FR series amplifiers (series II)

SERVICE MANUAL

MACKIE M1400/M1400i series II SERVICE MANUAL

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK DO NOT REMOVE THE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED PERSONNEL.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS POLARIZED PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

ATTENTION: POUR EVITER LES RISQUES DE CHOC ELECTRIQUE, NE PAS ENLEVER LE COUVERCLE. AUCUN ENTRETIEN DE PIECES INTERIEURES PAR L'USAGER. CONFIER L'ENTRETIEN AU PERSONNEL QUALIFIE.

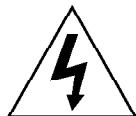

AVIS: POUR EVITER LES RISQUES D'INCENDIE OU D'ELECTROCUSSION, N'EXPOSEZ PAS CET ARTICLE A LA PLUIE OU A L'HUMIDITE.

POUR PREVENIR LES CHOCS ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR, UN PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT, SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS LAISSER AUCUNE PARTIE A DECOUVERT.

This apparatus does not exceed the Class A/Class B (whichever is applicable) limits for radio noise emissions from digital apparatus as set out in the radio interference regulations of the Canadian Department of Communications.

ATTENTION : Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de class A/de class B (selon le cas) prescrites dans le règlement sur le brouillage radioélectrique édicté par les ministère des communications du Canada.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio energy and, if not installed properly and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure, that may be of sufficient magnitude to constitute a risk of electric shock to persons.

Le symbole éclair avec point de flèche à l'intérieur d'un triangle équilatéral est utilisé pour alerter l'utilisateur de la présence à l'intérieur du coffret de "voltage dangereux" non isolé d'ampleur suffisante pour constituer un risque d'électrocution.

The exclamation point within an equilateral triangle is intended to alert the user of the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Le point d'exclamation à l'intérieur d'un triangle équilatéral est employé pour alerter les utilisateurs de la présence d'instructions importantes pour le fonctionnement et l'entretien (service) dans le livret d'instruction accompagnant l'appareil.

INTRODUCTION

- **What's all this "series II" stuff anyway?**

The designation "series II" is an internal Mackie way of describing the new M1400 and M1400i amplifiers built after June 1999. You will not see "series II" written on any of the advertising, boxes or silkscreens. One clue is that the series II amps do not have handles.

The serial number prefix also indicates if the amplifier is a series I or II:

The M1400 Series I serial numbers start with a prefix "AH," (use the other M1400 service manual)

The M1400 Series II serial numbers start with a prefix "DB" (use this manual)

M1400i Series I serial number prefix is "AM" (use the other M1400 service manual)

M1400i Series II serial number prefix is "DA" (use this manual)

This manual contains basic service information. It is essential that you have a copy of the user's manual as this contains the complete operating instructions.

SERVICE TECHNICAL ASSISTANCE

Mackie Designs, Service Technical Assistance, is available 8AM - 5PM PST, Monday through Friday for Authorized Mackie Service Centers, at 1-800-258-6883. Feel free to call with any questions and speak with a carefully-calibrated technician. If one is not available, leave a detailed message and a qualified Mackoid will return your call asap.

DISCLAIMER

The information contained in this manual is proprietary to Mackie Designs, Inc. The entire manual is protected under copyright and may not be reproduced by any means without express written permission from Mackie Designs, Inc.

MACKIE M1400/M1400i series II SERVICE MANUAL

Overview

M1400 and M1400i power amps built after June 15, 1999 have some rather lovely improvements. These include:

1. **Higher output fan for increased cooling** – The old fan which has an output of 51 CFM has been replaced with a new hi-performance Panasonic FBA0824H1T fan that has 62 CFM output. This improves the M1400/1400i's cooling capacity by 20%, allowing them to run in an environment 14°F hotter than previously without overheating.
2. **Higher voltage tolerance** – the four main filter capacitors have been increased in voltage rating from 80V to 82V. This improves the ability of the M1400/1400i to handle installations and gigs where the AC line voltage is higher than normal.
3. **Improved speaker protection circuitry** – Previously, under certain unusual conditions, (such as the SeaHawks winning an away game), the protection circuits could shut down the amplifier. The circuit is redesigned so instead of shutting down, the amplifier will mute for two seconds and then begin operation again.
4. **Other improvements**– The new designs have improved reliability by changing the design surrounding the driver transistors, specifying higher quality main 30A bridges, removing all soldered-in multi-pin cable assemblies in favor of more reliable (and more expensive) header to receptacle interconnections, increasing the robustness of the +/-16V power supplies, and redesigning the baker clamp for improved high power operation.
5. **New circuit boards**– The new designs have new circuit boards.
6. **Handles Removed**– The new designs have no handles on the front panel. This is also a quick way of telling if the amplifier is a series II design or not.
7. **Service Manual** The old service manual contains many details which still apply, such as circuit theory and troubleshooting. This series II manual is just a basic guide to the new schematics, pcbs, assembly drawings and parts lists.
8. **Owner's Manual**– The owner's manual was only mildly altered to reflect the new model, so all details of the amplifier's operation are correct.
9. **Service bulletin**– The ribbon modification still applies to the "series II" models. See the last page of this service manual.

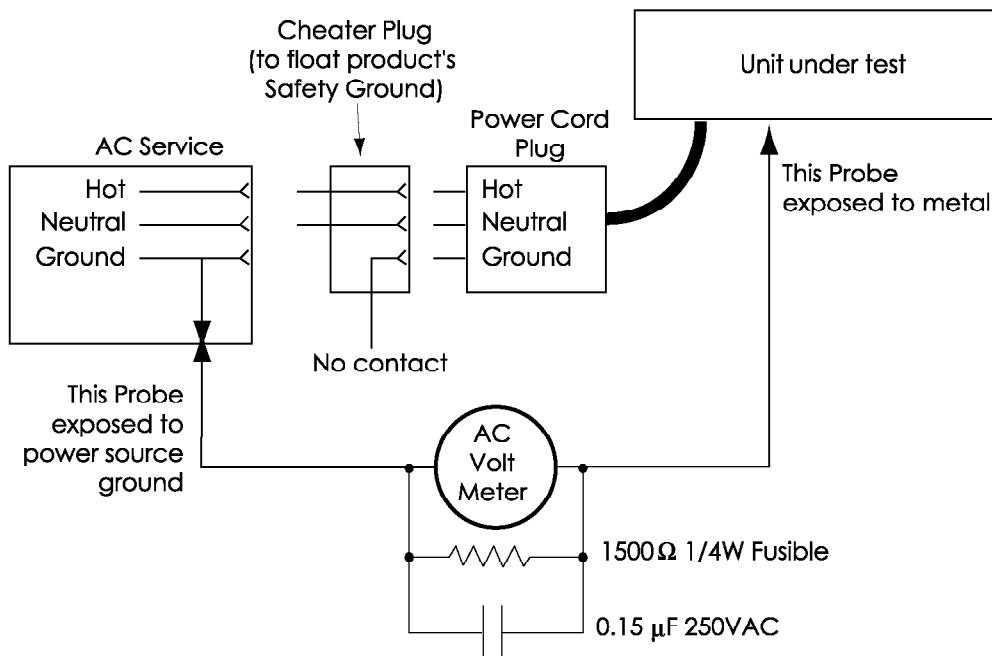

Safety test

You must perform the following leakage test before returning the unit to your customer. Take every safety precaution to protect yourself while doing this test.

1. Make a small loading RC circuit as shown in the diagram below, and connect the AC volt meter between the AC power source ground and any exposed metal on the unit under test.
2. Connect the unit under test to an AC power source using a ground-lift adaptor, leaving the unit's safety ground floating. Turn the unit on.
3. The meter reading should be less than 750mVAC (note: this is equivalent to 0.5mA of leakage current).
4. Flip the plug over in the receptical so the hot and neutral are swapped. Verify that the reading is still less then 750mVAC.
5. If either reading is greater than 750mVAC, then you must investigate and repair the unit before returning it to your customer.

THE MACKIE FIXER • MACKIE DESIGNS SERVICE NEWS

FR series Amplifier ribbon replacement instructions (NEW! IMPROVED! July 2000)*

Models affected: FR series M1200, M1400, M1400i

M1200: All models. **M1400i:** Before Serial # DA20889 and all models with "AM" prefix.

M1400 and 230v versions: Before Serial # DB12700 and all models with "AH" prefix.

Add this as part of your normal repair procedures.

Note: This bulletin replaces all previous ribbon bulletins.

Symptom:

Ch.1 or 2 output signal intermittently fades out, or cuts out completely and/or the DC supply rail fuses blow.

Possible Cause:

The two ribbon cables from the input board may be defective

Solution:

* Replace the input ribbon cables with an improved type in all of the above models, (including any which have had the previous ribbon bulletin completed).

Safety Warning:

⚠ Caution! These instructions are for use by qualified personnel only. To avoid electric shock, do not perform any servicing unless you are qualified to do so. Refer all service to qualified personnel.

Tools Required:

Phillips screwdriver, Torx and Allen drivers, needle nose pliers, safety glasses.

Parts Required:

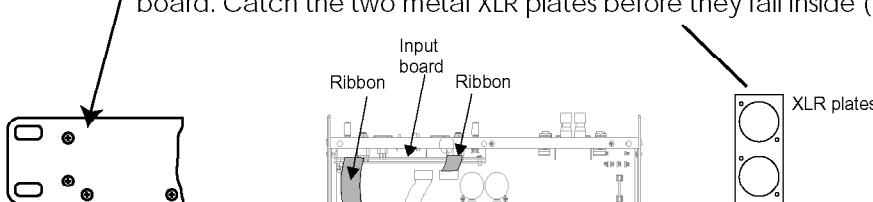

040-359-00	Ribbon cable, 28GA, 20 Pin, Length 4.25", PLZD	Quantity = 1
040-360-00	Ribbon cable, 28GA, 20 Pin, Length 18", PLZD	Quantity = 1
400-077-00	20 Pin Headers	Quantity = 2

Procedure:

1. Remove all cords (including the power cable and speaker outputs) from the amplifier.
2. Take off the top cover and inspect the ribbon cables. If they are not marked 040-359-00 or 040-360-00 then proceed as follows:

Remove the input board:

3. Undo the XLR screws, TRS nuts, and pull out the four pot knobs.
4. Disconnect the short ribbon cable from the amp board, and the long cable from the front panel display board. On later amplifiers, you will have to remove the front display board first.
5. Disconnect the black ground wire from the amp board.
6. Undo the four screws on the right side of the chassis. This will give enough room to pull out the input board. Catch the two metal XLR plates before they fall inside (not present on later amplifiers).

Continued....

THE MACKIE FIXER • MACKIE DESIGNS SERVICE NEWS

Procedure continued.

Input board work:

If the two ribbon cables are soldered to the input board, follow steps 7 to 11. If not, then go to step 12.

7. Remove the metal shield plate and insulator sheet from the back of the input board.
8. Carefully unsolder the ribbon cable headers from J16 and J11.
Discard part# 040-033-03, 4 inch ribbon cable.
Discard part# 040-033-02, 18 inch ribbon cable.
9. Solder two new headers (#400-077-00) to the input board, with the cutout side pointing towards the center of the input board (i.e. downwards).
10. Replace the metal shield plate and insulator sheet onto the back of the input board.
11. Add part# 040-359-00, 4.25 inch ribbon cable to J11.
Add part# 040-360-00, 18 inch ribbon cable to J16.
Align each cable's color stripe with the header's pin 1.

Make sure both ribbons are **fully inserted**, then proceed to step 15.

If the two ribbon cables are not soldered to the board, follow steps 12 to 14.

12. Discard part# 040-062-00, 4.25 inch ribbon cable.
Discard part# 040-062-02, 18 inch ribbon cable. You may have to undo the display board screws in order to remove it from J1.
13. Add part# 040-359-00, 4.25 inch ribbon cable to J11.
Add part# 040-360-00, 18 inch ribbon cable to J16.
Align each cable's color stripe with the header's pin 1.

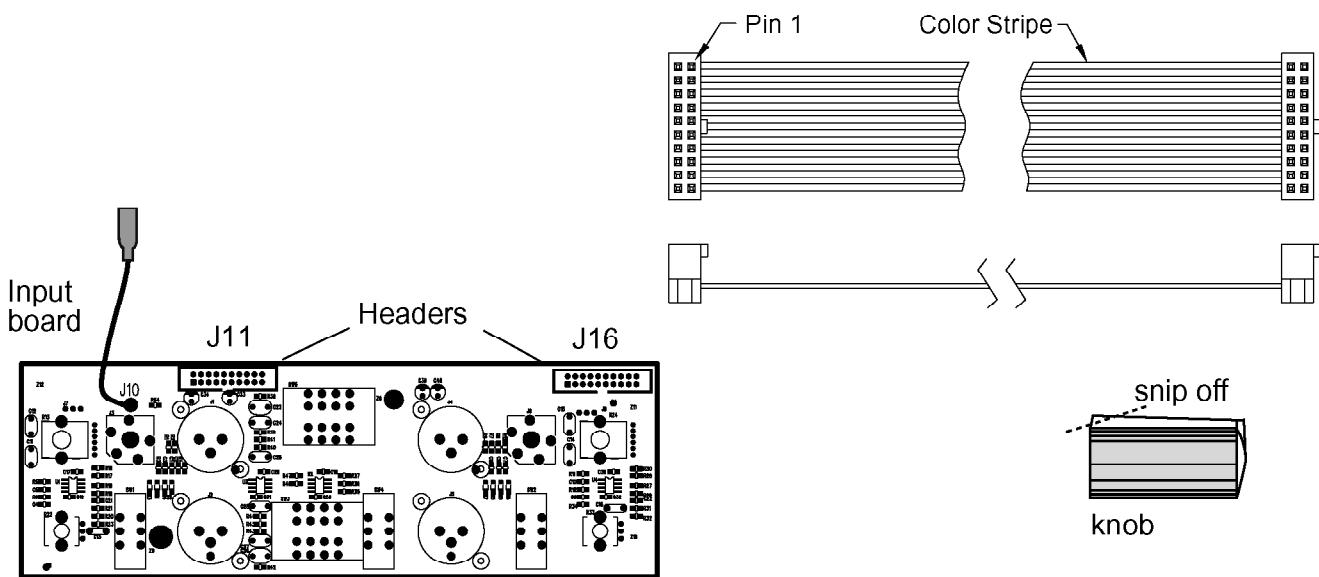

Make sure both ribbons are **fully inserted**.

14. Refit the display board, once the long ribbon cable is securely attached to J1.

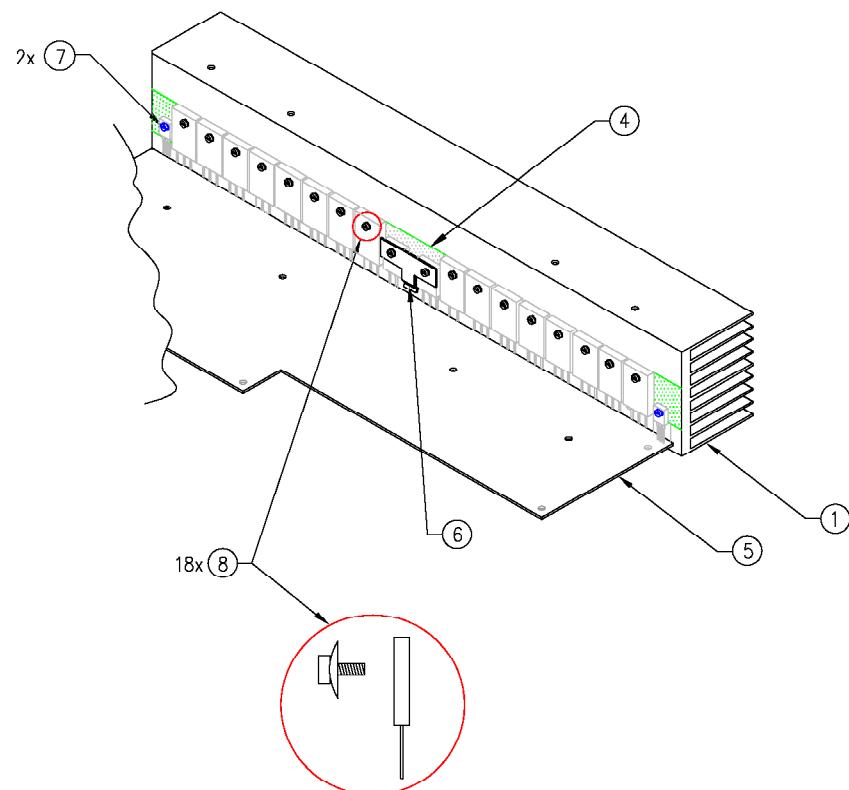

Putting the input board back in:

15. Add the two metal XLR plates (where fitted) and carefully fit the input board back in place. Put the four pot knobs back after the board is in place.
16. It can be difficult getting the knobs back on through the chassis holes, but you can make it easier by snipping off a bit of the plastic center ridge, as shown in the little knob diagram below.
17. Add and tighten all the nuts and screws, and the four chassis screws (removed in step 6).
18. Make sure that all ribbon cables are secure and that all ends are fully inserted.
19. Reconnect the black wire from the input board to the amp board.
20. Replace the top cover.
- 21/ Perform a complete specification and safety test before returning the unit to the customer.

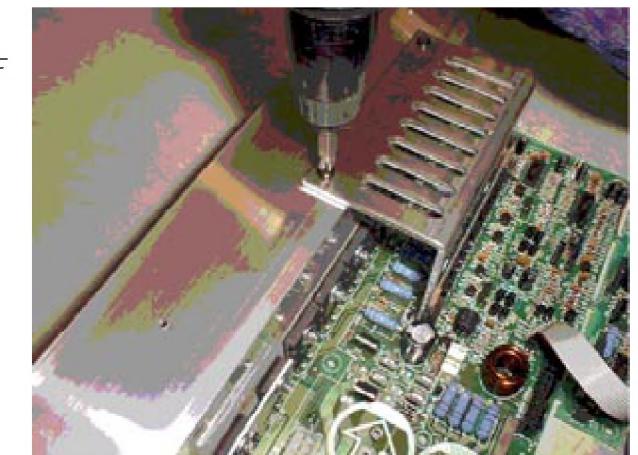

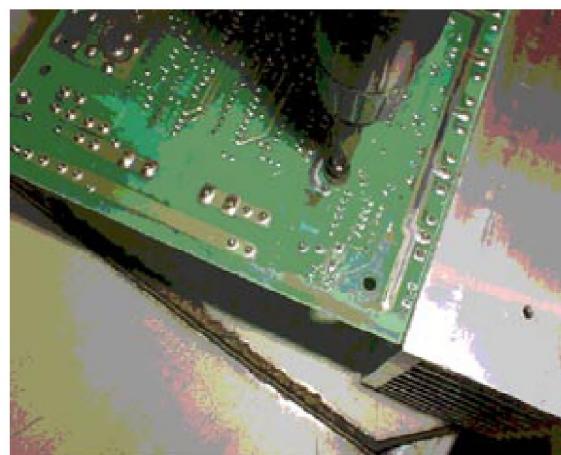

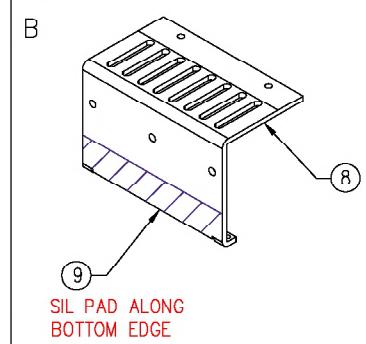

FASTEN TRANSISTOR TO HEATSINK

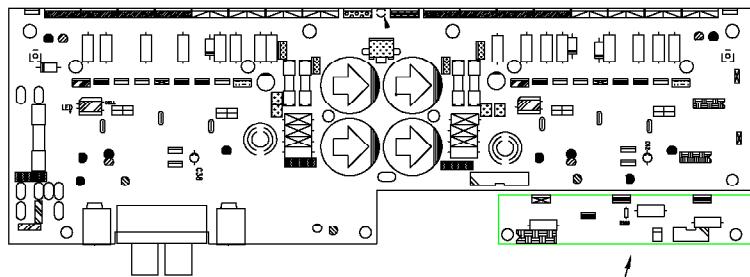

STEP	TASK			
A	INSPECT ITEM ① HEATSINK FOR SCRATCHES, DINGS, AND BURRS. SAND AS REQUIRED TO REMOVE SCRATCHES AND BURRS.			
B	CLEAN ITEM ① HEATSINK USING ITEM ② CITRUS CLEANER. USE COMPRESSED AIR TO BLOW OFF ANY REMAINING DUST OR DEBRIS.			
C	APPLY A THIN EVEN COAT OF ITEM ③ THERMAL JOINT COMPOUND TO ITEM ① HEATSINK. APPLY TO AREA THAT WILL BE COVERED BY SILPAD.			
D	CLEAN ITEM ④ SILPAD WITH A CLEAN CLOTH. SILPADS SHOULD BE STORED IN ORIGINAL PACKAGING TO PREVENT CONTAMINATION FROM DUST OR DEBRIS. IT IS ABSOLUTELY CRITICAL THAT THE HEATSINK AND SILPAD ARE THOROUGHLY CLEAN BEFORE PROCEEDING.			
E	PLACE ITEM ④ SILPAD ON ITEM ① HEATSINK. ENSURE HOLES IN SILPAD ALIGN WITH HOLES IN HEATSINK.			
F	INSPECT ITEM ⑤ PCB: 1) CHECK TOP SIDE FOR LOOSE, MISSING, LIFTED AND BACKWARDS PARTS. 2) CHECK BACKSIDE FOR UNTRIMMED LEADS, MISSING SOLDER AND SOLDER BRIDGES. 3) CHECK METAL ON TRANSISTORS FOR SCRATCHES, BURRS, OR OTHER MATERIAL THAT MAY DAMAGE SILPAD.			
G	INSTALL ITEM ⑤ MAIN PCB ONTO ITEM ① HEATSINK.			
H	PLACE ITEM ⑥ (1X) T-CLIP ON CENTER COMPONENTS.			
I	INSTALL ALL HARDWARE ITEMS ⑦ (2X), & ⑧ (18X).			
ITEM	DESCRIPTION	PART NUMBER	QTY	TORQUE IN. LBS.
①	HEATSINK	551-085-00	1	
②	3M CITRUS CLEANER	730-006-00	A/R	
③	THERMAL JOINT COMPOUND	730-001-00	A/R	
④	SILPAD	410-006-00	1	
⑤	MAIN PCB	055-255-01-01	1

#2 INSTALL SUBSINKS					
STEP	TASK				
A	TIGHTEN ITEM ① (2x) & ITEM ② (18x) SCREWS. CAUTION: BE SURE THERE IS NO DIRT OR OTHER PARTICLES BETWEEN THE HEATSINK, SILPAD AND COMPONENTS.				
B	APPLY ITEM ⑨ SILPAD (2x) TO BOTTOM EDGE OF ITEM ⑧ SUBSINK (2x). CAUTION: THERE CAN NOT BE ANY AIR BUBBLES, DIRT, OR OTHER PARTICLES TRAPPED UNDER OR IN THE SILPAD.				
C	APPLY ITEM ⑫ THERMALCOTE AS A THIN FILM ON THE UNDERSIDE OF ITEM ⑧ SUBSINK (2x) AT THE HEATSINK MATING SURFACE.				
D	START ITEM ⑪ (2x) SCREWS INTO HEATSINK.				
E	INSTALL ITEM ⑧ SUB-SINK (2x) TO PCB, BE SURE BE SURE TO INCLUDE ITEM ⑩ FIBRE WASHER USING 7 IN. LBS.				
F	TIGHTEN ITEM ⑧ SUB-SINK (2x) TO ITEM ① HEATSINK ASSEMBLY USING ITEM ⑪ SCREWS (4x), USING 12 IN. LBS.				
ITEM	DESCRIPTION	PART NUMBER	QTY	TORQUE IN. LBS.	
1	TF 4-40x5/8 TORX 1/4	700-087-00	2	10	
2	TF 4-40x5/8 TORX 3/8	700-088-00	18	13

12	THERMALCOTE	730-001-00	A/R		

STEP	TASK
A	INSTALL ITEM ① CAPACITORS (4x), USING ITEM ② BLACK GLUE (A/R), TO UNDERSIDE OF CAPS.
B	SOLDER ITEM ① CAPACITORS (4x), USING CAP FIXTURE, AND TRIM LEADS.
C	AFTER SOLDERING CAPS, APPLY ITEM ② BLACK GLUE TO MATING SURFACES BETWEEN CAPACITORS.
D	SEPARATE POWER SUPPLY BOARD FROM MAIN CIRCUIT BOARD FOR USE AT NEXT STATION.

SEPARATE POWER SUPPLY PCB FROM MAIN BOARD.

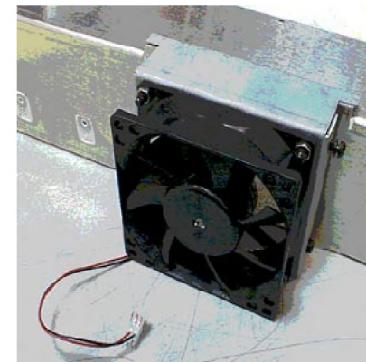

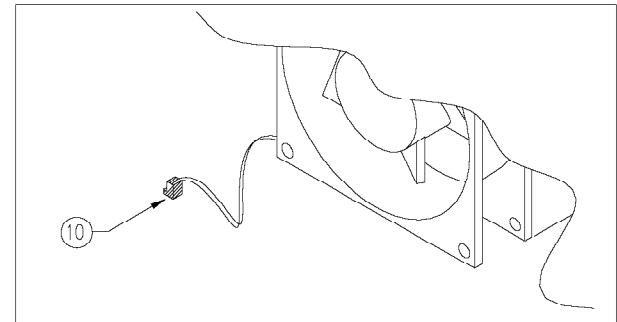

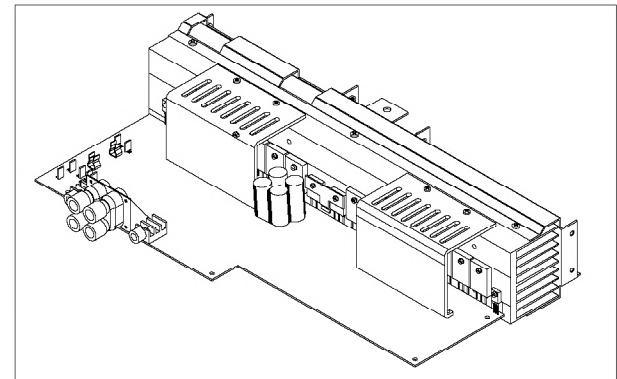

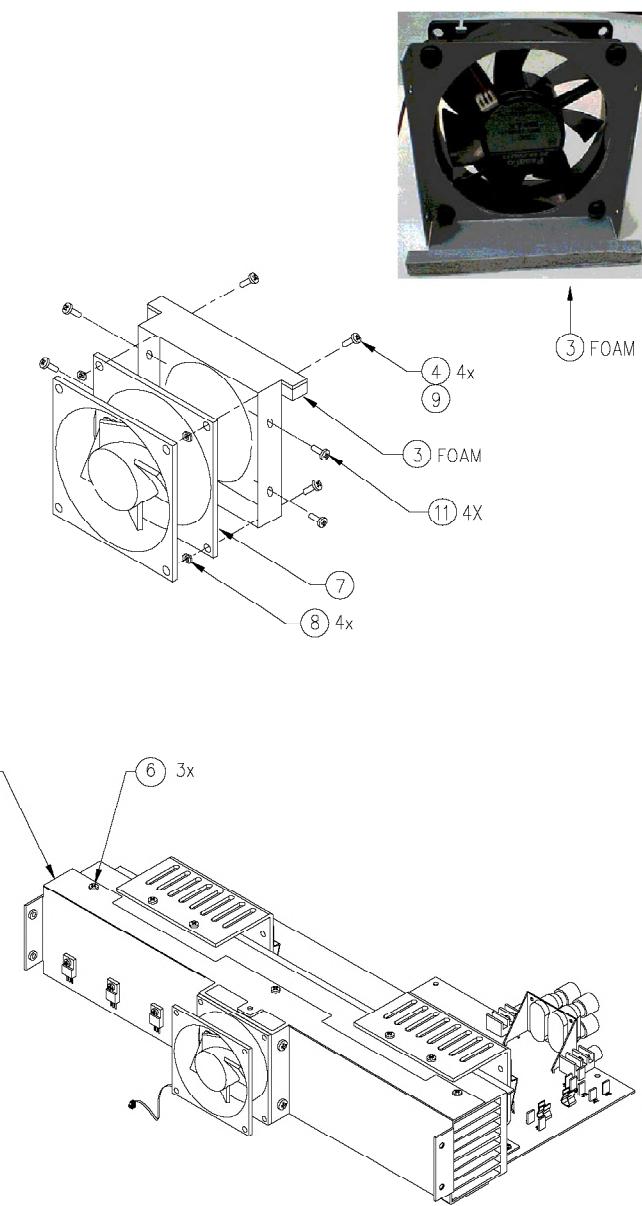

ITEM	DESCRIPTION	PART NUMBER	QTY
1	CAPACITORS 12,000uF	220-035-00	4
2	BLACK GLUE	730-003-00	A/R

INSTALL FAN AND COWLING

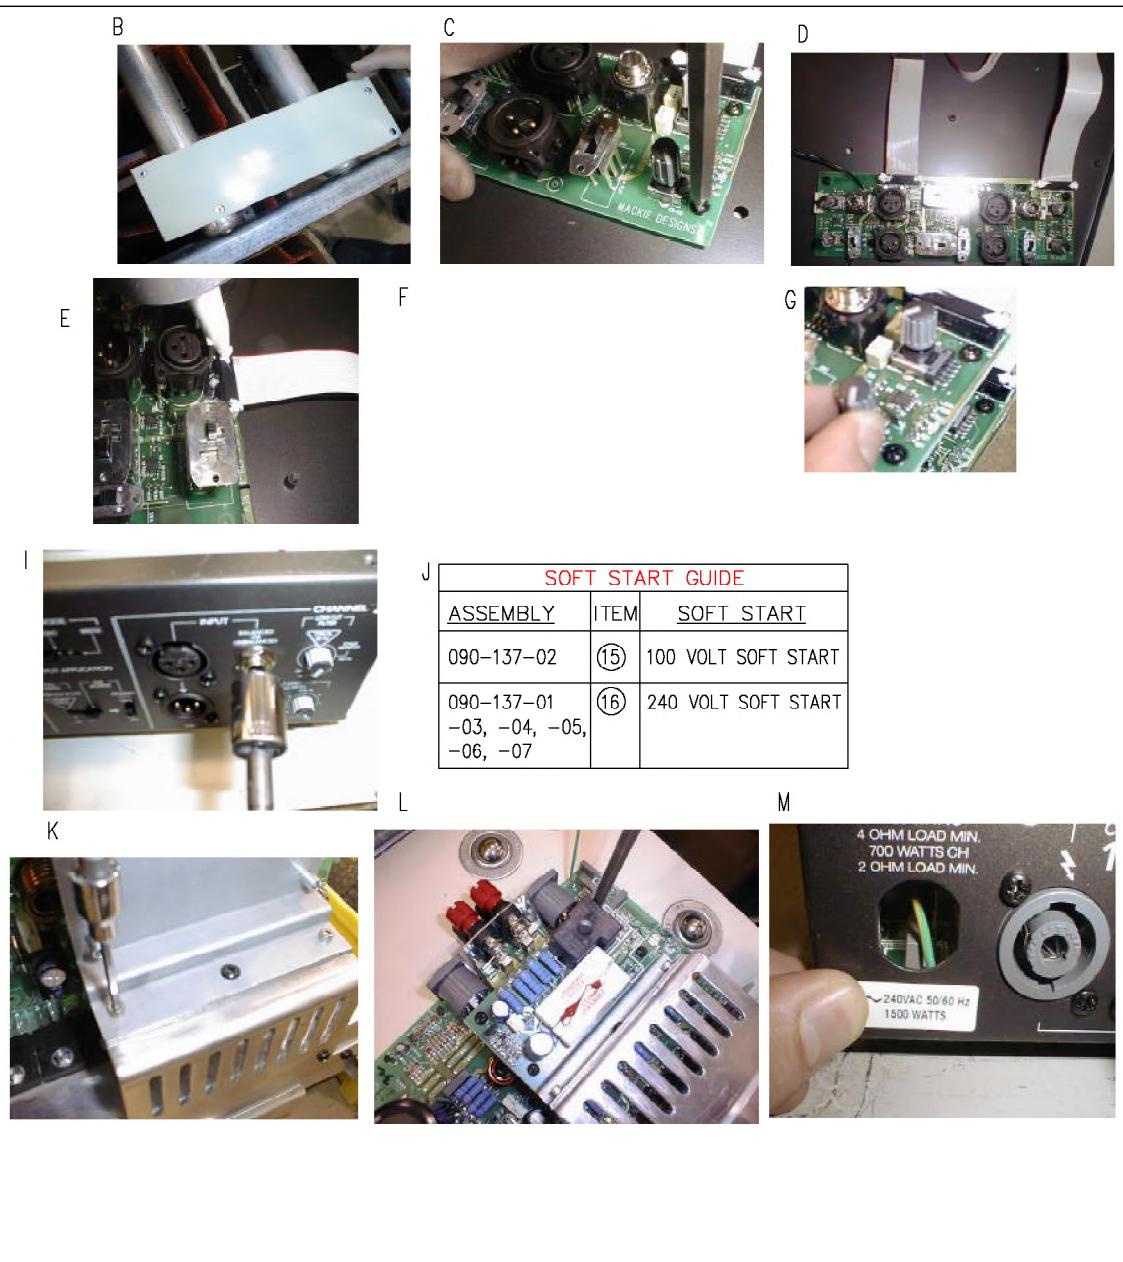

STEP	TASK
A	INSTALL ITEM ⑩ CONNECTOR (1x) ONTO FAN WIRES (SEE NOTE ON PCB AT J3 FOR PROPER WIRE LOCATIONS).
B	MOUNT ITEM ⑦ FAN (1x) TO ITEM ① FAN BRACKET (1x) USING ITEM ④ SCREWS (4x), AND ⑧ NUT (4x). APPLY ITEM ⑨ LOCTITE TO SCREWS.
C	MOUNT ITEM ① FAN BRACKET (1x) TO ITEM ⑤ COWLING (1x) USING ITEM ② SCREWS (4x).
D	INSTALL ITEM ⑤ COWLING (1x) TO HEATSINK USING ITEM ⑥ SCREWS (3x).

ITEM	DESCRIPTION	PART NUMBER	QTY	TORQUE IN. LBS.
