

The world's
most sensitive
FM TUNER
is now the
FISHER *FM-100*

New! And designed for a long future!

FISHER DOES IT AGAIN! Year after year, tuner after tuner, there is only one best—THE FISHER. Today, the leader is the FM-100, latest in a series of FISHER FM tuners now used by radio stations, the Satellite Tracking Project of Ohio State University and by many government agencies. The reason is simple—these tuners meet the exacting standards of performance and reliability required by professional users.

■ And where standards are concerned, *the audio enthusiast* is, in his own right, a professional. He desires *maximum sensitivity* for optimum reception of stations near and far. **FM-100 SENSITIVITY** is 0.8 microvolts for 20 db of quieting! ■ *The audio enthusiast* wants an FM tuner that permits simple adaptation to stereo. **THE FM-100 IS CUSTOM-DESIGNED FOR STEREO.** It has space directly on its own chassis for installation of a multiplex adaptor. Moreover, it includes feed-through facilities for FM-FM and FM-AM stereo as well. ■ *The audio enthusiast* expects *maximum fidelity*. **THE FM-100 OFFERS FOUR WIDE-BAND IF STAGES**, uniform frequency response (20 to 20,000 cps) and less than 0.5% harmonic distortion. ■ *The audio enthusiast* wants an FM tuner that eliminates noise when tuning between stations. **THE FM-100 EXCLUSIVE INTERSTATION NOISE SILENCER** automatically eliminates noise, side-band response and unwanted weak and noisy signals. *For the audio enthusiast who buys the best at the outset, there is only one truly logical choice—IT IS THE FISHER FM-100 TUNER.*

\$159.50 Cabinet, \$15.95

Slightly Higher in the Far West.
