## TP12D TURNTABLE

- BELT DRIVE • SOLID DIE CAST PLATTER •
- RUMBLE -47dB • WOW & FLUTTER 0.1%

The TP12D Turntable has taken a decade to develop, and although contemporary in looks, its design is principally functional and of prime importance. The tri-lateral peripherally weighted platter produces an equiponderate tangential counterbalancing force, the platter being solid die-cast, combines to permit it to revolve at more constant speed, thereby limiting wow and flutter to a minimum. The drive is by a 16-pole synchronous motor with belt drive minimising rumble. The tone arm is of 'S' shape and specifically designed for minimum tracking error,

and employs a lightweight detachable headshell thus reducing wear on the sides of the record groove. The arm is counterbalanced by an adjustable weight and has a low friction precision bearing and bias compensator and damped Cue control. The TP12D is mounted on a teak finished solid mount with low profile Perspex cover, complete with power cord and 5-pin DIN audiolead ready to connect and play.

Size: 445mm x 356mm x 140mm.
