

Vacuum Tubes

12AX7B

Premium and Hand-Selected,
Super-Low Noise Dual Triode

- The BUGERA 12AX7B is a high-end version of the standard 12AX7 as it features super-low audio and microphonic noise
- It provides maximum level of gain and overall tonal quality with superior reliability and consistency plus features an extremely open and expressive tonal spectrum, with a balanced and smooth frequency response
- This is clearly our ultimate preamp tube to be used in virtually all critical gain stages, which makes it one of the best 12AX7 ever produced

BUGERA premium-grade 12AX7B tubes are hand-selected for their expressive tonal range, reliability and super-low noise operation – and are highly recommended for all guitar, bass and other audio tube amplifier applications.

Glorious Tone and Dependability

Our 12AX7B high-end preamp tube features super-low audio and microphonic noise, and provides the maximum level of gain and overall tonal quality. You get consistently open and expressive tonal spectrum with balanced, smooth frequency response and unparalleled reliability. When compared to the competition, the BUGERA 12AX7B stands above the rest as the ultimate preamp tube for all critical gain stages. It is simply one of the best 12AX7 tubes ever produced.

Super-Low Noise Dual Triode

Quality is Always #1

Our state-of-the-art process begins with selecting only the finest tubes from all over the world. We then subject them to the most rigorous testing procedures, which are conducted in demanding “real-world” applications. Only about 10% pass the test and are given the BUGERA name and stamp of approval. The rest are recycled responsibly.

This highly labor-intensive process is an art we’ve mastered over many years. As a result, ours are the finest and most musical tubes you can buy – at any price!
