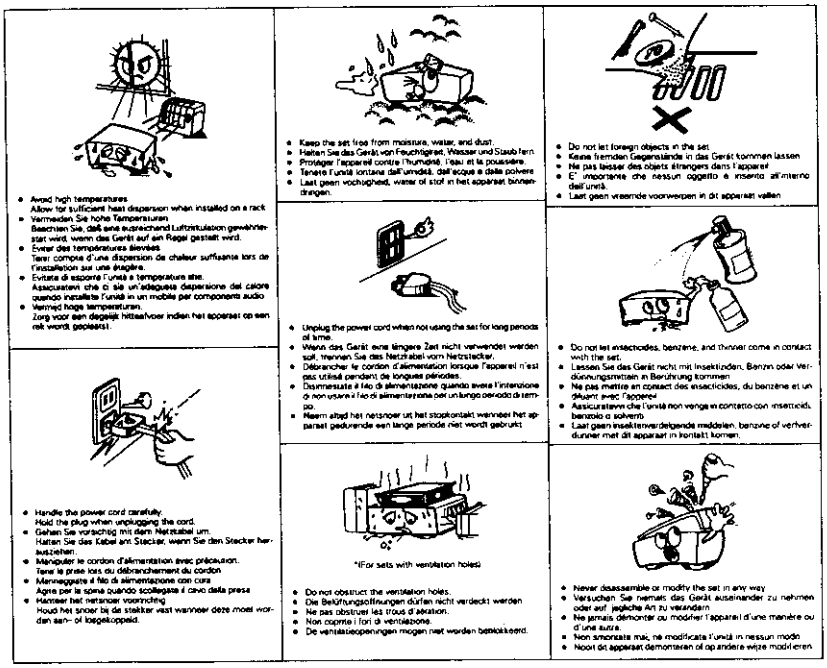
● Some illustration using in this service manual is slightly different from the actual set.

NIPPON COLUMBIA CO., LTD.

OPERATING INSTRUCTIONS

(Contents of operation are in regard to DMD-1300 Europe Model.)

NOTE ON USE / HINWEISE ZUM GEBRAUCH / OBSERVATIONS RELATIVES A L'UTILISATION
NOTE SULL'USO /ALVORENS TE GEBRUIKEN



- Avoid high temperatures
  Allow for sufficient heat dispersion when installed on a rack
- Vermeiden Sie hohe Temperaturen
  Beachten Sie, daß eine ausreichend Luftzirkulation gewährleistet wird, wenn das Gerät auf ein Regal gestellt wird.
- Eviter des températures élevées
  Tenir compte d'une dispersion de chaleur suffisante lors de l'installation sur une étagère.
- Evitare di esporre l'unità a temperature alte.
  Assicurateviche ci sia un'adeguata dispersione del calore quando installate l'unità in un mobile per componenti audio
- Vermijd hoge temperaturen.
  Zorg voor een degelijk hittaafvoer indien het apparaat op een rek wordt geplaatst.

- Handle the power cord carefully.
  Hold the plug when unplugging the cord.
- Gehen Sie vorsichtig mit dem Netzkabel um.
  Halten Sie das Kabel am Stecker, wenn Sie den Stecker herausziehen
- Manipuler le cordon d'alimentation avec précaution.
  Tenir la prise lors du débranchement du cordon
- Maneggiate il filo di alimentazione con cura.
  Agire per la spina quando scollegate il cavo dalla presa
- Hanteer het netsnoer voorzichtig.
  Houd het snoer bij de stekker vast wanneer deze moet worden aan- of losgekoppeld.

- Keep the set free from moisture, water, and dust.
- Halten Sie das Gerät von Feuchtigkeit, Wasser und Staub fern
- Protéger l'appareil contre l'humidité, l'eau et la poussière.
- Tenere l'unità lontana dall'umidità, dall'acqua e dalla polvere
- Laat geen vochtigheid, water of stof in het apparaat binnendringen.

- Unplug the power cord when not using the set for long periods of time.
- Wenn das Gerät eine längere Zeit nicht verwendet werden soll, trennen Sie das Netzkabel vom Netzstecker.
- Débrancher le cordon d'alimentation lorsque l'appareil n'est pas utilisé pendant de longues périodes.
- Disinnestate il filo di alimentazione quando avete l'intenzione di non usare il/lo strumento/una per un lungo periodo di tempo.
- Neem altijd het netsnoer uit het stopkontakt wanneer het apparaat gedurende een lange periode niet wordt gebruikt

*(For sets with ventilation holes)

- Do not obstruct the ventilation holes.
- Die Belüftungsöffnungen dürfen nicht verdeckt werden
- Ne pas obstruer les trous d'aération.
- Non coprire i fori di ventilazione.
- De ventilatieopeningen mogen niet worden bedekkeerd.

- Do not let foreign objects in the set.
- Keine fremden Gegenstände in das Gerät kommen lassen
- Ne pas laisser des objets étrangers dans l'appareil
- E' importante che nessun oggetto e inserito all'interno dell'unità.
- Laat geen vreemde voorwerpen in dit apparaat vallen

- Do not let insecticides, benzene, and thinner come in contact with the set.
- Lassen Sie das Gerät nicht mit Insektiziden, Benzin oder Verdünnungsmitteln in Berührung kommen
- Ne pas mettre en contact des insecticides, du benzène et un diluant avec l'appareil
- Assicuratevi che l'unità non venga in contatto con insetticidi, benzolo o solventi
- Laat geen insektenverdelgende middelen, benzine of verfverdunner met dit apparaat in kontakt komen.

- Never disassemble or modify the set in any way
- Versuchen Sie niemals das Gerät auseinander zu nehmen oder auf jegliche Art zu verändern
- Ne jamais démonter ou modifier l'appareil d'une manière ou d'une autre.
- Non smontate mai, né modificate l'unità in nessun modo
- Noort dit apparaat demonteren of op andere wijze modificeren

- **DECLARATION OF CONFORMITY**
  We declare under our sole responsibility that this product, to which this declaration relates, is in conformity with the following standards: EN60065, EN55013, EN55020, EN60555-2 and EN60555-3.
  Following the provisions of 73/23/EEC, 89/336/EEC and 93/68/EEC Directive.

- **ÜBEREINSTIMMUNGSERKLÄRUNG**
  Wir erklären unter unserer Verantwortung, daß dieses Produkt, auf das sich diese Erklärung bezieht, den folgenden Standards entspricht:
  EN60065, EN55013, EN55020, EN60555-2 und EN60555-3
  Entspricht den Verordnungen der Direktive 73/23/EEC, 89/336/EEC und 93/68/EEC.

- **DECLARATION DE CONFORMITE**
  Nous déclarons sous notre seule responsabilité que l'appareil auquel se réfère cette déclaration, est conforme aux standards suivants:
  EN60065, EN55013, EN55020, EN60555-2 et EN60555-3.
  D'après les dispositions de la Directive 73/23/EEC, 89/336/EEC et 93/68/EEC.

- **DICHIARAZIONE DI CONFORMITÀ**
  Dichiariamo con piena responsabilità che questo prodotto, al quale la nostra dichiarazione si riferisce, è conforme alle seguenti normative:
  EN60065, EN55013, EN55020, EN60555-2 e EN60555-3
  In conformità con le condizioni delle direttive 73/23/EEC, 89/336/EEC e 93/68/EEC
  QUESTO PRODOTTO E' CONFORME
  AL D.M. 28/08/95 N. 548

- **EENVORMIGHEIDSVERKLARING**
  Wij verklaren uitsluitend op onze verantwoordelijkheid dat dit product, waarop deze verklaring betrekking heeft, in overeenstemming is met de volgende normen:
  EN60065, EN55013, EN55020, EN60555-2 en EN60555-3
  Volgens de bepalingen van de Richtlijnen 73/23/EEC, 89/336/EEC en 93/68/EEC

CLASS 1 LASER PRODUCT
LUOKAN 1 LASERLAITE
KLASS 1 LASERAPPARAT

"CLASS 1
LASER PRODUCT"

"SERIAL NO. _____
PLEASE RECORD UNIT SERIAL NUMBER ATTACHED TO THE REAR OF THE CABINET FOR FUTURE REFERENCE"

<DMD-1300 U.S.A. Model only>

NOTE:
This MiniDisc recorder uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 5°C (41°F) ~ 35°C (95°F).

LABELS (for U.S.A. model only)

CERTIFICATION
THIS PRODUCT COMPLIES WITH DHHS RULES 21 CFR SUBCHAPTER J APPLICABLE AT DATE OF MANUFACTURE.

CAUTION:
USE OF CONTROLS OR ADJUSTMENTS OR REFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

THE COMPACT DISC PLAYER SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT PROPERLY QUALIFIED SERVICE PERSONNEL.

NOTE:
This unit may cause interference to radio and television reception if you do not operate it in strict accordance with this OPERATING INSTRUCTIONS.

This unit complies with Class B computing device rules in accordance with the specifications in Sub-part J or Part 15 of the FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. If the unit does cause interference to any radio or television reception, try to reduce it by one or more of the following means:

a) Turn the other unit to improve reception
b) Move this unit
c) Move this unit away from others
d) Plug this unit respectively into a different AC outlet

- **This is note in accordance with Section 15.838 of the FCC Rules.**

CAUTION
RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

- **FOR U.S.A. & CANADA MODEL ONLY**

CAUTION
TO PREVENT ELECTRIC SHOCK DO NOT USE THIS POLARIZED PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

- **POUR LES MODELES AMERICAINS ET CANADIENS UNIQUEMENT**

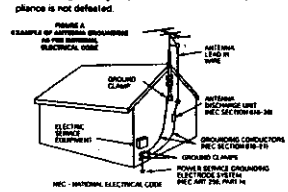
ATTENTION
POUR PREVENIR LES CHOCS ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT, SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT.

SAFETY INSTRUCTIONS

1. Read Instructions – All the safety and operating instructions should be read before the appliance is operated.
2. Retain Instructions – The safety and operating instructions should be retained for future reference.
3. Head Warnings – All warnings on the appliance and in the operating instructions should be adhered to.
4. Follow Instructions – All operating and use instructions should be followed.
5. Water and Moisture – The appliance should not be used near water – for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.
6. Carts and Stands – The appliance should be used only with a cart or stand that is recommended by the manufacturer.

6A. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn

7. Wall or Ceiling Mounting – The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
8. Ventilation – The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
9. Heat – The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
10. Power Sources – The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.
11. Grounding or Polarization – Precautions should be taken so that the grounding or polarization means of an appliance is not defeated.



12. Power-Cord Protection – Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance
14. Cleaning – The appliance should be cleaned only as recommended by the manufacturer.
15. Power Lines – An outdoor antenna should be located away from power lines.
16. Outdoor Antenna Grounding – If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna-discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
17. Nonuse Periods – The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
18. Object and Liquid Entry – Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.
19. Damage Requiring Service – The appliance should be serviced by qualified service personnel when:
    A. The power-supply cord or the plug has been damaged; or
    B. Objects have fallen, or liquid has been spilled into the appliance; or
    C. The appliance has been exposed to rain; or
    D. The appliance does not appear to operate normally or exhibits a marked change in performance; or
    E. The appliance has been dropped, or the enclosure damaged.
20. Servicing – The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

IMPORTANT TO SAFETY

WARNING:
TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION:

1. **Handle the power supply cord carefully**
   Do not damage or deform the power supply cord. If it is damaged or deformed, it may cause electric shock or malfunction when used. When removing from wall outlet, be sure to remove by holding the plug attachment and not by pulling the cord.
2. **Do not open the top cover**
   In order to prevent electric shock, do not open the top cover.
   If problems occur, contact your DENON DEALER.
3. **Do not place anything inside**
   Do not place metal objects or spill liquid inside the MiniDisc recorder.
   Electric shock or malfunction may result.

Please, record and retain the Model name and serial number of your set shown on the rating label.

Model No. DMD-1300 Serial No._____

NOTE:
This MiniDisc recorder uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 10°C (50°F) – 35°C (95°F).

- **Place of Installation**
  To ensure sufficient ventilation, leave a space of at least 10 cm between the front, sides and back of the unit and walls or other objects which may obstruct ventilation.

CAUTION:
USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

THE MINIDISC RECORDER SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT PROPERLY QUALIFIED SERVICE PERSONNEL.

Thank you for purchasing this DENON MiniDisc recorder. Please read the operating instructions thoroughly in order to acquaint yourself with the MiniDisc recorder and achieve maximum satisfaction from it.

Please check to make sure the following items are included with the main unit in the carton:

(1) Operating Instructions 1
(2) Connection Cord 2
(3) Remote Control Unit [RC-264] 1
(4) R6P (AA) Dry Cell Battery 2

— TABLE OF CONTENTS —

1 FEATURES

The DMD-1300 is an audio device using the MiniDisc format. Recording is possible for up to 74 minutes. Operation is the same as with regular compact discs (CDs).

1. **Clear sound quality**
   Digital recording provides clear playback sound.
   Also, a " ΔSLC " (ADVANCED Super Linear Converter) is used for playback, increasing musical expression particularly when the volume is low.
2. **Abundant playback functions**
   Programmed playback, random playback, all track repeat, single track repeat, etc.
3. **Numerous editing functions**
   Editing functions for dividing, combining and moving tracks make it possible to freely manipulate recorded discs, and disc and track titles can be added. These functions make it easy to create original discs.
4. **Sampling rate converter**
   Sources with different sampling frequencies, such as DATs and satellite broadcasts (32 kHz and 48 kHz), can be recorded digitally.
5. **Timer recording and playback**
   A timer (not included) can be used for timer recording and playback.

2 CAUTIONS ON HANDLING

Installation
Do not place a TV set (even a small one) or other object on top of the DMD-1300.

When receiving FM, AM and TV broadcasts
If the DMD-1300's power is turned on while receiving FM, AM or TV broadcasts, there may be noise in the sound or stripes on the TV picture. Keep the DMD-1300's power turned off when not using it.
The DMD-1300 uses digital technology. If an FM tuner is placed nearby, it may cause adverse effects, such as noise in the tuner's antenna cable, etc.
Be sure to use coaxial cables to connect the antenna and the tuner's antenna terminal.

When not using the DMD-1300

■ **Under normal circumstances**
- Always remove the disc and turn the power off.
- When leaving home for long periods of times such as for trips, be sure to unplug the power cord.

■ **When moving the DMD-1300**
- Do not subject the DMD-1300 to shocks.
- Always check that the disc has been removed and the connection cords disconnected before moving the DMD-1300.

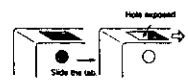
3 ABOUT MINIDISCS

■ MiniDiscs allow a maximum of 74 minutes of recording and playback in a compact size.
There are two types of MiniDiscs: those for playback only, and those for recording and playback.

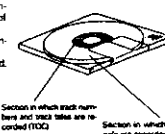
Playback only MiniDiscs
- These discs are for playback only. Commercially available music MDs are of this type.
- These are laser discs, like regular compact discs.
- Tracks on such discs cannot be edited.

Recordable MiniDiscs
- These are magneto-optical discs on which both recording and playback are possible. Recording is performed through magnetic modulation.
- Re-recording is also possible.

Accidental erasure prevention tabs
These tabs protect recordable MiniDiscs from accidental erasure.
To avoid accidentally erasing the recording, open the tab so that the hole is exposed (See the diagram below.) When this is done, "Protected" is displayed if you attempt to record, erase or otherwise edit the disc, and the recording is protected. To record or erase the disc, set the tab back to its original position (with the hole covered).



Recording on discs
MiniDiscs include a section in which the audio signals are recorded and a section in which such data as track numbers and track titles are recorded.



■ **The TOC**
With MiniDiscs, after the audio signals are recorded, data used for checking the tracks (TOC — Table of Contents) is also recorded on the disc. This TOC data is used when playing the disc. In addition, editing is performed by rewriting the TOC data.
The TOC is written on the disc when the eject button is pressed to eject the disc and when the power button on the remote control unit is pressed to set the power to the standby mode.
When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's power button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc.

■ **Handling MiniDiscs**
MiniDiscs are housed in cartridges so there is no need to worry about dirt and scratches. However, dirty or warped cartridges may cause malfunction. Be careful of the following to ensure long-lasting, high quality sound.
- Do not touch the disc surface directly.
- Do not open the shutter by hand.
- Do not place MiniDiscs in dusty, dirty or humid places.
- Do not place MiniDiscs in places exposed to direct sunlight or high temperatures.

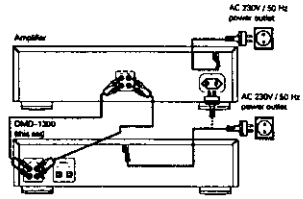
Cleaning
Use a dry cloth to gently wipe dirt or dust off the cartridge. Do not apply excessive force.

4 CONNECTIONS

1. Connecting the analog input and output jacks (analog connections)

• Use the included connection cords (pin-plug cords) to connect the analog input and output jacks.

① Connect the left (L) and right (R) analog output (ANALOG OUT) jacks on the DMD–1300 to the left (L) and right (R) tape input (tape playback) jacks on the amplifier.
② Connect the left (L) and right (R) analog input (ANALOG IN) jacks on the DMD–1300 to the left (L) and right (R) tape output (tape recording) jacks on the amplifier.

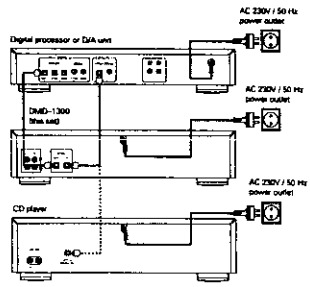


2. Connecting the digital input and output jacks (digital connections)

Use commercially available optical fiber cords to connect the digital input and output jacks.

① Connect the digital output (DIGITAL OPTICAL OUT) jack on the DMD–1300 to the digital optical input of a digital processor or D/A unit.
② Connect the digital input (DIGITAL OPTICAL IN) jacks on the DMD–1300 to the digital output (OPTICAL OUT) jacks on a CD player, digital processor or D/A unit.

• For information on optical fiber cords, contact your nearest Denon dealer.



NOTE:
- Do not plug in the power cord until all other connections have been made.
- Check the channels and be sure to connect left to left (L—white), right to right (R — red).
- Insert the plugs securely. Incomplete connections may result in noise.
- After unplugging the power cord, wait about 5 seconds before plugging it back in.
- Note that clamping the connection cords (pin-plug cords) together with the power cord may result in humming or noise.

5 PART NAMES AND FUNCTIONS

❶ POWER button
- The power turns on when the button is switched from the off position (▟▙) to the on position (▁▔).
- The power turns off when the button is switched from the on position (▁▔) to the off position (▟▙).
- When the button is in the on position (▁▔), the power button on the remote control unit can be used to switch the power between the on and standby modes. "OFF" is displayed when the power is in the standby mode.
- If a disc is inserted while in the standby mode, the power turns on automatically and the disc is drawn in. If a disc is inserted, the power turns on automatically when the play or eject button is pressed, and that operation is performed.

NOTE:
- This model is equipped with a backup function for storing the recorded or edited TOC (Table Of Contents) data even when the power button is set to the off position (▟▙) or the power cord is unplugged.
  The data is backed up for 2 or 3 days. Write the TOC data on the disc immediately after recording or editing.
  If the backup data is lost, the recorded or edited data is erased and cannot be retrieved. (See Page 4.)

❷ EJECT button (⏏)
- Press this to eject the disc.

❸ REPEAT button
- Use this button to play a single track or all tracks repeatedly. (See Page 10 and 11.)

❹ RANDOM button
- Press this button to play the tracks in random order. (See Page 10.)

❺ TIME button
- Press this to switch the time display between the elapsed time and the remaining time per track.
- When pressed in the stop mode, the time display switches between the total playing time and the recordable time.
- When a title is displayed, press this button to switch to the time display.

❻ TITLE button
- Press this button to switch the time display to the title display.
- When pressed while a title is displayed, the title is scrolled.

❼ CHARACTER button
- Use this button when inputting titles to switch between capital letters, small letters and special letters.

❽ CLEAR button
- Press this to clear programmed tracks or title characters.

❾ EDIT button
- This button is used when inputting disc and track titles and for such editing operations as erasing, dividing, combining and moving tracks. (See Page 14 – 19.)
- Press this to enter titles.

❿ ENTER button
- Press this to enter the edited data.

⓫ Jog dial
- Use this dial to find the beginning of tracks and for editing.
- Use this dial to input letters when giving titles to tracks on the disc.

⓬ Headphones jack (PHONES)
- Use this jack to listen with headphones. (Headphones are not included.)

⓭ Headphones volume control (LEVEL)
- Use this to adjust the output level (volume) of the headphones jack (⓬ PHONES).

⓮ Input level adjustment control (INPUT LEVEL)
- Use this to adjust the analog input signal recording level.
- This control does not affect digital recording.

⓯ Record button (● REC)
- Press this button to record.
- The recording standby mode is set when the ● REC button is pressed alone.
- Press the play button (⓰ ▶ PLAY) while in the recording standby mode to start recording.
- To stop recording or to cancel the recording standby mode, press the stop button (⓱ ■ STOP).

⓰ Pause button (II PAUSE)
- Press this button to stop playback or recording temporarily.
- Press the play button (⓯ ▶ PLAY) to cancel the pause mode.

⓱ Stop button (■ STOP)
- Press this button to stop playback or recording.
- Press this button to clear the editing operation.

⓲ Manual search forward button (▶▶)
- Press this to search forward rapidly. (See Page 8.)
- When inputting titles, press this to move the cursor to the right.

⓳ Play button (▶ PLAY)
- Press this button to start playback or recording.
- Press this button during recording to add a track number.

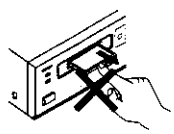
⓴ Manual search reverse button (◀◀)
- Press this to search backward rapidly. (See Page 8.)
- When inputting titles, press this to move the cursor to the left.

㉑ Display

㉒ REMOTE SENSOR
- Point the remote control unit (RC–264) towards this sensor when operating it.

㉓ Disc insertion slot
- When a disc is inserted here, it is automatically drawn into the set.
- Be sure to insert the disc in the proper direction.

★ Note on ejecting discs
- After pressing the eject button do not push the disc back in while it is being ejected. To reinsert the disc, wait until it comes fully out and stops, then press it back in.



㉔ Timer select switch (TIMER)
- Use this for timer recording or playback when using the DMD–1300 with a separately sold audio timer.
- Set the selector to the "OFF" position when not using the timer.

㉕ Input select switch (INPUT SELECT)
- Use this to select the input source for recording.
- The input source cannot be switched during recording. To do so, first set the recording standby or stop mode.

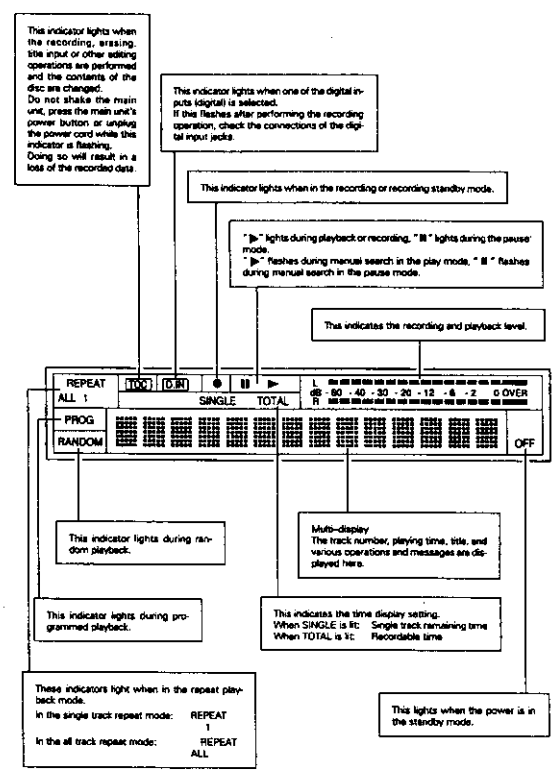
㉖ Analog output jacks (ANALOG OUT)
- When these jacks are connected to the tape input (TAPE–PB) jacks on an amplifier, the sound from the DMD–1300 can be heard through the speakers connected to the amplifier.

㉗ Analog input jacks (ANALOG IN)
- When these jacks are connected to the tape output (TAPE–REC) jacks on an amplifier, the sound of other components connected to the amplifier can be recorded on the DMD–1300. To do so, set the input selector (㉕ INPUT SELECT) to the "ANALOG" position.

㉘ Digital output jack (DIGITAL OPTICAL OUT)
- Digital data is output from this jack in the from of optical signals.
- When this jack is connected to the digital input (OPTICAL) jack on a digital processor or D/A unit, the sound from the DMD–1300 can be heard over the speakers.
- For details on the optical fiber cord used for connection, contact your nearest Denon Dealer.

㉙ Digital input jack (DIGITAL OPTICAL IN)
- Use this jack to input digital data.
- When connected to the optical digital output jack of a CD player, DAT deck, satellite broadcast tuner or another MD recorder, the sound from that unit can be recorded digitally on the DMD–1300. To do so, set the input selector (㉕ INPUT SELECT) to the "DIGITAL" position.
- For details on the optical fiber cord used for connection, contact your nearest Denon Dealer.

㉑ Display

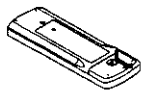


6 REMOTE CONTROL UNIT

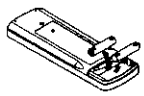
★ **The included remote control unit [RC-264] can be used to operate the DMD-1300 from a distance.**

Inserting the batteries

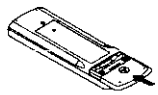
① Remove the remote control unit's back lid.



② Insert the two R6P (AA) batteries in the battery compartment, in the direction indicated by the marks inside the compartment.



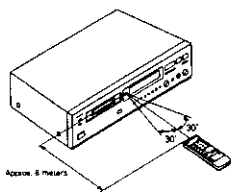
③ Put the back lid back on.



Cautions on batteries

- Use R6P (AA) batteries in the remote control unit.
- The batteries should be replaced with new ones after approximately one year, though this depends on the frequency with which the remote control unit is used.
- Even if the batteries are less than a year old, replace them with new ones if the remote control unit no longer operates even from a short distance from the main unit.
- When inserting new batteries, wait about two minutes after removing the old batteries before inserting the new ones.
- Be sure to set the batteries in the proper "⊕" and "⊖" directions, as indicated by the marks in the remote control unit's battery compartment.
- Remove the batteries when not using the remote control unit for long periods of time.
- To avoid explosions and fluid leakage:
  - Do not use one new battery with one old one.
  - Do not use two different types of batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
- If the battery fluid should leak, wipe all the fluid off the battery compartment, then insert new batteries.

Using the remote control unit



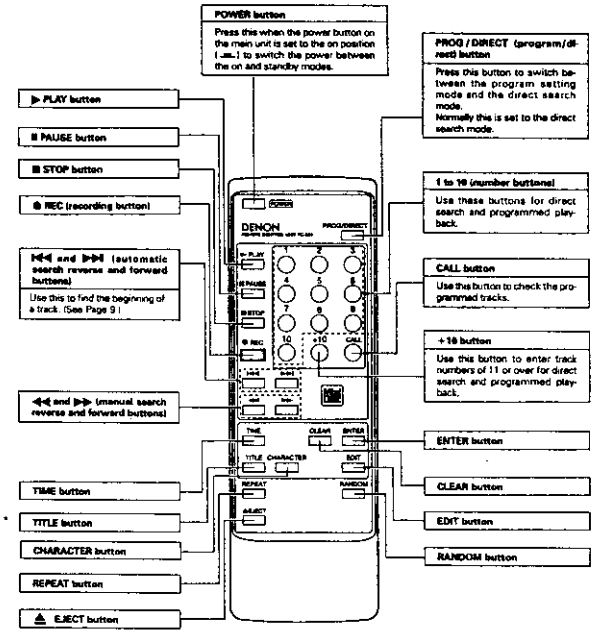
- When operating the remote control unit, point it at the main unit as shown in the diagram.
- The remote control unit can be operated from a direct distance of approximately 8 meters from the main unit. This distance will be shortened, however, if there are obstacles or when operated from an angle.
  (The remote control unit will operate from a horizontal angle of up to about 30°.)

NOTE:

- The remote control unit may not operate if the remote sensor is exposed to direct sunlight or strong artificial light, or if there is an obstacle between it and the remote sensor.
- Do not press buttons on the main unit and on the remote control unit at the same time. Doing so will result in malfunction.

Names and Functions of Remote Control Unit Buttons

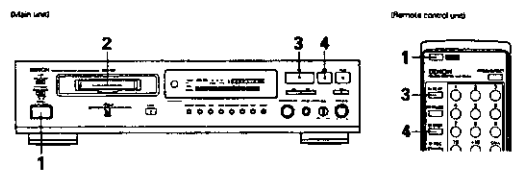
★ **Buttons not explained here function in the same way as the corresponding buttons on the main unit.**



7 NORMAL PLAYBACK

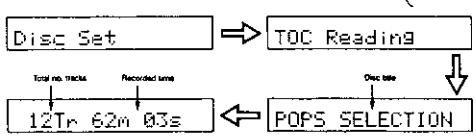
1. Starting playback

First try playing the tracks in order.



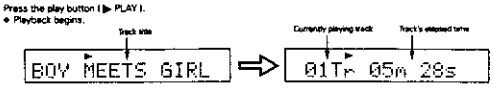
1 Turn on the power.

2 Load the disc.
- Insert the disc into the disc insertion slot in the direction indicated by the arrow on the top of the disc. The disc is drawn in automatically.



- The disc title is not displayed if no disc title has been input.

3 Press the play button (▶ PLAY).
- Playback begins.



- The track title is not displayed if no track title has been input.

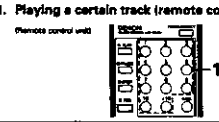
2. Stopping playback

4 Press the stop button (■ STOP).
- Playback stops.
- The stop mode is set automatically once all the tracks on the disc have been played.

8 VARIOUS PLAYBACK FUNCTIONS

In addition to normal playback, the DMD-1300 also offers the playback functions described below.

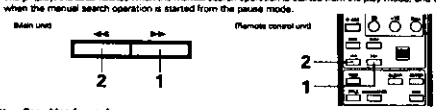
1. Playing a certain track (remote control unit only) ..... Direct Search



1 Use the number buttons (1 to 10) and the +10 button to input the number of the desired track.
- For example:
  Press button [4] to listen to the 4th track, buttons [+10] and [2] to listen to the 12th track. Playback begins from that track.

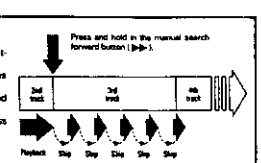
2. Finding the desired position while listening to the sound ..... Manual Search

- Use this function to skip rapidly through the disc while listening to the sound.
  This function comes in handy when you want to find a certain section within a long track.
- The manual search mode is set when one of the manual search buttons (▶▶ and ◀◀) is pressed and held in during playback. The disc moves slowly at first, then rapidly. Normal playback resumes when the button is released.
- The ▶ (play) indicator flashes when the manual search operation is started from the play mode, and the ⏸ (pause) indicator flashes when the manual search operation is started from the pause mode.



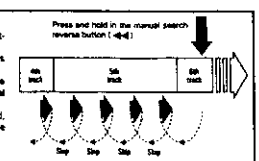
(1) Searching forward

1 During playback, press and hold in the manual search forward button (▶▶).
- Normal playback resumes from the point at which the button is released.
- Playback stops if the end of the last track on the disc is reached while pressing the manual search forward button (▶▶).
- For high-speed forward search without hearing the sound, press the manual search forward button while in the pause mode.



(2) Searching backward

2 During playback, press and hold in the manual search reverse button (◀◀).
- Normal playback resumes from the point at which the button is released.
- Manual search stops and playback starts if the beginning of the first track on the disc is reached while pressing the manual search reverse button (◀◀).
- For high-speed backward search without hearing the sound, press the manual search reverse button while in the pause mode.

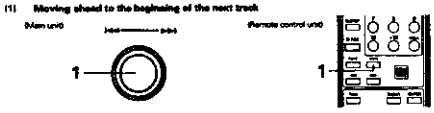


NOTE:

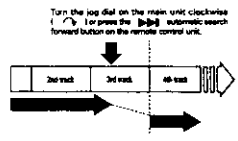
- There may be a slight break in the sound when returning to normal playback from the manual search mode.

3. Finding the beginnings of tracks during playback ..... Automatic Search

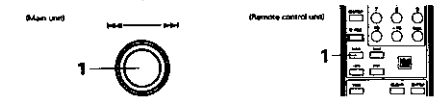
(1) Moving ahead to the beginning of the next track



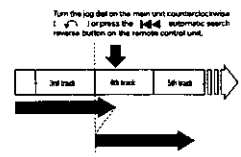
1	Either turn the jog dial on the main unit clockwise (↷) or press the ▶▶| automatic search forward button on the remote control unit. • During the search operation, turn the jog dial on the main unit clockwise (↷) again or press the ▶▶| automatic search forward button on the remote control unit again to move further on to the beginning of the following track.



(2) Moving back to the beginning of the current track

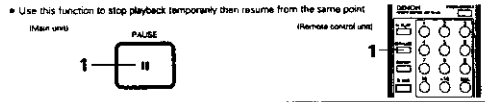


1	Either turn the jog dial on the main unit counterclockwise (↶) or press the |◀◀ automatic search reverse button on the remote control unit. • During the search operation, turn the jog dial on the main unit counterclockwise (↶) again or press the |◀◀ automatic search reverse button on the remote control unit again to move further back to the beginning of previous track.

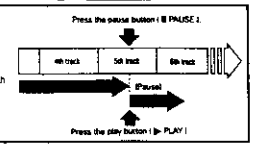


4. Stopping playback temporarily ..... Pause

• Use this function to stop playback temporarily then resume from the same point

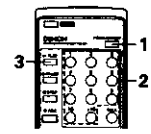


1	During playback, press the pause button (II PAUSE). • The pause mode is set. • Press the play button to resume playback from the point at which the pause mode was set.



5. Playing tracks in a certain order (remote control unit only) ..... Programmed Playback

(Remote control unit)



• Use this function to select certain tracks from the disc and program them to play in a certain order.
• Up to 25 tracks can be programmed.

1	In the stop mode, press the PROG/DIRECT button. • The "PROG" indicator lights.
2	Use the number buttons and the +10 button to select the tracks for programmed playback. • For example, to program the 3rd, 12th and 7th tracks, press PROG/DIRECT , 0 , +10 , 2 and 7 .
3	Press the play button (▶ PLAY). • The tracks are played in the programmed order.

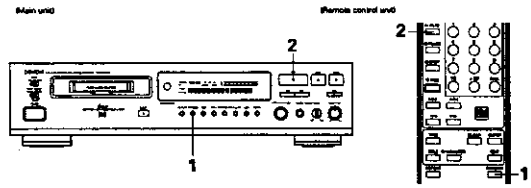
• To check the contents of the program, press the CALL button. The programmed tracks appear in the programmed order on the display each time the CALL button is pressed.
• To change the program, press the CLEAR button while in the stop mode, then program the desired track. The last programmed track is replaced with the newly input track.
• To clear the entire program, press the PROG/DIRECT or EJECT (⏏) button while in the stop mode.

NOTE:
• The single track repeat mode cannot be set during random playback.
• Programs with total playing times of over 256 minutes can be set, but the time will not be displayed properly.

6. Playing in random order ..... Random Playback

• Use this function to play all the tracks on the disc once in random order.

(Main unit)
(Remote control unit)



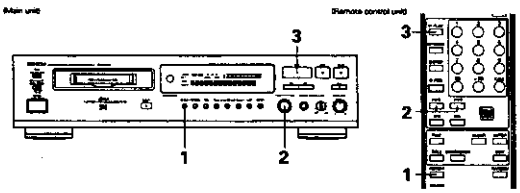
1	In the stop mode, press the RANDOM button. • The "RANDOM" indicator lights.
2	Press the play button (▶ PLAY). • During normal playback: Tracks are automatically played in random order. • During the all-track repeat mode: All the tracks are played once in random order, then repeated in another random order. • To cancel the random play mode, either set the stop mode or press the RANDOM button again.

NOTE:
• The single track repeat mode cannot be set during random playback.
• The manual search buttons cannot be used for searching forward or backward during the all track random repeat mode.

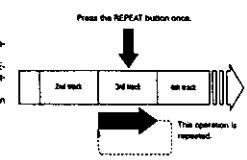
7. Playing repeatedly ..... Repeat Playback

(1) Playing a single track repeatedly [Single Track Repeat]

(Main unit)
(Remote control unit)

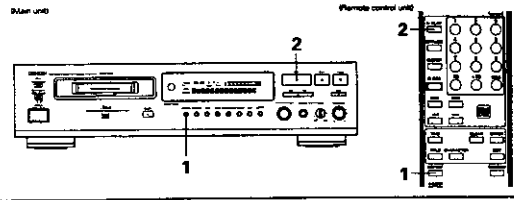


1	Press the REPEAT button once. • The "REPEAT" indicators light on the display and the single track repeat mode is set.
2	Either turn the jog dial on the main unit or use the automatic search buttons (|◀◀ and ▶▶|) on the remote control unit to select the track to be played repeatedly.
3	Press the play button (▶ PLAY). • Playback starts. • Once the selected track ends, it is played again from the beginning. • The single track repeat mode can also be set by pressing the REPEAT button during playback. The current track is played repeatedly. • To cancel the single track repeat mode, press the REPEAT button repeatedly until the "REPEAT" indicator turns off.



(2) **Playing all tracks repeatedly (All Track Repeat)**

(Main unit) (Remote control unit)



1	Press the REPEAT button twice. • The " REPEAT " indicators light on the display and the all track repeat mode is set.
2	Press the play button (▶ PLAY). • The disc is played repeatedly. • The all track repeat mode can also be set by pressing the REPEAT button twice during playback. • If the REPEAT button is pressed during programmed playback, the tracks are played repeatedly in the programmed order. • To cancel the all track repeat mode, press the REPEAT button repeatedly until the "REPEAT" indicator turns off.

NOTE:
• The single track repeat mode cannot be set during programmed playback or random playback.

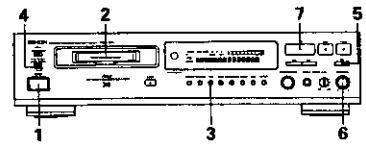
9 RECORDING

• When recording on an already recorded disc, recording automatically starts from the end of the section last recorded. When doing so, pay attention to the remaining time.
• To clear the entire content of the disc and record from the beginning, first erase the entire disc. (For instructions on erasing the entire disc, refer to " 12 Editing — (1) Erasing all tracks " on Page 15.)
• To record on a disc, make sure the accidental erasure prevention tab is closed and the hole is covered.

1. Starting recording

(1) **Analog recording**

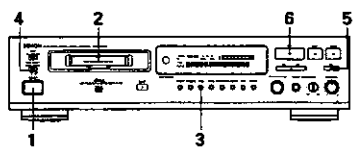
(Main unit)



1	Turn on the power.
2	Load the recordable MiniDisc on which you want to record.
3	When using an already recorded MiniDisc, press the TIME button to check the recordable time. • The time display switches between the total recorded time and the recordable time each time the TIME button is pressed.
4	Set the input select switch (INPUT SELECT) to the "ANALOG" position. • "Analog ATM On" or " Analog ATM Off" appears on the multi-display. • When the analog A.T.M. (Auto Track Marking) function is on (when "Analog ATM On" is displayed): Track numbers are automatically added when soundless sections (about 2 sec.) are detected in the recording input signal. • When the analog A.T.M. function is off (when " Analog ATM Off " is displayed): Track numbers are not automatically added. (For instructions on adding track numbers, refer to " 12 Editing — (2) Dividing tracks " on Page 16.) "Analog ATM On" or "Analog ATM Off" is displayed. Analog ATM On
5	Press the record button (● REC). • The recording standby mode is set.
6	Use the INPUT LEVEL control to adjust the recording level. • Adjust the INPUT LEVEL control so that the "OVER" indicator does not light even when the volume is loudest. After adjusting, set the source to be recorded to the standby mode.
7	Press the play button (▶ PLAY). • Recording starts. • Set the source to be recorded to the play mode.

(2) **Digital recording**

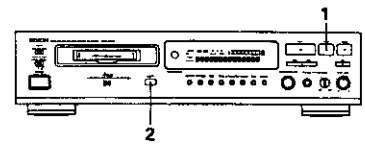
(Main unit)



1	Turn on the power.
2	Load the recordable MiniDisc on which you want to record.
3	When using an already recorded MiniDisc, press the TIME button to check the recordable time. • The time display switches between the total recorded time and the recordable time each time the TIME button is pressed.
4	Set the input select switch (INPUT SELECT) to the "DIGITAL" position. • "Digital In" appears on the multi-display. • If the " DIN " indicator is flashing, check the connections to the digital input jacks "Digital In" is displayed. Lights DIN Digital In
5	Press the record button (● REC). • The recording standby mode is set.
6	Press the play button (▶ PLAY). • Recording starts. • Set the source to be recorded to the play mode.

2. Stopping recording

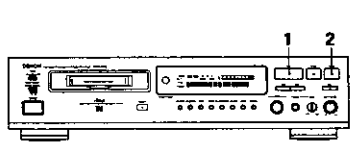
(Main unit)



1	Press the stop button (■ STOP). • The stop mode is set automatically once the end of the recordable time is reached.
2	Press the EJECT button (⏏). • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

NOTE:
• When performing digital recording, there is no need to adjust the recording level. The position of the INPUT LEVEL control does not affect the recording level.
• When performing digital recording of CDs or MiniDiscs, the track numbers are recorded automatically. (Depending on the recorded content on the CD or MiniDisc and on the type of CD player, the track numbers may differ from those on the original CD or MiniDisc.)
• When recording on CDs or MiniDiscs, track numbers may be incremented by 1. If this happens, erase the unnecessary track numbers. (See Page 15.)
• The DMD-1300 is equipped with a sampling rate converter which converts the sampling frequency of sources whose sampling frequency is different from that of MiniDiscs (44.1 kHz), such as DATs and satellite broadcasts (32 kHz and 48 kHz), to 44.1 kHz when recording.
• When recording DATs digitally, track numbers are automatically added when soundless sections are detected when the sampling frequency is other than 44.1 kHz.
• Use analog recording to record sources that cannot be recorded digitally.
• During digital recording from CDs or MiniDiscs, the track number may not change if the same track is programmed twice in a row or if the single track repeat mode is set.
• Monaural recording is not possible on this recorder.
• It is not possible to make digital recordings of MiniDiscs which have already been recorded digitally. The DMD-1300 includes a serial copy management system. This system limits reproduction of digital signals on digital audio devices to "one generation". Use analog recording to record MiniDiscs originally recorded digitally.
• The auto mark function may not work properly when recording digital sources (BS/CS tuners or DATs) using digital connections.
  • The auto mark function may not work properly when there is much noise in the blank sections between tracks.
  • The auto mark function may be activated in the middle of a track if the signal level is low.
  If this happens, edit the disc after recording. (See Pages 16 and 17.)

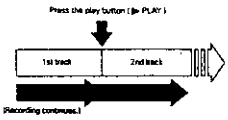
10 VARIOUS RECORDING FUNCTIONS



1. Adding track numbers during recording

- Track numbers can be added during recording regardless of the recording mode (Analog ATM on / off, Digital).

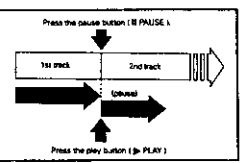
1	During recording, press the play button (▶ PLAY). • When the play button (▶ PLAY) is pressed during recording, a track number is added at that point. • It is not possible to add another track number less than 3 seconds after a track number has been added.



2. Stopping recording temporarily

- Recording can be stopped temporarily then resumed from the same point.

2	During recording, press the pause button (❚❚ PAUSE). • When the pause button (❚❚ PAUSE) is pressed during recording, the pause mode is set at that point and the track number changes. • Press the play button (▶ PLAY) to resume recording.

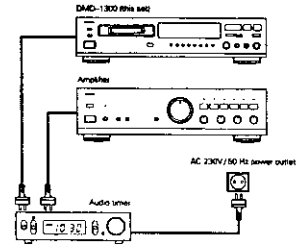


NOTE:
- The TOC is written on the disc when the eject button is pressed to eject the disc and when the power button on the remote control unit is pressed to set the power to the standby mode.
- After recording, press the EJECT button (⏏) to record the TOC data before performing other operations.
- The TOC indicator flashes while the TOC data is being recorded. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc.

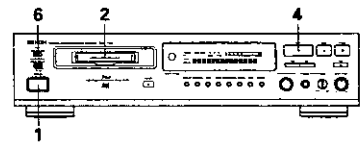
11 TIMER PLAYBACK AND RECORDING

- A separately sold audio timer can be used to start playback or recording at a specific time.
- Also refer to the operating instructions for the audio timer and amplifier.

1. Connections

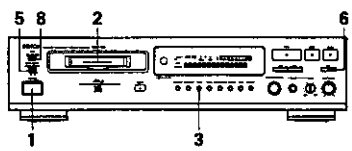


2. Timer playback



1	Turn on the power of the DMD-1300 and the connected components.
2	Load the MiniDisc for timer playback into the DMD-1300.
3	Set the amplifier's input selector to "MD".
4	Press the play button (▶ PLAY). • Play the disc to check the volume.
5	Set the audio timer for the desired time.
6	Set the DMD-1300's timer select switch (TIMER) to "PLAY".
7	Press the power button on the remote control unit to set the power to the standby mode. Turn the audio timer ON. • When the set time is reached, the power of the various components turns on automatically and playback begins from track one.

3. Timer recording



1	Turn on the power of the DMD-1300 and the connected components.
2	Load the recordable MiniDisc for timer recording into the DMD-1300.
3	When using an already recorded MiniDisc, press the TIME button to check the recordable time.
4	Set the input selector button on the amplifier or receiver to the source to be recorded.
5	Set the input select switch [INPUT SELECT] on the DMD-1300 to the source to be input.
6	Press the record button (● REC). • Set the recording pause mode and check the recording level.
7	Set the audio timer for the desired time.
8	Set the DMD-1300's timer select switch (TIMER) to "REC". • When the set time is reached, the power turns on and recording begins.
9	Press the power button on the remote control unit to set the power to the standby mode. Turn the audio timer ON. • When the set time is reached, the power of the various components turns on automatically and recording begins.

NOTE:
- **Be sure to keep the main unit's power button in the on position when performing timer playback and recording. Timer playback and recording will not work if the power button is in the off position.**
- **The recording mode using timer recording is stored on the disc the next time the power is turned on. During this, the TOC indicator flashes. Do not shake the main unit, press the main unit's power button or unplug the power cord while the "TOC" is flashing.**
- **To operate the DMD-1300 again after timer recording, first eject the disc, then reload it.**
- **The recording mode using timer recording may be cleared if the DMD-1300's power is not turned on for 2 or 3 days. Be sure to turn on the DMD-1300 within 2 or 3 days.**
- Be sure to set the DMD-1300's timer select switch (TIMER) to the "OFF" position when not using timer playback or recording.
- It takes several seconds from the time the timer recording start time is reached until the power is turned on and recording actually starts. Take this into consideration when setting the timer's start and stop times.
- The recordable time may be shortened by several seconds when using timer recording on discs on which editing (erasing tracks, etc.) has been performed repeatedly.
- The main unit's power and time buttons and the recording level control (for analog recording) can be operated during timer recording.
- Only the TIME button and the POWER button will function during timer recording.
- To stop recording during timer recording, set the timer select switch (TIMER) to "OFF", then press the stop button (■ STOP).
- Timer recording is not possible when the disc's accidental erasure prevention tab is open or when the disc is already full ("Disc Full").

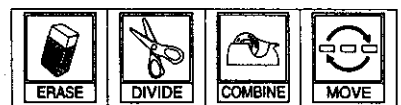
12 EDITING

The editing functions can be used to add track numbers, combine tracks, erase unwanted sections, etc.
It is also possible to give titles to discs and tracks.
Use the editing functions to get the best of the excellent operability that MiniDiscs offer.

1. Editing

The DMD-1300 is equipped with the following four editing functions:

Editing functions



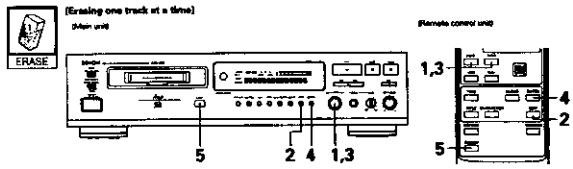
ERASE	DIVIDE	COMBINE	MOVE
• Erasing single tracks • Erasing all tracks	• Dividing tracks	• Combining track	• Moving tracks

These four editing functions can be combined for a variety of editing possibilities.

• When editing or adding titles, close the accidental erasure prevention tab to cover the hole.

(1) Erasing tracks

[Erasing one track at a time]

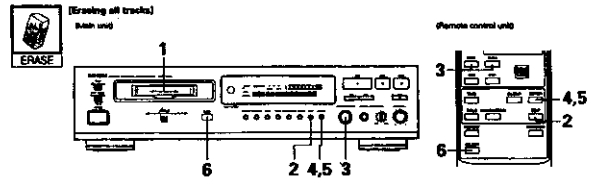


1	In the stop mode, display the number of the track to be erased. • Either turn the jog dial on the main unit or use the automatic search buttons (⏮ and ⏭) on the remote control unit to display the number of the track to be erased. • This step is unnecessary when you want to erase the currently playing or paused track.
2	Press the EDIT button. • "Edit Mode" is displayed.
3	Either turn the jog dial on the main unit or press one of the automatic search buttons (⏮ and ⏭) on the remote control unit. • Display "Track Erase?".
4	Press the ENTER button to erase the track. • "Complete" is displayed. • The stop mode is set once the operation is completed. • During the pause mode, that track is erased. • When a track is erased during the pause mode, the stop mode is set after the track is erased. • When a track is erased, the numbers of the tracks following that track are all decreased by one.
5	Press the EJECT button (⏏). • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

• When erasing two or more tracks, start from the track with the largest number, since the numbers of the following tracks decrease when a track is erased.
• To cancel the erasing procedure, press the STOP or CLEAR button before step 4 above to display "Track Erase?".

NOTE:
• Once a track is erased, it can no longer be retrieved. Be sure to check the track before erasing it.

[Erasing all tracks]

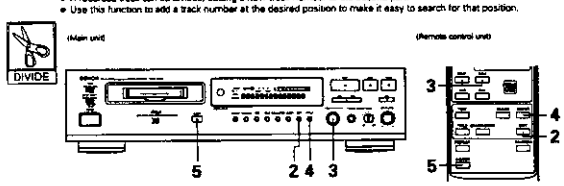


1	Load the disc you want to erase.
2	In the stop mode, press the EDIT button. • "Edit Mode" is displayed.
3	Either turn the jog dial on the main unit or press one of the automatic search buttons (⏮ and ⏭) on the remote control unit. • Display "ALL Erase?".
4	Press the ENTER button. • The "Erase OK?" message appears.
5	Press the enter button to erase the track.
6	Press the EJECT button (⏏). • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

• When the all erase function is used, both the tracks and the disc title are erased.
• To cancel the erasing procedure, press the STOP or CLEAR button before step 5 above to display "ALL Erase?" or "Erase OK?".

(2) Dividing tracks

• A recorded track can be divided, adding a new track number to the second part.
• Use this function to add a track number at the desired position to make it easy to search for that position.



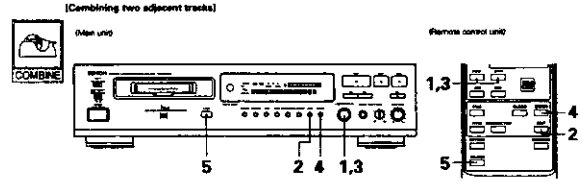
1	Set the pause mode at the position at which you want to divide the track.
2	Press the EDIT button. • "Edit Mode" is displayed.
3	Either turn the jog dial on the main unit or press one of the automatic search buttons (⏮ and ⏭) on the remote control unit. • Display "Divide?".
4	Press the ENTER button to divide the track.
5	Press the EJECT button (⏏). • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

• If a titled track is divided, both parts will have the same title.
• To put a divided track back together, see "(3) Combining tracks" on Page 16.
• To cancel the dividing procedure, press the STOP or CLEAR button before step 4 above.

(3) Combining tracks

• Use this function to combine two adjacent tracks.

[Combining two adjacent tracks]

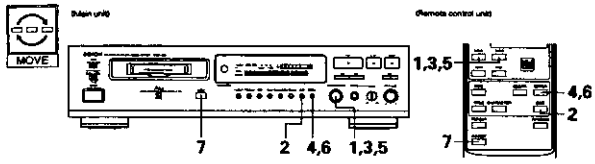


1	In the stop mode, display the number of the second of the adjacent tracks. • Either turn the jog dial on the main unit or use the automatic search buttons (⏮ and ⏭) on the remote control unit to display the number of the second track.
2	Press the EDIT button. • "Edit Mode" is displayed.
3	Either turn the jog dial on the main unit or press one of the automatic search buttons (⏮ and ⏭) on the remote control unit. • Display "Combine?".
4	Press the ENTER button to combine the tracks.
5	Press the EJECT button (⏏). • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

• To divide tracks that have been combined, see "(2) Dividing tracks" on Page 16.
• Tracks can also be combined in the same way during the play or pause modes by pressing the EDIT button. In this case, the track at the point where ENTER button is pressed is combined with the previous track.
• The title of the combined track is the title of the first of the two tracks. If the first track has no title, the title of the second track is used.
• To cancel the combining procedure, press the STOP or CLEAR button before step 4 above.

NOTE:
• Tracks recorded from CDs or MiniDiscs using the digital inputs cannot be combined with tracks recorded using the analog inputs.
• It may not be possible to combine short tracks less than 15 seconds long.

(4) **Moving tracks**



1	In the stop mode, display the number of the track to be moved. • Either turn the jog dial on the main unit or use the automatic search buttons (⏮ and ⏭) on the remote control unit to display the number of the track to be moved.
2	Press the EDIT button. • "Edit Mode" is displayed.
3	Either turn the jog dial on the main unit or press one of the automatic search buttons (⏮ and ⏭) on the remote control unit. • Display "Move?".
4	Press the ENTER button. • Display "00TrMove 00Tr".
5	Either turn the jog dial on the main unit or use the automatic search buttons on the remote control unit to specify the number to which the track is to be moved.
6	Press the ENTER button to move the track.
7	Press the EJECT button (⏏). • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

• To cancel the moving procedure, press the STOP or CLEAR button before step 6 above.

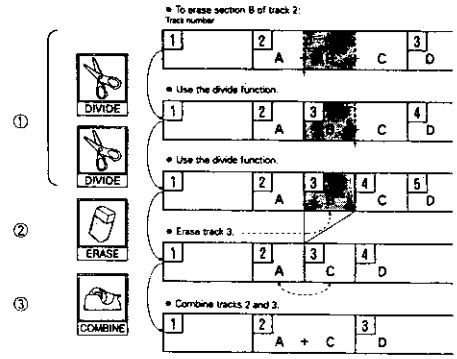
2. Examples of editing applications

The four editing functions can be combined for a variety of editing possibilities. Here we give two examples. Use these as reference to make your own original discs.

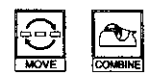
[Erasing part of a track]

To erase part of a track, give a track number to the section you want to erase, then erase that track number.

① Isolate the section of the track you want to erase by giving it a track number. (Divide function)
② Erase the section to which you have given a track number. (Erase function)
③ Combine parts A and C of the original track. (Combine function)

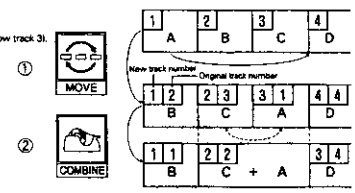


[Combining two non-adjacent tracks]



• Joining track 1 to the end of track 3:

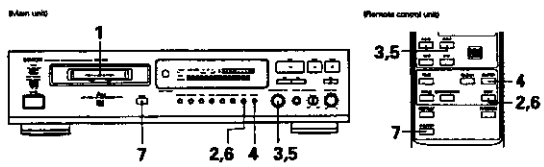
① Move track 1 behind track 3. (Move function)
② Combine track 3 (now track 2) with track 1 (now track 3). (Combine function)



3. Adding titles

★ Up to 100 characters can be input for the track and disc titles.

(1) **Adding disc titles**

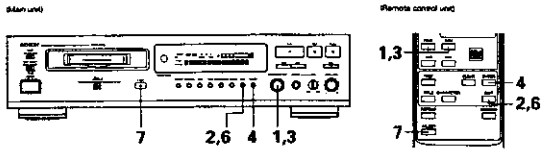


1	Load the disc to which you want to give a title.
2	Press the EDIT button after the total number of tracks on the disc and the total playing time are displayed (in the stop mode). • "Edit Mode" is displayed.
3	Either turn the jog dial on the main unit or use the automatic search buttons (⏮ and ⏭) on the remote control unit to display "Disc Name In?".
4	Press the ENTER button. • The cursor flashes, indicating the title input standby mode.
5	Input the title. • Either turn the jog dial on the main unit or use the automatic search buttons (⏮ and ⏭) on the remote control unit to select the desired character. • Some characters that can be input on the DMD-1300 cannot be displayed on other models. • The shape of the cursor changes each time the CHARACTER button is pressed. [Explanation of cursor:] ..... Capital letter / number input mode ..... Small letter / number input mode ..... Special character input mode [Available characters and numbers] Capital letter / number input mode: ABCDEFGHIJKLMNOPQRSTUVWXYZ0123456789 Small letter / number input mode: abcdefghijklmnopqrstuvwxyz0123456789 Special character input mode: Space ! " # $ % & ' ( ) * + , - . / : ; < = > ? @ [ ] _ ` { } ~ • When the manual search forward button (⏭) or the ENTER button is pressed, the selected character is set, and the unit is set to the input standby mode for the next character. • The cursor can be moved back by pressing the manual search reverse button (⏮). Use this to correct input characters.

6	Press the EDIT button to enter the input title.
7	Press the EJECT button (⏏). • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

• To erase a character, move the cursor to that character then press the CLEAR button.
• To correct a character, first erase it, then input the correct character.

(2) Adding track titles



1	In the stop mode, either turn the jog dial on the main unit or use the automatic search buttons (⏮ and ⏭) on the remote control unit to display the track number.
2	Press the EDIT button. • "Edit Mode" is displayed. • In the play, pause or recording modes, press the EDIT button to give a title to the current track.
3	Either turn the jog dial on the main unit or use the automatic search buttons (⏮ and ⏭) on the remote control unit to display "Track Name in?"
4	Press the ENTER button. • The cursor flashes, indicating the title input standby mode.
5	Input the title • For instructions on inputting titles, see step 5 under "Adding disc titles" on Page 18.
6	Press the EDIT button to enter the input track title.
7	Press the EJECT button (⏏) • The TOC data is written and the disc is ejected. • When TOC writing starts, the " TOC " indicator flashes. Do not shake the main unit, press the main unit's POWER button or unplug the power cord while the TOC is being written. If the data is not recorded properly, it will not be possible to play the disc. • The TOC data can also be written by setting the power to the standby mode by pressing the power button on the remote control unit.

• In the play or recording mode, finish adding the title before the track ends. If the track changes, the characters that have been input up to that point are no longer valid.
• Characters input in the recording pause mode are cleared when the STOP button is pressed.

NOTE:
• Up to 100 characters can be input for the track and disc titles. "Name Full" is displayed if you attempt to input a 101st character.
• If the title operation is performed with a disc containing titles with over 100 characters input on another MiniDisc recorded, the characters over the 100th character are erased.
• A total of approximately 1700 characters can be input for all disc and track titles. "Name Full" is displayed if you attempt to input more characters.

13 MESSAGES

Messages may appear on the display while using the DMD-1300. The meanings of these messages are explained below.

Message	Meaning
TOC Reading	TOC is being read.
Blank Disc	Nothing is recorded on the loaded disc.
Complete	Editing is completed.
Copy Prohibit	The SCMS (Serial Copy Management System) prohibits digital copying of that source.
Digital Unlock	During digital recording, this indicates that signals are not being input properly due to incomplete connection of the digital input jacks, etc.
Disc Err*	Disc is scratched. No TOC is written on the MiniDisc or the data is defective.
Disc Full	There is no remaining time on the disc. There are already 254 tracks on the disc.
Impossible	This indicates that the editing operation is not possible.
No Name	This means that no title has been input.
No Track	The disc has a title but no tracks on it.
Playback Only	This appears when you try to record or edit on a disc for playback only.
Protected	The disc is protected against accidental erasure.
Name Full	100 characters have already been input for the disc or track title. Approx. 1700 characters have already been input for the disc and track titles.
TrackProtected	This track cannot be edited.
Disc ?	Data is defective. MiniDisc does not conform to standards.
TOC Err*	Disc is scratched. TOC data cannot be red. MiniDisc does not conform to standards
Can't REC	Proper recording was not possible due to shocks or scratched disc.
Temp Over	Temperature is too high
Defect	Recording is interrupted due to scratched disc.
Mech Err*	MiniDisc is not functioning properly.
Not Audio	Non-audio data is recorded on the disc.
UTOC W Err	Proper TOC data could not be created due to scratched disc.
UTOC Err*	TOC data recorded on the disc is not to MiniDisc standards or cannot be read.
Focus Err	Disc is scratched. Player is being used in a shaky, unstable place.

("*" indicates a letter or character.)

14 SYSTEM LIMITATIONS

The recording method used on MiniDisc (MD) systems is different from conventional recording methods. Because of this, there are several system limitations.
Note that the following are not malfunctions.

1. Track number limitations

• Up to 254 tracks can be recorded on blank discs or discs with no tracks on them when the tracks are recorded in order starting from track 1. If a disc has been edited repeatedly, however, it may not be possible to record 254 tracks on the disc.
• If there is emphasis data or other signals between tracks during digital recording, this will be treated as a break within the track (the track number will not change), and recording may not be possible, regardless of the recording time or number of tracks.

2. Recording limitations

• If 254 tracks are already recorded on the disc, no further recording is possible, even if the recorded time is less than the maximum recordable time.
• Recording is performed in units of about 2 seconds. About 2 seconds of disc space is used even if the section is less than 2 seconds long. Thus, the actual recordable time becomes shorter.
• If there are scratches on the disc, recording is not possible in the scratched sections, and the recordable time decreases accordingly. ("Defect" is displayed during recording and the number of tracks on the MiniDisc is automatically increased.)
• When digitally recording CDs, depending on the recording on the CD blank sections of several seconds may be created and the number of tracks may differ from the number on the original CD.
• When the analog A.T.M. function is on and track numbers are added automatically, the track numbers may not be added properly, depending on the original recording.
• In some cases, the remaining time may not decrease when short tracks are erased. This is because sections of 12 seconds and less are ignored when displaying the remaining time on the MD.

3. Editing limitations

• In some cases it is not possible to combine short tracks created through editing.
• There may be breaks in the sound during manual search on MiniDiscs which have been recorded or edited repeatedly.

15 TROUBLESHOOTING

Check the following before assuming there is a problem with the set.
■ Are connections proper?
■ Are you operating as described in these operating instructions?
■ Be sure to check that the main power switch on the rear panel is turned on.
If the set does not seem to be operating properly, check the items listed on the table below.
If the cause of the problem cannot be found, the set may be malfunctioning. Immediately turn off the power and unplug the power cord, then contact your store of purchase or your nearest Denon dealer.

Problem	Cause	Measure	Page
Set does not operate.	• No disc is loaded. • Disc is damaged or dirty	• Load a disc. • Replace with another disc.	8 —
Disc does not play.	• Connections are wrong. • Nothing is recorded on the disc. ("Blank Disc" or "No Track" is displayed.)	• Check the connections. • Replace with a recorded disc.	5 19
Recording is not possible.	• Disc is protected. ("Protected" is displayed.)	• Move the disc's accidental erasure protection tab to cover the hole.	4, 18
	• There is no remaining time on the disc. ("Disc Full" is displayed.)	• Replace the disc. If there are any sections you do not need, erase them to increase the recording time.	19
	• 254 tracks are already recorded on the disc. ("Disc Full" is displayed.)	• Replace the disc. If there are any tracks you do not need, erase them to increase the recording time.	18
	• You are attempting to digitally record a digitally recorded source. (See the description of the SCMS system.) ("Copy Prohibit" is displayed.)	• Use analog recording.	11, 19
	• The input selector (INPUT SELECT) is not set properly.	• Check the recording input mode.	11
	• The INPUT LEVEL control is turned down.	• Adjust the INPUT LEVEL control (for analog recording only).	11

16 MAIN SPECIFICATIONS

Type:	MiniDisc digital audio system
Wow & flutter:	Below measurable limits (±0.001% W. peak or less)
Sampling frequency:	44.1 kHz
Recording method:	Magnetic modulation overwriting
Light source:	Semiconductor
Power supply:	AC 230 V, 50 Hz (DMD-1300 Europe model, DMD-1550G Asia model) AC120V, 60Hz (DMD-1300 U.S.A. model)
Power consumption:	14 W
Maximum external dimensions:	434 (width) x 100 (height) x 285 (depth) mm (DMD-1300 Europe model, U.S.A. model) 470 (width) x 100 (height) x 285 (depth) mm (DMD-1550G Asia model) (including feet, controls and terminals)
Weights	4.0 kg (DMD-1300 Europe model, U.S.A. model) 4.9 kg (DMD-1550G Asia model)
■ **Remote control unit:**	(RC-254)
Remote control method:	Infrared pulse
No. buttons:	31
Power supply:	DC 3V using two R6P (AA) batteries
Maximum external dimensions:	60 (width) x 177 (height) x 18 (depth) mm
Weight:	100 g (including batteries)

● For improvement purposes, specifications and design are subject to change without notice.

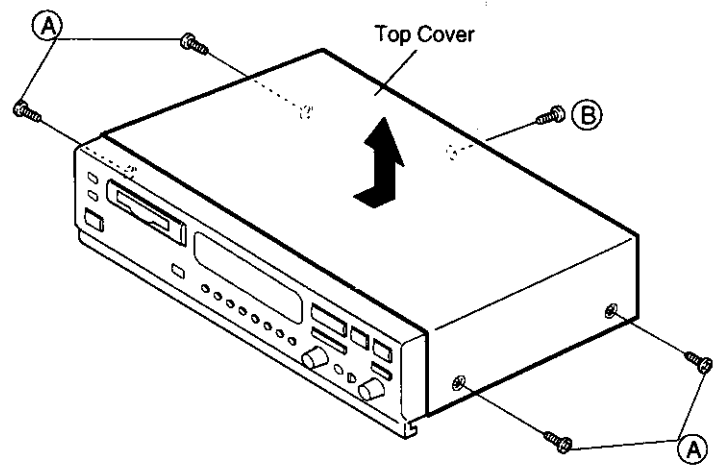
"US and foreign patents licensed from Dolby Laboratories Licensing Corporation"

DISASSEMBLY

(To reassemble reverse disassembly)

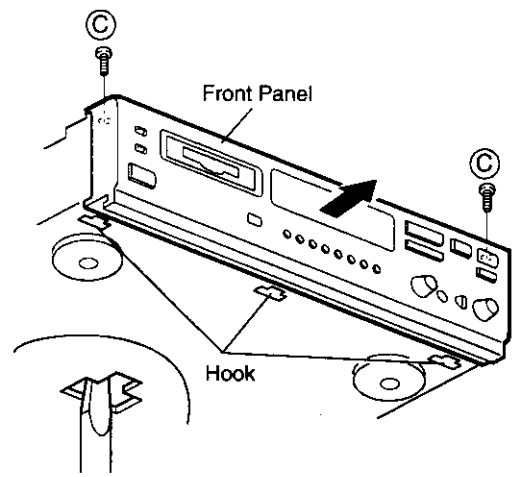
● Top Cover

1. Remove 4 screws Ⓐ on both sides and one screw Ⓑ on the rear side.
2. Lift the Top Cover in the arrow direction.



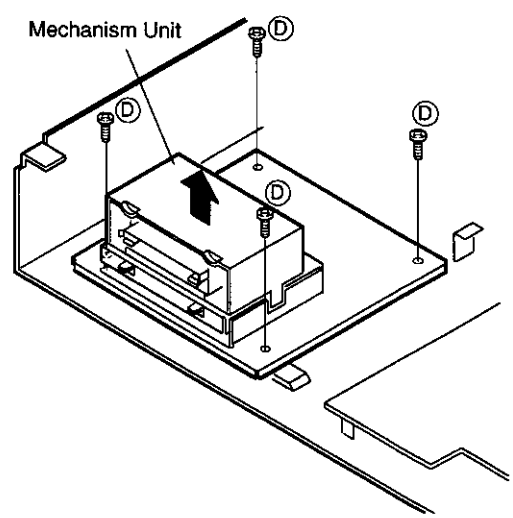
● Front Panel

1. Remove 2 screws Ⓒ on the top of Front Panel.
2. While unhooking places on the bottom of Front Panel, disassemble the Front Panel toward arrow direction.

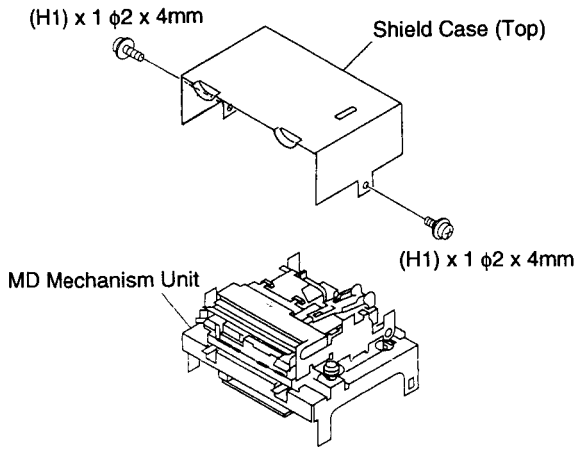


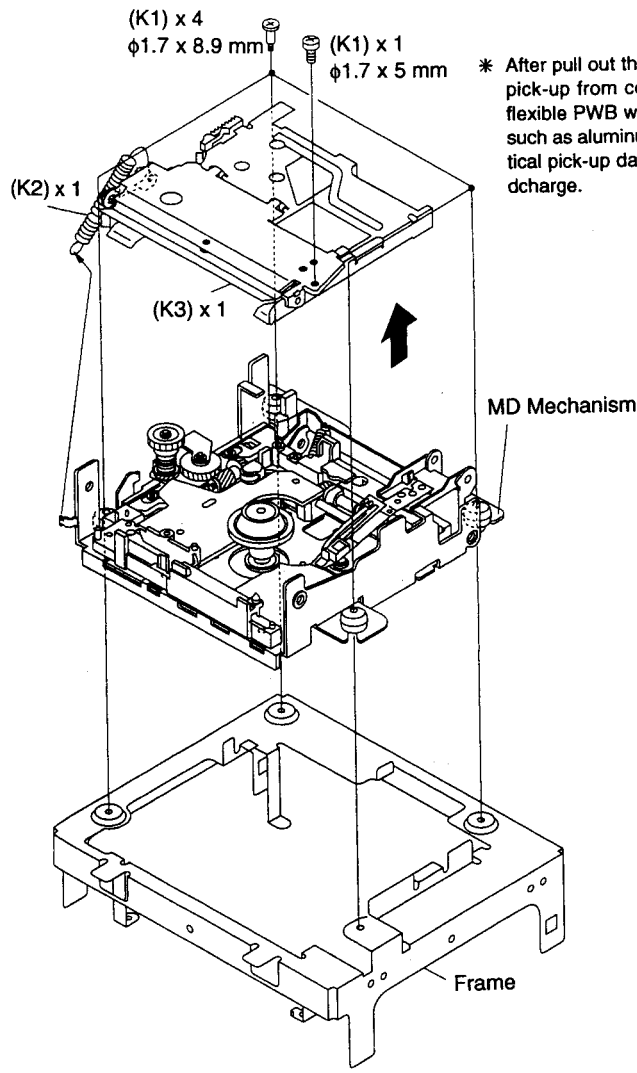
● Mechanism Unit

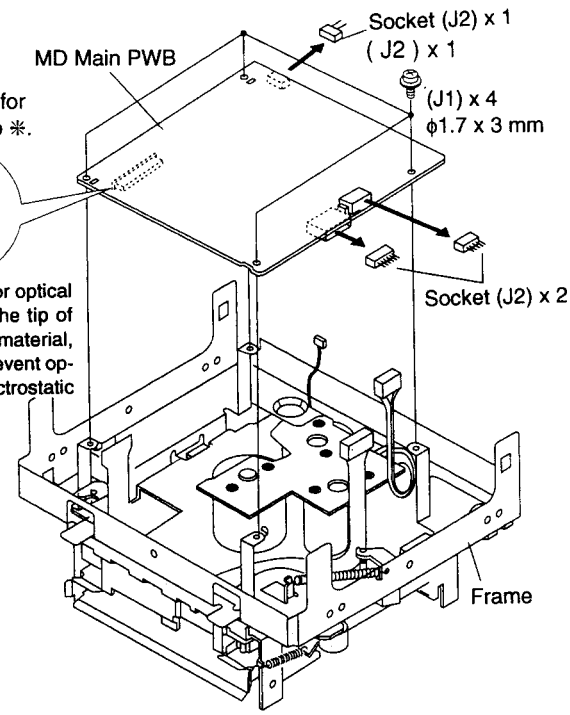
1. Remove 4 screws Ⓓ mounting the mechanism.
2. Disassemble the Mechanism Unit in the arrow direction.



● Mechanism Section







✳ After pull out the flexible PWB for optical pick-up from connector, wrap the tip of flexible PWB with a conductive material, such as aluminum foil, etc. to prevent optical pick-up damage due to electrostatic dcharge.

ADJUSTMENT

● PREPARATION

Required Test Disc

	Type	Test Disc
1	High reflection disc	TGYS1 (SONY) for playback
2	Low reflection disc	Mini disk for recording
3	—	Transparent disc for head alignment

Required Extension Cable

	Type
1	Extension P.W.B.
2	2-Pin extension coonector
3	26-Pin flat cable
4	5-Pin extension connector
5	5-Pin flat cable
6	24-Pin flat cable
7	8-pin flat cable

● MAGNETIC HEAD MOUNTING POSITION

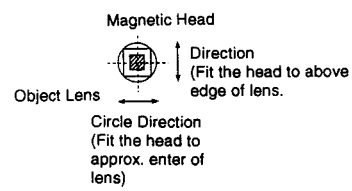
* Be sure to adjust the mounting position whenever the magnetic head or optical pick-up is replaced.
* In order easier to perform the mounting position adjustment, place the pick-up in the center position.

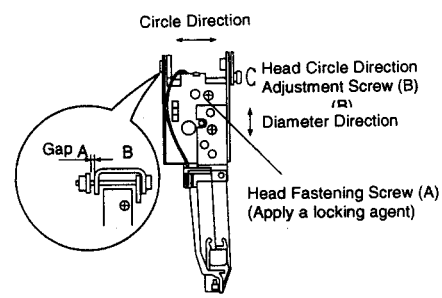
1. Set the transparent disc (Test disc 3).
2. Lower the head up-shift arm manually to lift the head.
3. View the unit from the above to confirm that the object lens of pick-up coincides with the head.

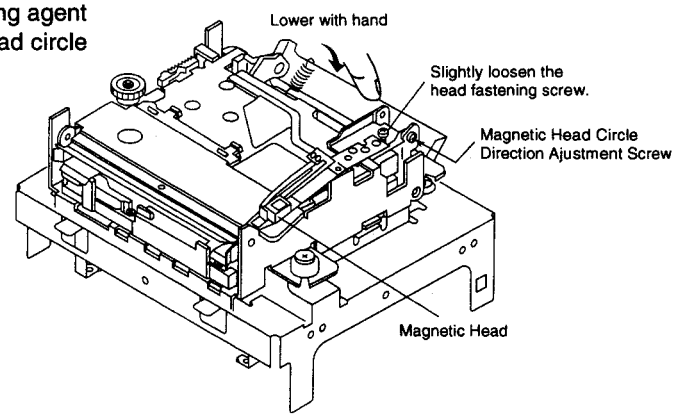
   Diameter direction: Slightly loosen the head fastening screw (A) and slide the head fixture to diameter direction so as the head coincides within the object lens of pick-up.

   Circle direction: Adjust the head circle direction adjustment screw (B) to fit the head within the object lens.

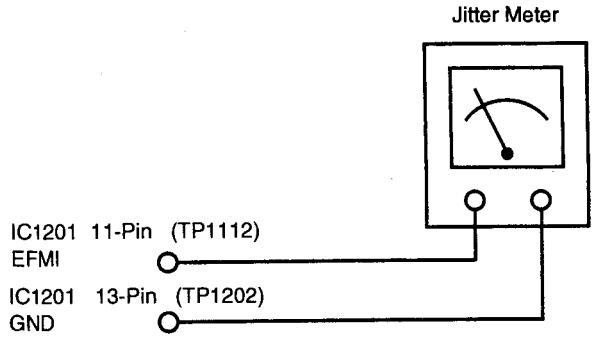
4. Confirm a gap as in figure and ascertain the head that is moving smoothly.
5. After complete adjustment, apply a screw locking agent on head fastening screw (A) and adjusted head circle direction screw (B).





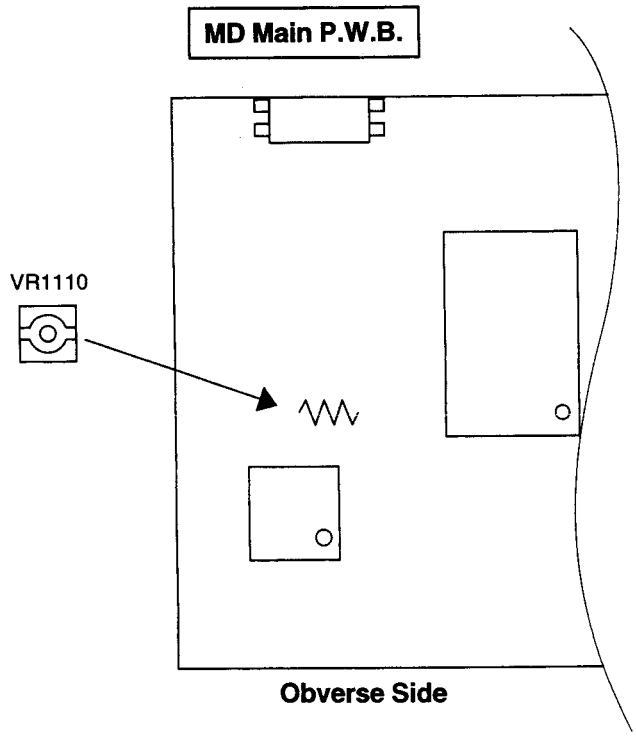


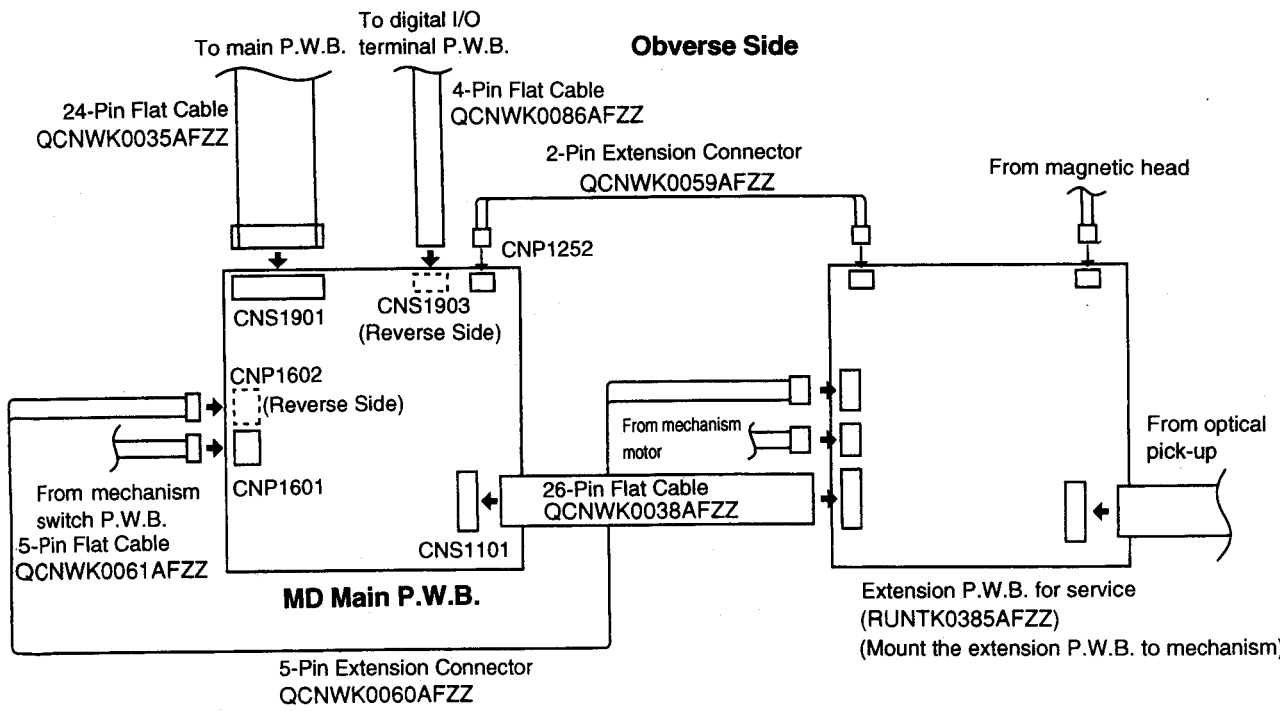
● ADJUSTMENT AND CONFIRMATION



Jitter connection diagram

Load a low reflection disc and playback,
confirm that the jitter reading is less than 35 ns.





● DETAILED DESCRIPTION OF ERROR INDICATION

Error Indication	Content of Error	Remedy
Can't Rec	• DEFECT occured continuously 10 times during REC-PLAY. • Possible record cluster becomes 0 due to DEFECT occurrence during REC-PLAY. • Unable to read address. However repeating try, unable to enter REC mode in 20 seconds.	• Is there any scratch, dust, finger print, black spot, etc. on the disc? Check for eccentricity, warp, etc. of disc.
Impossible	• With the channel status of digital signal from D-IN during REC-PAUSE or REC-PLAY judged as follows. (1) Other than audio. (2) Other than public use. (3) Copy NG by reverse of CD COPY bit. • Respective edit condition does not satisfy in each edit function	• Check the CD for copy inhibit. (Example: CD-R, etc.) • As operation is wrong, do it properly.
Digital Unlock	• Becomes lower against the digital signal input from D-IN during. REC-PAUSE, REC-PLAY or CD FUNC playback. (1) Digital IN PLL is UNLOCKED. (2) Locked other than FS=44.1 kHz.	• Check for abnormality in D-IN signal line. • Is 8.4 MHz clock from MD to CD normal?
Disc Full	• No registering area for program number or character information. (music name disc name, etc.) • Possible recording area is not ramained when entering to REC-PAUSE. • UTOC writing area is full of use when entering to REC-PAUSE or DIVIDE.	• Replace with a REC/PLAY disc having a remained area for registering UTOC. • Replace with the other recording disc possessing an area able to record. • Replace with the other REC/PALY disc having a remained area for writing UTOC.
UTOC Err R	• FTNO > LTNO. • FTNO ≠ 0 or 1. • Unable to read UTOC recorded on the disc.	• Replace with the other disc as abnormality exists in data of UTOC.
UTOC Err A	• Start adress > End adress.	• Replace with the other disc as abnormality exists in data of UTOC.
UTOC Err L0~4	• One of UTOC 0~4 data is looped.	• Replace with the other disc as abnormality exists in data of UTOC.
Not Audio	• Data of not audio is recorded in TNO track mode of presently selected music.	• Select other TNO or replace with other disc.
? Disc	• Data of system ID "MINI" written with ASCII code in TOC is not correct. • Disc type written in TOC is not for Pre, Mastered MD, MD for recording Hybrid MD.	• Unspecified disc. Replace with others and check.
Playback Only	• When entering REC-PAUSE or edit, found that the disc is for playback only.	• As the disc is playback only, replace with a recording disc.
Protected	• Attempt to record or edit as the mis-erasure preventive knob of REC/PLAY disc set to preventive position. • Attempt to edit the write protect track by information written in UTOC.	• Set the mis-erasure preventive knob back to the former position and retry. • As the track attempt to edit is write protected, try it in the other track.
TOC FULL	• UTOC writing area is full of use when entering to REC-PAUSE or DRIVE.	• Replace with a REC/PLAY disc having remained UTOC writing area.
Temp Over	• Inner MD unit temperature becomes excessively high due to some abnormality occurrence.	• Check with the troubleshooting. • Is the unit using in high temperature location?
Mecha Err 1	• Does not come to EJECT complete position however performing EJECT operation.	• Turn OFF the power once and try it again.
Mecha Err 2	• Does not come to LOAD complete position however performing HEAD UP operation.	• Check or signal line to mechanism or loading motor.
Mecha Err 3	• Does not come to HEAD DOWN position however performing HEAD DOWN operation.	
Disc Err RD RD PA WR	• As a result of reading data, data is not correct. Or unable to read correctly. • As abnormality occurred while recording music data, unable to perform correct recording.	• Abnormality in data of TOC, UTOC, disc scratch, etc. Replace with the other disc.

Error Indication	Content of Error	Remedy
TOC Err S TOC Err R TOC Err T	• As a result of reading TOC, data is not correct. • Attempt to read TOC but couldn't.	• Toc information recorded on disc is not meet the MD spec requirement. Replace with the other disc. • Scratch, etc. on the disc, Replace with the other disc.
UTOC W Err	• As abnormality occurred during UTOC rewriting, unable to perform correct rewriting.	• Scratch, etc. on the disc. Replace with the other disc.
Focus Err	• Unable to lead in FOCUS as the disc is inserted.	• Is there any scratch, dust, finger print black spot, etc. on the disc? Check for considerable eccentricity, warp etc. disc.
Blank Disc	• As a result of reading UTOC, all TNO and NAME character number is 0.	• Record and check for disc possible to record.
Detect	• Focus lead in error, etc. occurred due to shock during REC-PLAY.	• Is there any scratch, dust, finger print, black spot, etc. on the disc? Check for considerable eccentricity, warp, etc. of disc.

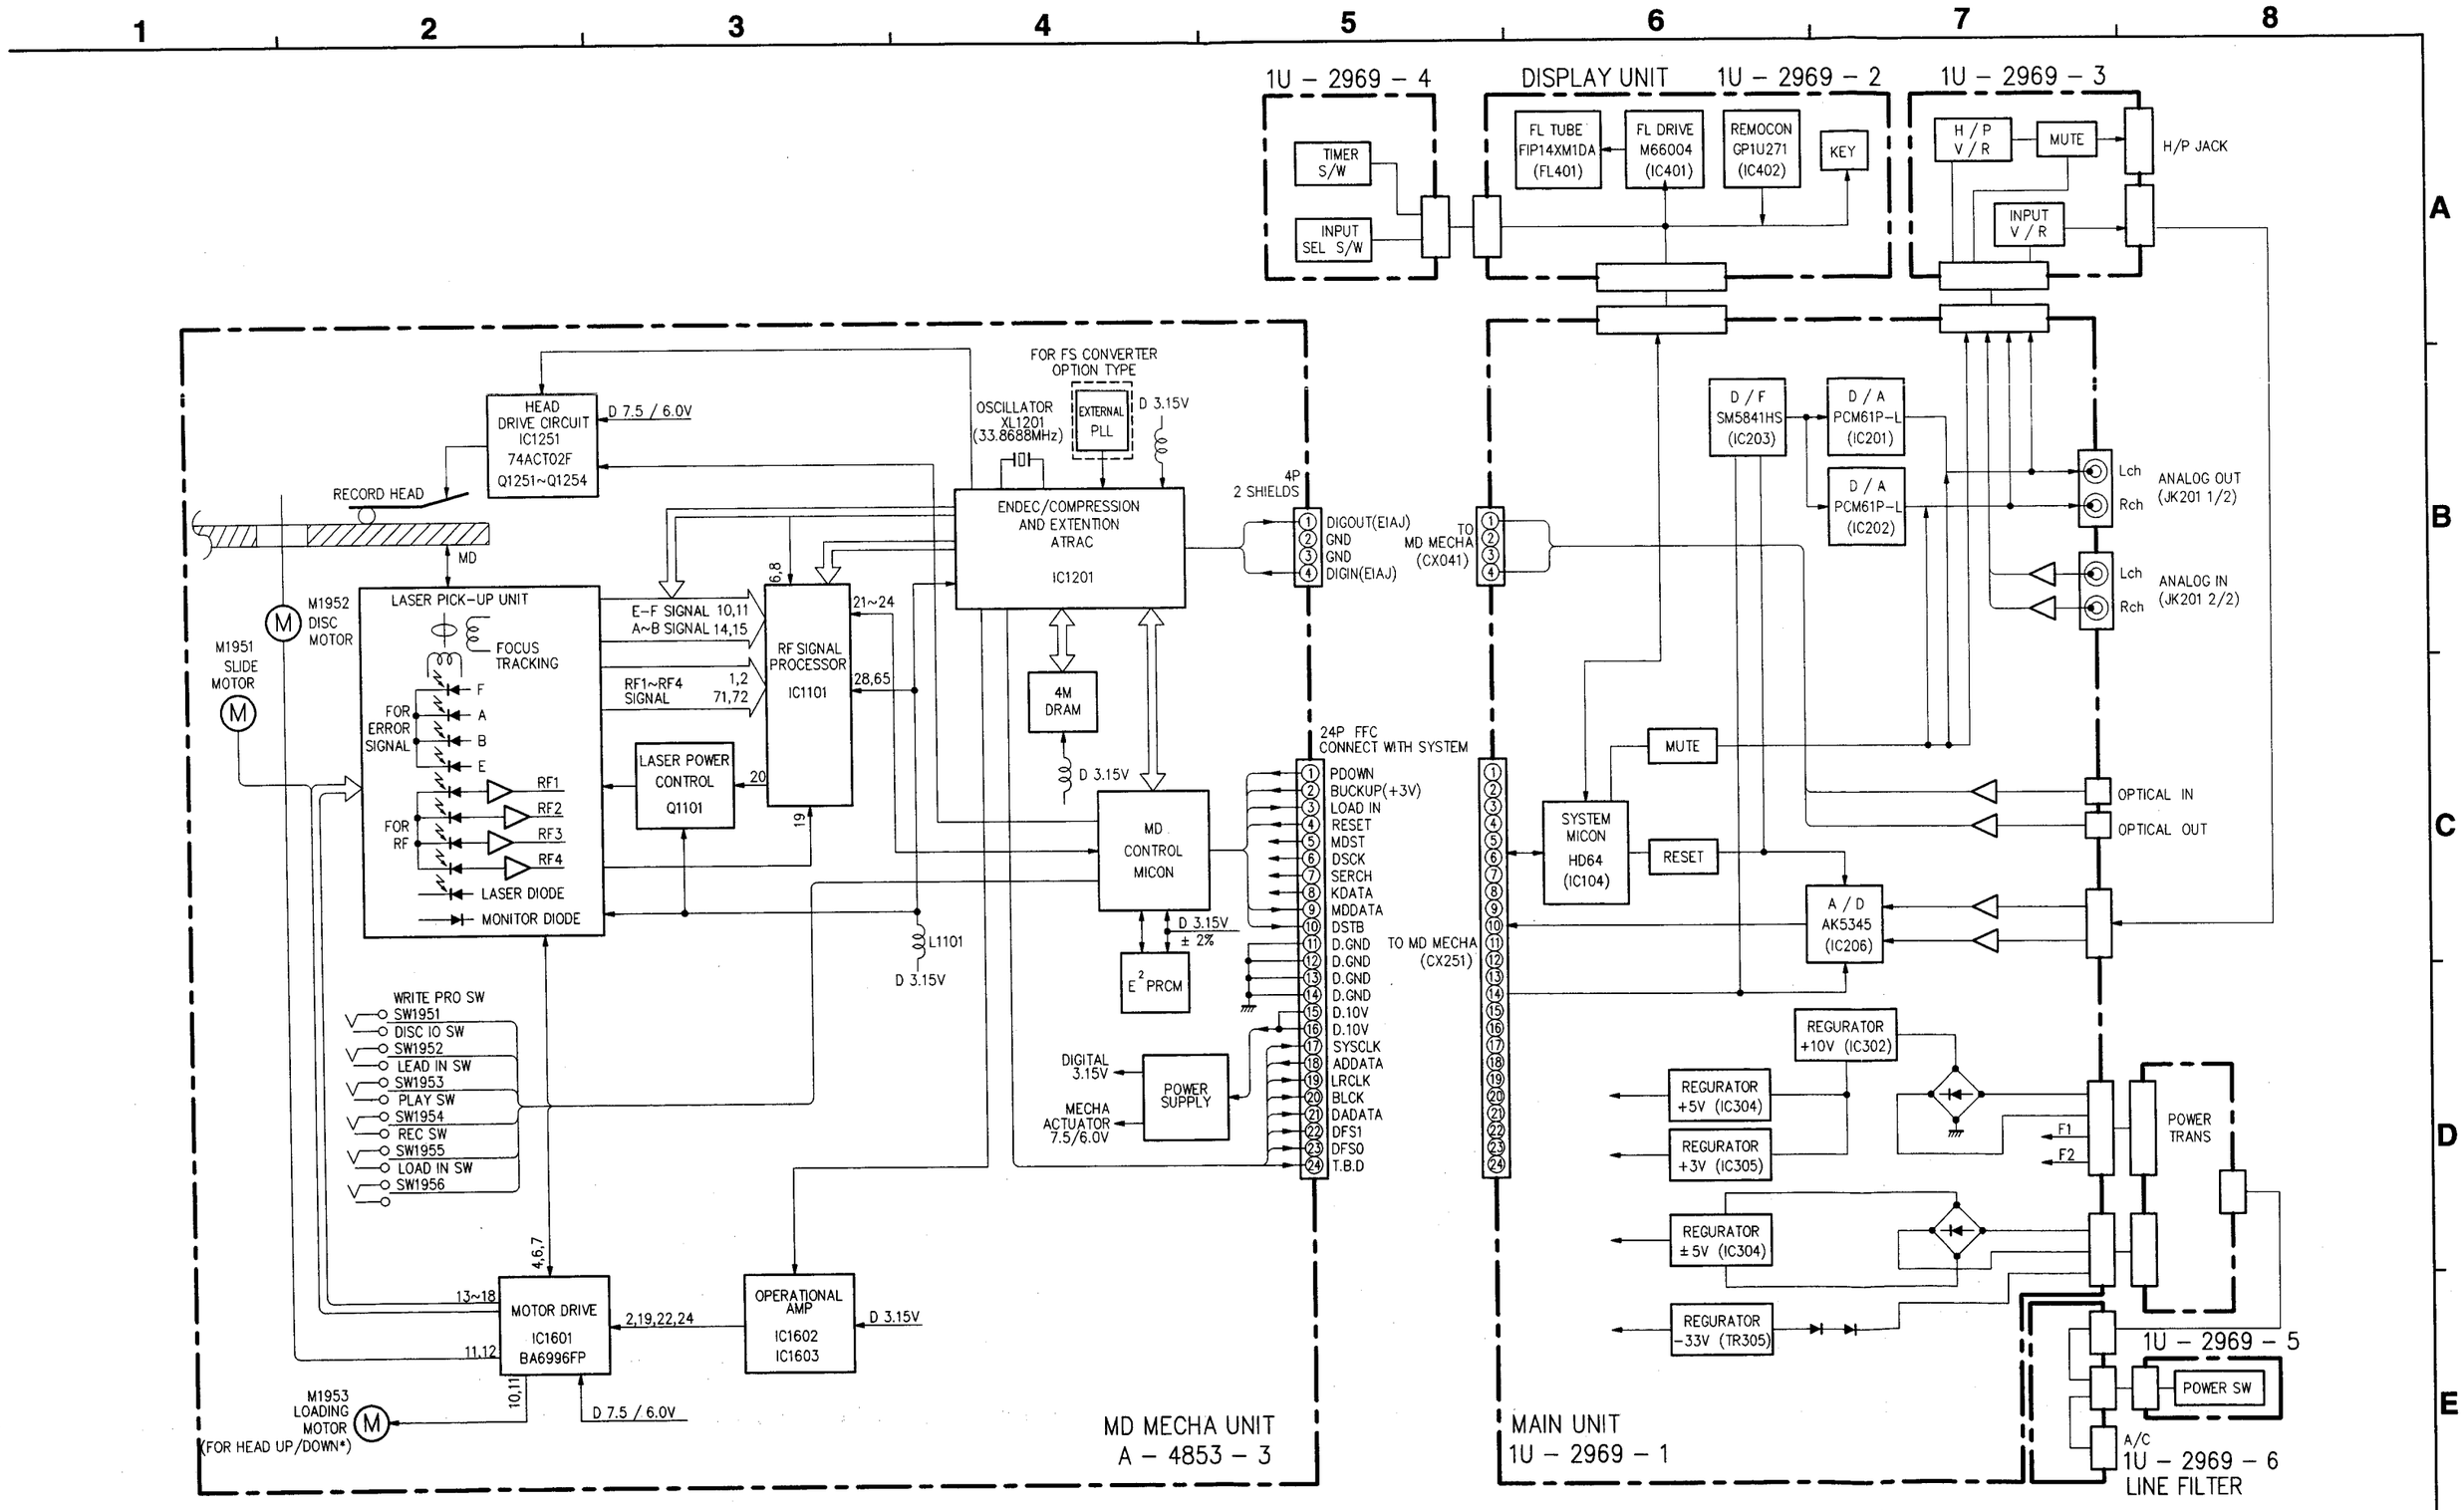
DETAILED DESCRIPTION OF MECHANISM ERROR

Error Indication	Content of Error
Mecha Err 1_*	Does not complete EJECT for long?
Mecha Err 2_*	Does not perform HEAD UP for long?
Mecha Err 1_*	Does not perform HEAD DOWN for long?

* =E	EJECT complete position	< 1.3 V
* =M	Horizontal midway position	> 3.06 V
* =L	Load Complete position	1.853~2.48 V
* =D	HEAD DOWN position	1.3 ~ 1.853 V

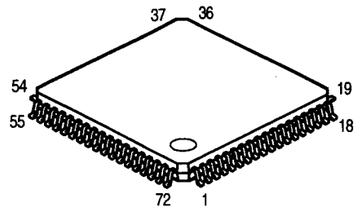
NOTE:

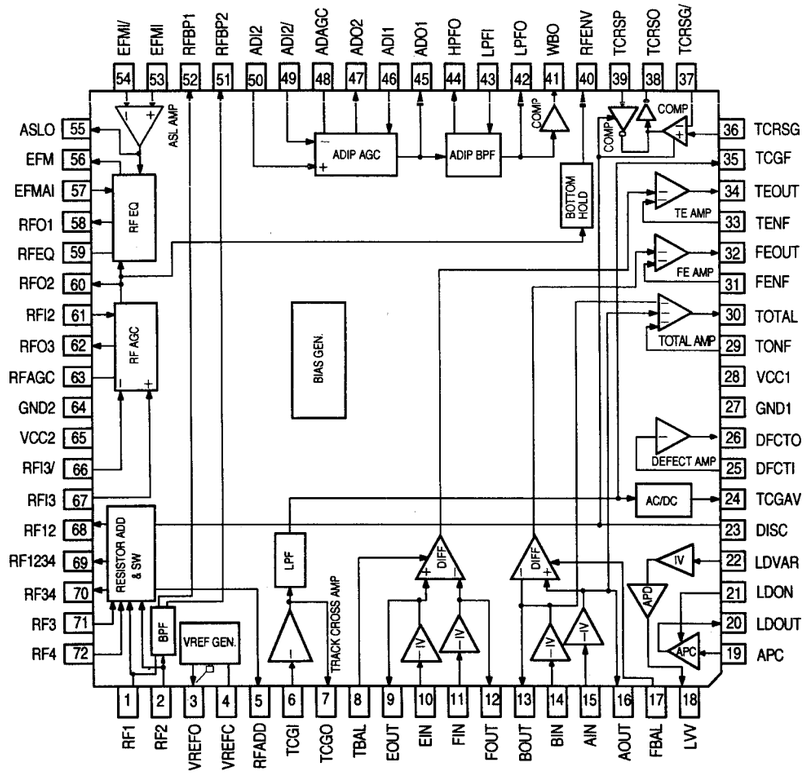
BLOCK DIAGRAM



IC TERMINAL FUNCTION LIST

1R3R50
MD Mechanism Unit (IC1101)

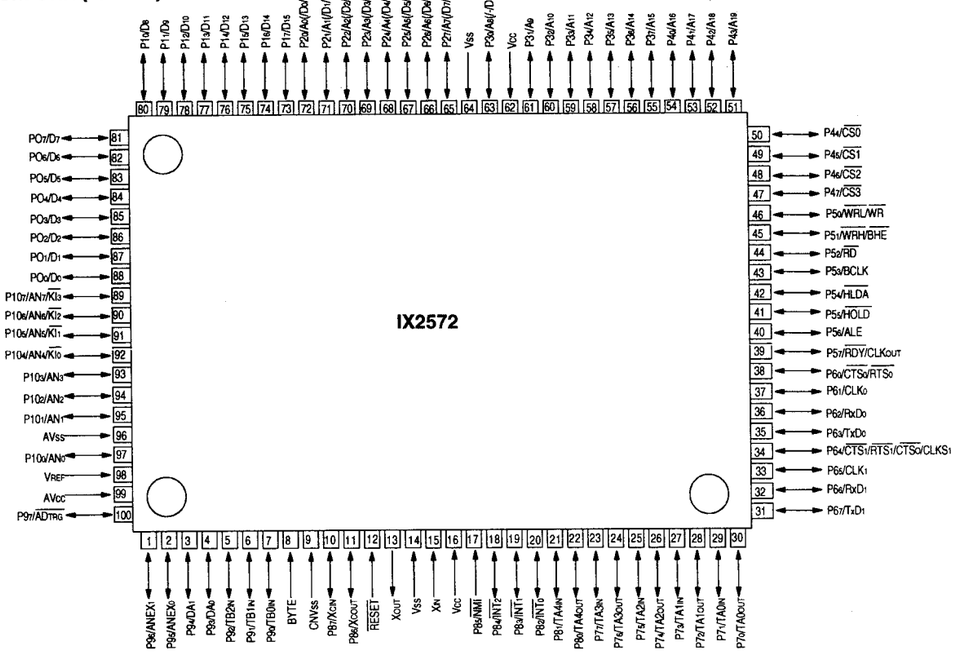




IR3R50 Terminal Function

Pin No.	Symbol	I/O	Function	Connect to
1	RF1	I	RF signal input terminal 1. Inputs pick-up RF output signal.	Pick-up
2	RF2	I	RF signal input terminal 2. Inputs pick-up RF output signal.	Pick-up
3	VREFO	O	Reference voltage (Vcc/2) output terminal. Connect a bypass capacitor of 1μF or greater.	Signal process LSI
4	VREFO	I	Bypass capacitor connecting terminal for inputting reference voltage.	
5	RFADD	O	Resistance adding output terminal of DF1~4.	
6	TCGI	I	Track cross detecting signal amp reverse input terminal at group.	
7	TCGO	O	Track cross detecting signal amp output terminal.	
8	TBAL	I	Tracking balance adjustment terminal.	Signal process LSI
9	EOUT	O	I-V conversion output terminal of photo diode output E for servo.	
10	EIN	I	Input terminal of photo diode output E for servo.	
11	FIN	I	Input terminal of photo diode output F for servo.	
12	FOUT	O	I-V conversion output terminal of photo diode output F for servo.	
13	BOUT	O	I-V conversion output terminal of photo diode output B for servo.	
14	BIN	I	Input terminal of photo diode output B for servo.	
15	AIN	I	Input terminal of photo diode output A for servo.	
16	AOUT	O	I-V conversion output terminal of photo diode output A for servo.	
17	FBAL	I	FOCUS balance adjustment terminal.	Signal process LSL
18	LVV	O	Power supply output terminal for monitor diode.	Pick-up
19	APC	I	Input terminal of monitor diode output.	Pick-up
20	LDOUT	O	Terminal for laser diode drive external PNP transistor.	Pick-up
21	LDON	I	Laser outpput ON/OFF control terminal. H or open : Action L: Non-action	Microcomputer
22	LDVAR	I	Laser output control terminal. Laser output becomming maximum at spplying power supply voltage and becoming maximum at 0V.	Microcomputer
23	DISC	I	Disc mode switching signal input terminal. H or open : Pit line L : Group	Microcomputer
24	TCGAV	O	DC conversion output of track cross amp (group) output.	Microcomputer
25	DFCTI	I	Refect detecting amp reverse input terminal.	
26	DFCTO	O	Defect detecting amp output terminal.	Signal process LSI
27	GND1		GND terminal.	
28	VCC1		Power supply terminal. (connect a 2.2 μF capacitor across GND 1.	
29	TONF	I	TOTAL output amp feadback terminal.	
30	TOTAL	O	TOTAL output terminal.	Signal process LSI
31	FENF	I	Focus error amp feedback terminal.	
32	FEOUT	O	Focus error signal output terminal.	Signal process LSI
33	TENF	I	Focus error amp feedback terminal.	
34	TEOUT	O	Tracking error signal output terminal.	Signal process LSI
35	TCGF	O	Track cross amp (group) output.	
36	TCRSG	I	Track cross comparator non-reverse input terminal (group mode).	
37	TCRSG/	I	Track cross comparator reverse input terminal (group mode).	
38	TCRSO	O	Track cross output terminal.	Signal process LSI
39	TCRSP	I	Track cross comparator input terminal (pit mode).	
40	RFENV	O	RF signal envelope input terminal	
41	WBO	O	ADIP signal output terminal	Signal process LSI
42	LPFO	O	ADIP signal LPF amp output terminal.	
43	LPFI	I	ADIP signal LPF amp input terminal.	
44	HPFO	O	ADIP signal HPF amp output terminal.	
45	ADO1	O	ADIP signal preamp output terminal.	
46	ADI1	I	ADIP signal preamp input terminal.	
47	ADO2	O	ADIP signal AGC amp output terminal.	
48	ADAGC		Filter capacitor connecting terminal for ADIP signal AGC.	
49	ADI2/	I	ADIP AGC amp reverse input terminal.	
50	ADI2	I	ADIP AGC amp non-reverse input terminal.	
51	RFBP2	O	BPF output terminal of RF2 input signal.	
52	RFBP1	O	BPF output terminal of RF1 input signal.	
53	EFMI	I	EFM input terminal (non-reverse).	Signal process LSI
54	EFMI/	I	EFM input terminal (reverse).	Signal process LSI
55	ASLO	O	Slice control output terminal.	
56	EFM	O	RF signal output terminal.	Signal process LSI
57	EFMAI	I	Equalizer amp input terminal.	
58	RFO1	O	RF signal filter amp output terminal.	
59	RFEQ		Capacitor connecting terminal for RF signal equalizer.	
60	RFO2	O	RF signal preamp output terminal.	
61	RFI2	I	RF signal preamp input terminal.	
62	RFO3	O	RF signal AGC amp output terminal.	
63	RFAGC		Filter capacitor connecting terminal for RF signal AGC.	
64	GND2		GND terminal.	
65	VCC2		Power supply terminal. Connect a 2.2 μF capacitor across GND2.	
66	RFI3/	I	RF signal AGC amp reverse input terminal.	
67	RFI3	I	RF signal AGC amp non-reverse input terminal.	
68	RF12	O	Resistance adding output terminal of RF1 input signal and RF2 input signal.	
69	RF1234	O	Resistance adding output terminal of RF1~4 input signal.	
70	RF34	O	Resistance adding output terminal of RF3 input signal and RF4 input signal.	
71	RF3	I	RF signal input terminal 3. Inputs RF signal output of pick-up.	Pick-up
72	RF4	I	RF signal input terminal 4. Inputs RF signal output of pick-up.	Pick-up

IX2572
MD Mechanism Unit (IC1401)



IX2572 Terminal Function

Pin No.	Symbol	I/O	Function
1	P96/ANEX1	O	No connection.
2	P95/ANEX0	O	No connection.
3	P94/DA1	O	LDVAR (laser power adjustment output).
4	P93/DA0	O	ADJS (automatic adjustment step check).
5	P92/TB2IN	O	No connection.
6	P91/TB1IN	I	LDSWCK input (interrupts at simple).
7	P90/TB0IN	I	ERR input.
8	BYTE	I	BYTE
9	CNVss	I	CNVss
10	P87/XCIN	O	No connection.
11	P86/XCOUT	O	No connection.
12	RESET	I	RESET input.
13	XOUT		No connection.
14	Vss		GND
15	XIN	(I)	EXTAL (8.4672 MHz input).
16	Vcc		+3.5 V
17	P85/NMI	I	—
18	P84/INT2	I	DINT (interrupt input from MD REC/PLAY LSI).
19	P83/INT1	I	DSENSE (MD REC/PLA LSI servo sense input).
20	P82/INT0	I	ST-ID/MD-ON.
21	P81/TA4IN	I	CD search input (sync REC interrupt input).
22	P80/TA4OUT	O	MDRSW output.
23	P77/TA3IN	O	FSW1 (SW power supply frequency shifting).
24	P76/TA3OUT	O	FSW2 (H/L shifting of SW power supply f).
25	P75/TA2IN	I	P-DOWN (power down detection).
26	P74/TA2OUT	O	HDON (magnetic head current ON/OFF output).
27	P73/TA1IN	O	LD+ (loading motor ⊕ control output).
28	P72/TA1OUT	O	LD– (loading motor control output).
29	P71/TA0IN	I	CIN (track count signal input).
30	P70/TA0OUT	I	INNSW (inner SW detection input).
31	P67/TxD1	I	
32	P66/RxD1	I	
33	P65/CLK1	I	—
34	P64/CTS1/RTS1/CTS0/CLKS1	O	DSTB (system computer communication feasible or busy).
35	P63/TxD0	O	MDDATA (MD data output) 32 byte LSB first.
36	P62/RxD0	I	KDATA (system computer data input) 32 byte LSB first.
37	P61/CLK0	I	DSCK (system computer communication input).
38	P60/CST0/RTS0	I	—
39	P57	O	R/P (REC/PLAY switching).
40	P56	I	FOK (focus servo state monitor input).
41	P55	O	HF ON (high frequency overrup ON/OFF output).
42	P54		—
43	P53	I	SELO (H: 4-generation, L: 3-generation LSI).
44	P52	O	SYRS (MD R/P LSI register select signal output).
45	P51	O	SYRD (MD R/P LSI read signal output).
46	P50	O	SYWR (MD R/P LSI write signal output).
47	P47	I/O	SYSD7 (ENDEC/ATRAC data bus 7).
48	P46	I/O	SYSD6 (ENDEC/ATRAC data bus 6).
49	P45	I/O	SYSD5 (ENDEC/ATRAC data bus 5).
50	P44	I/O	SYSD4 (ENDEC/ATRAC data bus 4).
51	P43	I/O	SYSD3 (ENDEC/ATRAC data bus 3).
52	P42	i/O	SYSD2 (ENDEC/ATRAC data bus 2).
53	P41	I/O	SYSD1 (ENDEC/ATRAC data bus 1).
54	P40	I/O	SYSD0 (ENDEC/ATRAC data bus 0).
55	P37	O	No connection.
56	P36	O	No connection.
57	P35	O	No connection.
58	P34	O	EEPRO (E_2 PROM protect cancel)
59	P33	O	EPCS (E_2 PROM chip selector output).
60	P32	I/O	EERD (E_2 PROM serial data output).
61	P31	O	EEPK (E_2 PROM serial clock output).
62	Vcc	I	+3.15 V
63	P30	O	No connection.
64	Vss		GND
65	P27	O	No connection.
66	P26	O	No connection.
67	P25	O	No connection.
68	P24	O	No connection.
69	P23	O	DISC (H: Pit).
70	P22	O	PCNTO
71	P21	O	PCNT1
72	P20	O	LDON (H: ON)
73	P17	O	ANLPTR output.
74	P16	O	ADPON output.
75	P15	O	DAPON output.
76	P14	O	DFS0 output.
77	P13	O	DFS1 output.
78	P12	O	DIGEX output.
79	P11	O	DIGCD output.
80	P10	O	XRST (system reset output).
81	P07	O	ADMUTE output.
82	P06	O	EMPHA output.
83	P05	O	DA MUTE (audio mute ON/OFF output).
84	P04	O	MUTE
85	P03	O	DOUTM
86	P02	I	TEST2 (special mode select 2).
87	P01	I	TEST1 (special mode select 1).
88	P00	I	TEST0 (special mode select 0)
89	P107/AN7/KI3	I	TCG (TOTAL signal detection input).
90	P106/AN6/KI2	I	AVCK2 (AD/DA section 3.1 V monitor input).
91	P105/AN5/KI1	I	AVCK1 (DOUT section 5V monitor input).
92	P104/AN4/KI0	I	TEMP (temperature sensor detection input).
93	P103/AN3	I	MINF (disk type/REC window).
94	P102/AN2	I	TESTK1 (test key input1).
95	P101/AN1	I	TESTK2 (test key input2).
96	AVss		GND
97	P100/AN0	I	HIFN (input position/head position).
98	VREF		V_{REF} (+3.15 V)
99	AVcc		+3.15 V

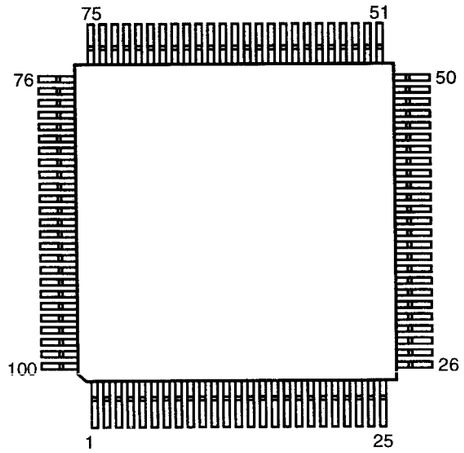
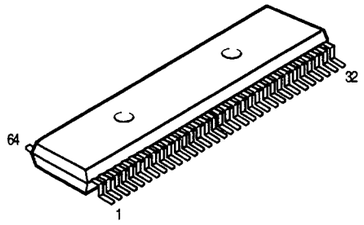
HD6433837B48H (IC104)
Microcomputer

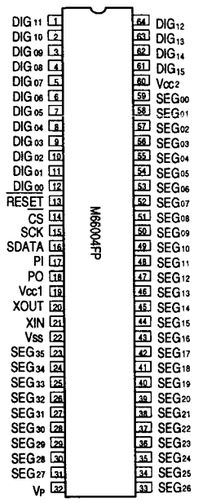


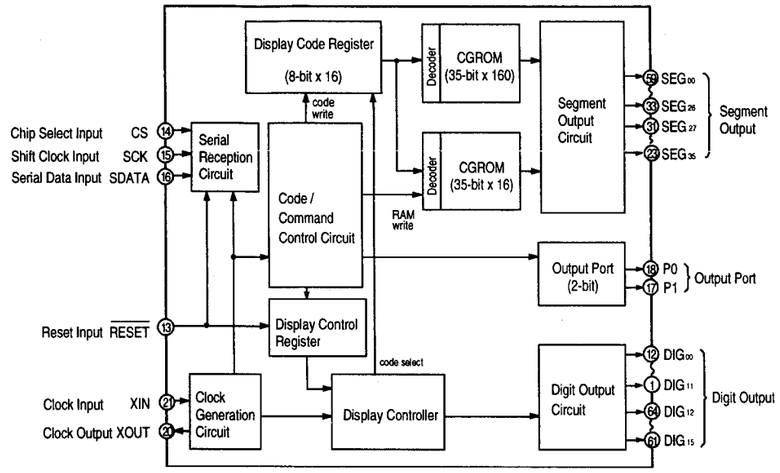
HD6433837B48H Terminal Function

Pin No.	Symbol	Port Name	I/O	Ini	Ext	Function
1	Pc3/AN11	TMPLY	I	—	P.UP	Timer PLAY signal input.
2	AVss	AVss	I	—	—	Connect with GND (GND for A/D converter).
3	TEST	TEST	I	—	—	Connect with GND (Test terminal).
4	X2	X2	I	—	—	Open (Sub clock output).
5	X1	X1	O	—	—	Connect with +5V (Sub clock input terminal).
6	Vss	Vss	I	—	—	Connect with GND for system.
7	OSC1	OSC1	I	—	—	Ceramic oscillator input.
8	OSC2	OSC2	O	—	—	Ceramic oscillator output.
9	$\overline{RES}$	$\overline{RESET}$	I	—	—	Reset signal input (oscillation stable time: 40 msec).
10	MD0	MD0	I	—	—	Connect with +5V (Reset control).
11	P20/$\overline{IRQ4}$/$\overline{ADTRG}$	JOGA	I	—	P.UP	Pulse noninverting input terminal of jog A.
12	P21/UD	SRVICE	I	—	P.UP	Service mode judgment input ("H": normal mode, "L": service mode.
13	P22	FLDA	O	L	—	Data output to FL tube controller.
14	P23	FLCK	O	L	—	Clock output to FL tube controller.
15	P24	FLCS	O	L	—	Chip selection output to FL tube controller.
16	P25		O	L	—	Open (Not used).
17	P26		O	L	—	Open (Not used).
18	P27	CE	O	L	—	Latch output for LC8903 microcomputer interface.
19	P30/SCK1	CL	O	L	—	Clock output for LC8903 microcomputer interface.
20	P31/SI1	DO	I	L	—	Data input for LC8903 microcomputer interface.
21	P32/SO1	DI	O	L	—	Address output for LC8903 microcomputer interface.
22	P33/SCK2	SHT	O	L	—	Open (Not used).
23	P34/SI2	SO	O	L	—	Open (Not used).
24	P35/SO2	SI	O	L	—	Open (Not used).
25	P36/STRB	C/D	O	L	—	Open (Not used).
26	P37/$\overline{CS}$	CS	O	L	—	Open (Not used).
27	Vss	Vss	I	—	—	Connect with GND (GND for system).
28	V3		I	—	—	Open (power supply for LCD).
29	V2		I	—	—	Open (power supply for LCD).
30	V1		I	—	—	Open (power supply for LCD).
31	Vcc	Vcc	I	—	—	Connect with +5V (power supply for system).
32	PA3/COM4	EMPHA	I	—	(UP)	Emphasis signal input ("H": emphasis, "L": non-emphasis).
33	PA2/COM3	ERROR	I	—	P.DW	Error signal input "H": error (lock NG), "L": non-error (lock OK)).
34	PA1/COM2	SUB1	I	—	(UP)	fs input1 "L" ┐ 44.1 "L" ┐ 48 "H" ┐ 32(kHz) "H" ┐ unlock
35	PA0/COM1	SUB2	I	—	(UP)	fs input2 "L" ┘ "H" ┘ "H" ┘ "L" ┘
36	P50/WKP0/SEG1	COPY	O	H	(UP)	COPY bit setting terminal ("H": non-rights reserved, "L": rights reserved).
37	P51/WKP1/SEG2	CTG1	O	H	(UP)	Category setting terminal 1 "H" ┐ "L" ┐
38	P52/WKP2/SEG3	CTG2	O	H	(UP)	Category setting terminal 2 "H" ┘ sample rate converter "L" ┘ general
39	P53/WKP3/SEG4	CTG3	O	L	(UP)	Category setting terminal 3 "H" ┘ "L" ┘
40	P54/WKP4/SEG5	LBIT	O	H	(UP)	L bit setting terminal ("H": original, "L": high order).
41	P55/WKP5/SEG6		O	L	—	Open (Not used).
42	P56/WKP6/SEG7		O	L	—	Open (Not used).
43	P57/WKP7/SEG8		O	L	—	Open (Not used).
44	P60/SEG9		O	L	—	Open (Not used).
45	P61/SEG10		O	L	—	Open (Not used).
46	P62/SEG11		O	L	—	Open (Not used).
47	P63/SEG12		O	L	—	Open (Not used).
48	P64/SEG13		O	L	—	Open (Not used).
49	P65/SEG14		O	L	—	Open (Not used).
50	P66/SEG15		O	L	—	Open (Not used).
51	P67/SEG16		O	L	—	Open (Not used).
52	P70/SEG17		O	L	—	Open (Not used).
53	P71/SEG18		O	L	—	Open (Not used).
54	P72/SEG19		O	L	—	Open (Not used).
55	P73/SEG20		O	L	—	Open (Not used).
56	P74/SEG21		O	L	—	Open (Not used).
57	P75/SEG22		O	L	—	Open (Not used).
58	P76/SEG23		O	L	—	Open (Not used).
59	P77/SEG24		O	L	—	Open (Not used).
60	P80/SEG25		O	L	—	Open (Not used).
61	P81/SEG26		O	L	—	Open (Not used).
62	P82/SEG27		O	L	—	Open (Not used).
63	P83/SEG28		O	L	—	Open (Not used).
64	P84/SEG29		O	L	—	Open (Not used).
65	P85/SEG30		O	L	—	Open (Not used).
66	P86/SEG31		O	L	—	Open (Not used).
67	P87/SEG32		O	L	—	Open (Not used).
68	P90/SEG33		O	L	—	Open (Not used).
69	P91/SEG34		O	L	—	Open (Not used).
70	P92/SEG35	ADRST	O	L	—	Open (Not used).
71	P93/SEG36	AMUTE	O	L	—	Open (Not used).
72	P94/SEG37/M	XRST	O	L	—	Open (Not used).
73	P95/SEG38/DO	RECLED	O	L	—	Open (Not used).
74	P96/SEG39/CL2	BKLIGHT	O	L	—	Open (Not used).
75	P97/SEG40/CL1	STB	I	L	P.UP	Strobe signal input.
76	Vcc	Vcc	I	—	—	Connect with +5V (power supply for system).
77	P10/TMOW	C/O.OUT	O	L	—	COAX/OPT switching signal output ("H": COAX, "L": OPT).
78	P11/TMOFL	D/A.OUT	O	L	—	Digital/Analog switching signal output ("H": Digital, "L": Analog).
79	P12/TMOFH	POWER	O	L	—	Open (Not used).
80	P13/TMIG		O	L	—	Open (Not used).
81	P14/PWM		O	L	—	Open (Not used).
82	P15/IRQ1/$\overline{TMIB}$	REMOTE	I	—	P.UP	Remote control receiving interrupt terminal.
83	P16/IRQ2/$\overline{TMIC}$	75E	O	—	—	Connect with GND "H": DMD-7.5E, L: DMD-1500.
84	P17/IRQ3/$\overline{TMIF}$	JOGA	O	—	P.UP	Pulse input for jog A.
85	P40/SCK3	RTS	O	H	P.UP	Status receive control. "H": Inhibit receive, "L": Permit receive.
86	P41/RXD	RXD	I	H	P.UP	Status receive terminal.
87	P42/TXD	TXD	O	H	P.UP	Command transmit terminal.
88	P43/$\overline{IRQ0}$	CTS	I	H	P.UP	Command transmit control terminal. "H": Inhibit transmit, "L": Permit transmit.
89	AVcc	AVcc	I	—	—	Connect with +5V (power supply for A/D converter).
90	PB0/AN0	KEY0	I	—	P.UP	Key matrix input 0 (A/D conversion use).
91	PB1/AN1	KEY1	I	—	P.UP	Key matrix input 1 (A/D conversion use).
92	PB2/AN2	KEY2	I	—	P.UP	Key matrix input 2 (A/D conversion use).
93	PB3/AN3	KEY3	I	—	—	Connect with GND.
94	PB4/AN4		I	—	—	Connect with GND.
95	PB5/AN5		I	—	—	Connect with GND.
96	PB6/AN6		I	—	—	Connect with GND.
97	PB7/AN7	JOGB	I	—	P.UP	Pulse input of jogB.
98	PC0/AN8	D/A.IN	I	—	P.UP	Switching input for DIG/ANA "H": digital, "L": analog.
99	PC1/AN9	C/O.IN	I	—	P.UP	Switching input for COAX/OPT "H": GOAX, "L": OPT.
100	PC2/AN10	TMREC	I	—	P.UP	Input for timer REC.

M66004FP (IC401)







M66004FP Terminal Function

Symbol	Name	Function
$\overline{RESET}$	Reset Input	Initializes internal state of M66004.
$\overline{CS}$	Chip Select Input	Able to communicate with MCU in "L" mode. Command from MCU will be disregareded in "H" mode.
SCK	Shift Clock Input	Shifts input data at rise from "L" to "H".
SDATA	Serial Data Input	Inputs character code or command data needed to display from MSB.
XIN XOUT	Clock Input Clock Output	Sets oscillation frequency by connecting external resistor and capacitor (maximum oscillation frequency fosc (max)=1MHz). Also feasible to apply external clock. In this case, injects external clock to Xin terminal and opens Xout terminal.
DIG 00 ~ DIG15	Digit Output	Connect to digit terminal of VFD. DIG00~DIG15 correspond to the 1st figure and 16th figure respectively.
DIG 00 ~ DIG35	Segment Output	Connect to segment terminal of VFD. For corresponding SEG00~SEG35 to segment terminal of VFD, refer to the figure right.
P0, P1		Output port (static movement).
Vcc1		Positive power supply terminal for internal logic.
Vcc2		Positive power supply terminal for high tension output port.
Vss		GND terminal.
Vp		Negative power supply terminal for VFD drive.

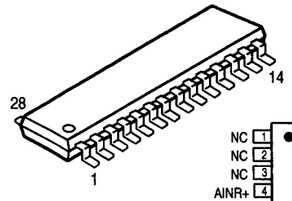
(Forwarding connection of segment output terminal.)

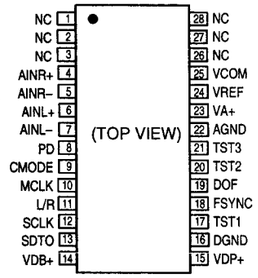
00	01	02	03	04
05	06	07	08	09
10	11	12	13	14
15	16	17	18	19
20	21	22	23	24
25	26	27	28	29
30	31	32	33	34

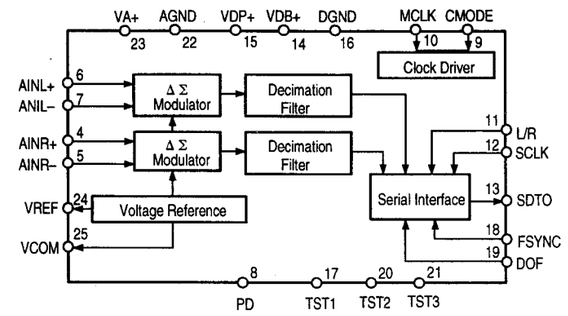
35

☐ in the right figure indicates 1 dot of segment, the figure in ☐ shows the segment output terminal number (00 ~ 35) to be connected.

AK5345-VS-E1 (IC206)







AK5345-VS-E1 Terminal Function

Pin No.	Symbol	I/O	Function
4	AINR+	I	Rch analog positive input terminal.
5	AINR–	I	Rch analog negative input terminal.
6	AINL+	I	Lch analog positive input terminal.
7	AINL–	I	Lch analog negative input pin.
8	PD	I	Power down terminal. Becomes "H" in power down mode. From "↓" offset calibration will start. When tuning ON the power or shift the frequency, make sure to perform calibration once.
9	CMODE	I	Master clock selection terminal. "L": CLK=256 fs (12.288 MHz @ fs=48 kHz) "H": CLK=384 fs (18.432 Mhz @ fs=48 kHz)
10	MCLK	I	Master clock input terminal. CMODE="H": 384 fs CMODE="L": 256 fs
11	L/R	I	Input channel selection terminal. Inputs fs clock. When DOF="L", outputs Lch at "H", Rch at "L". When DOF="H", polarity is reversed.
12	SCLK	I	Serial data clock terminal. With "↓" of this terminal, outputs 1-bit of output data. Inputs 32 fs ~ 64 fs clock.
13	SDTO	O	Serial data output terminal. Data is output by close forwarded 2's compliment, MSB first, 16-bit. After output 16-bit, outputs "L". Mode is "L" at a time power down (PD="H").
14	VDB+	—	Power supply terminal of digital section, +5V (silicon PWB potential).
15	VDP+	—	Power supply terminal of digital section, +5V.
16	DGND	—	Ground terminal of digital section.
17	TST1	I	Test pin. Make this terminal opened or "L".
18	FSYNC	I	Frame sync clock terminal. SDATA will be shifted by SCLK at "H".
19	DOF	I	Digital output format terminal. "L": Close to forward "H" I^2S interchange format
20	TST2	O	Test terminal. Use as opened.
21	TST3	O	Test terminal. Use as opened.
22	AGND	—	Analog ground terminal.
23	VA+	—	Analog power supply terminal, +5V.
24	VREF	O	Reference voltage output terminal, (VA+) –3.0V Between VA+ connect a 10μF or lesser electrolytic capacitor and a 0.1μF ceramic capacitor.
25	VCOM	O	Common voltage output terminal, (VA+) –2.5V. Between VA+ connect a 0.1μF ceramic capacitor.

Note: All other terminals except the above are no connection (NC). NC terminals are not bonded internally.

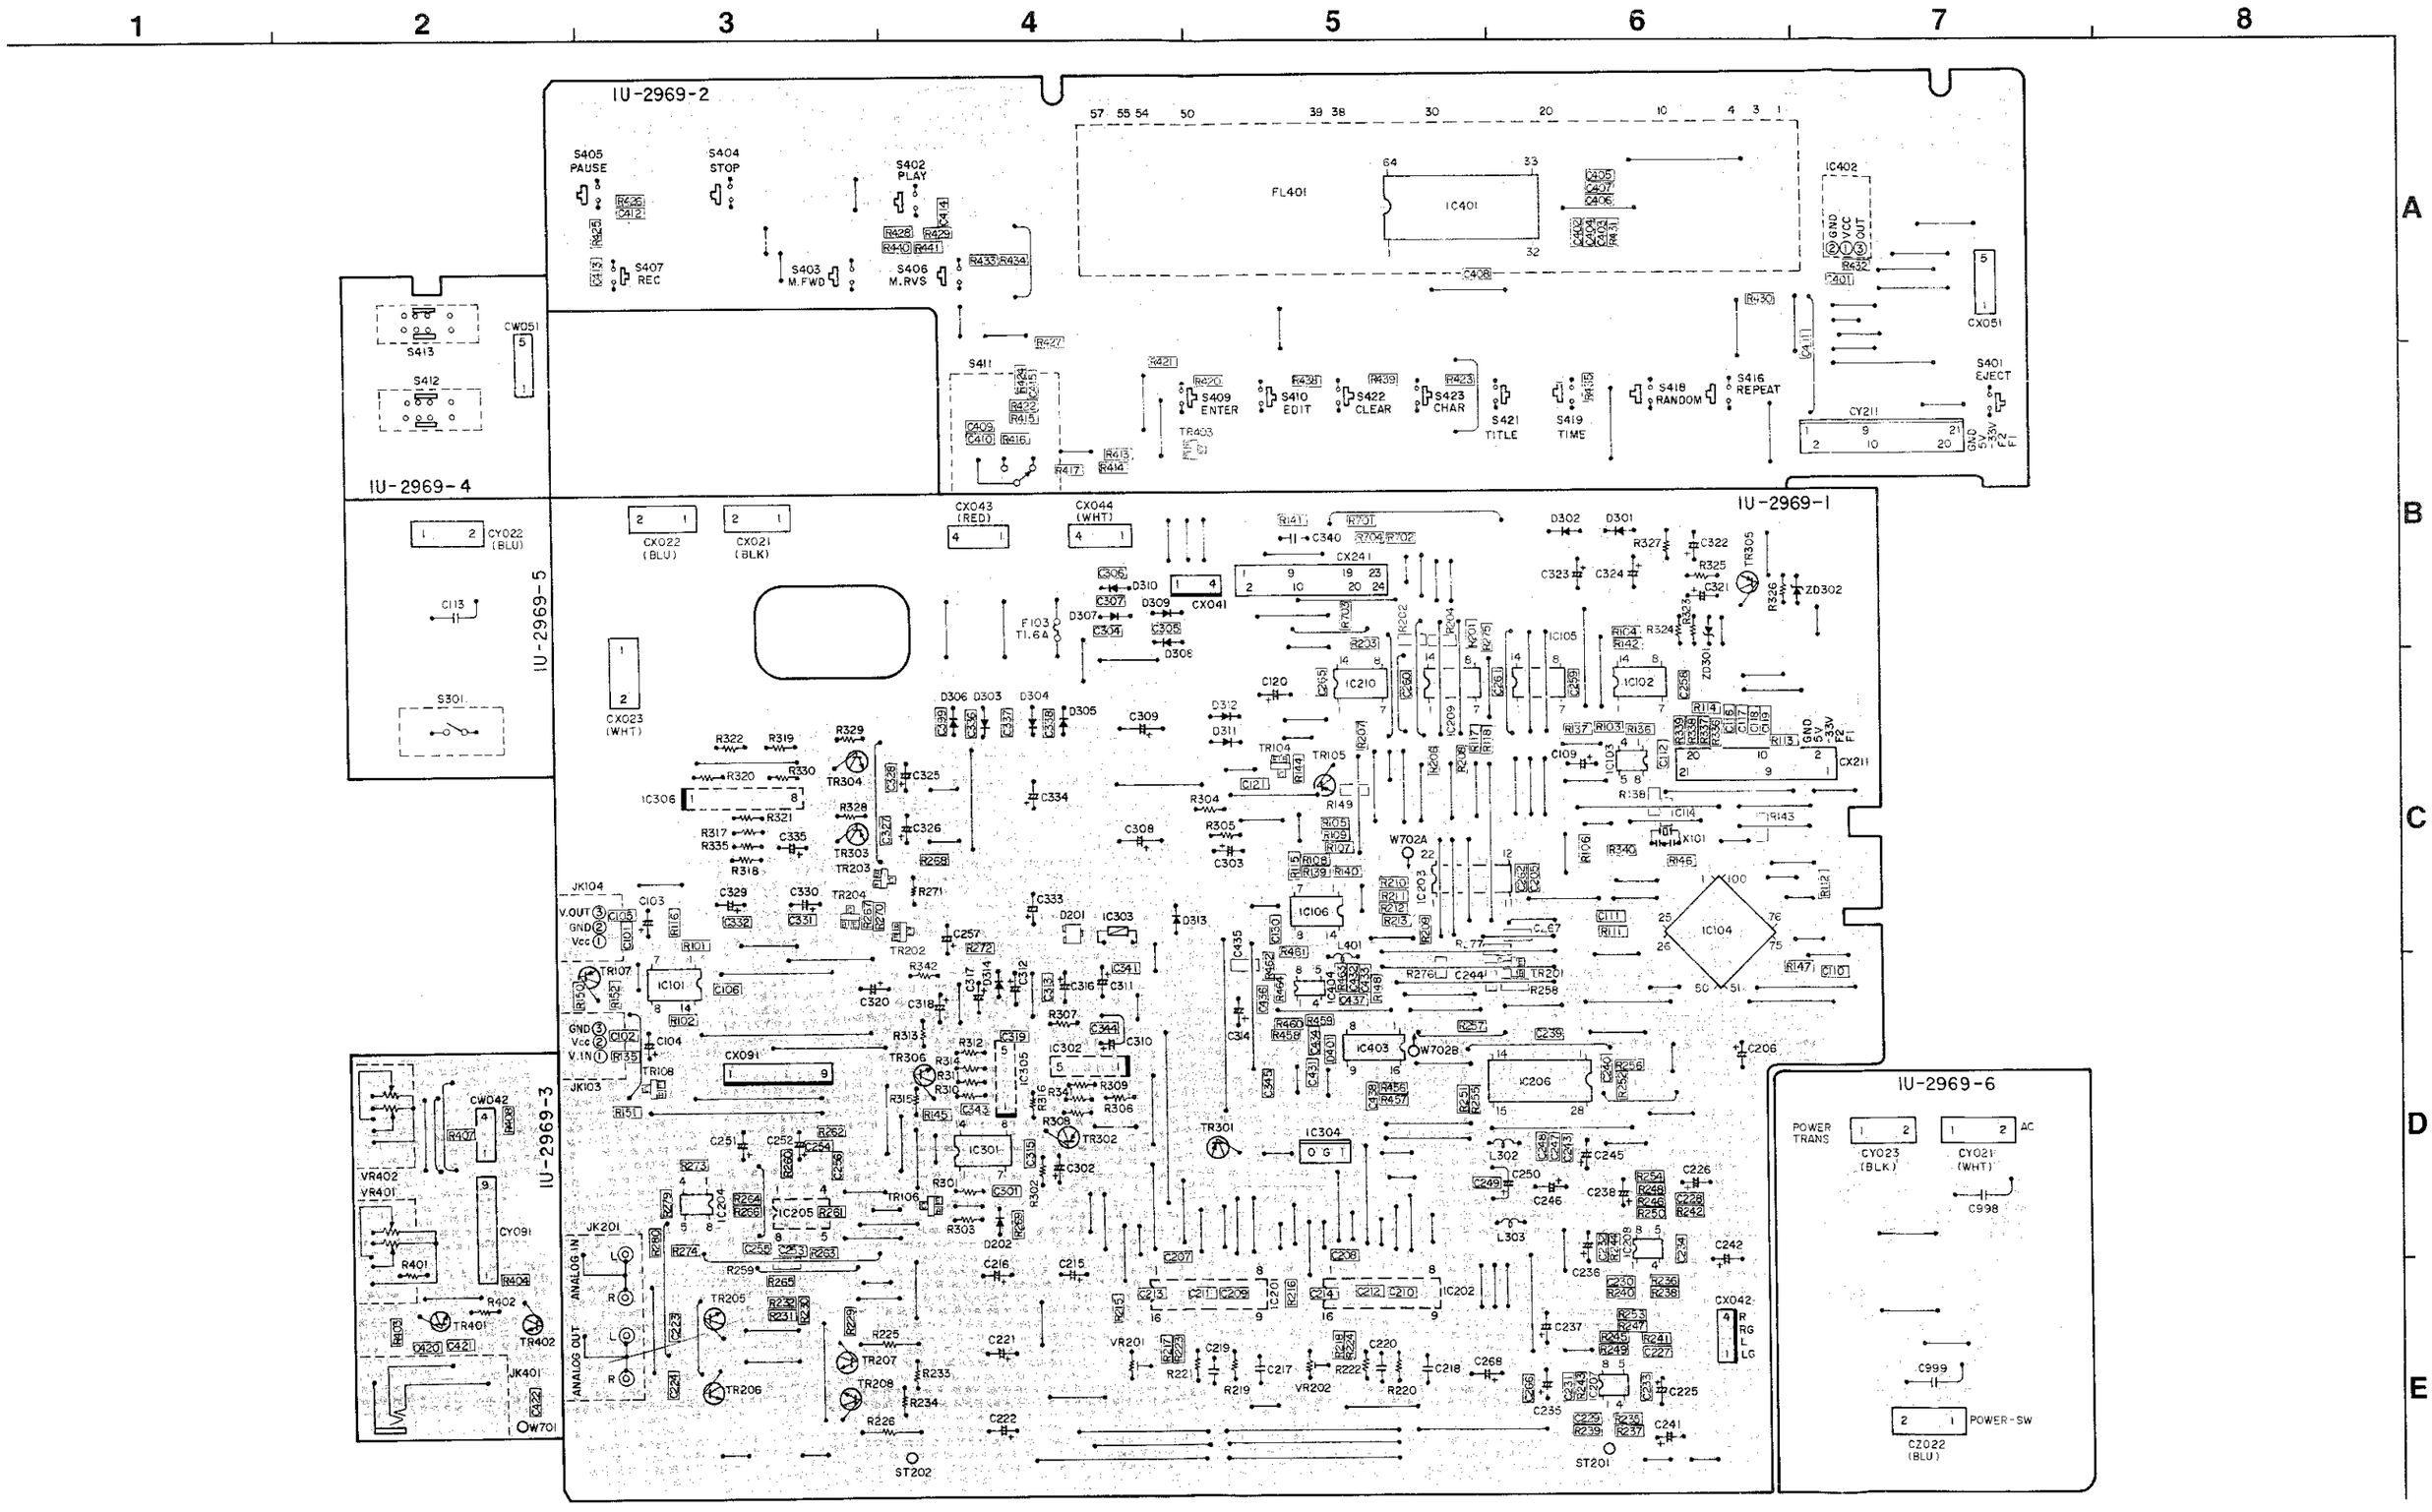
PRINTED WIRING BOARD



NOTE FOR PARTS LIST

- Part indicated with the mark "⊙" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film ±5%, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

WARNING:
Parts marked with this symbol ⚠ ▓▓▓ have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

● Resistors

Ex.: RN Type | 14K Shape and performance | 2E Power | 182 Resistance | G Allowable error | FR Others

RD : Carbon RC : Composition RS : Metal oxide film RW : Winding RN : Metal film RK : Metal mixture	2B : 1/8W 2E : 1/4W 2H : 1/2W 3A : 1W 3D : 2W 3F : 3W 3H : 5W	F : ±1% G : ±2% J : ±5% K : ±10% M : ±20%	P : Pulse-resistant type NL : Low noise type NB : Non-burning type FR : Fuse-resistor F : Lead wire forming

✻ Resistance

1 8 2 ⇒ 1800 ohm = 1.8 kohm
Indicates number of zeros after effective number.
2-digit effective number.
• Units: ohm

1 R 2 ⇒ 1.2 ohm
1-digit effective number.
2-digit effective number, decimal point indicated by R.
• Units: ohm

● Capacitors

Ex.: CE Type | 04W Shape and performance | 1H Dielectric strength | 2R2 Capacity | M Allowable error | BP Others

CE : Aluminum foil electrolytic CA : Aluminum solid electrolytic CS : Tantalum electrolytic CQ : Film CK : Ceramic CC : Ceramic CP : Oil CM : Mica CF : Metallized CH : Metallized	0J : 6.3V 1A : 10V 1C : 16V 1E : 25V 1V : 35V 1H : 50V 2A : 100V 2B : 125V 2C : 160V 2D : 200V 2E : 250V 2H : 500V 2J : 630V	F : ±1% G : ±2% J : ±5% K : ±10% M : ±20% Z : +80% −20% P : +100% −0% C : ±0.25pF D : ±0.5pF = : Others	HS : High stability type BP : Non-polar type HR : Ripple-resistant type DL : For change and discharge HF : For assuring high frequency U : UL part C : CSA part W : UL-CSA type F : Lead wire forming

✻ Capacity (electrolyte only)

2 2 2 ⇒ 2200μF
Indicates number of zeros after effective number.
2-digit effective number.
• Units: μF.

2 R 2 ⇒ 2.2μF
1-digit effective number.
2-digit effective number, decimal point indicated by R.
• Units: μF.

✻ Capacity (except electrolyte)

2 2 2 ⇒ 2200pF=0.0022μF
(More than 2) — Indicates number of zeros after effective number.
2-digit effective number.
• Units: μF.

2 2 1 ⇒ 220pF
(0 or 1) — Indicates number of zeros after effective number.
2-digit effective number.
• Units: pF.

• When the dielectric strength is indicated in AC, "AC" is included after the dieelectric strength value.

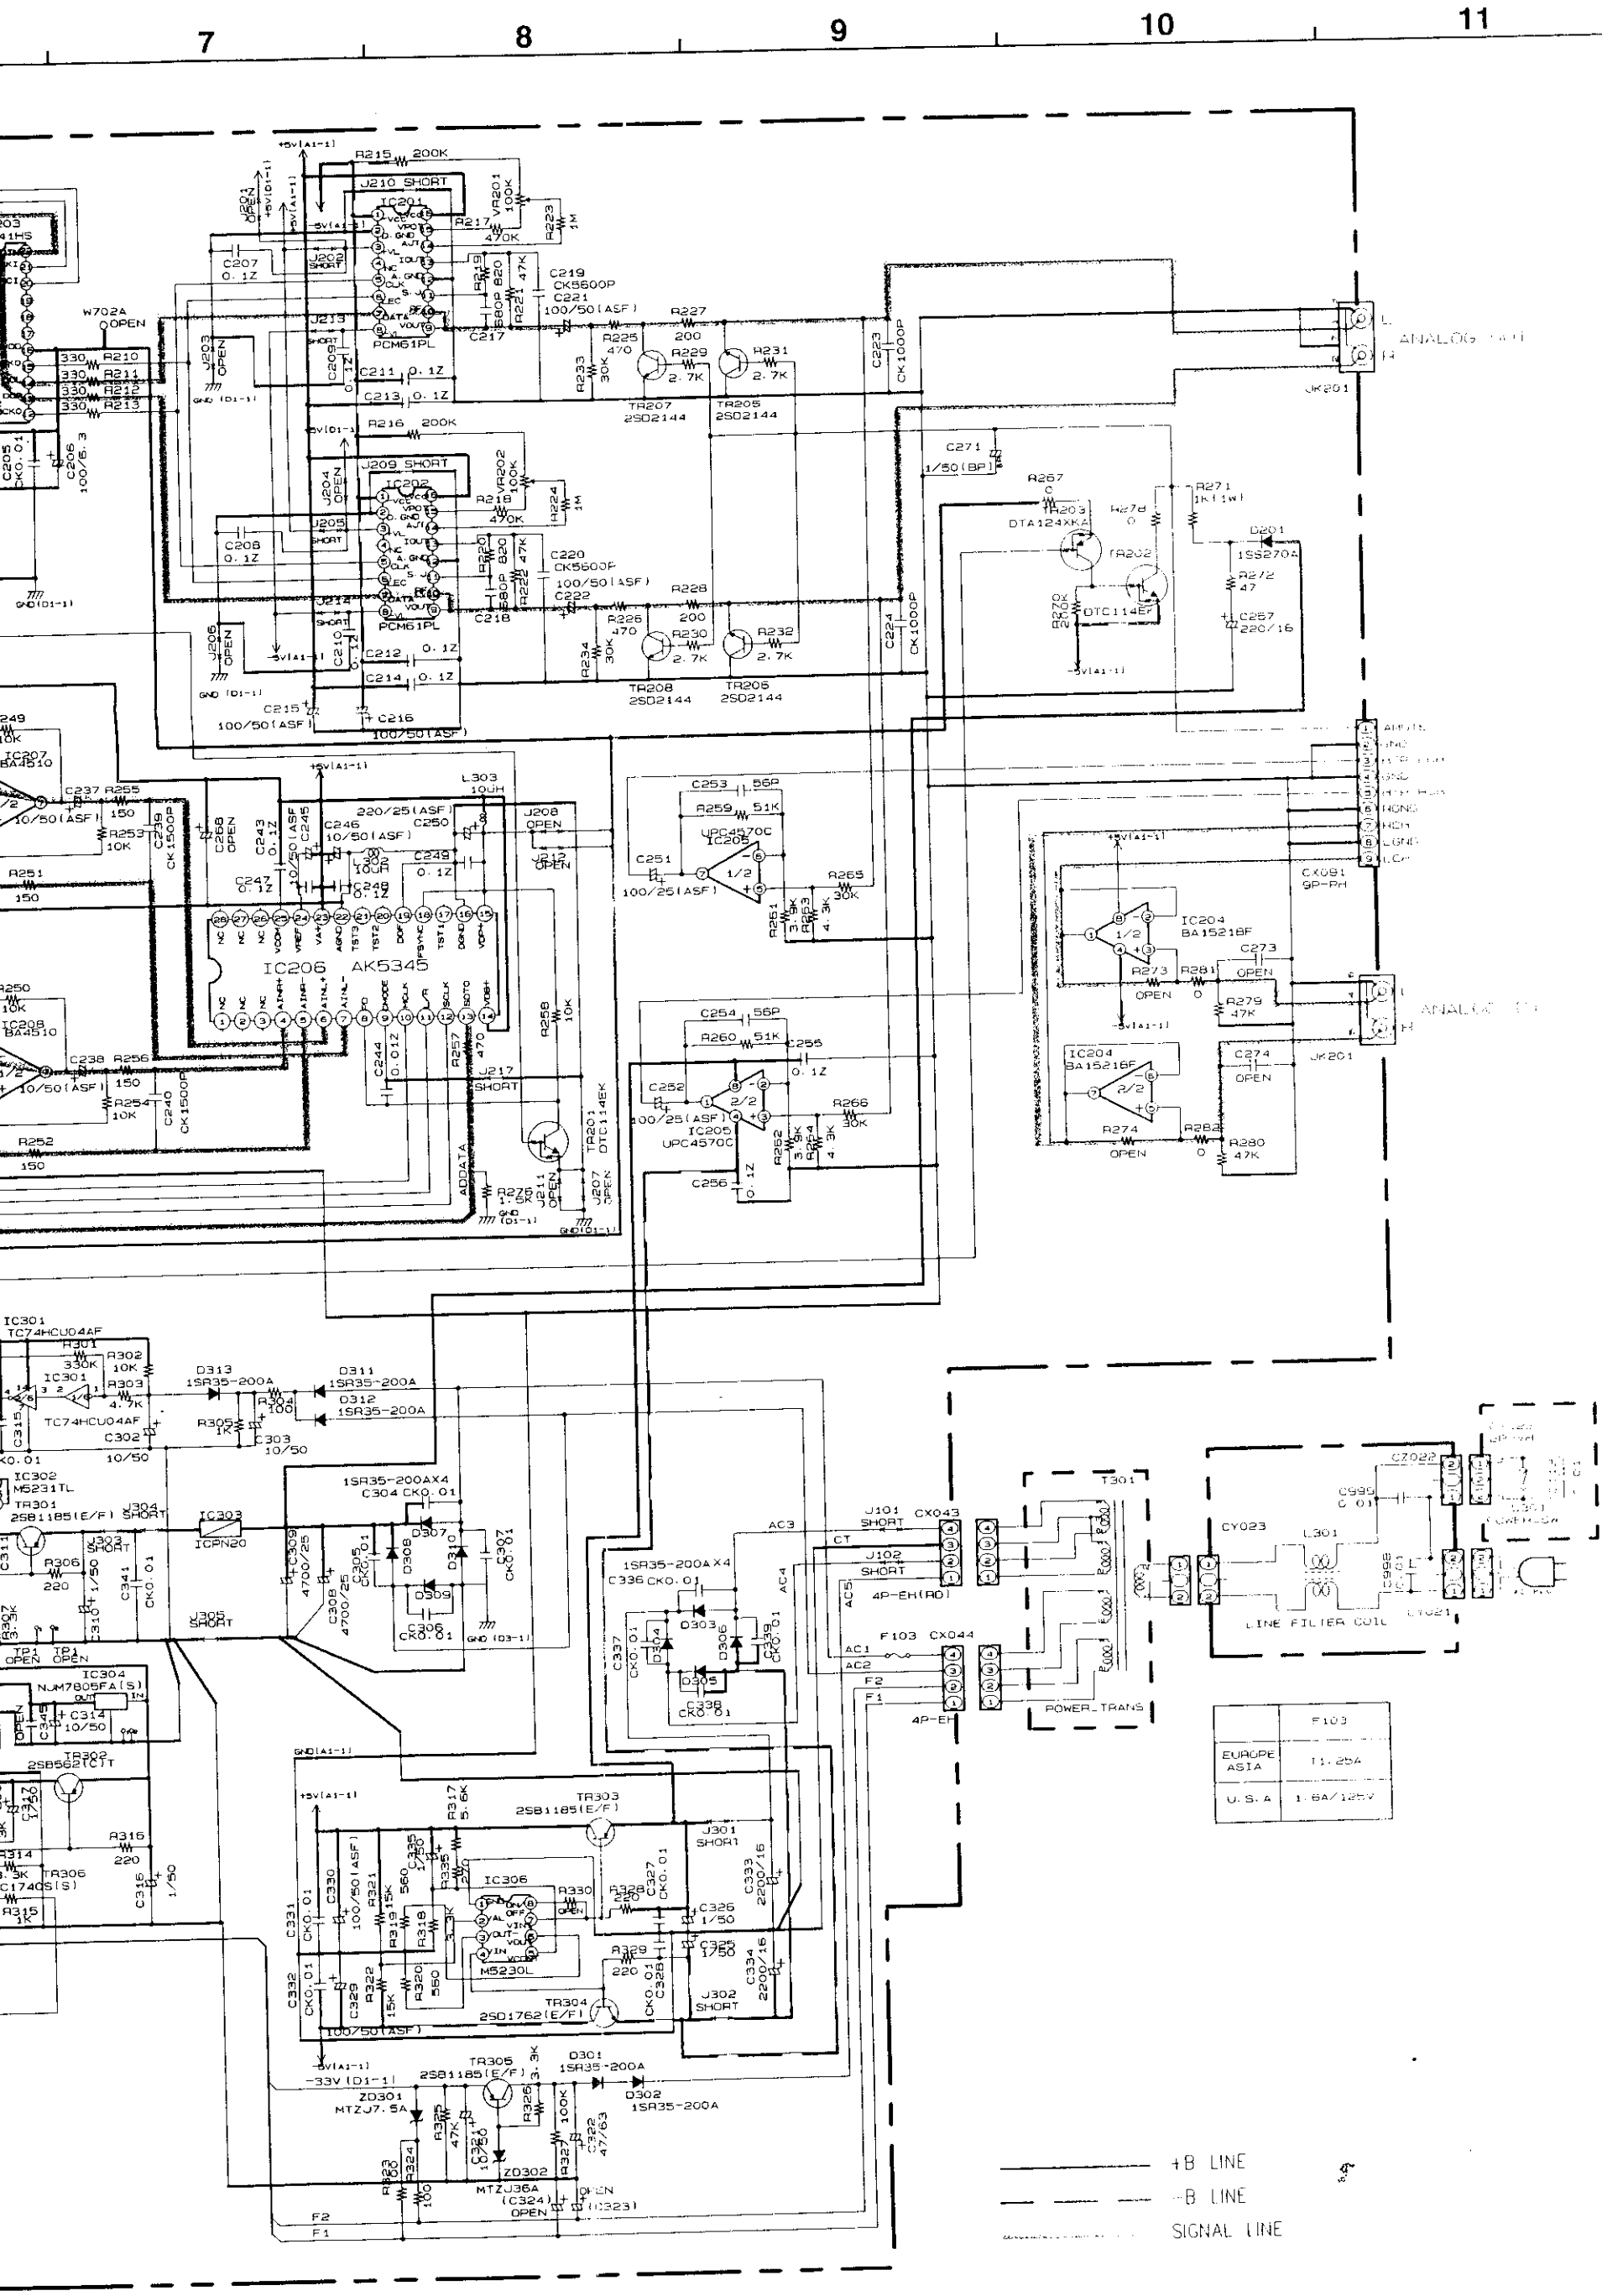
Use ONLY replacement parts recommended by

CAUTION:
Before returning the unit to the customer, make
leakage current check or (2) a line to chassis re
current exceeds 0.5 milliamps, or if the resistan
of the power cord is less than 240 kohms, the

WARNING:
DO NOT return the unit to the customer until th
corrected.



NOTES
ALL RESISTANCE VALUES IN OHM k=1,000 OHM, M=1,000,000 OHM
ALL CAPACITANCE VALUES IN MICRO FARAD P=MICRO-MICRO FARAD
EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT CONDITION.
CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.

WARNING:
Parts marked with this symbol ⚠ ▭ have critical characteristics
Use ONLY replacement parts recommended by the manufacturer.

CAUTION:
Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamps, or if the resistance from chassis to either side of the power cord is less than 240 kohms, the unit is defective.

WARNING:
DO NOT return the unit to the customer until the problem is located and corrected
