SPECIFICATIONS

AMPLIFIER SECTION

Continuous Power Output (DIN):	65 W + 65 W (4 ohms, 1 kHz)
Power Bandwidth (IHF):	10 Hz ~ 40 kHz (T.H.D. 0.15% both channels driven into 8 ohms)
Total Harmonic Distortion:	0.03% (-3 dB at rated output, 8 ohms)
Frequency Response:	PHONO RIAA Standard Curve (Recording Output) MM 20 Hz ~ 20 kHz ± 0.5 dB CD, VIDEO, 20 Hz ~ 50 kHz ± 1.5 dB TAPE (at 1 W)

Input Sensitivity and Impedance:

PHONO	MM	2.5 mV	47 kohms
CD, VIDEO,		150 mV	25 kohms

Maximum Input Level: (at 1 kHz)

PHONO MM 120 mV

Signal to Noise Ratio (IHF-A):
PHONO MM 78 dB (at 5.0 mV input)
CD, VIDEO,
TAPE 98 dB
Tone Controls:
BASS ± 10 dB at 100 Hz
TREBLE ± 10 dB at 10 kHz
Loudness Control Effect:
Variable Loudness at maximum position
50 Hz/10 kHz, +10 dB/+5 dB
TUNER SECTION

[FM] (note: μV at 75 ohms, 0 dBf = $1 \times 10^{-15} \text{ W}$)		
Receiving Range:	87.5 ~ 108 MHz	
Usable Sensitivity:	0.9 μV (10.3 dBf)	
Signal to Noise Ratio (IHF-A):	MONO 82 dB STEREO 78 dB	
Image Rejection:	65 dB	
Selectivity (± 300 kHz):	55 dB	

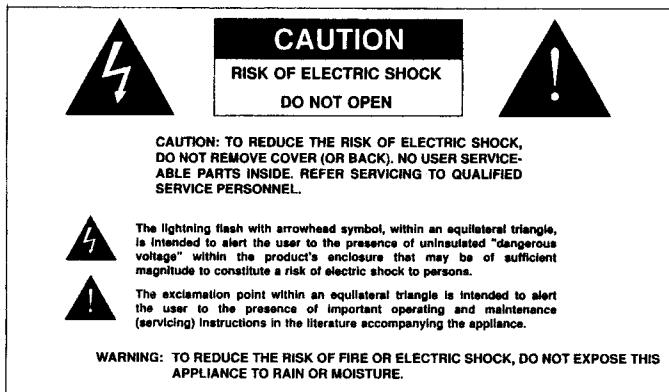

Frequency Response: 30 Hz ~ 15 kHz +0.2 dB -1.5 dB
Stereo Separation (at 1 kHz):

40 dB

[AM] Receiving Range: 522 ~ 1611 kHz**Usable Sensitivity:** 18 μV
Signal to Noise Ratio: 55 dB**General Power Supply:** AC 230 V 50 Hz**Power Consumption:** 125 W**Power Outlet:** SWITCHED 100 W
Dimensions: 434 mm (W) x 119 mm (H)
x 310 mm (D)**Weight:** 5.9 kg
REMOTE CONTROL UNIT

Remote control system: Infrared pulse system
Power supply: 3V DC Two size "AA" (R6)
 dry cell batteries
External dimensions: 60 mm (W) x 175 mm (H)
 x 18 mm (D)
Weight: 120 g (includes batteries)

Design and specifications are subject to change without prior notice.

PRECAUTIONS FOR INSTALLATION

Install DRA-385RD always horizontally. And leave at least 10 cm of space between the unit and other component placed above.

VORKEHRUNGEN FÜR DIE AUFSTELLUNG

Stellen Sie den DRA-385RD stets waagerecht auf. Achten Sie ebenfalls darauf, daß ein Mindestabstand von 10 cm zwischen dem Gerät und der Komponente, die darüber gestellt wird, eingehalten wird.

PRECAUTIONS D'INSTALLATION

Le DRA-385RD doit toujours être installé horizontalement. Laisser au moins un espace de 10 cm entre cet appareil et tout autre composant qui serait placé au-dessus.

PRECAUZIONI PER L'INSTALLAZIONE

Installare il DRA 385RD sempre in posizione orizzontale, avendo cura di lasciare almeno 10 cm fra l'unità ed altri componenti posti al di sopra.

PRECAUCIONES PARA LA INSTALACION

Instale siempre el DRA-385RD en posición horizontal. Asegúrese también de dejar un espacio de por lo menos 10 cm entre esta unidad y el componente que sea colocado encima.

VOORZORGSMATREGELEN VOOR INSTALLATIE

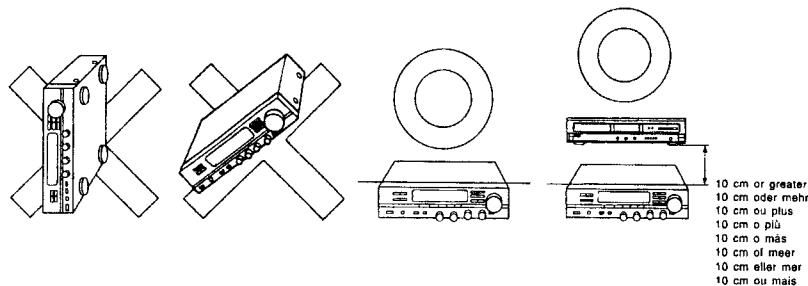

De DRA-385RD altijd horizontaal plaatsen. Laat ten minste 10 cm ruimte tussen dit apparaat en het andere component dat u erboven plaatst.

FÖRBEREDELSE FÖR INSTALLATION

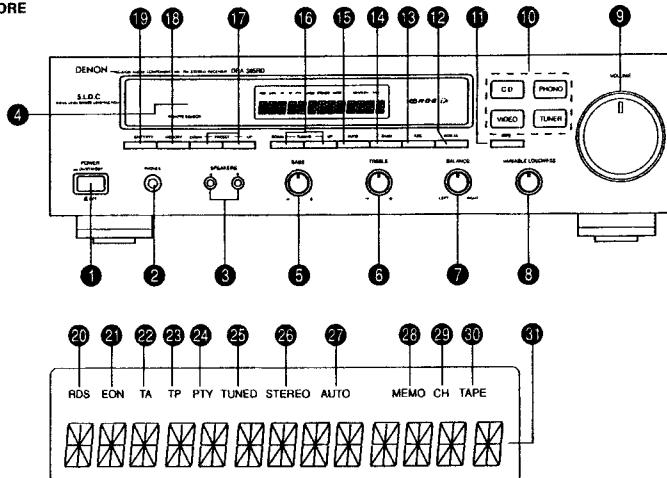

Installera alltid DRA-385RD horisontellt. Lämna åtminstone 10 cm mellan denna apparat och en annan komponent som placeras ovanpå.

PRECAUÇÕES DURANTE A INSTALAÇÃO

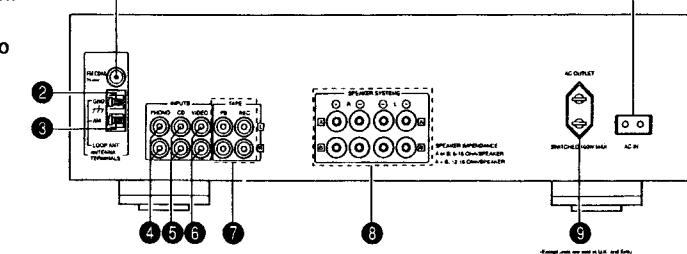

Instale sempre o DRA-385RD em posição horizontal. E deixe pelo menos 10 cm de espaço entre esta unidade e o outro componente colocado acima.

CONNECTIONS

REAR PANEL

- ① FM ANT (FM antenna terminals)**
75-ohm coaxial cable can be connected to this terminal. For antenna connecting procedure, see ANTENNA INSTALLATION.
- ② GND (Grounding terminal)**
The grounding wire of the turntable is connected here.
▪ Hum or noise may be generated if the grounding wire is not connected.
- ③ AM ANT (AM antenna terminals)**
Connect the attached AM loop antenna. (Refer to page 7 for connections).
Connect to this terminal when a medium wave outdoor antenna is used.
- ④ PHONO (Phono input terminals)**
The output cord of the turntable is connected here.
Since the input sensitivity of "PHONO" is extremely high, do not use the unit without the input pin cord. If used without this cord, the speakers may generate hum.

- ⑤ CD**
The output cord of the CD player is connected here.
- ⑥ VIDEO**
A VIDEO, such as a VCR or Video Disc may be connected here.
- ⑦ TAPE**
Tape decks can be connected for full use including playing or copying.
- ⑧ SPEAKER SYSTEMS (Speaker terminals)**
Two pairs of speakers A and B can be connected to these terminals.
- ⑨ AC OUTLET (AC power outlet)**
This AC outlet is controlled by the power switch.
(Except units are sold in U.K. and Eire)
- ⑩ AC Inlet**
Connect the included AC cord here.

SPEAKER CONNECTION

Confirm polarity (+, -) and left and right channels (L, R). Connect the speaker pairs to the SPEAKER terminals A or B on the back panel. Connections must be made with power cord disconnected.

Preparing the cord

1. Peel of the sheath.
2. Twist the wires.

Connecting the front speaker terminals

1. Loosen by turning counterclockwise.
2. Insert the cord and tighten by turning clockwise.

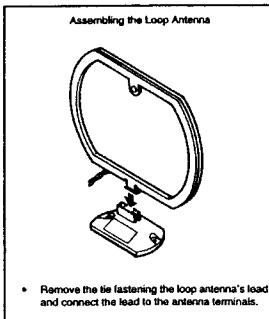

ANTENNA INSTALLATION

• FM ANTENNA

The supplied indoor FM antenna can be used inside wooden houses for receiving local FM stations and other strong FM signals. Stretch out the end of the antenna and mount the antenna on the wall or ceiling where optimum reception is achieved. An indoor FM antenna may not consistently ensure stable reception, due to environment changes. In such cases, the indoor FM antenna should only be used temporarily until an outdoor FM antenna has been installed.
When connecting an outdoor FM antenna, the use of 75 ohm coaxial cable (3C-2V, 6C-2V) is strongly recommended.

• AM ANTENNA

Attach the supplied AM loop antenna even when using an outdoor AM antenna.
Connect the leads to the AM and GND terminals.
Also use the AM terminals for connecting an outdoor AM antenna (when making such a connection do not disconnect the AM loop antenna).
Adjust the loop antenna to obtain optimum reception. Where broadcast stations are distant and only weak signals are received or where signals are blocked, it is best to install an outdoor AM antenna.

- Remove the tie fastening the loop antenna's lead and connect the lead to the antenna terminals.

Notes:

- Do not connect two FM antennas simultaneously.
- Even if an external AM antenna is used, do not disconnect the AM loop antenna.
- Make sure AM loop antenna lead terminals do not touch metal parts of the panel.

CAUTION

Protective Circuit

This set is equipped with a high speed protective circuit. This circuit protects the internal circuitry from damage due to large currents flowing when the speaker jacks are not completely connected or when an output is generated by a short circuit.
This protective circuit's operation cuts off the output to the speakers. In such a case, be sure to turn the power to the set off and check the connections to the speakers. Then turn the power on again. After muting for several seconds, the set will operate normally.

DESIGNATIONS AND FUNCTIONS OF PANEL CONTROLS (Refer to Page 3.)

FRONT PANEL

① POWER (Power ON-STANDBY/OFF Switch)

This switch turns the unit ON or OFF. There is a delay of approximately 3 seconds before the unit will operate after this power switch is turned ON. If the unit is turned OFF from the remote control, the unit will be in the STANDBY mode. When in the STANDBY mode, the unit can be turned ON with the power button on the remote control. If the unit will not be used for extended period, be sure to turn the unit OFF from the front panel power switch.

NOTE: This unit includes a STANDBY protection feature. This feature is designed to prevent accidental turn-on from the STANDBY mode in the event of a power failure. Should AC power be disconnected and then reconnected when the unit is in STANDBY mode, the unit will return the STANDBY mode.

To turn the unit ON from the STANDBY mode without the remote control, operate the front panel power switch four times. The unit will then operate normally.

② PHONES (Headphones jack)

Connect a pair of headphones (sold separately) to this jack for private listening.

③ SPEAKERS (Speaker selector switches)

These switches are used to select speaker system A and B. No sound is heard through the speakers when both switches are reset to the (▲) position.

④ REMOTE SENSOR (Remote control sensor)

This sensor receives the infra-red light transmitted from the wireless remote control unit.

For remote control, point the wireless remote control unit towards the sensor.

⑤ BASS (Bass control)

Use this control to adjust the low-range response. When the control is set to the center position, the frequency characteristic curve (below 1,000 Hz) is flat. Turn the control clockwise to increase the bass response and counterclockwise to decrease it.

⑥ TREBLE (Treble control)

Use this control to adjust the high-range response. When the control is set to the center position, the frequency characteristic curve (above 1,000 Hz) is flat. Turn the control clockwise to increase the treble response and counterclockwise to decrease it.

⑦ BALANCE (Balance control)

Use this control to balance the volume levels between left and right channels. The volume levels in both channels are equal when the control is set to the center position.

⑧ VARIABLE LOUDNESS (Loudness control)

At low volumes, the human ear is less sensitive to low (BASS) and high (TREBLE) frequencies. Use this control to compensate for this deficiency when listening at low volume levels. Turn this control counter-clockwise until a natural balance of bass and treble sound has been restored.

NOTES

- This receiver has a full back-up system. When the power is turned on, the INPUT SELECTOR buttons are set to the last mode set before the power was turned off.
- When using this receiver in close proximity to video equipment (TV, VCR, VDP, etc.) noise may be generated in AM broadcasts.

⑨ VOLUME (Volume control)

This knob is used to adjust the volume level of both channels. Turn the knob clockwise to raise the volume and counterclockwise to lower it.

⑩ INPUT selector (Input selector buttons)

- These buttons are used to select the audio input source.
- **PHONO:** Press to play a record on a record player connected to the PHONO input jacks.
 - **CD:** Press to listen to a compact disc player or another component connected to the CD input jacks.
 - **TUNER:** Press to listen to FM or AM programs.
 - **VIDEO:** Use when playing back the audio from a Hi-Fi video, video disc player or other component connected to the VIDEO terminal.

⑪ TAPE (Tape monitor button)

Press this button once, TAPE indicator will light up and then you can play tape source on the TAPE terminal. Press again the button currently accessed, to play sources selected by input selector ⑩. indicator goes out.

⑫ EON TA button

When a traffic announcement begins on a station in the same network as the station currently tuned in, that network station is automatically tuned in, and the previous station is tuned back in once the traffic announcement is over.

This button is used to turn this mode on and off. If the station switches from the current station to the network station when this mode is on but the network station cannot be received properly due to weak signals, the previous station is immediately tuned back in. (Refer to page 11.)

⑬ RDS (RDS button)

This button is used for the RDS search (refer to page 10) and PTY search (refer to page 10, 11) and TP search (refer to page 11) operations, and to input the station name (refer to page 10).

⑭ BAND (Band selector button)

Press this button to select the FM or AM (MW) band.

⑮ AUTO (Tuning mode button)

This switches between auto and manual tuning. Auto tuning: When the UP button is pressed, the radio is tuned automatically to a higher frequency. Press the DOWN button to tune to a lower frequency. Use this position to eliminate noise when no signals or weak signals are being received.

Manual tuning: In this position, the radio can be tuned manually. Reception is automatically monaural when in the manual mode.

⑯ TUNING (Tuning buttons)

Use these to change the received frequency to a higher frequency (UP) or a lower frequency (DOWN). When writing station names, use these buttons to select the letters. (Refer to Page 10.)

⑰ Preset (Preset station buttons)

These buttons are used for storing stations or recalling stations which have been preset. Using the SHIFT/PTY button you can preset a total of 40 FM or AM stations into preset channels.

Once a radio has been memorized, the same station can later be tuned in instantly simply by recalling the corresponding preset channel with PRESET UP or DOWN button.

DISPLAY

⑲ RDS Indicator

This lights when receiving RDS broadcasts, and flashes during the RDS search operation.

⑳ EON Indicator

This lights when receiving EON information.

㉑ TA Indicator

This lights when receiving traffic announcements.

㉒ TP Indicator

This flashes during the TP search operation and lights when TP stations are tuned in.

㉓ PTY Indicator

This flashes during the PTY (Programme Type) search operation.

㉔ TUNED Indicator

This lights when a station is properly tuned in.

㉕ STEREO Indicator

This lights when receiving stereo broadcasts. It remains off when receiving AM broadcasts.

USING THE VARIOUS FUNCTIONS

1. Using the auto preset memory function

This function automatically stores the FM stations which can be received in the area in which the set is being used in the preset memory. Use this function so that the RDS functions can be used more effectively. Also note that the channel memories can be changed at will even after the preset stations have been stored with this function.

Operation

1. Connect the FM antenna and set it so that FM stations can be received.
2. Press the POWER button to turn on the power while holding in the MEMORY button.
3. Searching begins automatically, and stations are stored in the preset memory in order, beginning from channel A1. (The operation automatically stops once 40 stations have been set in the memory.)

⑯ MEMORY (Memory button)

This switch is used to store the desired radio station to a memory.

⑰ SHIFT / PTY button

Use this button to select the memory blocks, A (1 to 8), B (1 to 8), C (1 to 8), D (1 to 8) or E (1 to 8).

For PTY search, use this button to select the program type. When writing station names, use this button to set the writing position.

㉗ AUTO Indicator

This indicates the tuning mode. It lights in the auto mode and remains off in the manual mode.

㉘ MEMO Indicator

This indicator lights for approximately 10 seconds when the MEMORY button has been pressed and a station can be stored on a PRESET CHANNEL button. This flashes continuously during the auto memory operation.

㉙ CH Indicator

This lights when the preset channel number and shift mode (A, B, C, D or E) are displayed.

㉚ TAPE Indicator

The TAPE indicator lights when the TAPE source is selected with the tape selector buttons.

㉛ Multi function display

This displays the frequency, station name, program type, etc.

2. Storing new stations at the preset channels

The reception frequency, RDS service information, Tuning mode and input characters can be stored at the different channel memories. When this operation is performed, the station already stored in that channel memory using the auto preset memory function is cleared.

Operation

1. Press the MEMORY button (The MEMO Indicator flashes.)
2. Use the SHIFT/PTY button to select the block, A to E.
3. Use the PRESET UP or DOWN button to select the channel at which the station is to be stored.
4. Press the MEMORY button again to store the station in the memory.

3. Recalling preset channels

Use the following operation to recall preset channels:

Operation

1. Use the SHIFT/PTY button to select the block, A to E.
2. Use the PRESET UP or DOWN button to recall the station stored in the memory.
- If the PRESET UP or DOWN buttons are pressed without pressing the SHIFT/PTY button, the stations are recalled in the order A1 to A8, B1 to B8, and so on through E8.

4. Inputting characters

Any characters can be input (up to 8 characters).
The input characters can be stored at the preset channels.

Operation

1. Press the RDS button ● four times.
(The cursor flashes at the first place.)

2. Use the TUNING UP or DOWN button ● to select the character for the first place.
(The selected character flashes.)

Table of characters

The characters are input in the order shown to the right. Use the TUNING buttons ● to select the desired characters.

→	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
→	0	1	2	3	4	5	6	7	8	9	C	\	%	/	<	>	*	+	-	=	SPACE					

Using the RDS functions (for FM only)

1. RDS search

Use this to automatically search and stop at stations offering RDS services.

Operation

1. Press the RDS button ● once.

2. Press the PRESET UP or DOWN button ●.
(Searching begins.)

3. Searching begins again if the PRESET UP or DOWN button ● is pressed while the RDS indicator is flashing.

4. If no other RDS station is found when all the frequencies are searched, "NO RDS" is displayed.

3. Press the SHIFT/PTY button ● to move the cursor to the next place.
(The cursor flashes at the second place.)

4. Repeat steps 2 and 3 above to input up to 8 characters.

5. The characters are set five seconds after the input procedure is finished. The input characters can be stored in the memory.
To keep the input characters, be sure to store them in a channel memory.

6. Clearing characters

1. Recall the character you want to clear.
2. Press the RDS button ● 4 times until the character at the first place flashes.
3. Then press the SHIFT/PTY button ● for at least 2 seconds. The current character will then be cleared.

4. Searching begins again if the PRESET UP or DOWN button ● is pressed while the PTY indicator is flashing.

5. If no other station broadcasting the designated programme type is found when all the frequencies are searched, "NO PROGRAMME" is displayed.

List of PTY (Programme Type) displays:

1. NEWS	9. VARIOUS
2. AFFAIRS	10. POP MUSIC
3. INFORMATION	11. ROCK MUSIC
4. SPORT	12. M.O.R. MUSIC
5. EDUCATION	13. L-CLASSICS (Light classics)
6. DRAMA	14. S-CLASSICS (Serious classics)
7. CULTURE	15. OTHER MUSIC
8. SCIENCE	31. ALARM

NOTE: ALARM cannot be selected during the PTY search operation.

3. TP Search

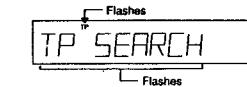

Use this to automatically search and stop at stations which broadcast traffic announcements (even if the station is not currently broadcasting a traffic announcement).

Operation

1. Press the RDS button ● three times.

2. Press the PRESET UP or DOWN button ●.
(Searching begins.)

3. Searching begins again if the PRESET UP or DOWN button ● is pressed while the TP indicator is flashing.

4. If no other TP station is found when all the frequencies are searched, "NO PROGRAMME" is displayed.

4. EON TA

When an RDS station is broadcasting RDS information on other stations within the same network and a traffic announcement begins on another station in the same network based on this information (EON = Enhanced Other Network), that network station is automatically tuned in. The previous station is tuned back in once the traffic announcement is over.

Operation

1. Press the EON TA button ●.
(The EON TA indicator lights.)

(STATION A)

(STATION B)

(STATION A)

RDS Emergency Alarm

"ALARM" will flash on the display when the unit receives the Emergency Programme Type Code (PTY31) from an RDS station. This feature may not operate properly if the signal from the RDS station is too weak or is subjected to interference. It is not possible to select the "ALARM" display from the PTY search mode.

NOTE:

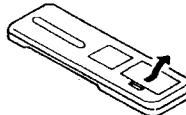

1. Be sure to turn the EONTA mode off when recording programmes.
2. In the EON TA mode, if the station is switched from the current station to another station in the network but the signals of that network station are weak and it cannot be tuned in properly, "WEAK SIGNAL" is displayed and the original station is immediately tuned back in.
3. In the EON TA mode, the station does not switch to another station in the network if the current station is broadcasting a traffic announcement.
4. Since the RDS services offered differ from station to station, some RDS functions may not operate for some stations, but this is not a malfunction.

PLAYBACK USING THE REMOTE CONTROL

The accessory RC-174 remote control unit is used to control the RECEIVER from a distance.

(1) Inserting the dry cell batteries

1. Remove the rear cover on the remote control unit.

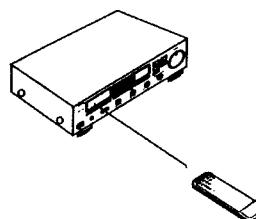

2. Insert two size "AA" (R6) dry cell batteries as shown in the diagram on the battery supply unit.

3. Replace the rear cover.

(2) Directions for use

Notes on Use of the Batteries

- The remote control unit uses size "AA" (R6) dry cell batteries.
- The batteries will need to be replaced approximately once a year. This will depend upon how often the remote control is used.
- If, in less than a year from the time new batteries were inserted, the remote control fails to operate the receiver from a near-by position, it is time to replace the batteries.
- Insert the batteries properly, following the diagram on the remote control battery supply unit, and making sure to align the plus and minus sides of each battery.
- Batteries are prone to damage and leakage. Therefore:
 - Do not combine new batteries with used ones.
 - Do not combine different types of batteries.
 - Do not jumper the opposite poles of the batteries, expose them to heat or break them open, or put them into open fire.
- When the remote control is not to be used for a long period of time, remove the batteries from the unit.
- If the batteries have leaked, remove any battery fluid from the inside of the battery supply unit by wiping it out thoroughly and insert new batteries.

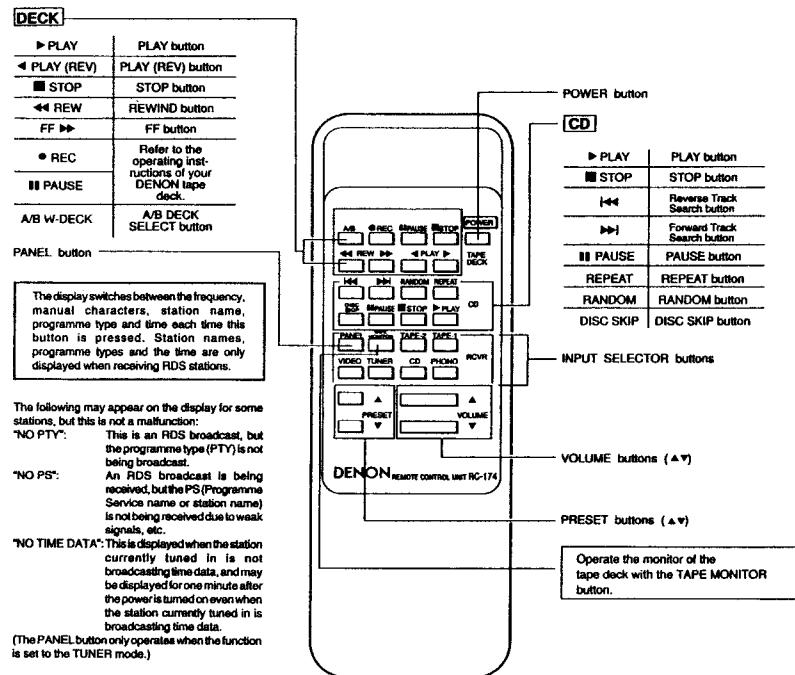

Besides being able to operate the DRA-385RD receiver with this remote control unit, you can also operate a DENON cassette deck and CD player from this handy full-system remote control unit.

Remote Control Section

Full-system Remote Control Unit

The full-system remote control unit operates all major functions of the receiver such as function switching, volume control, and preset station selection. But that's not all! The same control pad can also control the major functions of a DENON CD player and cassette deck to create a remarkably ergonomic and versatile DENON system with all the quality sound reproduction that the devoted audiophile expects.

Remote Control Unit RC-174 supplied with DRA-385RD

The following may appear on the display for some stations, but this is not a malfunction:

"NO PTY": This is an RDS broadcast, but the programme type (PTY) is not being broadcast.

"NO PS": An RDS broadcast is being received, but the PS (Programme Service name or station name) is not being received due to weak signals, etc.

"NO TIME DATA": This is displayed when the station currently tuned in is not broadcasting time data, and may be displayed for one minute after the power is turned on even when the station currently tuned in is broadcasting time data.
(The PANEL button only operates when the function is set to the TUNER mode.)

- The RC-174 Remote Control Unit can control CD players and cassette decks made by DENON.
- Note the operation may not be possible for some models.

Buttons are conveniently separated into groups, each group controlling one specific component. The groups are RECEIVER; CD and DECK.

For details on operating other components, refer to the instruction manuals for the CD player and/or cassette deck.

CAUTION:

- If the power is turned off with the remote control unit, the receiver is switched to the power stand-by state. If you are to be absent for a long period of time, be sure to turn the power off using the POWER switch on the receiver.
- A part of 1st digit of fluorescent display light while the receiver is in the power stand-by state.
- You may experience erratic operation of the remote control unit if it is operated in fluorescent light and direct sunlight, in particular if this light strikes the remote control sensor on the receiver. However, this is not a malfunction, and if this should happen, protect the sensor against such light.

Note on Operation:

- Do not press the operating buttons on the receiver and the remote control unit at the same time. This will cause misoperation.
- Operation of the remote control unit will become less effective or erratic if the infrared remote control sensor on the receiver is exposed to strong light or if there are obstructions between the remote control unit and the sensor.
- In case you operate your VCR, TV or other components by remote control, do not operate buttons on two different remote control units at the same time. This will cause misoperation.

TROUBLESHOOTING

1. Have all connections been made PROPERLY?
2. Have you followed all operational instructions correctly?
3. Check speaker and the turntable systems for proper operation.

When your unit does not seem to be operating correctly, first check the items in the following table. If the symptom does not correspond to any of the problems as shown below, turn off the power sources immediately and contact your DENON dealer.

Problem	Cause	Remedy
FM AND AM RECEPTION		
Radio program can not be received.	<ul style="list-style-type: none"> • Antenna connection is wrong. • A signal strength is weak. 	<ul style="list-style-type: none"> • Check the connection. • Check the antenna installation.
Noise is reproduced.	<ul style="list-style-type: none"> • A signal strength is weak. • Automobile ignition noise interferes with reception. • Other electrical equipment interferes with reception. 	<ul style="list-style-type: none"> • Install an outdoor antenna. • Keep the antenna away from the street. • Keep the equipment away from this set, or turn off the power of the other equipment.
The preset frequencies are erased.	<ul style="list-style-type: none"> • The memory back-up term (about 1 month) passed. 	<ul style="list-style-type: none"> • Preset again.
In automatic tuning, the frequency doesn't stop at the radio station.	<ul style="list-style-type: none"> • A signal strength is weak. 	<ul style="list-style-type: none"> • Use manual tuning.
In automatic tuning, it stops at the one step lower or higher frequency than the radio station.	<ul style="list-style-type: none"> • Noise or strong signal strength is received. 	<ul style="list-style-type: none"> • Use manual tuning for optimum reception.
PLAYBACK OF THE AUDIO EQUIPMENTS		
No sound is produced with power on.	<ul style="list-style-type: none"> • Input and speaker cords connection are wrong. • Speaker switch is off. • The INPUT SELECTOR buttons are in wrong position. • The protective circuit is operating. • The fuse has blown out. 	<ul style="list-style-type: none"> • Check the connection. • Turn on speaker switch. • Check these position. • Turn the power off once, check the connections to the speakers, then turn the power on again. • Ask your dealer, or the nearest DENON representative.
Audible hum when playing records.	<ul style="list-style-type: none"> • The input and grounding cords connection of the turntable are wrong. • The cords connection of the cartridge are wrong. • The interference from the nearby TV or radio transmission antenna. 	<ul style="list-style-type: none"> • Check the connection. • Check the connection. • Ask your dealer, or the nearest DENON representative.
Howling is produced when the volume control is turned up too high while playing records.	<ul style="list-style-type: none"> • The vibrations and sounds transmit from the speakers to the turntable. 	<ul style="list-style-type: none"> • Insulate the vibrations, or keep the speakers away from the turntable.
Cracking noise is produced when playing records.	<ul style="list-style-type: none"> • The record is stained with dust. • The stylus tip of the cartridge is stained with the dust. • The cartridge is defective. 	<ul style="list-style-type: none"> • Clean the record. • Clean the stylus tip. • Try the other cartridge.

SPECIFICATIONS

AMPLIFIER SECTION			TUNER SECTION		
Continuous Power Output (DIN):	65 W + 65 W (4 ohms, 1 kHz)		[FM] (note: μV at 75 ohms, $0 \text{ dBf} = 1 \times 10^{-14} \text{ W}$)	Receiving Range:	87.5 - 108 MHz

			Weight:	5.9 kg	
REMOTE CONTROL UNIT			RC-174		
Remote control system:			Infrared pulse system		
Power supply:			3V DC Two size "AA" (R6)		
External dimensions:			dry cell batteries		
Weight:			60 mm (W) x 175 mm (H) x 18 mm (D)		
			120 g (includes batteries)		

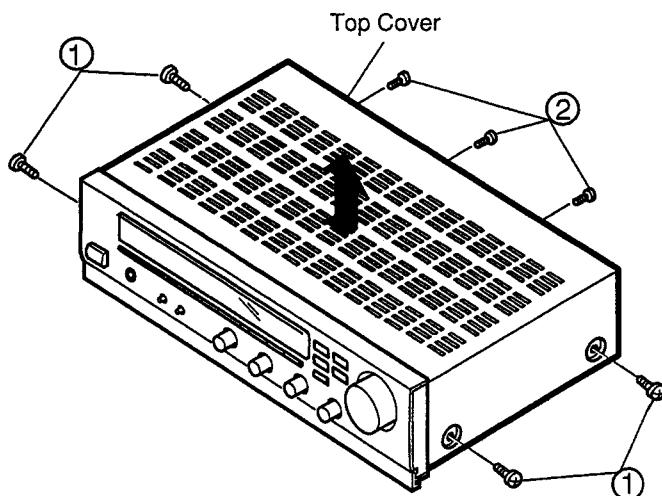

Design and specifications are subject to change without prior notice.

DISASSEMBLY

(To reassemble reverse disassembly)

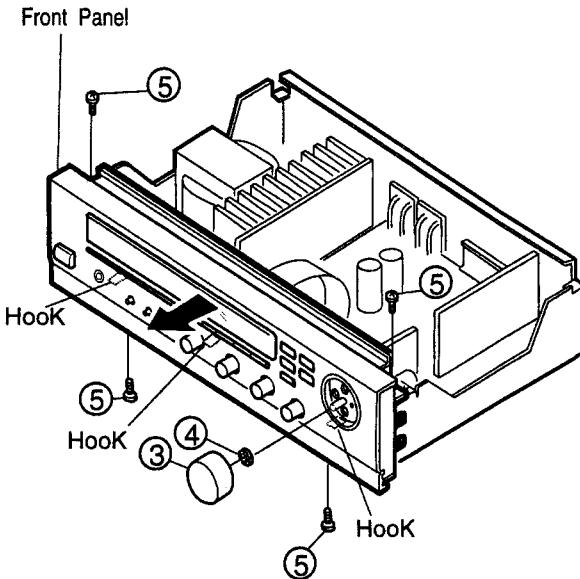

1. Top Cover

- (1) Remove 4 screws ①.
- (2) Remove 2 screws ②.

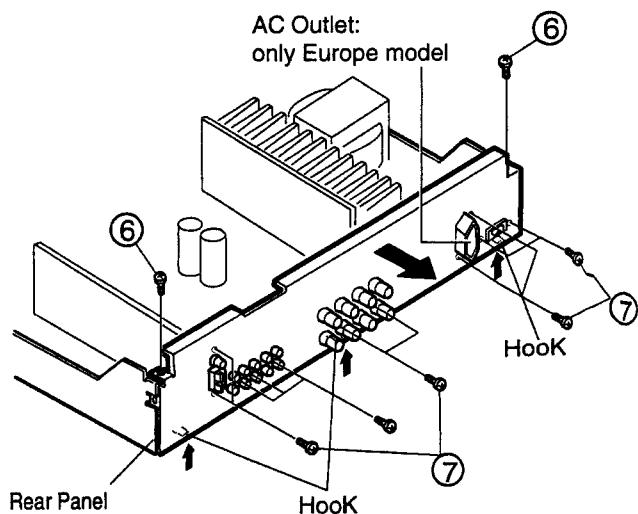

2. Front Panel

- (1) Pull out Volume knob ③.
- (2) Remove nut ④.
- (3) Remove 5 screws ⑤ and undo hooks at 2 places.

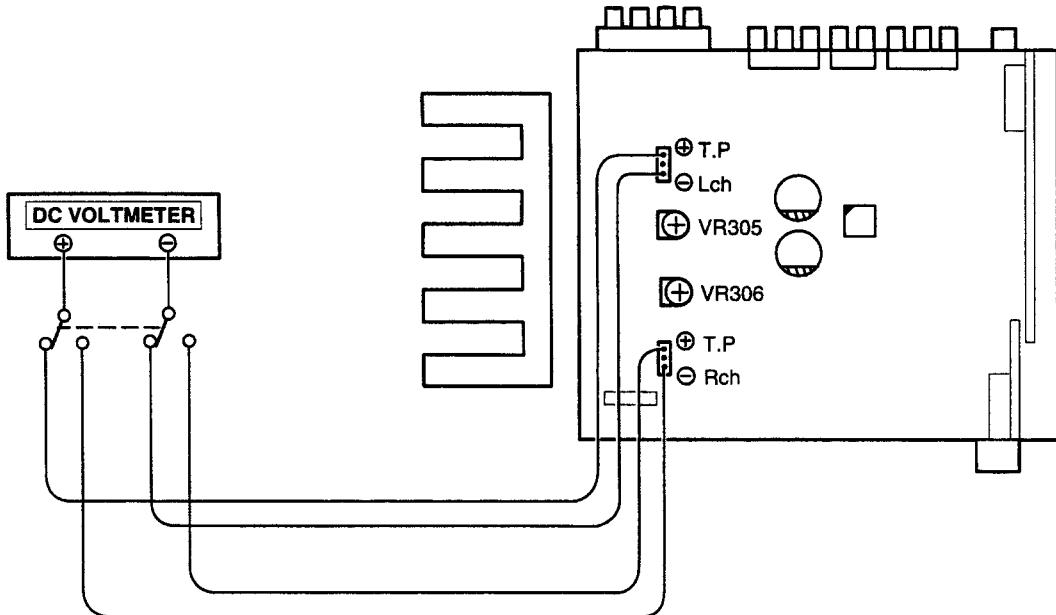

3. Rear Panel

- (1) Remove 2 screws ⑥ and 11 fixing screws ⑦.
- (2) Remove hooks at 3 places in arrow direction.

METHOD OF ADJUSTMENTS

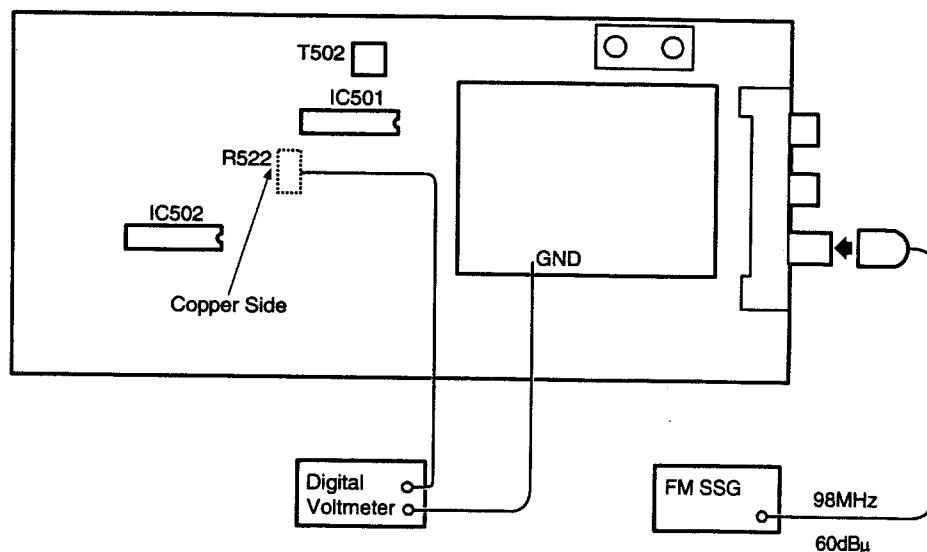

IDLING CURRENT

- (1) Set controls as follows.
 - POWER Switch → off (■)
 - VOLUME Control → 0 (min.)
 - SPEAKERS → off (■)
 - Temperature → 15°C ~ 30°C (59°F ~ 86°F)
 - VR305 and VR306 of the 1U-2817-1 (Main Unit) → MIN. (○)
- (2) Connect DC Voltmeter to the T.P Lch and T.P Rch of the 1U-2817-1.
- (3) Turn the Power Switch on and rotate VR305 clockwise so that the DC Voltmeter reads 2.5 mV ±0.2 mV DC at the T.P Lch. Follow the same procedure to VR306 for T.P Rch.
- (4) Warm up for three minutes, then readjust VR305 and VR306 so that the DC Voltmeter reads 2.5 mV ±0.5 mV DC.
- (5) Warm up for 10 minutes, then readjust VR305 and VR306 so that the DC Voltmeter reads 2.5 mV ±0.5 mV DC.

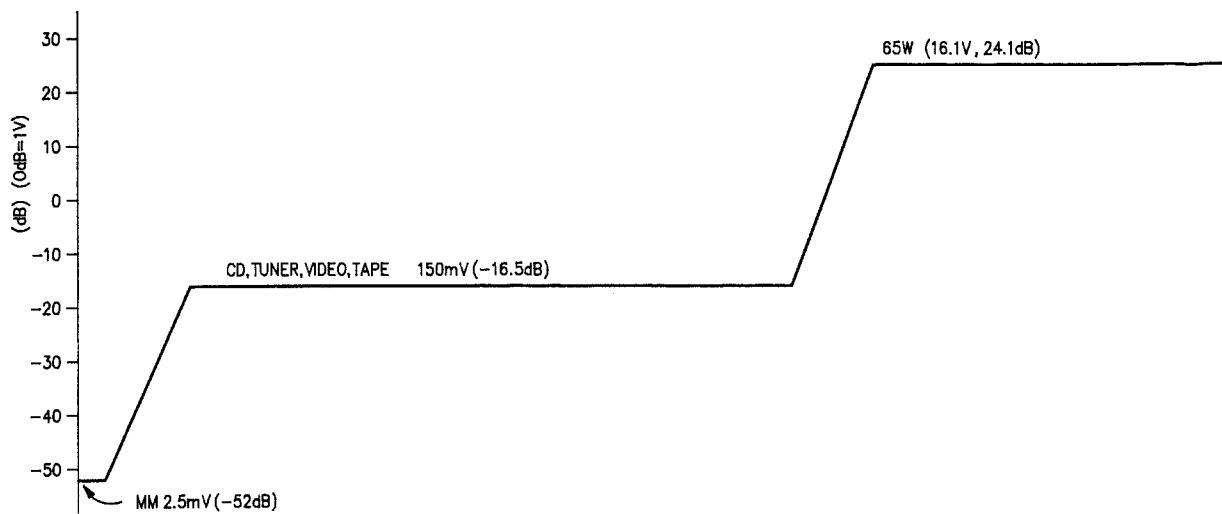

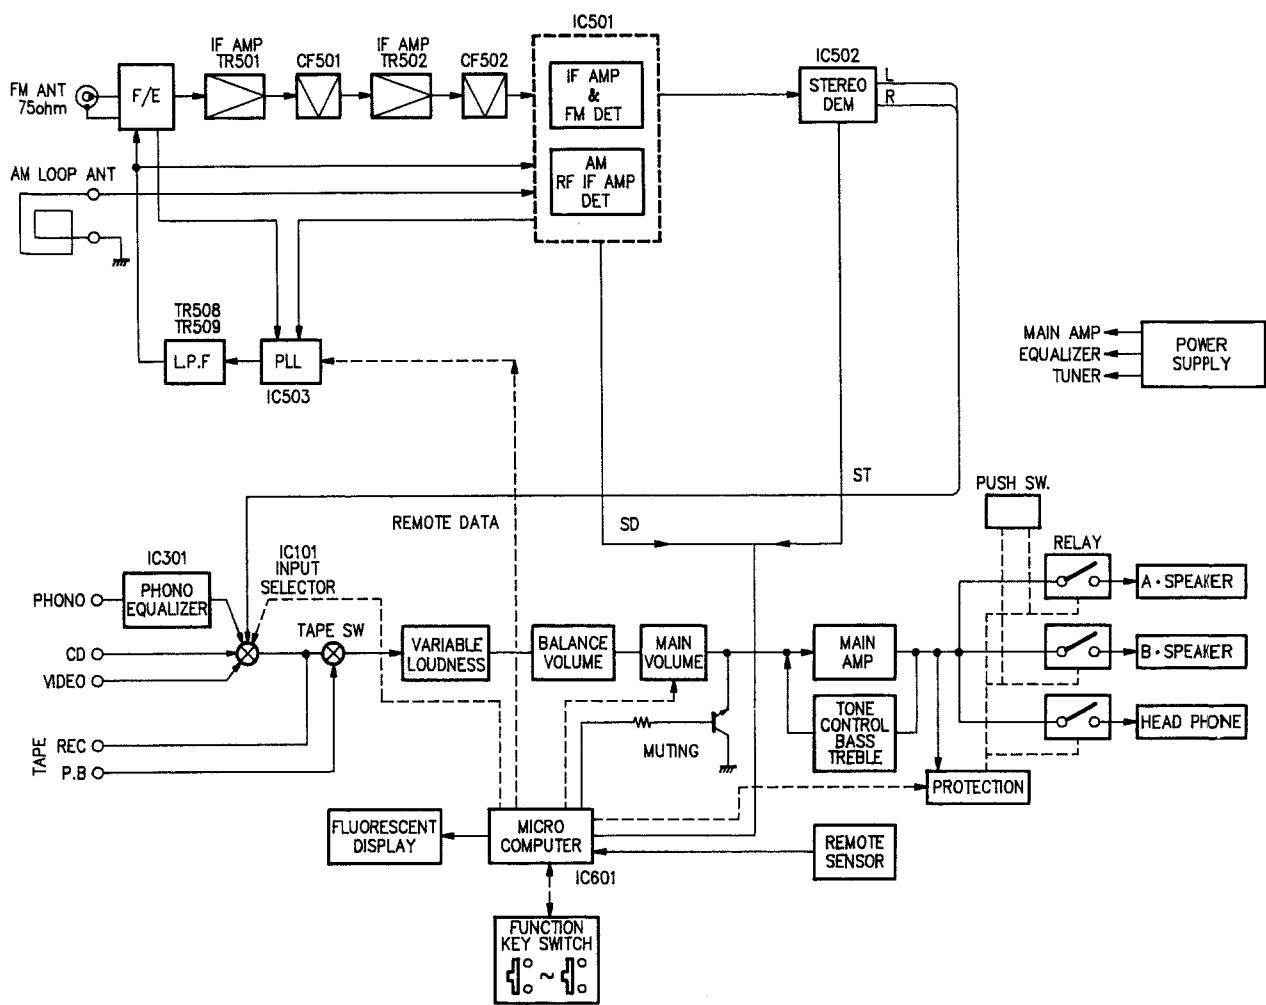

CONNECTION DIAGRAM OF MEASURING INSTRUMENTS

● FM SECTION

Adjust T502, Potential difference across R522 should be within 50mV.

BLOCK/LEVEL DIAGRAM

NOTE FOR PARTS LIST

- Part indicated with the mark "◎" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film ±5%, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

WARNING:

Parts marked with this symbol  have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

• Resistors

Ex.: RN	14K	2E	182	G	FR
Type	Shape and performance	Power	Resistance	Allowable error	Others
RD : Carbon	2B : 1/8W	F : ±1%	P : Pulse-resistant type		
RC : Composition	2E : 1/4W	G : ±2%	NL : Low noise type		
RS : Metal oxide film	2H : 1/2W	J : ±5%	NB : Non-burning type		
RW : Winding	3A : 1W	K : ±10%	FR : Fuse-resistor		
RN : Metal film	3D : 2W	M : ±20%	F : Lead wire forming		
RK : Metal mixture	3F : 3W				
	3H : 5W				

*** Resistance**

 ⇒ 1800 ohm = 1.8 kohm
 Indicates number of zeros after effective number.
 2-digit effective number.

• Units: ohm

 ⇒ 1.2 ohm
 1-digit effective number.
 2-digit effective number, decimal point indicated by R.

• Units: ohm

• Capacitors

Ex.: CE	04W	1H	2R2	M	BP
Type	Shape and per- formance	Dielectric	Capacity	Allowable error	Others
CE : Aluminum foil electrolytic	0J : 6.3V	F : ±1%	HS : High stability type		
CA : Aluminum solid electrolytic	1A : 10V	G : ±2%	BP : Non-polar type		
CS : Tantalum electrolytic	1C : 16V	J : ±5%	HR : Ripple-resistant type		
CO : Film	1E : 25V	K : ±10%	DL : For charge and discharge		
CK : Ceramic	1V : 35V	M : ±20%	HF : For assuring high frequency		
CC : Ceramic	1H : 50V	Z : +80%	U : UL part		
CP : Oil	2A : 100V	-20%	C : CSA part		
CM : Mica	2B : 125V	P : +100%	W : UL-CSA type		
CF : Metallized	2C : 160V	-0%	F : Lead wire forming		
CH : Metallized	2D : 200V	C : ±0.25pF			
	2E : 250V	D : ±0.5pF			
	2H : 500V	= : Others			
	2J : 630V				

*** Capacity (electrolyte only)**

 ⇒ 2200μF
 Indicates number of zeros after effective number.
 2-digit effective number.

• Units: μF

 ⇒ 2.2μF
 1-digit effective number.
 2-digit effective number, decimal point indicated by R.

• Units: μF

 ⇒ 2200pF = 0.0022μF
 (More than 2) — Indicates number of zeros after effective number.
 2-digit effective number.

• Units: pF

 ⇒ 220pF
 (0 or 1) — Indicates number of zeros after effective number.
 2-digit effective number.

• When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

WARNING:
Parts marked with this symbol Use ONLY replacement parts recommended.

CAUTION:
Before returning the unit to the customer, (1) a current check or (2) a line to chassis check must be made. If the current exceeds 0.5 millamps, or if the resistance of the line to chassis is less than 240 kohms, the unit must not be returned.

WARNING:
DO NOT return the unit to the customer.

NOTES:
Circuit and parts are subject to change.
