

Stops arc-backs and cuts call-backs...

RCA-3A3C HIGH VOLTAGE RECTIFIER

It's the tube that saves you time, trouble and dissatisfied customers . . . because it minimizes arcing in rectifier circuits of TV receivers and other high voltage applications.

RCA makes this tube with special equipment that pre-coats the cathode and pressure welds the coating . . . producing such a smooth, uniform surface that arcing is significantly reduced.

The RCA-3A3C takes 38,000V peak inverse plate voltage and supplies 100 mA peak plate current.

For high voltage applications, put the RCA-3A3C high on your tube inventory list. This high-volume replacement type is available from your RCA tube distributor along with all the other types you need for your service business.
