This shows what happens
in an Acme Transformer
—amplification without
distortion.

With ACME transformers you get Amplification *without distortion*

WHEN you put a lot of time and money into a radio set you want to be sure that it will give the best results. You want to know that you can bring in the distant stations loud and clear, so that a roomful of your friends can enjoy it. You want amplification, but above all you want Amplification without Distortion. To do this, use amplifying transformers that increase the sound without spoiling the quality.

Audio Transformer will make your set better.

If you are not getting loud, clear, undistorted radio, change to Acme Transformers and note the difference.

Each Acme Transformer is tested in our factory and bears a guarantee tag; there are no Acme "seconds." Use Acme Transformers in the set you build. Insist on them in the set you buy. One of the big reasons why the Acmeflex Kitset gives such excellent results is that it uses Acme Transformers.

Send the coupon today for our 40-page book, "Amplification without Distortion," which shows how to get the best results out of your set through proper amplification and also contains a number of valuable wiring diagrams that will help you build a set. Enclose 10c. with coupon.

The Acme A-2 Audio Frequency Amplifying Transformer is the result of five years of research by Acme Engineers. Whether you have a neutrodyne, superheterodyne, regenerative or Reflex, the Acme A-2

"For Amplification without distortion" use ACME Transformers in the set you build. Insist on them in the set you buy and enjoy all the year round Radio
