year's theme:

**BAKELITE
AND
BEYOND**

Please NOTE: To encourage participation by the general public,
buyer's access to the flea market is free but we request that everyone
attending EXTRAVAGANZA must register! The monies collected as a
result of registrations are a major source of revenue that helps pay for
the event. Your cooperation is greatly appreciated.

THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the *QST-VIEW* series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. *QST* Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets)! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and *QST-VIEW* has on-line instructional help for operating the *QST-VIEW* browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter

S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. **Thousands sold at \$ 199. SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

We now have a small mountain of vacuum tubes at very competitive prices - Thousands sold since our first posting of these tubes. All types including receiving and transmitting types. Tube price listings on the web:
<http://www.radioera.com/tubes.asp>

SCHEMATIC DIAGRAM & MANUAL SERVICE

Over a Million schematics & 100,000 manuals and growing! Schematics and most manuals may be emailed instantly via the internet

scribers receive a **FREE** classified ad of up to
50 words in each issue.

Publisher's Comments

I'm happy to inform our readers that starting with this issue we're once again beginning to report auction results in *A.R.C.* This month we bring you auction prices and photographs from the February 18, 2012, Estes Auction in Burbank, Ohio. The results of over 200 auctioned items are listed in these pages, and we'll also have the results for Estes' April and May 2012 events over the next few months. I attended my first Estes Auction in April and thoroughly enjoyed myself. Now that the warm weather has arrived, there will be many radio meets and quite a few will have auctions as part of the action. I really encourage all you to attend your local meets and sit in on an auction—you may just return with a fabulous deal. One thing's pretty much a given, though: you'll have a great time!

In addition to our Estes coverage, this month we also have a report on Radiofest 2011, which took place in Willowbrook, Illinois. The Antique Radio Club of Illinois does a wonderful job of hosting the annual event, in conjunction with the Wisconsin Antique Radio Club (WARCI), Vintage Radio & Phonograph Society (VRPS) of Texas, Michigan Antique Radio Club (MARC), and the AWA. The next Radiofest is August 2 through 4. And, yes, if there's any chance you can make it, you definitely should do your best to attend. You'll meet a terrific bunch of people.

Rounding out our editorial, Richard Majestic writes about—you guessed it—a Majestic model 161 chrome front radio. He describes the restoration and has plenty of photographs to illustrate the process. Congratulations on another "saved" radio!

Radio Meets vs. Auctions vs. eBay

When talking with buyers and sellers at the radio meets I attend around the country, the word I hear most often is "eBay." That's no surprise to readers of this magazine, or to anyone else involved in collectable hobbies, from antique radio to rare stamps. In today's world,

eBay is seen as the quick and easy method of buying and selling your collectables. Craigslist is another website where many people buy and sell items. I've followed the action on eBay for many years and, after attending the Estes Auction last month and other auctions over the past year, have noticed that eBay may *not* be the place where you get the most money for your items, or find that rare item you have been long searching for. Nothing can compare with seeing an item in person and having that all-important human interaction. In fact, at the auctions I've attended, the items being sold were netting more money than they would on eBay, and the buyers really knew what they were getting right up front. There's no substitution for that.

Speaking of websites, the number of classified ads has decreased in *A.R.C.* over the past few years due to the Internet. I urge all of you to submit a classified ad to us. You'll be doing a favor for the magazine, the hobby, and yourself!

Coming Events

What is not shrinking is the "Coming Events" section of the magazine, and we've expanded it to include more International radio meets. For those of you who live in, or this summer will be traveling to, the northern part of the United States, why not check out a radio meet in Canada? It would be fun and informative to see how other clubs organize their events as well as to see different manufacturers and styles of equipment. Many of these events are not far from the border between our countries.

On this side of the border, *A.R.C.* will be attending the Kutztown Radio Show this month in Pennsylvania and the New England Meet in New Hampshire next month. We hope to see you there!

AUCTION REPORT

Estes Auction Burbank, OH, February 18, 2012

BY STAFF

A 1947 RCA 721TS TV and two console radios on display during the February Estes auction.

Antique Radio Classified is delighted to welcome back the Estes Auctions results. This is the kind of information our readers need to stay on top of what's happening in the hobby—what's hot and what's not, what's moving and what's dragging, and how to be savvy collectors in a tough economy.

A word of warning is called for here, however. Although auction prices are extremely helpful to the collector, they don't necessarily reflect current values. Our selection of auction items is not necessarily complete, and such a listing can't adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc.

Remember, too, that auction prices are the result of the auctioneer and the specific interests of the participants.

While we have taken every reasonable precaution to ensure the accuracy of this information, unfortunately the possibility of error does exist. If we are notified of inaccuracies, we'll be happy to report verifiable corrections.

Following are the prices from the February 18, 2012, auction. Over the next few months, we'll be listing several more auction results so get ready to take good notes!

If you have results for your club's auction or a similar local event, let us know. We'll be happy to print them, too.

Here we go...

MEET REPORT

Radiofest 2011 Antique Radio Club Of Illinois August 4, 5, 6, 2011

BY OLIN SCHULER

Early Friday morning at Radiofest.

Radiofest is an annual, three-day Vintage Radio Event hosted by the Antique Radio Club of Illinois (ARCI) and assisted by four other groups: WARCI, Wisconsin; VRPS, Texas; AWA, New York; and MARC, Michigan. We attract collectors, restorers, historians, engineers, technicians, buyers, sellers, and the newly interested. The event, held in the spacious Willowbrook, Illinois Holiday Inn and Convention Center, on Kingery Avenue, is easily accessible from Interstate 55 exit 274, Illinois highway 83. Excellent, comfortable surroundings are provided for all the activities by a seasoned and competent hotel staff. Radiofest 2011 ran Thursday August 4 through 6. Following are some highlights from that event.

Radiofest 2011 was well under way by Thursday afternoon, with the registration and hospitality committees welcoming and accommodating the early arrivals. Activity built

with more arrivals in preparation for the convention's opening event: the Main Auction in the Ballroom at 6:30 p.m. In short order, the ballroom was filled with vintage items and eager bidders. A 10-foot-tall projection screen and excellent remote control video camera worked beautifully to provide bidders with an unsurpassed view of the auction items. Just think of a typical radio front panel projected onto a 100-foot screen! Where necessary, the auction handling team filled in shadows and highlighted details with handheld LED lights—treatment usually reserved for the fashion world and super-model photo shoots. ARCI member and professional auctioneer, Jim Sargent from Dallas, Texas, presided over the auction, and in about three hours, over 150 lots passed over the auction block with sales just over \$16,000. A free pizza party followed the auction and checkout, with the camaraderie extending on into the late evening.

A museum-level historic equipment display, “One Hundred Years of Amateur Radio, From Spark to Solid State,” was featured in the Hotel Atrium area, just outside the ballroom. Over 80 rare artifacts from as far back at 1898 were on display along with gear that spanned the years, all the way from World War I through the 1970s. To call it simply splendid would be an understatement. The equipment came from the personal collections of our members and included early ARRL convention memorabilia.

By Friday morning nearly all the vendor selling spaces were filled. And those spaces were filled with really great stuff! Walking through the flea market sales area early Friday morning, I observed that the attendance was on par with past years. I felt just like a kid on Christmas morning. There was something for everyone, including nicely restored sets for the collector, restoration project sets for the upcoming winter, vacuum tubes, component parts, vintage papers, magazines, tech manuals, and—for free!—plenty of good conversation. The flea market area buzzed with activity through the day. It was ready to resume on Saturday, but was dampened by a persistent rain that ultimately led to an earlier-than-planned closing.

The Vintage Equipment Contest, always a popular part of our event, was held in a room convenient to the Ballroom and Atrium. The Best of Show Award went to Mike Feldt for his pre-1930 Remler Infradyne radio. Nineteen awards from 10 contest categories were announced during the Banquet Program Friday evening. The contest room always rates a visit because this is where our members show their very best items, and this year was no exception.

With Amateur Radio as part of the theme, the Vintage Ham Station was in operation outside in a tent near the flea market. It was just like a ham radio Field Day in the 1950s, but with access to AC power—no gas cans were needed to feed the generator. Amateur Radio license testing was conducted at Radiofest by a team of ARRL Volunteer Examiners (VEs). One applicant advanced to a General class license, while another just missed his move up to Extra class.

Beginning at mid-morning Friday a series of one-hour educational forums were presented in the main ballroom, conducted by veteran radio experts, collectors, engineers, and historians. The speakers and their subjects included: “A Vacuum Tube Audio Panel” by

Spark to Solid State Exhibit—Hallicrafters 500 in a desk, circa 1955

Karl Johnson, Pete Nauseda, and Terry Shaver; “Vacuum Tube Numbering Systems” by Bob Dobusch; “The Ham Radio Forum” by Bill Ross; “The Process of Broadcasting” by Al Germond; “Seeing Sound” by Bret Menassa; and “Chicago Experimental Television” by Steve Jaikowski, whose presentation included a book signing. The sessions were well attended with appreciative responses from their audiences.

The Annual Ladies luncheon convened promptly at 11:30 a.m. with Janet, the leader of the Hospitality Committee, holding forth with the usual revelry and door prizes. It’s always a fun time for the ladies.

An unexpected highlight occurred when executives from WGN Radio and the Museum of Broadcast Communications visited Radio-

A 1912 spark gap transmitter.

fest on Friday afternoon. We were pleased to give WGN Vice President and General Manager Tom Longmeyer, WGN Program Director Bill White, and Museum of Broadcasting Vice President David Plier the grand tour. They, too, have a great interest in vintage radio and its history and liked what they saw, enjoyed our hospitality, and gave words of encouragement.

The Friday evening banquet gave attendees the opportunity to relax and enjoy an excellent meal in an top-notch dining atmosphere. In the program that followed the meal, we enjoyed remarks from veteran broadcaster Chuck Shaeden, who is unsurpassed in his knowledge of vintage radio programs. In addition, Stephen Parry presented a sneak preview of his newly produced WLS National Barn-Dance video, which was to premier on PBS in mid September. ARCI volunteers who make each Radiofest possible (and there are many) were recognized and presented with certificates of appreciation. The evening's events were brought to a close by an hour of entertainment by the Wise Guys Trio, who took us back to the kind of musical variety shows often heard on radio in the 1930s and '40s. There were many smiles, some dancing, and much foot tapping.

The flea market sales usually resume on Saturday morning around 7 a.m., but, as mentioned, this time the rain didn't let up. Most of the sellers "packed it in," but waited anxiously for the Saturday morning finale to Radiofest: the ARCI Donation Auction. It is a key point of interest to buyers and serious bargain hunters.

Various battery sets being sold in the auction.

During Radiofest three or four selling spaces are reserved and staffed by ARCI volunteers who receive items donated to the club. Attendees can visit the space anytime Thursday or Friday morning, bargain with the attendant for a fair price, and purchase on the spot. You never know what will show up at the donation site. Then on Saturday at 10:30 a.m., all remaining items are auctioned without reserve. Rain greatly diminished this Saturday activity, both in morning donations and buyers, but sales were still made and bargains were carried home. In the end, over \$700 was realized.

By noon Saturday the event was finished, and the tents were down and packed up. The ham radio, video, and sound equipment was re-loaded into the trucks. A still somewhat damp crew of ARCI volunteers huddled in the parking lot, deciding on a place to go for lunch, where plans for Radiofest 2012 would take shape. To all our friends, and friends-to-be: Now you know who we are and what we

Friday evening banquet and awards—and lots of good company.

do. We invite you to come and see us at Radiofest 2012, August 2, 3, and 4! Details can be found on our club website, antique-radios.org, or by calling Art Bilski at 630 739 1060.

Olin Schuler is the president of the Antique Radio Club of Illinois. He can be reached at clubinfo@antique-radios.org.

RESTORATION REPORT

The 1933 Majestic 161 Chrome-Front Radio

BY RICHARD MAJESTIC

Majestic 460 chassis after chrome plating, polishing aluminum parts, and full reassembly. Dial scale is original.

Grigsby-Grunow introduced its fabulous Majestic model 161 “smart set” during the twilight of its regrettably all-too-short reign in the radio business. The first of the company’s modernistic smart sets had been introduced back in the summer of 1933, and they had been instant hits. Encouraged by this success, the company went on to introduce additional models, including in late September the four modernistic consoles of which the Lido is a striking example. The rarely seen model 161 appears to have been one of the last of the line, making its debut in late 1933 or early 1934, shortly before the company closed its doors for the last time.

Grigsby-Grunow was declared bankrupt in February 1934. If there was ever a perfect il-

lustration of “twilight’s last gleaming,” it was when the company introduced its “smart sets.” For these magnificent examples of the radio art came tantalizingly close to averting the company’s inexorable slide toward bankruptcy and corporate oblivion. So popular were the sets that for the nine months ending November ’33, the company sold eight times more radios than in the corresponding period a year earlier. However, it was not enough to save them. Advertising for the 161 gives its list price as \$47.50.

Most smart sets were given an official name, such as Lido, Mayfair, or Ritz, a practice that Grigsby-Grunow had begun a few years earlier. However, for some reason, the 161 is among a minority of sets that had to make do with just a model number.

jestic smart sets. This is the only newspaper ad I've found that shows the model 161. According to the copy, the store chain had purchased \$200,000 worth of late production sets, which they then proceeded to liquidate at discounted prices. This particular ad seems to have appeared only on this one date, as I found no earlier or later occurrences of it. One might therefore conclude that Gamble Stores was successful in quickly selling off most of its inventory of these sets. Given the stylishness of the merchandise, this should be no surprise!

My Majestic Restoration Project

I obtained my 161 "as found" from the friend of a club member. I traded a mint Majestic 411 for this disaster 161. I asked fellow

radiophile Mark Topo if he would take on the cabinet restoration and refinishing, and I must say he did an amazingly beautiful job. The accompanying pictures are Mark's and he took them as he did the restoration work.

Here's the bottom front view of the unrestored cabinet as received.

Side front view of the unrestored cabinet before reconstruction and refinishing.

The front view of cabinet before any reconstruction and refinishing also shows how much work was ahead; note the missing bottom and destroyed grille cloth. Luckily, all three bezel pieces were in good condition and polished up nicely.

The chrome front grille removed from the cabinet and before re-chroming. Refinishing this made a huge difference in the end result.

I held onto the radio chassis and speaker, which were in comparatively good condition, and completely disassembled the radio and stripped the chassis so I could get it chromed—you all know chrome radios perform and sound better, right?

I polished up the pot-metal IF transformer and the two original electrolytic cans. I also had all the hardware, second output IF transformer can, power transformer end bell, the Goat tube shield, the chassis, and front grille chrome plated. Additionally, I cleaned up the tuning capacitor frame and hand painted it silver. Finally, I reassembled and rewired the chassis.

The output IF transformer is a triple coil device with all coils the same number of turns, same wire size, and wound together (it looks like litz wire covered with linen thread). With one winding, the primary is tuned with a variable capacitor to 175 kHz. There are six leads coming out of this transformer coil, and although they are color-coded, it still took a bit of reverse engineering to find the intended primary. I had good pictures but it was impossible to see accurately the colors. I ended up taking the coil and the original variable compression capacitor and connecting them in parallel to each winding, one at a time, with the RF generator driving one end through a 10K resistor and the scope across the tuned coil and varying the RF oscillator.

Each coil had a different resonance but one peaked at 175 kHz, which then became the primary. Grigsby-Grunow Majestic used the second coil for the audio detector and the third for the automatic volume control. This is a somewhat unusual design, but it certainly works. I've also found that Grigsby-Grunow Majestic loads the audio detector circuit (the volume control) with 500K, but if it's loaded with 180K to 200K the audio distortion (THD) drops to less than 2 percent from 8 percent, a redesign I put in all the 460 chassis I restore.

The radio worked great right after completing the rebuilding. A full alignment went well and I'm very pleased to report that today the radio performs as good as it looks.

The front view of the restored 1933 Majestic model 161. The knobs are original and were only cleaned and refinished. It's once again an absolutely gorgeous radio set. Majestic indeed!

Richard Majestic has over 30 years experience in broadcast television engineering system design and engineering management and holds 10 patents for digital servo system designs, cryogenic instrumentation, and low-noise analog circuit designs. He is the president of the New Mexico Radio Collectors Club, a group of engineers and scientists dedicated to preserving early radio, television, and computer products.

Contact Richard at 5640 Superstition Drive, Las Cruces, NM 88011; Phone: 575-521-0018; email: rmajestic@msn.com; Web: www.majesticradios.com.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

Baldwin model 70 radio – This is really a console radio whose legs were removed at some time in the past. Large radio with 12-inch speaker and seven tubes. Manufactured in 1930. Mike Katz, Seaford, NY

De Forest type DV3 tube – Shown with its original can packaging, this DV3 tube was used as a detector and amplifier. It is a triode circa 1924. Charlie Kapotes, St. Paul, MN

OLD TECH BOOKS & THINGS

A 2,000 sq. ft. museum is not enough space for my 1000+ set collection. And, hundreds of boxes await either space in the museum or sale. Some things must go! Choices must be made. As the late Dr. Muchow said, "As collectors, we truly are temporary caretakers of these historical artifacts."

Items for sale are either duplicates or the result of fine-tuning the scope of my collection.

For details on these items and much more, visit:

www.oldtech.com

or contact:

John Terrey

CRYSTAL CLEAR

By Maurice L. Sievers

Volume 1

750 Illustrations – 570 Crystal Sets
341 Detectors – 207 Crystals
Perfect for the beginning collector!
Useful for the experienced too!

Crystal Clear is the most comprehensive reference for collectors, historians and anyone interested in early radio. In addition to the many excellent photos and reproductions of ads, *Crystal Clear* includes lists showing all sets by manufacturer, set name, selling price and date of manufacture. 8 1/2" x 11", 282 pages.

\$29.95 – Softcover

Volume 2

Crystal Clear, Vol. 2 supplements the first volume. It identifies an additional 172 crystal radio sets, 91 crystal detectors and 26 crystals by manufacturer, model, year produced, description and original selling price. Further research on many of the crystal sets covered in Volume 1. Detailed history on the Philmore Manufacturing Company and the Western Manufacturing Company. 8 1/2" x 11", 252 pages.

\$29.95 – Softcover

Everything stocked and shipped promptly — Radio is our middle name.

A.R.C., PO Box 1558, Port Washington, NY 11050 – Toll Free: (866) 371-0512

Fax: (516) 883-1077 – E-mail: ARC@antiqueradio.com – Web: www.antiqueradio.com

U.S. orders \$3 for first book, \$1 per additional book (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Most orders shipped by next business day. Send payment with order. New York residents add sales tax. Non-U.S. orders, contact us for shipping costs. For your protection, if using a credit card, use our secure website. Do not send credit card information via e-mail.

CLUBS: Send antique radio club and meet information to A.R.C. for free listing here, as space permits. Sorry, we don't have room for hamfests. Always send a SASE when writing to clubs!

Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are **SEARCHABLE!** If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

HOW DO I ACCESS THESE BENEFITS?

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page www.antiqueradio.com and click on Subscriber Only Page.

On the Subscriber-Only Access page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.

Lee de Forest - King of Radio, Television, and Film
by Mike Adams

A fascinating glimpse into the early role that the designer of the audion played in developing the mass entertainment media we enjoy today.
