2. PANEL FACILITIES

The above illustration shows the model CT-91a.

① POWER switch

Turns the power on and off.

After the power is turned on, the dotted lines in the level meter flash for approximately 4 seconds until the circuits of the unit have stabilized. The unit will not operate during this time.

② Cassette door OPEN/CLOSE button

NOTE:

If the cassette door is closed while the unit is turned OFF, and the power is then turned ON, the cassette door may open and close after pressing one of the operation buttons. This occurs when the microprocessor resets the door mechanism to its initial state and does not indicate any malfunctioning of the unit.

③ COUNTER selectors

RESET:

Resets the counter indication to "0000".

MODE:

Each time this button is pressed, one of the following three modes is set in sequence.

- Normal tape counter
- Time counter (displays the elapsed playback or recording time)
- Remaining time counter (displays the remaining time of the tape). CT-91a, CT-939 only.
- Two modes for CT-737.

④ TAPE CAPACITY selector (Not provided in the model CT-737)

To indicate the correct time value in the remaining time counter mode, this selector must be set in accordance with the tape used.

⑤ TAPE RETURN button

This button is used in the tape counter mode to fast forward or rewind the tape to a point near the counter reading "0000".

⑥ DOLBY * NR selectors ON/OFF:

Used to turn the Dolby NR Systems circuits ON or OFF.

B/C:

With the ON/OFF switch in the ON position, Dolby B-type NR or C-type NR can be selected with this switch.

*

- *Dolby noise reduction and HX Pro headroom extension system manufactured under license from Dolby Laboratories Licensing Corporation. HX Pro originated by Bang & Olufsen.*
- *"DOLBY", the double-D symbol  and "HX PRO" are trademarks of Dolby Laboratories Licensing Corporation.*

⑦ MPX FILTER switch

Set this switch to ON when recording FM broadcasts with one of the Dolby NR systems.

⑧ REC LEVEL control

⑨ REC BALANCE control

⑩ TIMER mode selector

REC:

Set to this position for timer recording.

PLAY:

Set to this position for timer playback.

OFF:

When the timer is not to be used, set the selector to this position. (Normally leave the selector in this position.)

⑪ PHONES LEVEL control

Used for adjusting the volume when listening with headphones.

⑫ PHONES jack

For connection of standard stereo headphones.

⑬ Cassette door

Open and close this door by pressing the OPEN/CLOSE button for insertion or removal of the tape.

Press this button to rewind the tape. Also, this button is used for music search during playback.

⑮ Stop (■) button

⑯ Play (▶) button

⑰ Fast forward (▶▶) button

Press this button to fast forward the tape. Also, this button is used for music search during playback.

⑱ Recording (●) button

When this button is pressed, the unit is set to one-touch recording pause (recording standby mode).

⑲ Pause (||) button

The tape transport can be momentarily stopped by pressing this button during recording or playback. Press the button again to restart operation. The button does not operate during fast forward or rewind.

⑳ Record muting (○) button

Press this button to create an unrecorded space during recording.

㉑ METER RANGE selector

Selects wide or expanded range for the level meter.

㉒ MONITOR selector

For monitoring the sound during recording, this switch can be used to switch between source sound and just recorded sound.

Normally, however, the unit will automatically select tape playback sound after playback has started or the just recorded sound after recording has started.

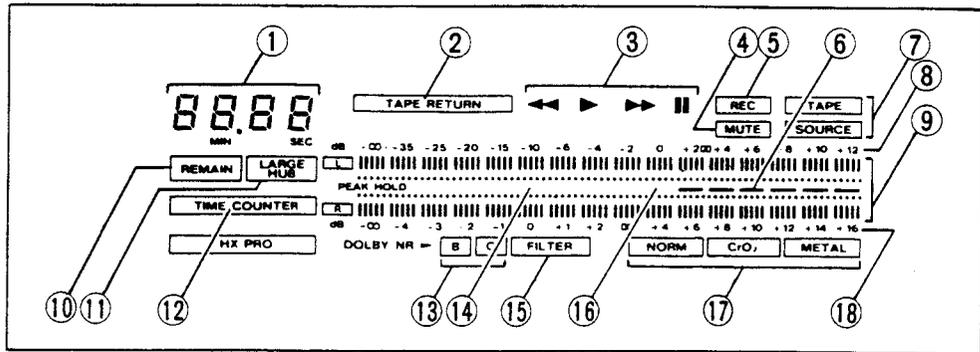

㉓ REC CALIBRATION BIAS control

It is possible to adjust the bias according to the tape used and the source to be recorded.

㉔ REC CALIBRATION LEVEL control

The AUTO TAPE SELECTOR of this unit matches the recording characteristics with the tape used. Proper adjustment of the REC CALIBRATION LEVEL control permits optimum use of the given tape characteristics for even better recording results.

OPERATING DISPLAY

① Counter

- The counter has three display modes.
- If the cassette door is open, the message "OPEN" is displayed.
- During music search the number of selections is displayed.

② TAPE RETURN

Lights up during tape return operation.

③ Tape transport modes
