1. Precautions

1-1. Safety Precautions

Follow these safety, servicing and ESD precautions to prevent damage and to protect against potential hazards such as electrical shock.

1-1-1. Warnings

For continued safety, do not attempt to modify the circuit board.
Disconnect the AC power and DC power jack before servicing.

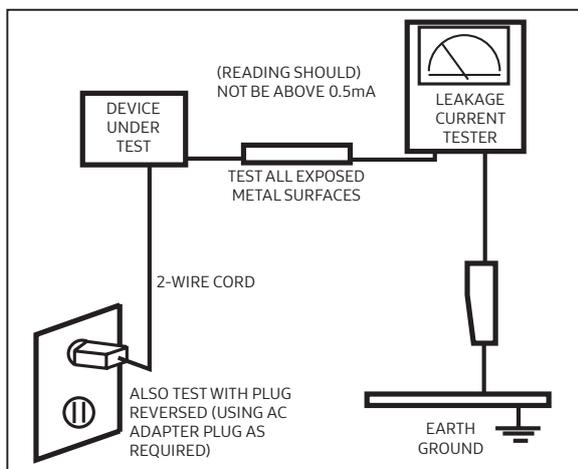

1-1-2. Servicing the LED TV

1. When servicing the LED TV, Disconnect the AC line cord from the AC outlet.
2. It is essential that service technicians have an accurate voltage meter available at all times. Check the calibration of this meter periodically.

1-1-3. Fire and Shock Hazard

Before returning the monitor to the user, perform the following safety checks:

1. Inspect each lead dress to make certain that the leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the monitor.
2. Inspect all protective devices such as nonmetallic control knobs, insulating materials, cabinet backs, adjustment and compartment covers or shields, isolation resistor/capacitor networks, mechanical insulators, etc.
3. Leakage Current Hot Check:

Do not use an isolation transformer during this test.

Use a leakage current tester or a metering system that complies with American National Standards Institute (ANSI C101.1, Leakage Current for Appliances), and Underwriters Laboratories (UL Publication UL1410, 59.7).

4. With the unit completely reassembled, plug the AC line cord directly into a 120V AC outlet. With the unit's AC switch first in the ON position and then OFF, measure the current between a known earth ground (metal water pipe, conduit, etc.) and all exposed metal parts, including: metal cabinets, screwheads and control shafts. The current measured should not exceed 0.5 milliamp. Reverse the power-plug prongs in the AC outlet and repeat the test.

1-1-4. Product Safety Notices

Some electrical and mechanical parts have special safetyrelated characteristics which are often not evident from visual inspection. The protection they give may not be obtained by replacing them with components rated for higher voltage, wattage, etc. Parts that have special safety characteristics are identified by  on schematics and parts lists. A substitute replacement that does not have the same safety characteristics as the recommended replacement part might create shock, fire and/or other hazards. Product safety is under review continuously and new instructions are issued whenever appropriate.

1-2. Servicing Precautions

An electrolytic capacitor installed with the wrong polarity might explode.

Before servicing units covered by this service manual, read and follow the Safety Precautions section of this manual.

If unforeseen circumstances create conflict between the following servicing precautions and any of the safety precautions, always follow the safety precautions.

1-2-1. General Servicing Precautions

1. Always unplug the unit's AC power cord from the AC power source and disconnect the DC Power Jack before attempting to: (a) remove or reinstall any component or assembly, (b) disconnect PCB plugs or connectors, (c) connect a test component in parallel with an electrolytic capacitor.
2. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring is sometimes clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
3. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the area around the serviced part has not been damaged.
4. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels, input terminals and earphone jacks).
5. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500 V) to the blades of the AC plug. The insulation resistance between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
6. Always connect a test instrument's ground lead to the instrument chassis ground before connecting the positive lead; always remove the instrument's ground lead last.

1-3. Static Electricity Precautions

Some semiconductor (solid state) devices can be easily damaged by static electricity. Such components are commonly called Electrostatically Sensitive Devices (ESD). Examples of typical ESD are integrated circuits and some field-effect transistors. The following techniques will reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. To avoid a shock hazard, be sure to remove the wrist strap before applying power to the monitor.
2. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of an electrostatic charge.
3. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ESDs.
4. Use only a grounded-tip soldering iron to solder or desolder ESDs.
5. Use only an anti-static solder removal device. Some solder removal devices not classified as “anti-static” can generate electrical charges sufficient to damage ESDs.
6. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
7. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Be sure no power is applied to the chassis or circuit and observe all other safety precautions.

8. Minimize body motions when handling unpackaged replacement ESDs. Motions such as brushing clothes together, or lifting your foot from a carpeted floor can generate enough static electricity to damage an ESD.

1-4. Installation Precautions

1. For safety reasons, more than a people are required for carrying the product.
2. Keep the power cord away from any heat emitting devices, as a melted covering may cause fire or electric shock.
3. Do not place the product in areas with poor ventilation such as a bookshelf or closet. The increased internal temperature may cause fire.
4. Bend the external antenna cable when connecting it to the product. This is a measure to protect it from being exposed to moisture. Otherwise, it may cause a fire or electric shock.
5. Make sure to turn the power off and unplug the power cord from the outlet before repositioning the product. Also check the antenna cable or the external connectors if they are fully unplugged. Damage to the cord may cause fire or electric shock.
6. Keep the antenna far away from any high-voltage cables and install it firmly. Contact with the highvoltage cable or the antenna falling over may cause fire or electric shock.
7. When installing the product, leave enough space (0.4m) between the product and the wall for ventilation purposes. A rise in temperature within the product may cause fire.
8. If an equipment is provided with a replaceable battery, and if replacement by an incorrect type could result in an explosion (for example, with some lithium batteries), the following applies:

CAUTION

- Risk of explosion if battery is replaced by an incorrect type dispose of used batteries according to the instructions.
- Do not dispose of batteries in a fire.
- Do not short circuit, disassemble or overheat the batteries.
- Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.
- Do not be exposed to excessive heat such as sunshine, fire or the like.

2. Product Specifications

2-4. Viewing the Functions

2-4-1. 2018' Concept

■ An intelligent way to enjoy the smart TV

Get to your entertainment the faster, easier, and intelligent way. A personal assistant that has you covered, a remote to control all, and a simple hub to control all devices. Search less, and watch more. Enjoying TV has never been this easy.

■ Bixby on TV

Control your TV the more intelligent way with Bixby.

It's easier, too. Just tell Bixby to flip channels, search for content, and open your apps.

Not only does Bixby help find your favourite content, it can even control your home IoT devices.

NOTE

- For the Bixby on TV functions, phones compatible with it are required.
- Actual product and remote control may differ from image shown.

■ One Remote Control

Easily control all connected devices and content with just One Remote Control. It also has an auto detection feature, which automatically connects and labels all connected devices. Easy to find, easy to use. Just one remote control.

NOTE

- Actual product and remote control may differ from image shown.

■ Universal Guide

Don't waste time worrying about what to watch next. Universal Guide not only shows you popular shows and content, it recommends content specifically to your viewing preference by analyzing your viewing pattern over the past few months.

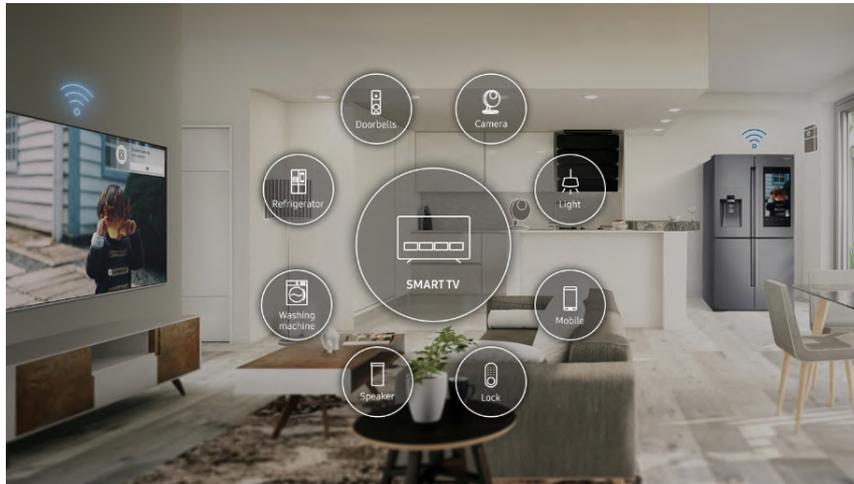

NOTE

- Agreement of the Smart Hub Terms and Conditions and Privacy Policy is required before use.
- Smart service and GUI(Graphic User Interface) may vary by model and region.

SmartThings

Keep your smart devices connected. SmartThings enables TV to connect various your smart home devices, from fridge to mobile, for seamless interaction.

NOTE

- SmartThings compatible devices may vary by region.
- This function may differ by mobile and OS(Operation System).
- Download and installation of SmartThings app are required.

Game Mode, get your best game on

Whether it's dynamic action or something fun from the arcade, Game Mode gives you the best gaming environment.

- Minimal Input Lag: Enjoy seamless dynamic action with fast interaction and minimal lag.
- Smooth Motion: See smooth motion even when playing games with high graphic quality.

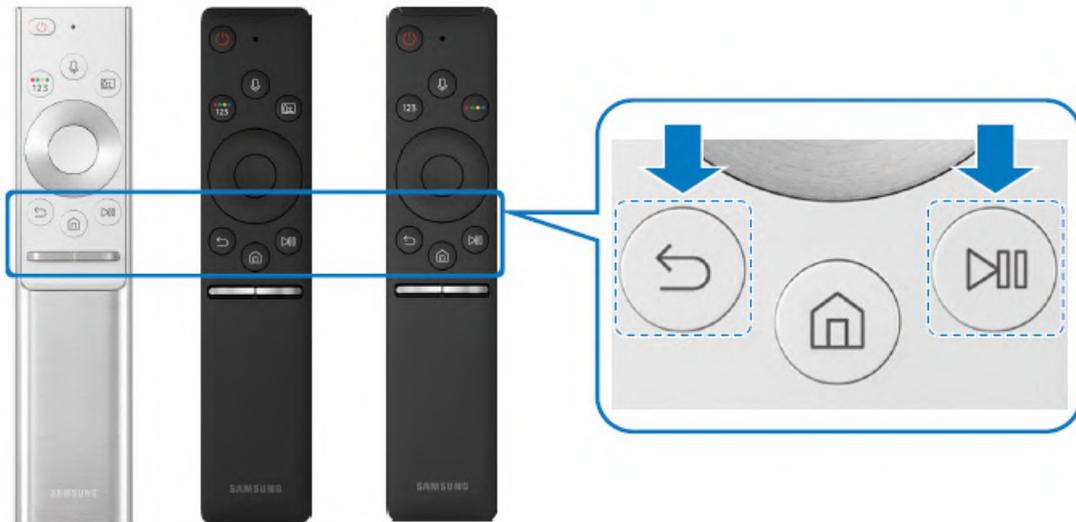

2-4-2. Quick Guides

You can learn quickly how to run and use the frequently used functions, such as Bixby, Ambient Mode, and Smart Hub.

■ Connecting the Samsung Smart Remote to the TV

Connect the Samsung Smart Remote to your TV to operate the TV.

When you turn on the TV for the first time, the Samsung Smart Remote pairs to the TV automatically. If the Samsung Smart Remote does not pair to the TV automatically, point it at the remote control sensor of the TV, and then press and hold the  and  buttons simultaneously for 3 seconds or more.

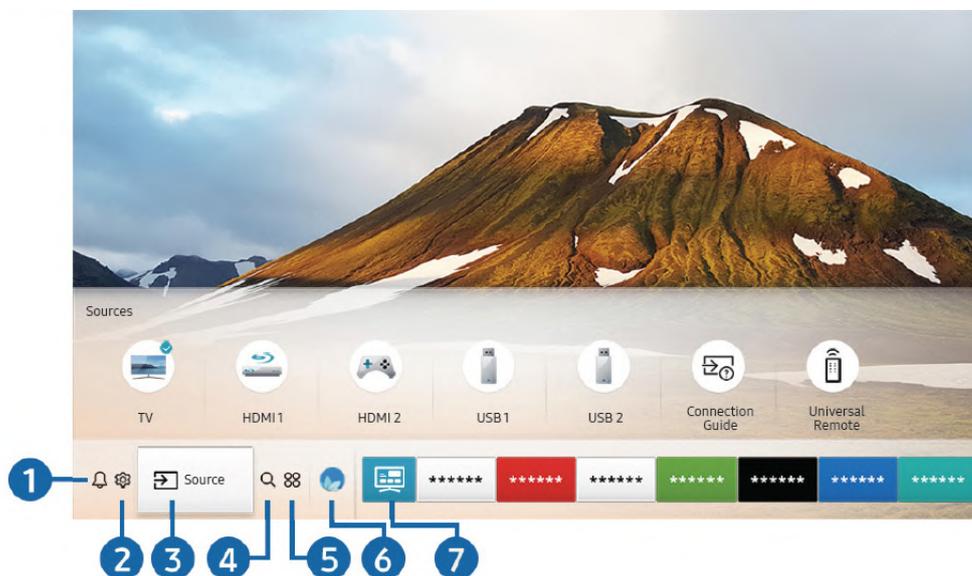

NOTE

- The images, buttons, and functions of the Samsung Smart Remote may differ depending on the model.
- For more information about the Samsung Smart Remote that comes with the UHD TV, refer to "About the Samsung Smart Remote (UHD TV)."
- The Samsung Smart Remote may not be supported depending on the model or geographical area.

■ Using Smart Hub

Connect to Smart Hub for apps, games, movies, and more.

Enjoy the multiple functions provided by **Smart Hub** simultaneously on a single screen.

NOTE

- The image on your TV may differ from the image above depending on your model and geographical area.

When you press the  button on your remote control, you can use the following functions and features.

1 Notification

You can view a list of notifications for all events that occur on your TV. A notification appears on the screen when it is time to broadcast a scheduled program or when an event occurs on a registered device.

2 Settings

When the focus is moved to the  icon, a list of quick settings icons appears above the top of the menu. You can quickly set frequently used functions by clicking the icons.

3 Settings

You can select an external device connected to the TV.

4 Search

You can search data for channels, programs, movie titles, and apps from Smart Hub.

- To use this feature, the TV must be connected to the Internet.

5 APPS

You can enjoy a wide range of content including news, sports, weather, and games by installing the corresponding apps on your TV.

- To use this feature, the TV must be connected to the Internet.

6 Ambient Mode

In **Ambient Mode**, you can view beautiful screens, various visual information, and notifications while the TV screen is turned off.

To enter **Ambient Mode**, press the  button. To return to the TV mode, press the  or  button. To shut off the TV, press the  button.

If you press the  button when the TV is turned off, the TV turns on in **Ambient Mode**.

- If you use a remote control other than the Samsung TV remote control, there may be restrictions to entering **Ambient Mode**.

7 Universal Guide

Universal Guide is an app that allows you to search for and enjoy content such as TV shows, dramas, movies, sports broadcasts, and music being provided by other apps.

■ Using Bixby

Speak into the microphone on your Samsung Smart Remote to control your TV.

NOTE

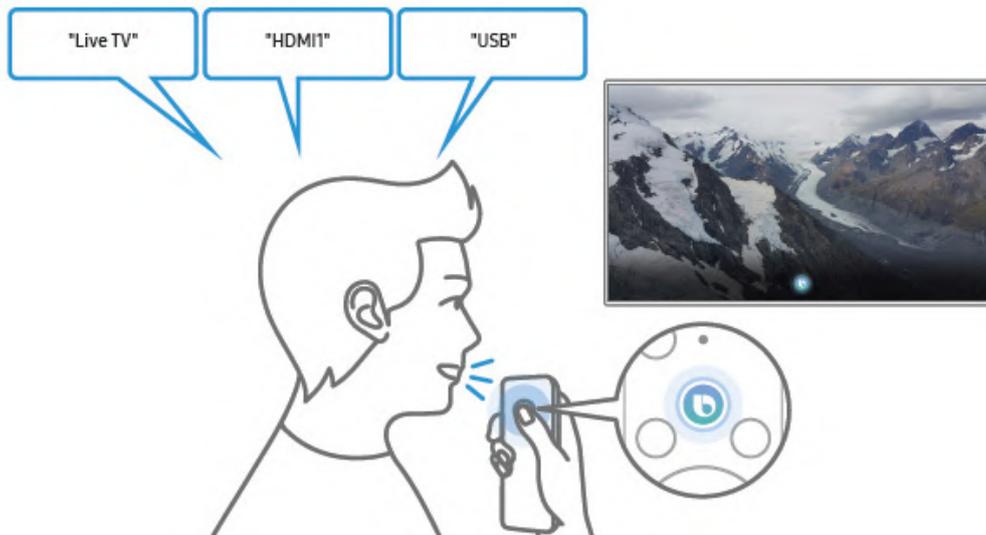

- This function may not be supported depending on the model or geographical area.
- The supported language may differ depending on the geographical area.

Running Bixby

Press and hold the  button on your Samsung Smart Remote, say a command, and then release the  button. The TV recognizes the voice command.

NOTE

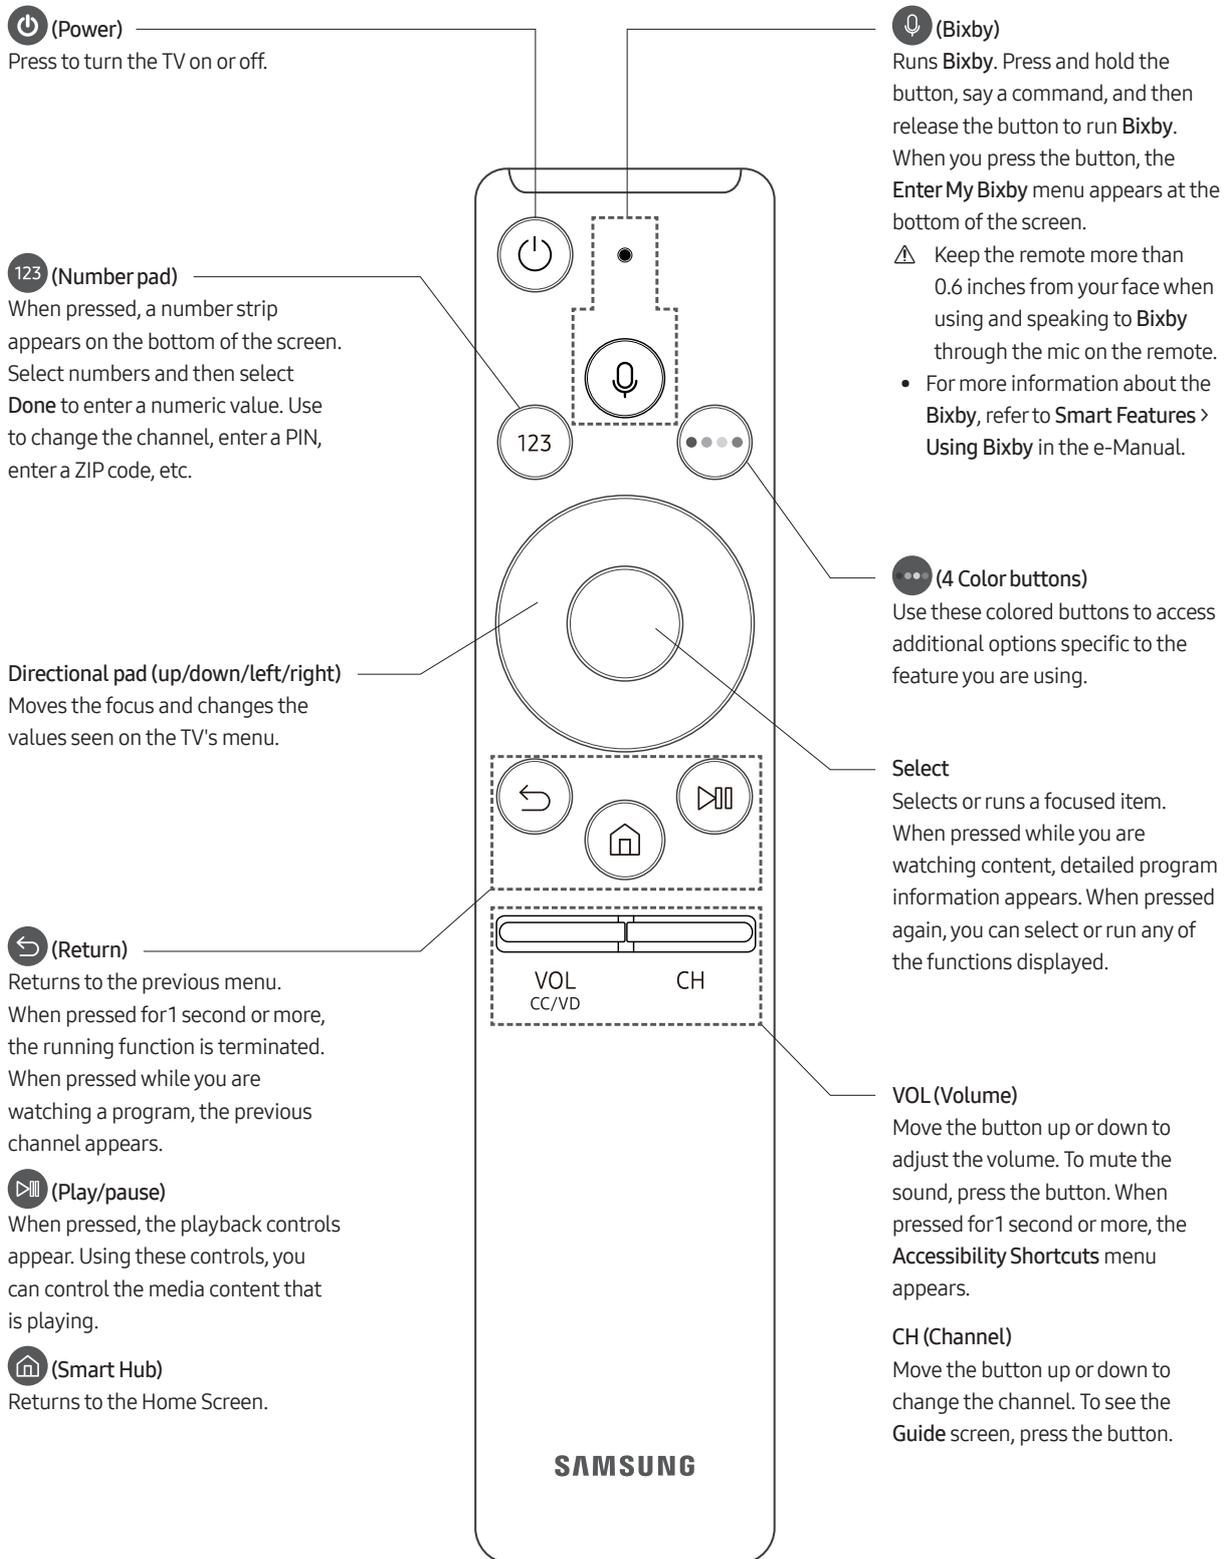

- To view the **Bixby** guide, press the  button once. When you press the  button for the first time, the **Using Bixby** button appears at the bottom of the screen. Press the Select button. The **Using Bixby** popup window appears and a tutorial on using **Bixby** is shown. When you press the  button, the **Enter My Bixby** button appears at the bottom of the screen. Press the Select button to go to the **My Bixby** screen.

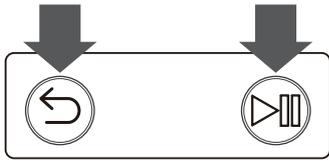

2-4-3. The Samsung Smart Remote

 **NOTE**

- The images, buttons, and functions of the Samsung Smart Remote may differ depending on the model.

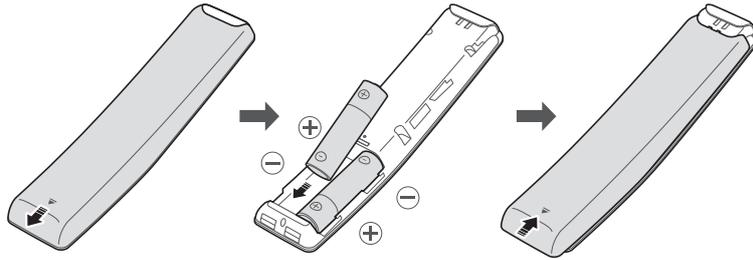

■ Pairing the TV to the Samsung Smart Remote

When you turn on the TV for the first time, the Samsung Smart Remote pairs to the TV automatically. If the Samsung Smart Remote does not pair to the TV automatically, point it at the remote control sensor of the TV, and then press and hold the buttons labeled  and  as shown in the figure on the left simultaneously for 3 seconds or more.

■ Installing batteries into the Samsung Smart Remote

To install the batteries, push the rear cover open in the direction of the arrow in the illustration on the left, and then insert the batteries as shown in the figure. Make sure that the positive and negative ends are facing in the correct direction.

- Alkaline batteries are recommended for longer battery life.

3. Disassembly and Reassemble

This section of the service manual describes the disassembly and reassembly procedures for the LED TV.

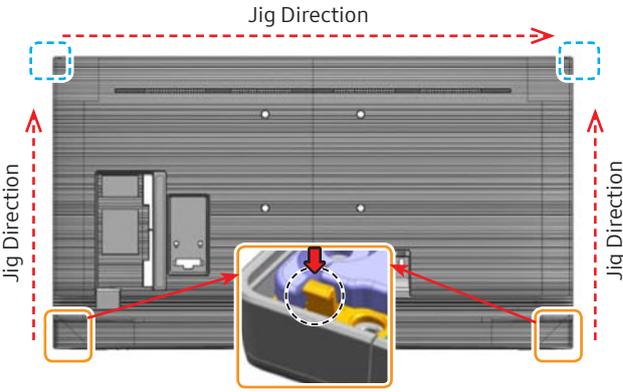

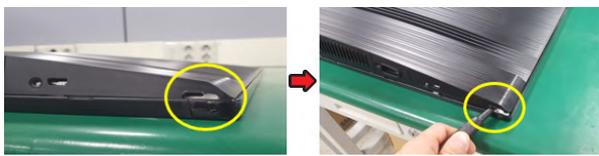

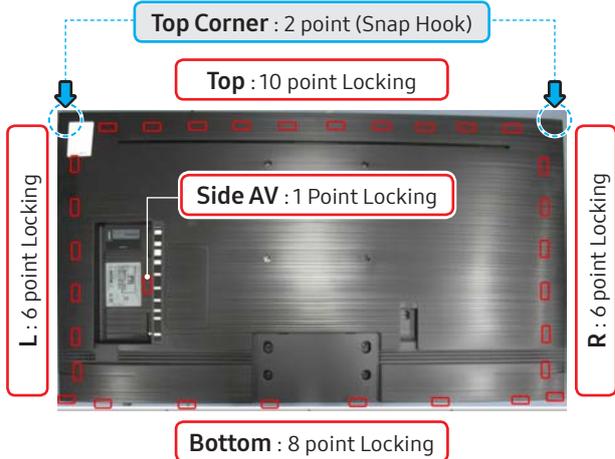

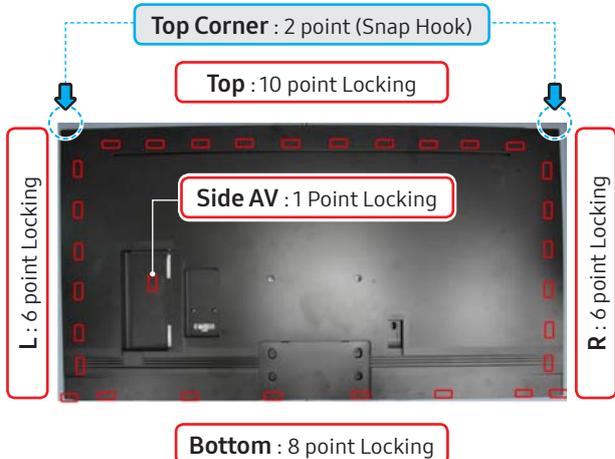

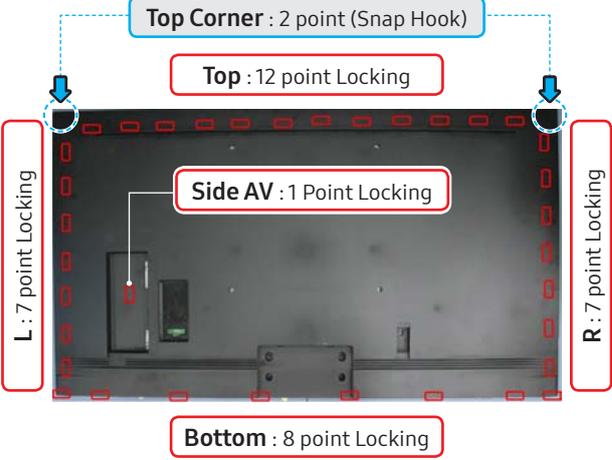

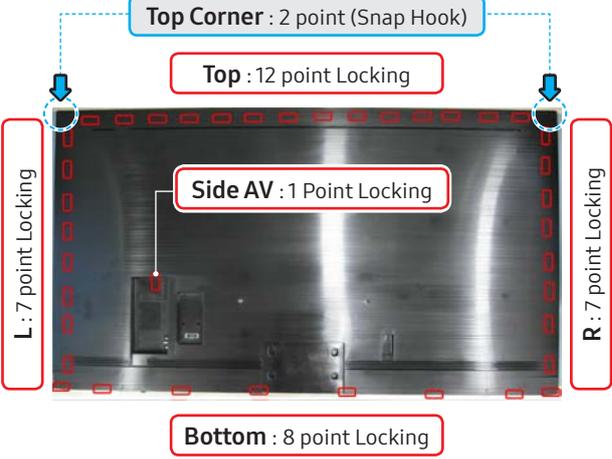

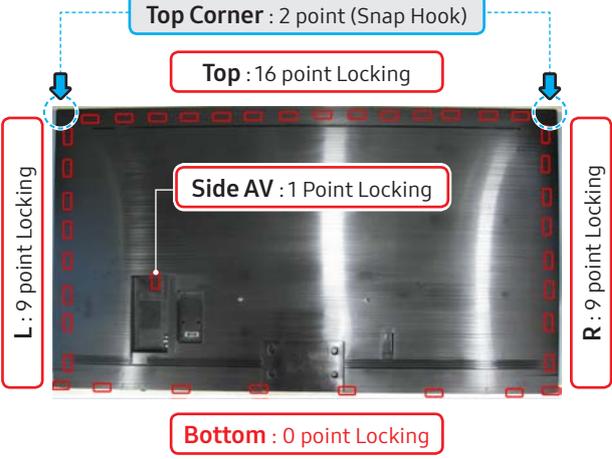

CAUTION

1. Disconnect the LED TV from the power source before disassembly.
2. Follow these directions carefully.
 - Use the Samsung Open Jig and Cushion to remove the Rear Cover.
 - Open Jig Tool, Protection Cushion (curved models Only)
 - Recommended Torque for Cabinet/Stand screws : 10 ~ 12kgf
 - A strength of Torque can be changed depending on the situation.

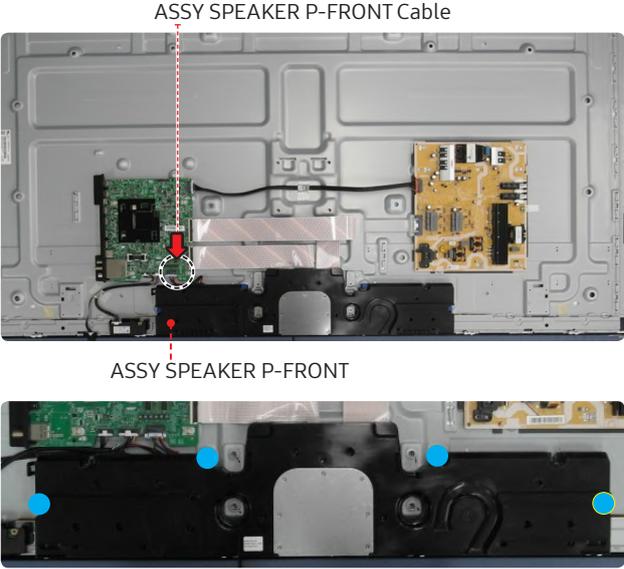

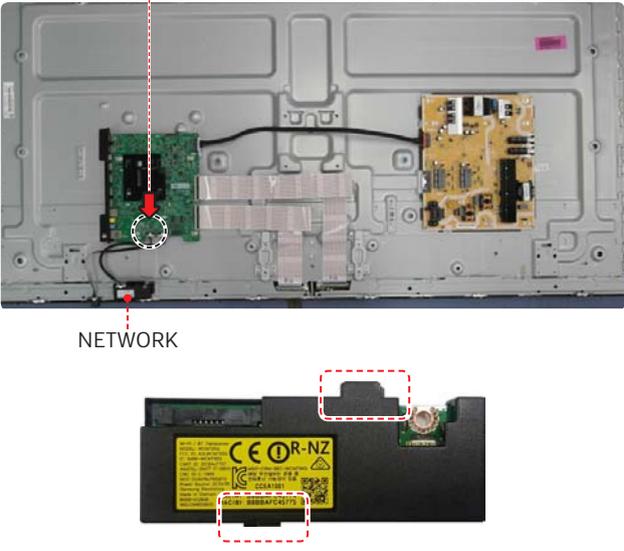

3-1. Disassembly

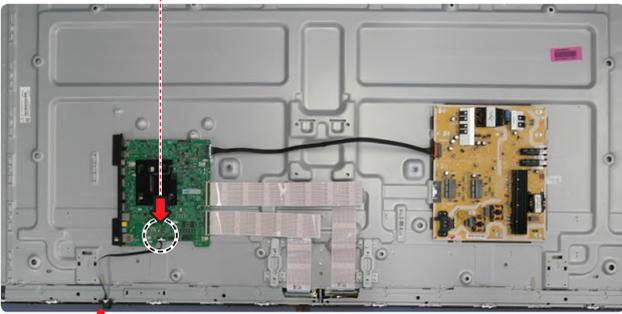

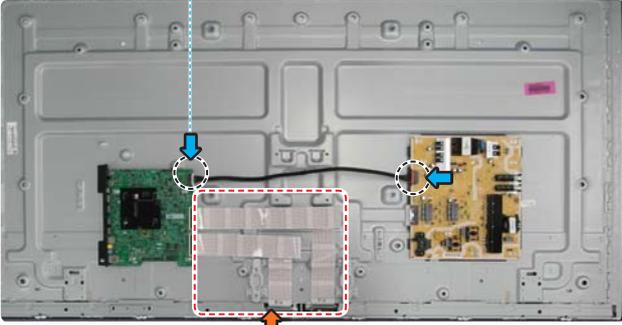

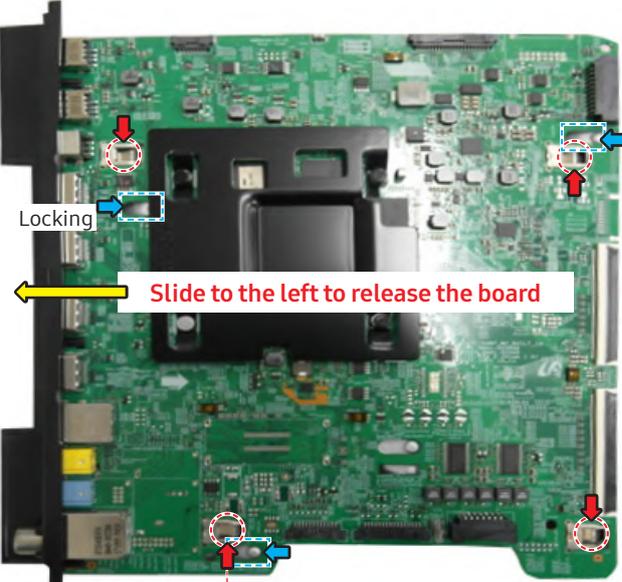

Description & Screws	Picture Description
<p>1 Carefully position the TV so that the screen is facing downwards.</p> <ul style="list-style-type: none"> • Make sure to place the TV upon a soft cushion or any material that will prevent damage to the screen. 	
<p>2 Pull out the right and left side ASSY STAND P-BRACKET BOTTOM.</p>	

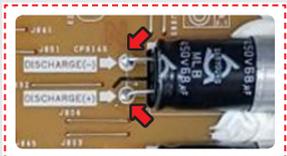

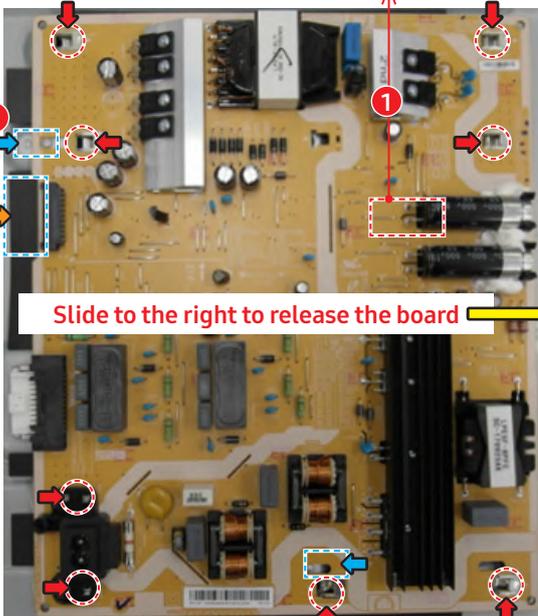

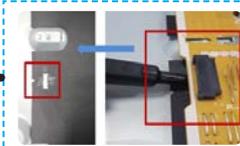

Description & Screws	Picture Description
<p>3 Use Open Jig to release tape in corners and all clips as indicated in red on sides and top & bottom.</p> <p>Gently lift up the Rear Cover starting at the top being careful of function assembly at the bottom.</p> <ul style="list-style-type: none"> • When the 4 points () Hook is broken. Although the hook is broken, the appearance of the Rear cover is no problem and Gap problem is not appeared after re-assembly. • To prevent the Inner Hook's broken. <ol style="list-style-type: none"> 1. Catch the upper section of the rear cover. 2. Open the rear cover from top to bottom. <ul style="list-style-type: none"> • If the wire is bent, need to change the wire. <p>Open Jigs</p> <p>BN81-12884A BN81-14946A</p>  <p>Locking tabs locations</p> <ul style="list-style-type: none"> • 49" 	<p>Picture Description</p>   <p><Bottom Conner></p>

7	2+	8	8+	9	2-	10	8-	11	3+	12	9+
13	3-	14	9-	15	4+	16	10+	17	4-	18	10-
19	5+	20	11+	21	5-	22	11-	23	6+	24	12+
25	6-	26	12-								

4. Troubleshooting

1. **Activate Backlights Test** : Disconnect Lead Cable from Main to Power Supply.
 - ✓ TV Screen for active backlight LEDs.
2. **If No BACKLIGHTS**
 - ✓ Minus (Control) pins & Plus (Supply) pins voltages on the Panel Connector. (**with fine test probe on left side of connector only for safety**)
 - If no pin voltages replace **SMPS**.
3. **If BACKLIGHTS ON BUT PANEL SECTION(S) OFF**
 - ✓ The Supply Drive (+) pins and (-) pins. All should measure same.
 - If a Minus (-) pin measures low (near 0 volts), a string(s) of LEDs are likely open.
 - Replace **Panel**.
 - If a (+) pin measures low voltage and it's minus pin is low but not 0V.
 - Check for Defective **SMPS**

BACKLIGHT DIMMING PROBLEMS

- Go to **Menu > Picture > Expert Settings > Backlight** and vary level (0 – 50)
- If no backlight changes observed:
 - ✓ Panel Connector **minus (-) pin voltages** and **ANA-DIM** voltages **CNL801** while changing backlight level.
 - If **minus (-) pin voltages** don't change, and **ANA-DIM** changes, replace **SMPS**.
 - If **ANA-DIM** doesn't change replace **Main/T-Con Board**.

Use: MUTE > 4 > 1 > 9 > EXIT to test Panel Vertical Backlight Sections in normal operation mode.

4-1-4. Additional Option Backlight Test

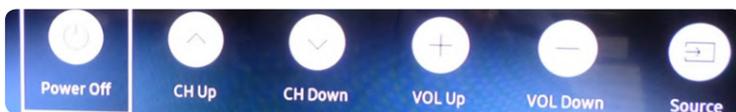

- 49 / 55 / 65 / 75 / 82 inches

1. **Activate Backlights Test** : Disconnect Lead Cable from Main to Power Supply.
 - ✓ TV Screen for active backlight LEDs.
2. **Locate LED1 through LED 6 Diodes on SMPS**
 - ✓ Check each stripe side of Diode for approx **130Vdc** (LED Drive)
 - ✓ Check other side of Diode for approx **50Vdc** (LED Control)
 - If any have low or missing 130V LED Drive **check SMPS**.
 - If any have near 0V LED Control and 130V LED Drive is OK, Replace **defective Panel**
3. **Reconnect SMPS to Main/T-Con to Operate TV Normally**
 - Adjust backlights in Picture Test between 0 to 50 range
4. **Locate LED1 through LED 6 Diodes on SMPS**
 - ✓ Check LED Control - non strip side of each Diode.
 - ✓ Check that each vary from approx 70 Volts when at 0 setting to approximately 55 Vdc at 50 setting.
 - If it doesn't change, check **ANA-DIM** changes (0.2Vdc to 0.7Vdc) on **CNL801** .
 - If **ANA-DIM** changes replace **SMPS**
 - If **ANA-DIM** doesn't change replace **Main/T-Con Board**

4-1-5. FUNCTION Control Test

CN1601_NQ8 (FUNCTION & IR)			
1	IR	2	GND
3	A3.3V_PW	4	IRB_SCL_I2C
5	IRB_SDA_I2C	6	KEY_INPUT1
7	KEY_INPUT2	8	LED_STB_OUT
9	A3.3V_PW	10	N.C
11	N.C	12	N.C

1. TV in Standby
2. Check **LED Status**.
3. If **LED is OFF**
 - ✓ LED 1.7Vdc (pin 8) and VCC for 3.3Vdc (pin 3)
 - If missing suspect Function Assy/Cable/Main board.
4. If **LED is ON**
 - ✓ Switch Operation activates on screen display.

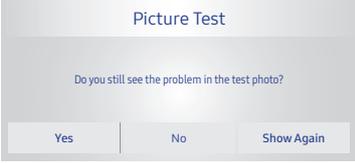

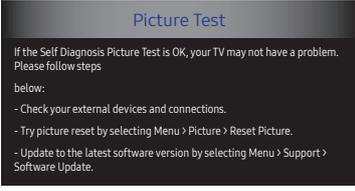

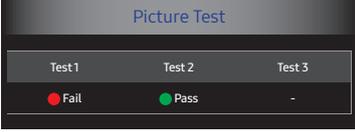

[On Screen Selections with Function Control]

- If missing:
 - ✓ **Key_Input1 Pin 6** change to 0V with a command.
 - If wrong voltage or no change:
 - ✓ Switch for stuck or miss-operation.
5. Check **IR** operation with Standard Remote command changes. (3.3V to 2.5V effective DC)
 6. **SDA, SCL** for effective 3.3Vdc (after power on)
 - If missing suspect Function Assy/Cable Assy./Main Assy.

4-2. Video

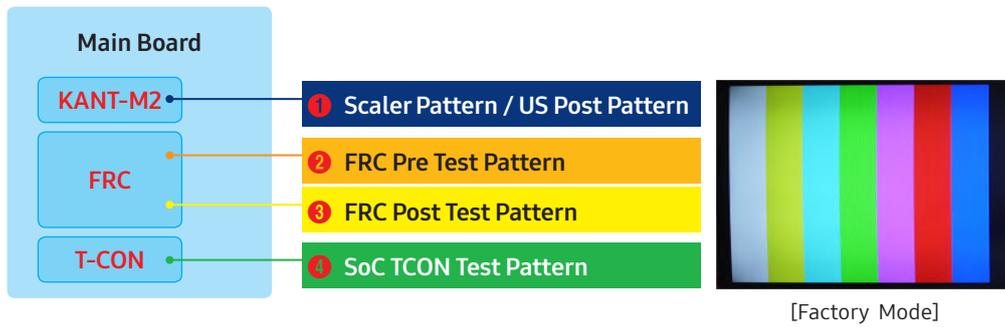

4-2-1. Customer Picture Test

■ MAIN/TCON BOARD

Main Section	Pre-FRC (T-CON)	Post FRC (T-CON)	Results	Problem
				
Pass	Pass	Pass		<ul style="list-style-type: none"> Check Signal Source and other inputs
Fail	Pass	Pass		<ul style="list-style-type: none"> Replace Main/T-CON Board
Fail	Fail	Pass		<ul style="list-style-type: none"> Replace Main/T-CON Board
Fail	Fail	Fail		<ul style="list-style-type: none"> Replace Main/T-CON Board or Panel

4-2-2. Check Test Patterns

- ENTER : **Factory mode** > **SVC** > **Test Pattern**

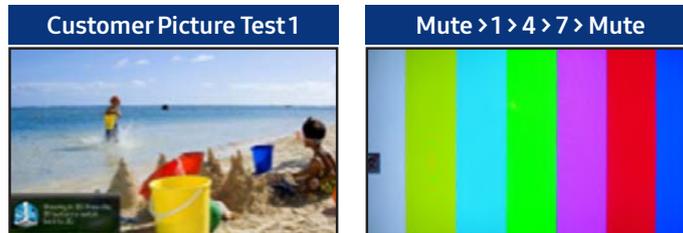

1. Verify "Scaler Pattern" and "US Post Pattern"
2. Verify "FRC Pre Test Pattern"
3. Verify "FRC Post Test Pattern"
4. Verify "SoC TCON Test Pattern"

4-2-3. MAIN/T-CON BOARD

- Main Section > PRE FRC Section > POST FRC Section > T-CONSection > PANEL

Video Operation

Generated on Main Section.

- **If OK:**
 - ✓ Source & Input Cables
 - ✓ Other inputs
- **If Noisy:**
 - ✓ Pre FRC Section Test Patterns

■ PRE FRC Section

Video Operation

Generated at Pre FRC Section.

- **If OK:**
 - ✓ Replace Main/T-Con Board
- **If Noisy:**
 - ✓ Post FRC Section

■ POST FRC Section

Video Operation

Generated at Post FRC Section.

- **If OK:**
 - ✓ Replace Main/T-Con Board
- **If Noisy:**
 - ✓ Mute > 3 > 6 > 9 > Mute

■ T-CON Section

[May not be available for Larger models over 70 inches.]

Video Operation

Generated at T-CON Section.

1. **If OK:**
 - ✓ Replace Main/T-CON Board.
2. **If Noisy:**
 - ✓ Main/T-CON Board
 - ✓ Panel

■ PANEL

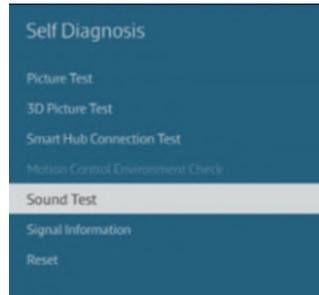

- Check Panel
1. **If Noisy Video:**
 - ✓ Soc T-CON Pattern in Factory Mode
 - Use type of Noise observed (Bars, single lines, video distortion, etc to help.)
 - If noise is only on one half of screen check / swap panel cables.
 - Verify Defective Panel Cables, TV Main/T-CON Board or Panel.

4-3. Audio

- Source (One Connect Mini) > Main Board > Speakers

■ Source (One Connect Mini)

- **No TV Sound**
 - ✓ Menu > Audio > Speaker Settings set to **TV Speaker**
- **Noisy / Distorted TV Audio**
 - ✓ Customer Menu > Support > **Sound Test**

- **If Sound Test FAILS : (Missing / Noisy Audio)**
 - ✓ Speakers (compare resistance/quality)
 - Compare audio level out to speakers with multi meter.
 - ✓ Replace defective Speakers or Main Board or Cable.
- **If Sound Test OK :**
 - ✓ Audio Source & External Cables
 - ✓ With external Audio Generator (device or App)
 - ✓ Other Inputs
 - ✓ One Connect Mini
- **Optical Digital Out Errors**
 - ✓ Red light from Optical Digital Out.
 - If missing replace One Connect Mini

■ Main Board

- **No HDMI Audio**
 - ✓ Source / HDMI Cable & One Connect Mini Connectors
 - Swap with other HDMI Inputs / Sources.
 - Perform **EDID Write** in Factory Mode (Can restore missing HDMI Audio).
 - ✓ Bulletins and Latest firmware on TV.
 - If not restored replace One Connect
 - Check Audio Format PCM / Dolby based on external Receiver
- **ARC Issues**
 - ✓ HDMI Cable is input to the ARC Designated HDMI port.
 - ✓ ARC (HDMI Control) is enabled on the external Receiver.
- **Bluetooth Audio "Sound Share" Connection Issues**
 - ✓ Sound Bar is in TV Mode.
 - To Connect, Press & Hold Play Button until Sound Bar pairing mode begins.

4-4. Network

■ TV to Router "Failure"

- ✓ **Check** Network Status

Check Network Status (TV ~~→~~ Router ~~→~~ Internet)

- ✓ **Wired & Wireless MAC Address** in Customer Support Menu.
 - **No Wired MAC Address:** Replace **Main Board**.
 - **No Wireless MAC Address:**
- ✓ Module cabling & voltages from Main Board.
 - If operating voltages are OK but signal missing.
 - ✓ Replace **WiFi Module** (WiFi/Bluetooth Module).
- ✓ Proper **security passcode**
- ✓ **Check** Wi-Fi signal strength at TV (use WiFi Analyzer or similar App).
 - Try another source (Hot spot or Test Router)
- ✓ **Check** related Bulletins.
- ✓ **Check** **Factory Mode** → **SVC** → **Info** → **WiFi Error Count** (replace module for high error counts).

■ Router to Network "Failure"

- ✓ **Check** Network Status

Check Network Status (TV → Router ~~→~~ Internet)

- Instruct the customer the TV has proper connection to the router and is likely OK.
- ✓ **Check** other devices using network are OK. If they test OK this does not mean the TV should be working.
 - Try another source (Hotspot) to test/show TV Network operation.

4-5. Smart Hub

- [Network Test/Gateway Test](#) > [DNS Test](#) > [ISP Blocking](#) > [Samsung Server Test](#) > [Samsung Apps Test](#)

Go to [Menu](#) > [Support](#) > [Self Diagnosis](#) > [Smart Hub Connection Test](#)

■ Network / Gateway

- If it Fails:
 - ✓ TV to Router Connection Test in "[Network Trouble shooting](#)"

■ DNS Test

- If it Fails:
 - ✓ DNS setting in "Network Settings"
- If DNS is set manually:
 - ✓ Settings are correct (may be set to 8.8.8.8 to prevent Netflix issues)
- If it still fails:
 - ✓ DNS Test with setting to Auto Mode
- If it fails both Manual & Auto problem is ISP or Router.

■ ISP Blocking

- If it Fails:
 - ✓ Internet Service Provider is Active.
 - ✓ With DNS setting at 8888.
 - ✓ With Hot Spot.

■ Samsung Server Test

- If it Fails:
 - ✓ Network Status.
- If OK:
 - ✓ Reset Smart Hub.
 - ✓ Terms of Agreement are accepted.

■ Samsung Apps

- If it Fails:
 - ✓ **Reset** Smart Hub.
 - ✓ Samsung Apps load correctly.
 - ✓ Perform "**Apps Reset**" in Factory Mode.
 - ✓ Go to Smart Hub and complete Terms of Agreement and set up information.
 - ✓ Samsung Apps load correctly.
 - ✓ Before selecting an App, allow Apps to load or failure will occur.

For Netflix Operation/Connection Issues:

- ✓ **Check** Certificate & Netflix ESN Status in Factory Mode.

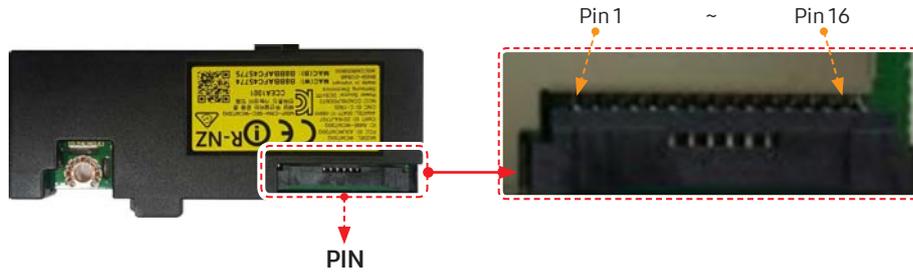

- If Certificate and ESN exists, "CO", "Nfo", change the DNS to 8.8.8.8
- If Certificate is missing, "C/" replace the TV's Main Board.
- If ESN number is missing: NF/ do not replace the Main Board.
 - Reset TV Clock and check for correct Time & Date. Netflix relies on correct settings.
 - Reset Smart Hub. / Reset Apps In Factory Mode.

For Streaming Issues:

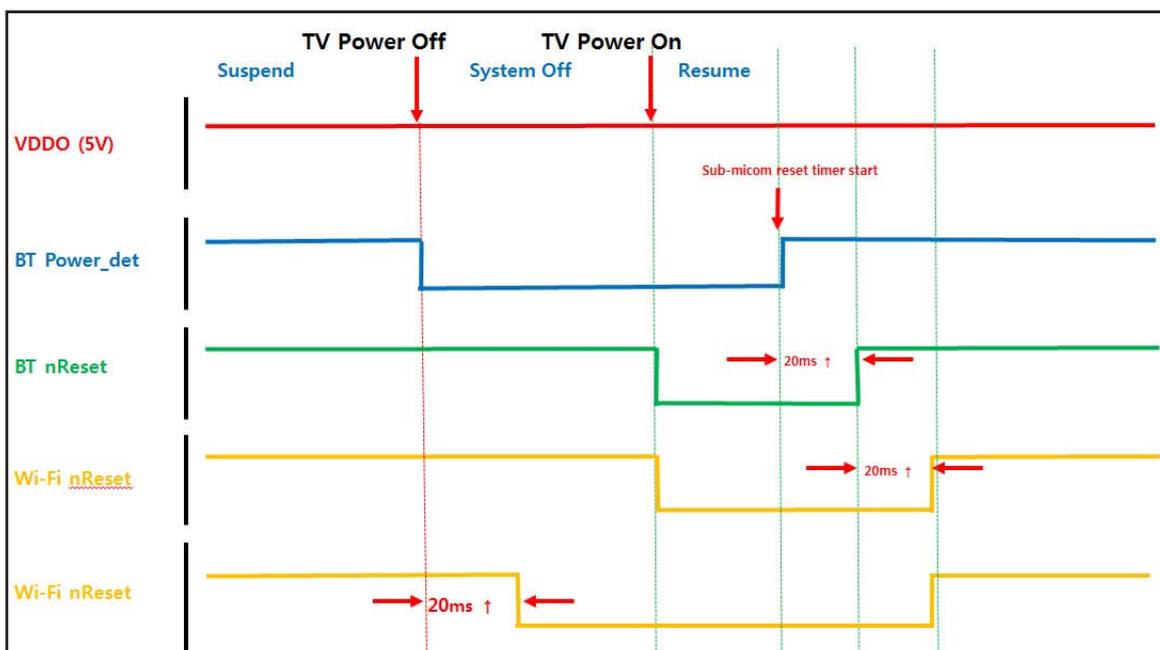

- Go to TV Web Browser / Go to speedof.me / testmy.net
 - ✓ **Check Speed** for at least 5 Mbps(HD streaming) / 25 Mbps (4K Streaming).
 - ✓ **Check Latency** for less than 50ms.

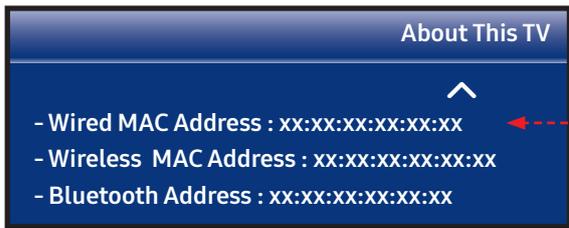

4-6. Bluetooth / WiFi Module

Pin Description

Pins	Name	Interface	I/O	Description	Standby	Power ON
1	BT_RESET	Digital	I	BT Block Reset	3.3 Vdc	3.3 Vdc

15	WIFI_WAKE UP	Digital	O	WiFi host wake up	3.3 Vdc	3.3 Vdc
16	WIFI_RESET	Digital	I	WiFi Block Reset	3.3 Vdc	3.3 Vdc

✓ Missing or Error : Replace **Main Board**.

Go to [Menu](#) > [Support](#) > [About This TV](#)

- ✓ Wireless MAC Address
- ✓ Bluetooth Address
 - If **Bluetooth Address** or **Wireless MAC Address** are missing or errors exist.
- ✓ CHECKBT & Wi-Fi Connector Voltages.
 - If Voltages are OK but no BT or Wi-Fi Signals voltage(s), replace defective Module.

4-7. Factory Mode

■ Setting TV into Factory Mode

Sample Part NO.
: AA81-00243A

Factory Remote

1. Power TV ON.
2. Select TV Source.
3. **Info** → **Factory**.
4. Use **MENU** for return.

Samsung IR Remote

1. TV Power Standby.
2. Press as follows.

- Remote Button

NTSC	MUTE → 1 → 8 → 2 → POWER
PAL	INFO → MENU → MUTE → POWER

■ Important Items

- **Option** (must set Option Bytes when replacing Main Board.)
- Option → **Factory Reset** (returns TV to out of box condition. Does not reset Apps.)
 - **Factory Reset** : Select Factory Reset

Factory Reset	
Type	65A1AU0QN
Local Set	US
SW Model	QNQ6F
BOM Model	6FNA
TUNER	-
Ch Table	NONE

← Ex. Sample Model

- SVC → **Test Patterns**
- SVC → Info → **ER Count** (Important to check for errors.)
 - Resets to 0 with Factory Reset.

Setting Option Bytes

1. Enter Factory Mode with **Service Remote** (only).
2. Check Option Byte Table located on **GSPN** (Fast Track or Tips).
3. Select each item to change.
4. Soft power TV Off to load.

First Screen Appearing in Factory Mode

QUICKTIPS:-

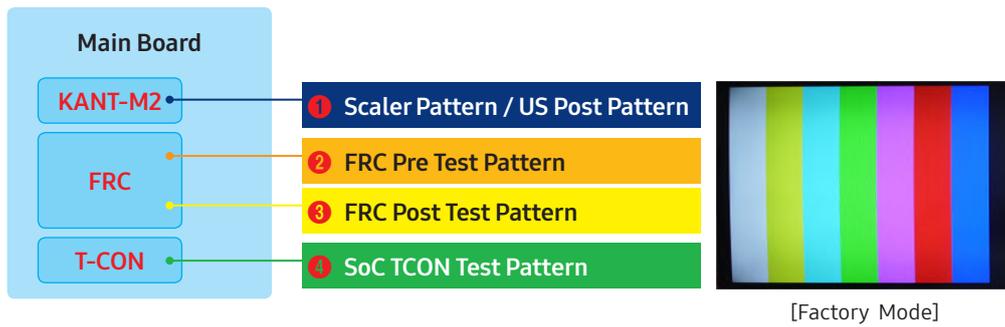

- * Set value of HV Flip from shell prompt without launching factory app. For detail check Updates window
- * Launch Factory:- "org.tizen.factory"
- * Get value of any item from shell prompt without launching factory app. For detail check Updates window
- * Launch Factory:- "org.tizen.factory"
- * Set value of type localset and model from shell prompt along with factory reset :-
"launch_app org.tizen.factory type value localset value model value"
- * Use channel up/down to toggle items when at last depth
- * Use arrow right/left to toggle values when at last depth
- * Home button can be used to jump directly to home screen of factory app from any level
- * Exit button can be used to Exit factory app without launching aging app

4-8. Factory Mode Adjustments

4-8-1. Entering Factory Mode

1. To enter [Service Mode] press the remote-control keys in this sequence :

- With Consumer Remote (IR Remote)

✓ Remote Button :

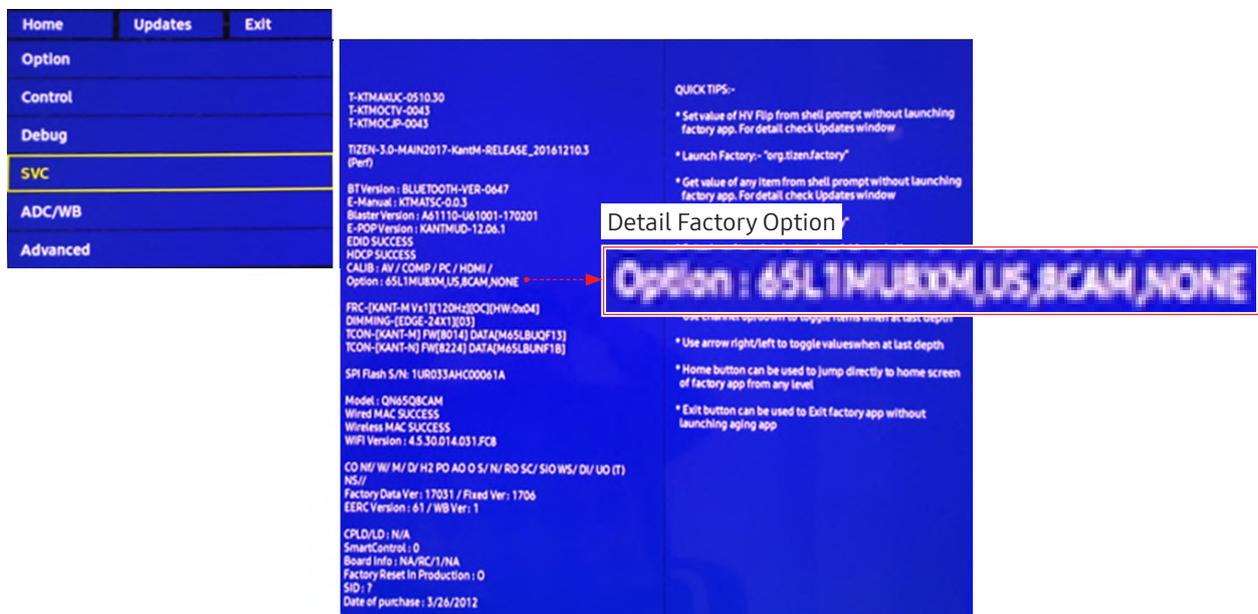

NTSC	POWER OFF → MUTE → 1 → 8 → 2 → POWER ON
PAL	POWER OFF → INFO → MENU → MUTE → POWER ON

- With Factory Remote

2. The following screen appears.

- Please refer to "[Detail Factory Option](#) page" for details.

4-8-2. Detail Factory Option

NOTE

If you replace the main board with new one, please change the factory option as well.
The options you must change are "Type".

4-10. Updating the TV's Software

View your TV's software version and update it if necessary.

-  >  [Settings](#) > [Support](#) > [Software Update](#)

4-10-1. Updating the TV's software to the latest version

DO NOT turn off the TV's power until the update is complete. The TV will turn off and on automatically after completing the software update. All video and audio settings return to their default settings after a software update.

■ Updating through the Internet

-  >  [Settings](#) > [Support](#) > [Software Update](#) > [Update Now](#)

- Updating from the Internet requires an active Internet connection.

■ Updating through a USB device

-  >  [Settings](#) > [Support](#) > [Software Update](#) > [Update Now](#)

After downloading the update file from the Samsung website and storing it on a USB device, connect the USB device to the TV to update.

- To update using a USB flash drive, download the update package from Samsung.com to your computer. Then, save the update package in the USB device's top-level folder. Otherwise, the TV will not be able to locate the update package.

4-10-2. Updating the TV automatically

-  >  [Settings](#) > [Support](#) > [Software Update](#) > [Auto Update](#)

If the TV is connected to the Internet, you can have the TV update its software automatically while you are watching the TV. When the background update is completed, it is applied the next time the TV is turned on.

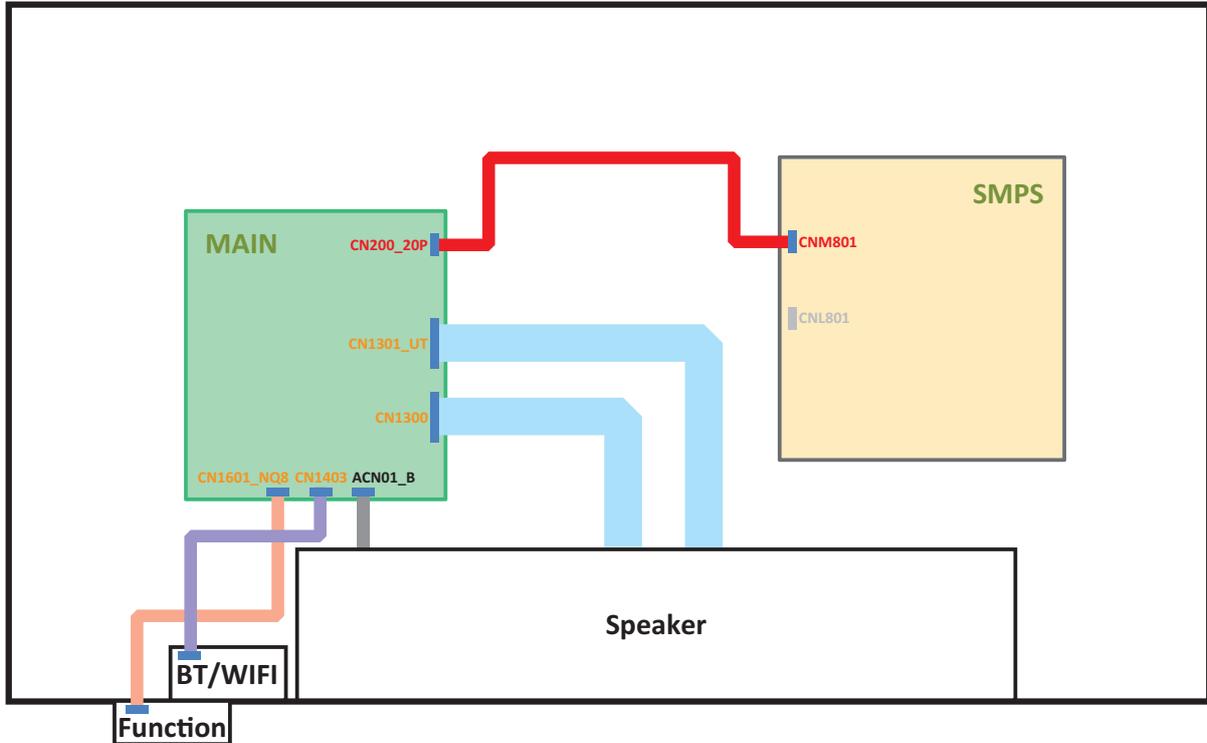

If you agree to the Smart Hub terms and conditions, [Auto Update](#) is set to **On** automatically. If you want this function disabled, use the Select button to turn it off.

- This function may take a longer time if another network function is running concurrently.
- This function requires an Internet connection.
