

CONNEXIONS DES CULOTS

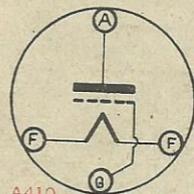

Tous les culots sont représentés par le dessous (côté correspondant au câblage). Une broche en noir n'est pas connectée. Une broche hachurée représente une liaison au blindage ou à la métallisation de la lampe. Les lettres dans l'intérieur des broches ont les symboles suivants :

A = Anode (plaque).
F = Filament.
C = Cathode.
G = Grille.
E = Ecran.
D = Diode.
