

3B600 - RF Power Triode

3B600 was made by Italian Fivre. This shape was quite common for RF high-power tubes intended for electro-medical or RF heating equipment. The tube had to be sturdy enough to operate with mismatched loads. Tungsten filamentary cathode.

- 600 W max anode power dissipation
- 6000 V max anode voltage
- 50 MHz max operating frequency
- 22 to 23 V at 13 A filament
- 361 mm max height
- 1200 g weight
