

Style with Innovation

Spring Fair 2019

Introduction

The Steepletone Story...

The Company was started in the late 60's and was incorporated in March 1972 by the founder and our Chairman Tony Tyler. The family business is now managed by Mark Tyler, the son of the founder, with his wife Kendal, and now joined by their son Kristian – making him the third generation. Additionally we have a great and experienced team of individuals that make up the Steepletone family. Steepletone's UK Head Office is located in the village of Croughton on the South Northamptonshire/North Oxfordshire border, only 4 miles from the M40 Motorway and just South of the Silverstone Racing Circuit. In the early years of trading the Company's key products were Record Players and Music Centres, which were made in an old converted Cinema in a village some 12 miles from the current Head Office.

In the 1980's Steepletone moved its manufacturing to the Far East to remain competitive in the market place. An office was formed in the region, which plays a significant role in maintaining product development, design, packaging, production and, of course, the very important role of Quality Control to ensure a high level of out-of-box reliability.

The Far East Team is headed up by Patrick Chan. The team have responsibility for quality, production and ensuring that all the products conform to the many European Standards which apply to products. Unlike many other Brands/Importers, our pedigree of being an actual Manufacturer means we understand what it takes to make great products and the high grade components used to make them work for daily use. Styling and ease of use are key foundations to all our products, we continue to innovate and embrace the very latest technologies.

WELCOME TO OUR 2019 SPRING FAIR PREVIEW BROCHURE

Customer Care

We are highly aware that, even more so today, customers' expectations are far greater than ever before, not only for quality, but function, simplicity, delivery and packaging. Our determination to succeed in these areas is one of the keys to our continued growth. If we supply a faulty product we aim to put it right as soon as possible.

We produce a regular Newsletter to ensure all our customers, whether or not personally called on by our Sales Team, are kept up-to-date with the latest information on new products, stock levels, price changes and special offers.

All products comply with ERP2, which means if it is not in use on CD or MP3 the unit will go into 'Standby'- this is not a fault, it's an EU directive. We are one of the first Importers to add an override switch for this function, so the end user now has a choice.

After Sales Service

We believe we are one of the few Importers that still has an in-house Service Department catering for customers' needs, from missing Instruction Manuals to more critical components and fault diagnosis, we also have extensive spare parts, meaning end users can be reassured that the product they purchase will last longer than a few years – this, we believe, maximises customers' peace of mind.
