SECTION 1
GENERAL DESCRIPTION

1-1. FEATURES

1. Hi-Fi Sound System

The revolutionary new Panasonic developed Hi-Fi sound recording system features two rotary audio heads arranged on the video head cylinder, while maintaining the conventional stationary audio head for compatibility with the standard VHS system. This new rotary audio head configuration increases the relative tape/head speed, thus making it possible to record a far greater amount of signal information on the tape.
In addition, the hi-fi sound system employs an FM conversion recording method, and the audio and video signal processing circuits are completely separate. The result of this innovative system is superb sound quality with a dynamic range of 80dB, flat frequency response from 20Hz to 20kHz and 0.005% wow and flutter.

2. Playback of Prerecorded Stereo Video Cassette Tapes

The new hi-fi audio system of this VTR allows playing back video tapes of concerts, etc. in stereo with the same outstanding sound quality, that you would get from a high-end audio cassette deck, but with the tremendous added advantage of beeing able to watch your favourite orchestra, singer or actor and actress in action in brilliant colours.

3. Use as a High-Quality Audio Cassette Recorder

The excellent audio quality, outstanding tape economy, continuous 4-hours recording capability, audio recording level control, FL audio level meters and convenient tape programme search system make this VTR ideal for use as a top-quality audio cassette recorder.

4. 14-day/8 Programme Timer

The built-in timer allows automatic absentee recording of up to 8 TV programmes within 14 days. It is also possible to record a programme which is broadcast at the same time every day or every week.

5. Tape Programme Search System

By pressing the Audio Rec Mute Button for at least 4 seconds at the beginning of every recording, this tape programme search system enables fast and automatic locating of the next start of a programme in forward or reverse direction. As soon as the beginning of the programme is found, playback will start immediately. Locating a desired programme or scanning through a whole tape to check the content is perfectly easy and fast.

6. Slim Design and Front Loading System

This highly functional design allows loading the video cassette from the front, thus minimizing the space required for the placement.

7. Multi-Function Display

Whenever an operation button is pressed, the activated function is immediately indicated on this easy-to-see display. It shows you at a glance, in what operation mode the VTR is.

8. One-Touch Timer Recording (OTR)

Simply by pressing the OTR Button between 2 and 5 times, the VTR can be programmed for 30, 60, 90 or 120 minutes of recording with immediate start.

9. Standby OTR Recording

By pressing the Standby Button between 1 and 4 times, the VTR can be programmed to begin recording in 30, 60, 90 or 120 minutes. By subsequently pressing the OTR Button repeatedly, a recording duration of 30, 60, 90 or 120 minutes can be selected for this delayed OTR recording.

Subject: Change of the System Control C.B.A. and Servo C.B.A.

Please use this manual together with the Service Manual for Model No. AG-6200/6100 and AG-6800
Order No. VRD-8309-484(AG-6200/6100-E/B/A/EN), VRD-8312-499(AG-6800-E/B/A/EN)

The System Control circuit board and Servo circuit board of Models AG-6200/6100/6800-E/B/A/EN have been modified to impove reliability.
The parts tentatively put on the foil side of the System Control and Servo circuit boards will be installed onto the component side. Since the early type C.B.A. is compatible with the new type C.B.A., the board numbers have not been changed.
However, following countermeasures have been introduced to the new System Control C.B.A. (VEP06190B1).

* When the Play Key is pressed immediately after the cassette tape is inserted, the tape may sub-load before cassette down is completed.
  To prevent this, the System Control Circuit has been changed as shown below.
