Amplifier

## SU-V300M2

Colour

(K).....Black Type

Areas

E.....Europe.

EG.....Germany and Italy, etc.

EB.....Great Britain.

## Specifications

### ■ MAIN AMP SECTION

Power output (at power supply 240V)

40 Hz-20 kHz continuous power

output both channel driven: 2x27W(8Ω)

1 kHz continuous power output both

channel driven (THD 1%): 2x33W(8Ω)  
2x40W(4Ω)

63 Hz-12.5 kHz continuous power output both

channel driven (THD 1%): 2x30W(8Ω)  
2x35W(4Ω)

Total harmonic distortion

rated power at 20 Hz-20kHz: 0.1%(8Ω)

Intermodulation distortion (50 Hz: 7 kHz=4:1, SMPTE)

rated power: 0.1%(8Ω)

Residual hum and noise:

1mV

Damping factor:

60(8Ω)

30(4Ω)

Headphones output level/impedance: 240mV/47Ω

Load Impedance

A or B: 4-16Ω

A and B: 8-16Ω

### ■ PRE AMP SECTION

Input sensitivity/impedance

PHONO MM: 2.5mV/47kΩ

TUNER, CD, AUX, TAPE 1, TAPE 2: 150mV/22kΩ

PHONO maximum input voltage(1 kHz,RMS)

MM 150mV(IHF'66)

S/N (Rated power 4Ω)

PHONO MM: 76dB (76dB, IHF'66)

TUNER, CD, AUX, TAPE 1, TAPE 2: 90dB(76dB,IHF'66)

S/N at -26 dB power (4Ω)

PHONO MM: 67dB

TUNER, CD, AUX, TAPE 1, TAPE 2: 70dB

S/N at 50mW(4Ω)

PHONO MM: 63dB

TUNER, CD, AUX, TAPE 1, TAPE 2: 63dB

Frequency Response

PHONO MM: RIAA standard curve ±1dB  
(30Hz-15kHz)TUNER, CD, AUX, TAPE 1, TAPE 2: +0, -3dB (3 Hz-60 kHz)  
+0, -0.3dB (20 Hz-20 kHz)

Tone controls

BASS: 50 Hz, +10 to -10dB

TREBLE: 20 kHz, +10 to -10dB

Output voltage

TAPE 1, TAPE 2 REC OUT: 150mV

Channel balance (AUX, 250Hz-6.3kHz): ±1dB

Channel separation (AUX, 1 kHz): 50dB

### ■ GENERAL

Power supply

For (EB): AC50 Hz/60 Hz, 230-240V

For (E)(EG): AC50 Hz/60 Hz, 230V

Power consumption: 110W

Dimensions (W×H×D): 430×125×310mm

Weight: 5.4kg

Notes:

1. Specifications are subject to change without notice.

Weight and dimensions are approximate.

### 3 Caution for AC Main Lead (For United Kingdom)

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

#### **CAUTION!**

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

#### **IMPORTANT**

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral, Brown: Live.

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

**WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.**

**THIS PLUG IS NOT WATERPROOF KEEP DRY.**

#### **Before use**

Remove the connector cover.

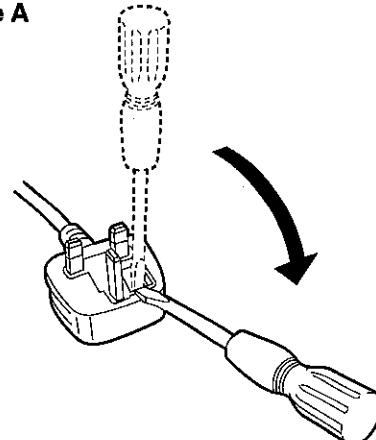

#### **How to replace the fuse**

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

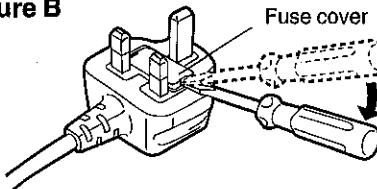

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

**Figure A**

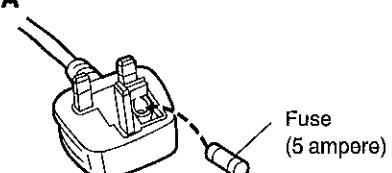

**Figure B**

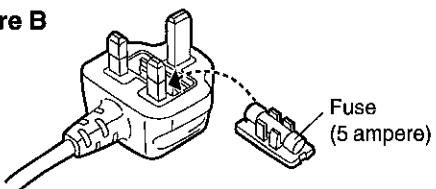

2. Replace the fuse and close or attach the fuse cover.

**Figure A**

**Figure B**

## Connecting speakers and the power supply

### Connecting the speakers

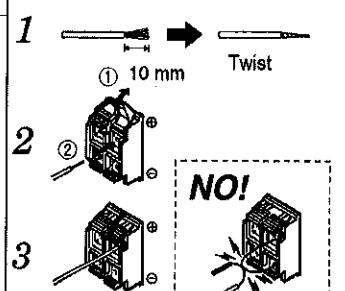

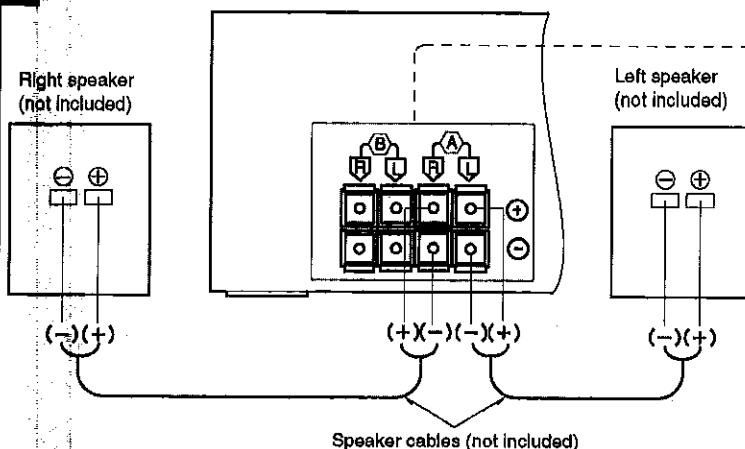

Be sure to only connect positive (+) wires to positive (+) terminals, and negative (-) wires to negative (-) terminals.

#### [B] terminals

For connection to a second pair of speakers.

#### **Speaker Impedance**

- When only the [A] or only the [B] terminals are used: 4–16 ohms
- When both the [A] and the [B] terminals are used simultaneously: 8–16 ohms

**A**

#### **CAUTION**

To prevent damage to circuitry, never short-circuit positive (+) and negative (-) speaker wires.

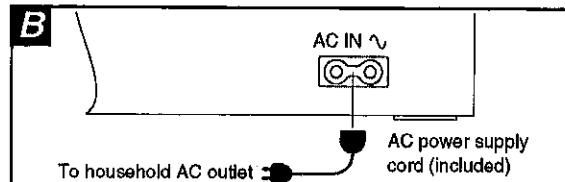

### Connecting the AC power supply cord

**B**

Connect the AC power supply cord only after all other connections have been made.

(For United Kingdom)

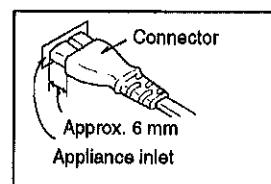

**BE SURE TO READ THE CAUTION FOR THE AC MAINS LEAD BEFORE CONNECTION.**

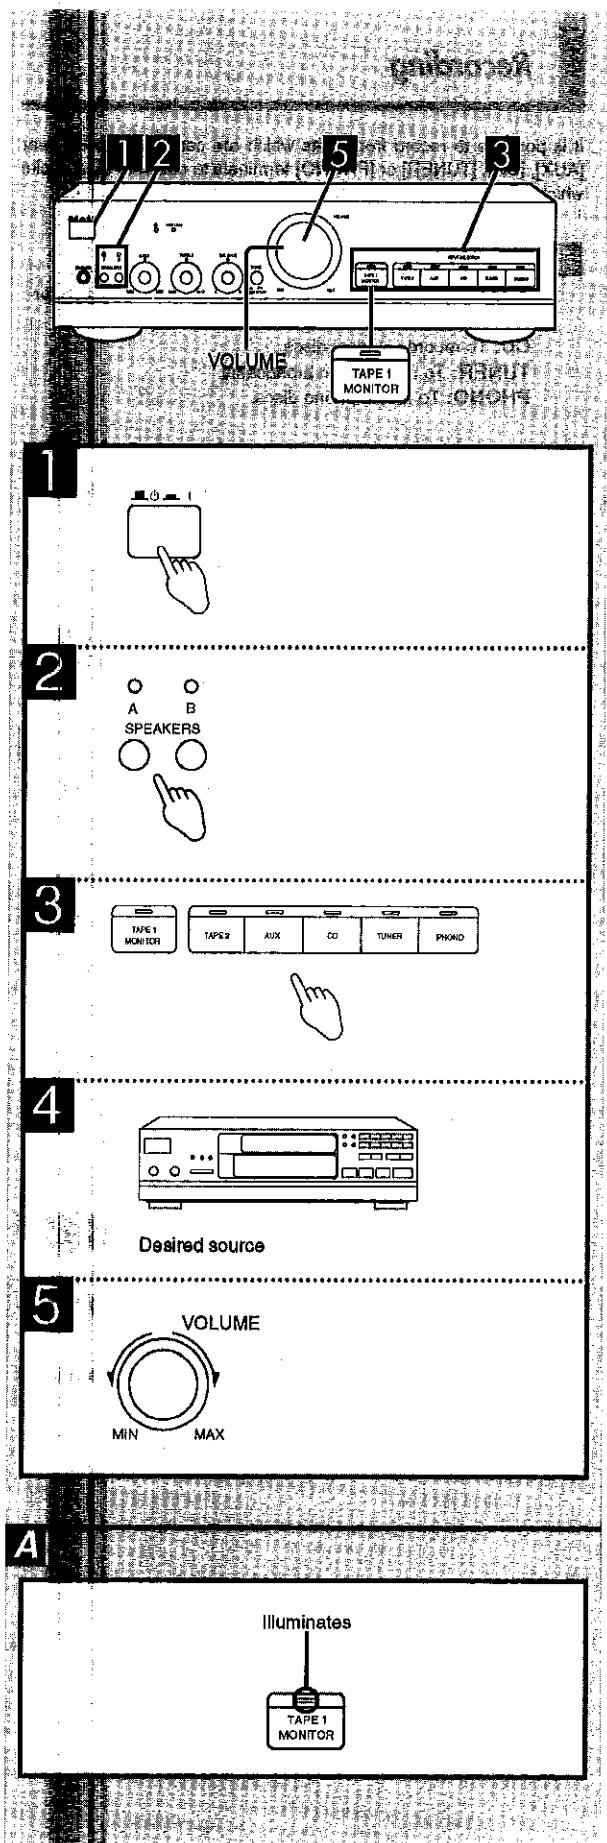

**B**

#### **Insertion of Connector**

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

## Listening to sound

Before operation, set [VOLUME] to the [MIN] position.

- 1** Press to switch on the power.
- 2** Press [A] and/or [B] to select the speaker system(s) to be used.  
The corresponding indicator(s) will illuminate.
- 3** Press to select the desired source.  
The corresponding indicator will illuminate.  
**TAPE 1 MONITOR:** To listen to tape (TAPE 1). The tape monitor indicator will illuminate. (See below.)  
**TAPE 2:** To listen to tape (TAPE 2).  
**AUX:** To listen to equipment connected to the [AUX] terminals.  
**CD:** To listen to compact discs.  
**TUNER:** To listen to radio broadcasts.  
**PHONO:** To listen to phono discs.
- 4** Start the desired source.  
(Refer to the appropriate operating instructions for details.)
- 5** Turn [VOLUME] to adjust the volume level.

### After listening is finished

Be sure to reduce the volume level, and turn the unit off by pressing the unit on/off button.

### When tape 1 monitor indicator illuminates **A**

This indicates that the tape monitor function of this unit is ON. To listen to sources other than a tape [TAPE 1], be sure to turn off the indicator by pressing [TAPE 1 MONITOR].

## Troubleshooting guide

Before requesting service for this unit, check the chart below for a possible cause of the problem you are experiencing. Some simple checks or a minor adjustment on your part may eliminate the problem and restore proper operation.

If you are in doubt about some of the check points, or if the remedies indicated in the chart do not solve the problem, refer to the directory of Authorized Service Centers (enclosed with this unit) to locate a convenient service center, or consult your dealer for instructions.

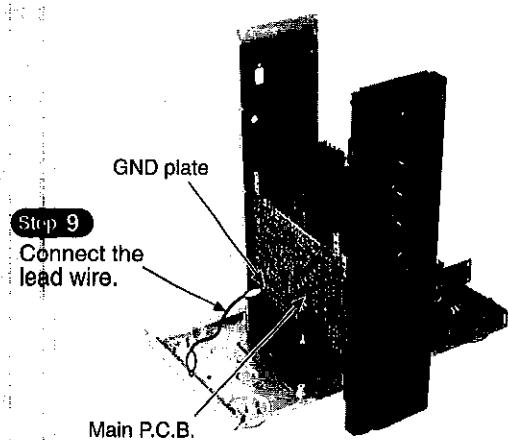

Problem	Probable cause(s)	Suggested remedy
<b>Common problems</b>		
No sound is heard when the power is switched ON.	The power cord plug is not completely inserted. Connections to the speakers, etc. are incomplete or incorrect. The source hasn't been selected. The speakers haven't been selected. The tape monitor function is on. (TAPE 1 MONITOR indicator is illuminated)	<ul style="list-style-type: none"> <li>• Confirm that the power cord plug is connected completely.</li> <li>• Check that all wires are correctly connected.</li> <li>• Press the selector button.</li> <li>• Press a speaker button (A or B).</li> <li>• When listening to a source other than the tape deck (TAPE 1), press TAPE 1 MONITOR so that the indicator is switched off.</li> </ul>
When listening to stereo sound, the sound lacks depth (i.e. thin bass, tinny sound).	One of the speakers is connected out of phase [(+) → (-), (-) → (+)].	<ul style="list-style-type: none"> <li>• Reconnect the speakers maintaining proper polarity [i.e., (+) → (+), (-) → (-)].</li> </ul>
When listening to stereo sound, the left and right sounds are reversed.	The left and right speaker connections, source connections, or graphic equalizer connections are reversed.	<ul style="list-style-type: none"> <li>• Check all connections and correct them if necessary.</li> </ul>
A low-pitched noise ("hum" or "buzz") is heard.	The power cord or a fluorescent light, etc., is near the connection wires.	<ul style="list-style-type: none"> <li>• Try separating this unit as far as possible from the electric appliance.</li> </ul>
Sound is not heard from one of the speakers.	The speaker wires are disconnected. The balance control is set too far to one side.	<ul style="list-style-type: none"> <li>• Check and correct the connections of the speaker wires.</li> <li>• Set so that sounds are heard at the center, between the speakers.</li> </ul>
Sound stops during a performance, or no sound is heard when the power is switched ON.	The protection circuitry has functioned because the positive and negative speaker connection wires are "shorted", speakers with an impedance less than the indicated rated impedance of the amplifier are used.	<ul style="list-style-type: none"> <li>• Switch OFF the power, and, after determining and correcting the cause, switch ON the power once again.</li> <li>• Use speakers of the proper impedance rating.</li> </ul>

## Maintenance

To clean this unit, wipe with a soft, dry cloth.  
If the surfaces are extremely dirty, use a soft cloth dipped in a soap-and-water solution or a weak detergent solution.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically impregnated cloth, read the instructions that came with the cloth carefully.

- Check the main P.C.B. as shown below.

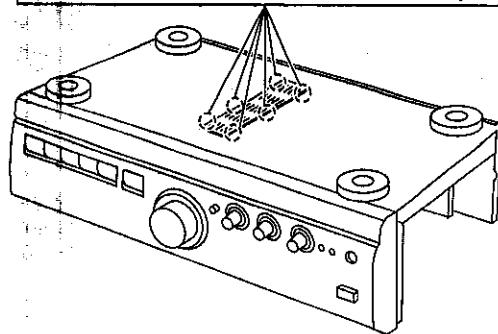

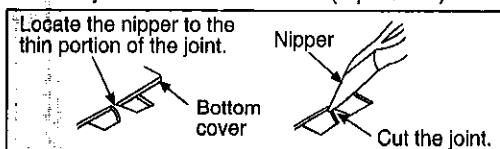

## Main Component Replacement Procedures

### 1. Replacement for the power IC

- Follow the Step 1 ~ Step 3 of the item 1 in checking procedure for each P.C.B..

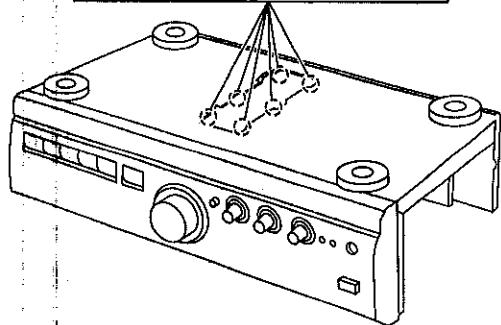

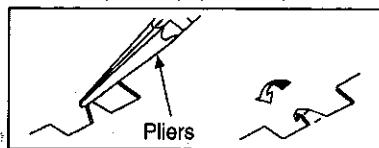

Step 1

Cut the joints as shown below. (6 portions)

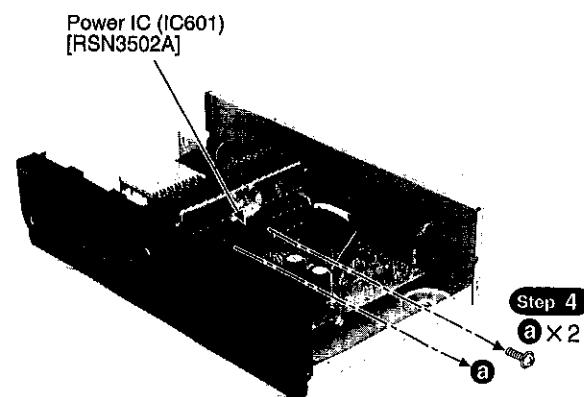

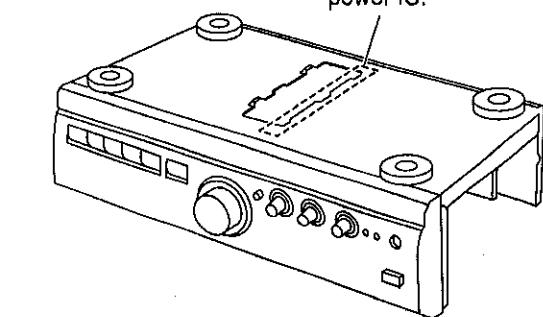

Step 2

Fold the joints. (6 portions)

Step 3

Unsolder the terminals of power IC.

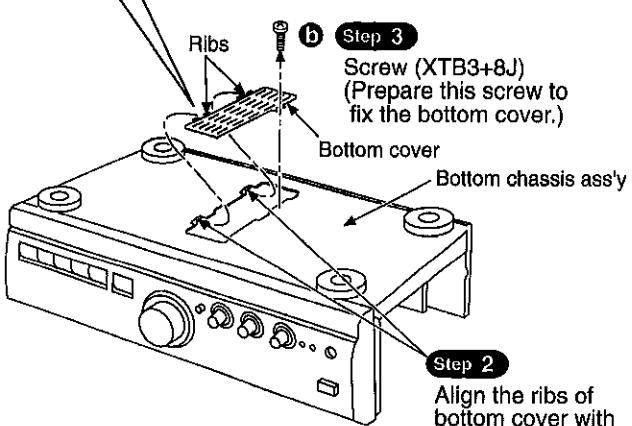

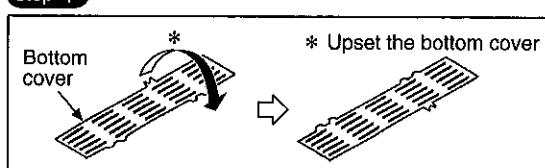

#### NOTE

- After replacing the power IC, apply a sufficient quantity of compound grease (RFKX0002) between the heat sink and the power IC (Radiation of power IC).
- Tighten enough the screws (a) after replacing the power IC. Otherwise, the heat radiation works little.

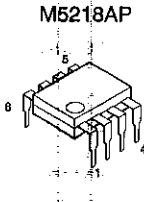

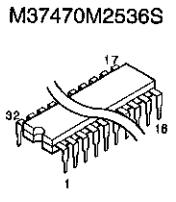

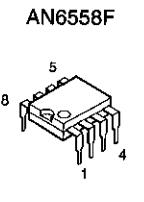

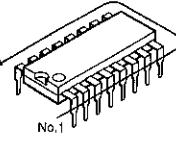

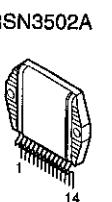

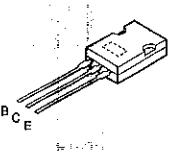

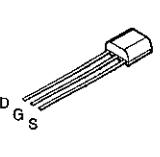

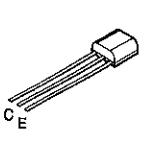

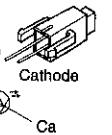

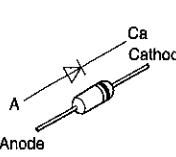

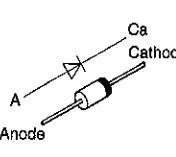

#### Installation of the bottom cover after replacement

Step 1

## 6.2. Schematic Diagram Notes

- This schematic diagram may be modified at any time with the development of new technology.

### Notes:

- S401:** Tone control (TONE) switch.
- S801:** Phono disc (PHONO) switch.
- S802:** Radio broadcast (TUNER) switch.
- S803:** Compact disc (CD) switch.
- S804:** Aux (AUX) switch.
- S805:** Tape2 (TAPE2) switch.
- S806:** Tape1 (TAPE1 MONITOR) switch.
- S807:** Power ON/STANDBY (POWER) switch. (in "ON" position)
- S808:** Speaker select (SPEAKERS.A) switch.
- S809:** Speaker select (SPEAKERS.B) switch.
- VR471:** Bass (BASS) V.R.
- VR472:** Treble (TREBLE) V.R.
- VR501:** Volume (VOLUME) V.R.
- VR502:** Balance (BALANCE) V.R.
- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

No mark: Power ON

### Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

### Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.  
Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.

## 8 Block Diagram

# 10 Replacement Parts List

## Notes:

\* Important safety notice:

Components identified by  $\Delta$  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

\* The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

\* Capacity values are in microfarads ( $\mu\text{F}$ ) unless specified otherwise, P=Picofarads ( $\text{pF}$ ), F=Farads ( $\text{F}$ )

\* Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000K (OHM)

\* "<IA>, <IB>, <IC>, <ID>, <IE>" marks in Remarks indicate language of instruction manual.

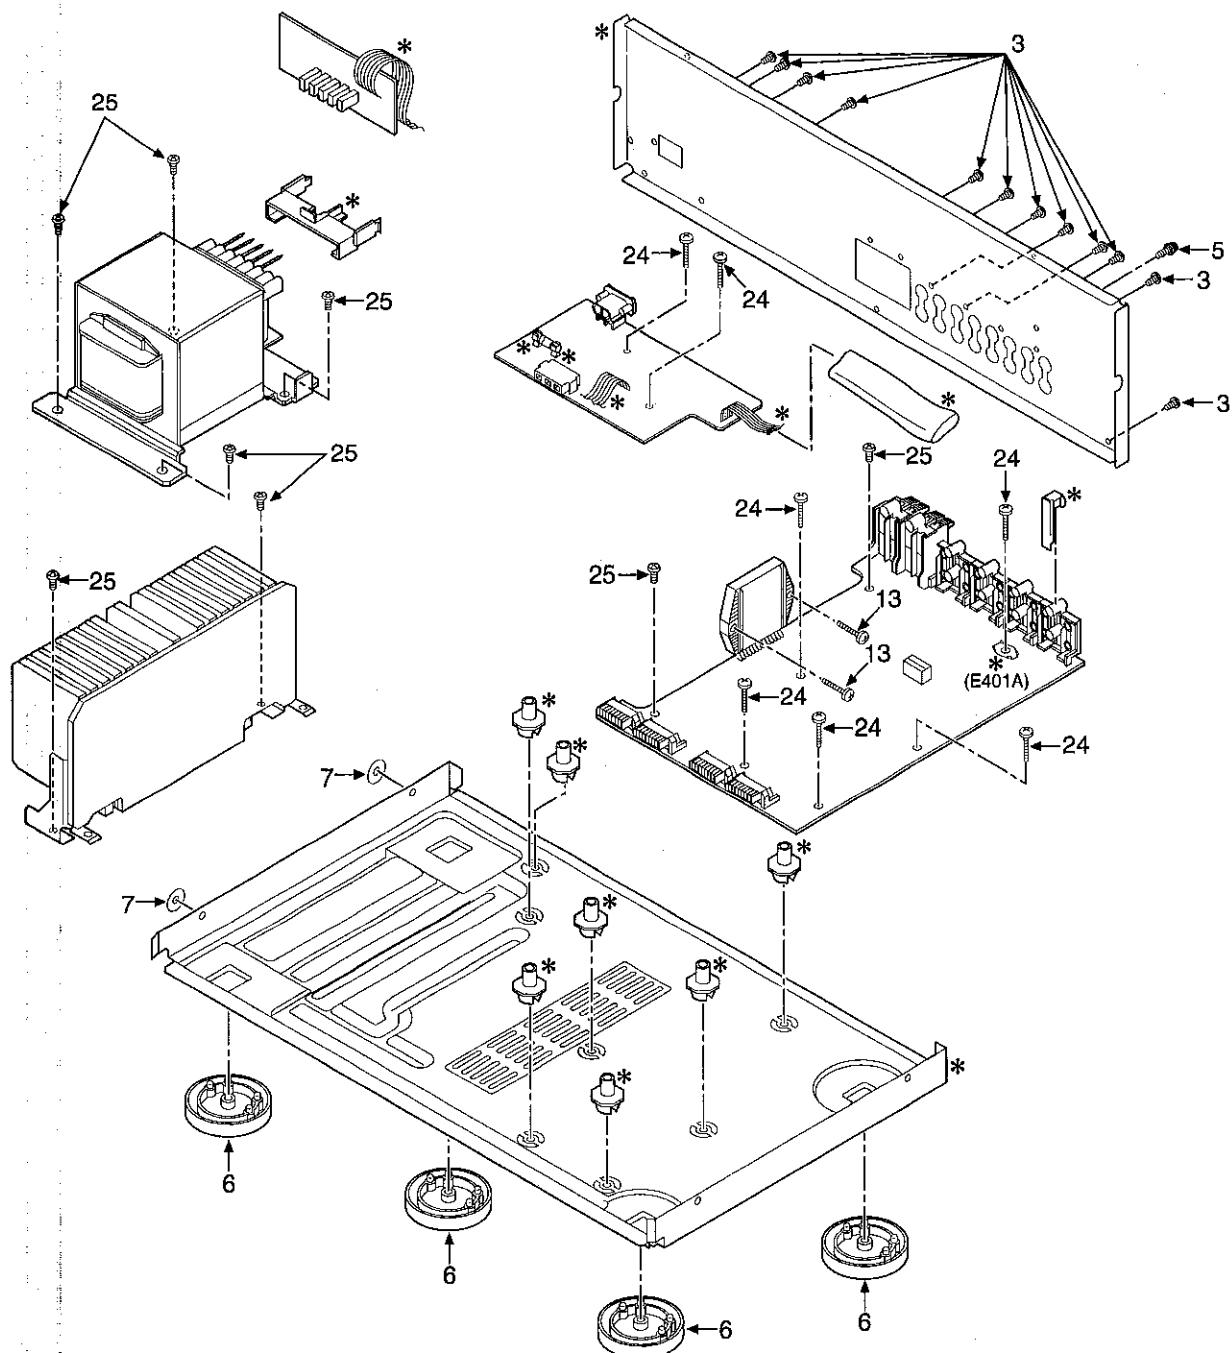

[<IA>:English/Spanish/Swedish,<IB>:Russian/Polish/Czecho,<IC>:German/Italian/French,<ID>:Dutch/Danish,<IE>: English]
