NIPPON COLUMBIA CO., LTD.

SPECIFICATIONS

POWER AMPLIFIER SECTION

Rated Output Power: Both channel drives (TUNER → SP OUT)
60 Watts minimum rms per channel (8 ohm Load) with less than 0.05% total harmonic distortion from 20 Hz to 20 kHz.
1 kHz (4 ohm Load) 80 W + 80 W (DIN, T.H.D 1%)

Total Harmonic Distortion: 0.008% (20 Hz – 20 kHz at –3 dB rated output 8 ohm Load)

Input Sensitivity: 150 mV

Input Impedance: 30 k ohm

EQUALIZER AMPLIFIER SECTION

Equalizer Amplifier Output:
(REC OUT Terminal)

Rated Output: 150 mV

Input Sensitivity/Input Impedance:

PHONO MM	2.5 mV	47 k ohm
MC	250 μV	100 ohm

CD, VIDEO-1, VIDEO-2, TUNER/AUX, TAPE

RIAA Deviation:

PHONO MM	150 mV	30 k ohm	within ±0.5 dB (20 Hz – 20 kHz)
MC			within ±0.5 dB (35 Hz – 20 kHz)

Maximum Input Level:

PHONO MM	160 mV/1 kHz
MC	12 mV/1 kHz

OVERALL CHARACTERISTICS

SN Ratio (IHFA Network): PHONO MM 86 dB (input terminals short-circuited for 5.0 mV input)
MC 68 dB (input terminals short-circuited for 500 μV input)

TUNER/AUX, CD, TAPE, VIDEO-1, VIDEO-2 98 dB (input terminals short-circuited)

Tone Control Adjustable Range:

BASS 100 Hz ±8 dB
TREBLE 10 kHz ±8 dB

Filtering Characteristics:
Loudness Characteristics:

SUBSONIC 16 Hz, 12 dB/oct
Low frequency 100 Hz + 7 dB
High frequency 10 kHz + 6 dB

AC OUTLET:

(For U.S.A., Canada and Asia)

SWITCHED x 2, 100 W (Total)
UNSWITCHED x 1,250 W

POWER SOURCE:

Germany and France AC 220 V, 50 Hz
U.K. and Australia AC 240 V, 50 Hz
U.S.A. and Canada AC 120 V, 60 Hz
Asia 110/120/220/240 V, 50/60 Hz (Multiple)

POWER CONSUMPTION:

115 W (U.S.A.); 120 W (IEC);
115 W (Multiple) 2.2 A (CSA)

DIMENSIONS:

434 mm (17-3/32")W x 112 mm (4-13/32")H x 281 mm (11-1/16")D (including rubber feet, control knobs, and terminals.)

WEIGHT:

5.8 kg (12 lbs 13 oz)

Design and specifications are subject to change without prior notice.

NOTE: The following codes correspond to the appropriate models.
E2 for Europe, EU for U.S.A., EA for Australia, EK for U.K.
E1 for Asia and EC for Canada.
This Service Manual is prepared based on E2 Black Version.

For United Kingdom model only.

WARNING:

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral
Brown: Live

For Australia model only.

FOR YOUR SAFETY

To ensure safe operation the three-pin plug supplied must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.

Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.

The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe. For your safety, if in any doubt about the effective earthing of the power point, consult a qualified electrician.

For U.S.A. and Canada models.

CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

NAMES AND FUNCTIONS OF PARTS

Fig. 1

- | | |
|---|---|
| ① POWER (Power switch) | ⑦ BASS (Regulation of low notes) |
| ② INPUT SELECTOR (Input signal selection button)
● CD, ● PHONO, ● TUNER, ● AUX/VIDEO 1,
● AUX/VIDEO 2 | ⑧ TREBLE (Regulation of high notes) |
| ③ VOLUME (Adjustment of the volume) | ⑨ BALANCE (Balance adjustment) |
| ④ TAPE MONITOR/COPY (Tape monitor/Copy switch) | ⑩ SUBSONIC (Subsonic filter button) |
| ⑤ PHONES (Headphone Jack) | ⑪ LOUDNESS (Loudness button) |
| ⑥ SPEAKERS (Speaker selection switch)
● A, ● B (On, Off) | ⑫ CARTRIDGE (Cartridge changeable switch)
(Back Panel Side)
● MM, ● MC. |

Video Input Function

The PMA-300V provides a video input function. The image selection circuitry gives preference to VIDEO-1 for all settings of the INPUT SELECTOR button, unless VIDEO-2 has been specified. This function might be used, for example, to watch a TV monitor while playing a compact disc. In this case it would connect the image input circuitry of the VIDEO-1 terminal to the image output of a video recorder, tape recorder, or video disc recorder. The resultant monitor out signal would be sent to the TV monitor, for "background video" audio-visual entertainment combining sound and images.

CONNECTIONS

Speaker Impedance

- When the A and B terminal sets are to be used separately, the speakers that are to be connected should have an impedance of 6 to 16 ohms.
- When the two terminal sets (A + B) are to be used at the same time, use of speakers whose impedance is outside the range from 12 to 16 ohms will result in malfunction. Be careful not to let this happen.

Fig. 2

Connection to the Speaker System

Connect the speaker system for the left channel (the left side as viewed facing the front) to the L speaker terminal on the back panel, and the speaker system for the right channel to the R terminal.

- When connecting the speaker terminals to the speaker systems, make certain to connect the polarities correctly (+ to + and - to -).
- During connection, be careful that the inner wires in the speaker cords do not protrude from the terminals to contact any other terminal, and that the inner wires in the separate speaker cords do not contact each other.

Connecting the speaker Cords

Lift the lock piece on the terminal to its upright position and insert the cord. Then set the lock.

METHOD OF ADJUSTMENTS

When making adjustments, be sure the power supply is at the rated voltage and the room air is in normal condition with respect to temperature and humidity.

IDLE CURRENT ADJUSTMENT (Fig. 3)

1. Keep the unit away from direct wind blown by an air-conditioner and an electric fan, and keep the unit under normal conditions. Adjust the range of ambient temperature to 15 – 30°C.
2. Set the following switches as follows:
 - POWER (power switch) to off
 - VOLUME (VOLUME CONTROL) to 0 (\curvearrowright)
 - SPEAKERS (speaker terminal) to no load (speakers disconnected)
3. Remove the top cover and connect a DC digital voltmeter to the test points of ETC9067 (Power Amp units) (between the positive terminal TP \oplus (R89) and the negative terminal TP \ominus (R91), and between the positive TP \oplus (R90) and the negative terminal TP \ominus (R92)).
4. (1) Connect Power cord to AC outlet, and turn Power Switch "on" (---). Within 10 seconds turn VR5 (Lch) and VR6 (Rch) clockwise so that the DC voltmeter reads 2.0 ± 0.1 mVDC
- (2) Then after 5 minutes warmup adjust VR5 and VR6 so that the DC Voltmeter reads 5 ± 0.5 mV
- (3) And after 15 minutes warmup adjust VR5 and VR6 so that the DC Voltmeter reads 8 ± 3 mV

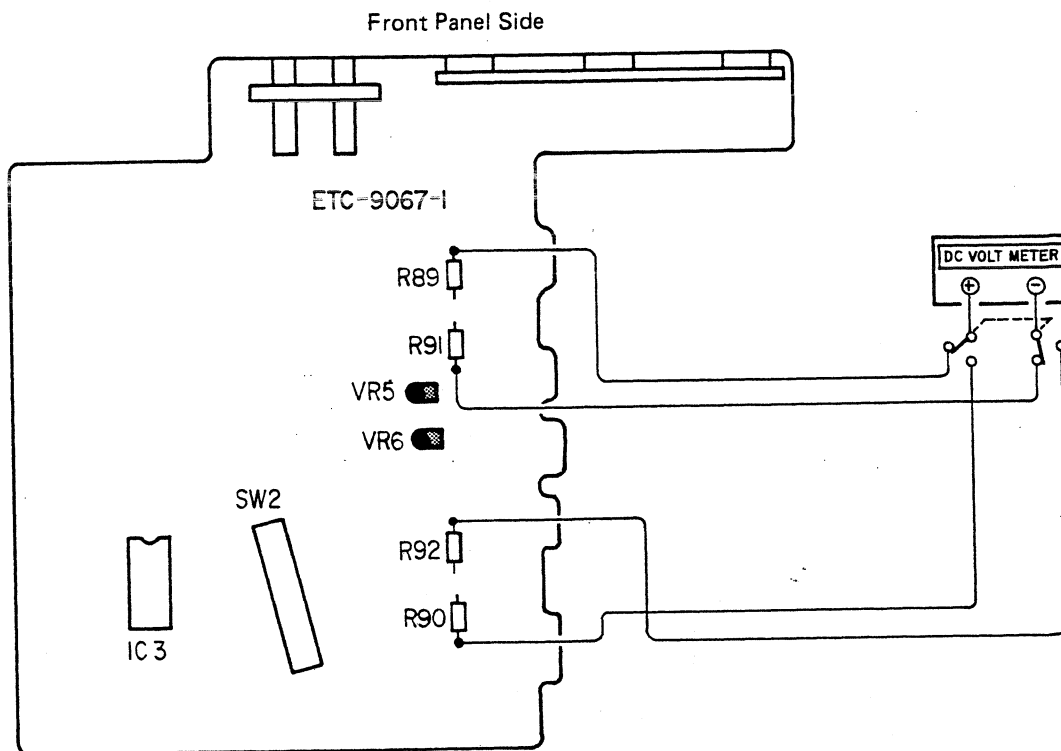

Fig. 3

REMOVAL EACH SECTION (Reverse the procedure to install the covers.)

1. How to remove top cover (Fig. 4)

- 1) Remove the six screws holding the top cover in place.
- 2) Pull out the sides of the cover to free it, then lift off the cover.

2. How to remove the back panel (Fig. 5)

- 1) Remove the fourteen screws holding the back panel in place.
- 2) Pull the back panel toward you and remove it.

3. How to remove the front panel (Fig. 6)

- 1) Pull off the five knobs.
- 2) Remove the five screws holding the front panel in place.
- 3) Pull the front panel toward you and remove it.

FUNCTION OF EACH TERMINAL

TERMINAL NO.	SYMBOL	FUNCTION	REMARKS
2	INH	Inhibit input terminal. Normal operation at "H" level, inhibit operation at "L" level.	
3	OSC	C.R connecting terminal for oscillator. With this oscillation frequency, muting time and switching time of analog will be set.	
4	ALL-OFF	Specified OFF input terminal of all analog switches. Applying "H" level to turn off all analog switches.	 Schmitt trigger input
5	MUTE	Output terminal of muting signal. By receiving of "H" level at select input terminals (SEL-1 ~ SEL-5), this terminal becomes "H" level for settled time and within this time analog switch will shift.	
23 22 21 20 19	SEL-1 SEL-2 SEL-3 SEL-4 SEL-5	Select input terminals for respective analog switches. Turn SEL-1 ~ SEL-5 terminals to "H" level to turn on respective analog switches. SEL-1 ~ SEL-5 are all reciprocal reset. These terminals are in conjunction with driver output I/O terminals.	
6/18	SIG-A ₁ SIG-B ₁	Signal input terminal 1. Select SEL-1 to turn on analog switch 1 and this terminal will conduct to COM terminal.	
7/17	SIG-A ₂ SIG-B ₂	Signal input terminal 2. Select SEL-2 to turn on analog switch 2 and this terminal will conduct to COM terminal.	
8/16	SIG-A ₃ SIG-B ₃	Signal input terminal 3. Select SEL-3 to turn on analog switch 3 and this terminal will conduct to COM terminal.	
9/15	SIG-A ₄ SIG-B ₄	Signal input terminal 4. Select SEL-4 to turn on analog switch 4 and this terminal will conduct to COM terminal.	
10/14	SIG-A ₅ SIG-B ₅	Signal input terminal 5. Select SEL-5 to turn on analog switch 5 and this terminal will conduct to COM terminal.	
11/13	COM-A COM-B	Common terminal for analog switches.	
24 1 12	V _{DD} V _{SS1} V _{SS2}	Power supply voltage applying terminal. For control system V _{DD} -V _{SS1} . For analog switch system V _{DD} -V _{SS2} .

E:2 (Ssa)

is an important safety item, which must be replaced, if necessary, by a part specified or meeting the specification of the manufacturer.

WARNING:

1. Component parts

Parts marked with ⚡ and/or shading in this service manual have special characteristics important to safety. Be sure to use the specified parts for replacement.

2. Leakage current

Before returning the appliance to customer, test the leakage current when the power plug is connected. Use a calibrated (with an error of not more than 5%) leakage current tester and measure the leakage current from any exposed metal to the earth ground. Reverse the power plug polarity and test the above again.

Any current measured MUST NOT EXCEED 0.5 milliamps. Corrective measure must be taken if it exceeds the limit.

CAUTION

RISK OF ELECTRIC SHOCK

DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user of the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user of the presence of important operating and maintenance (servicing) instruction in the literature accompanying the appliance.

WARNING: TO PREVENT FIRE OR SHOCK HAZARD. DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.
