THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the *QST-VIEW* series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. *QST* Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and *QST-VIEW* has on-line instructional help for operating the *QST-VIEW* browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter

S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. **Thousands sold at \$ 199. SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

We now have a small mountain of vacuum tubes at very competitive prices - Thousands sold since our first posting of these tubes. All types including receiving and transmitting types. Tube price listings on the web:

Publisher's Comments

I'd like to start out by saying that *A.R.C.* will be attending the Antique Wireless Association gathering this month. If you'll be there, too, please come by and say hello—we love having the chance to meet our readers and get their input. We'll also have a report within a few months on the activity that takes place in this yearly ritual taking place in Rochester, New York.

This month we bring back our "At Home with the Collector" column, written by Lou T. who lives in the Northeast section of the country. His collection includes radios, TVs, and vintage test equipment. He likes restoration and researching his latest "finds."

Also in this issue, Jim Moneghan reports on the June 16, 2012, New England Antique Radio Club Meet in New Hampshire. The NEARC always has an excellent meet and this one was held both indoors and outdoors. Nice weather, buyers, and sellers made for a wonderful time.

For most of my life I've heard stories of Radio Row and a business called Leeds Radio. Though Radio Row is long gone, Leeds Radio is still going strong, across the river from Manhattan in Brooklyn. This type of store has become a rarity in American towns and cities. We all remember (or saw old photographs of) the Mom & Pop stores that used to support Main Street USA. While it requires much searching, they still can be found. Take a look at the photos of Leeds Radio that you'll find in this issue's piece describing this echo of the past.

Have you been to a yard sale, garage sale, or tag sale lately? If you're a collector, the answer is probably yes. In the New York City Metropolitan area they have almost become an Olympic endurance event. At one recent sale I attended, people slept in their cars over-

night to be the first inside the house! Read all about the craziness in the article summarizing my experience there. Let me know if this is how these sales happen in your part of the country.

A.R.C. Needs Your Support

People are starting to send in more submissions for the monthly "Photo Review." Keep up the good work. We really appreciate it.

All clubs are invited to send in a report of their radio meets. It's an excellent way to promote your club and its activities. Just send in photos and a one-page write-up—it's that easy. And best of all, it's *free* promotion for your club!

We're always looking for restoration articles. Take some before and after photos of your project. We want to see what you're working on. Just give us a call if you have any questions on how to write a restoration article.

As always, I wish everyone happy collecting.

On The Cover

The latest in women's radio fashion from the June 1949 issue of *Radio-Electronics* magazine. Although the "Radio Hat" or "Chapeau de radio" (for the milliner types) never caught on as a fashion statement, *A.R.C.* would like to revive it with an informal contest. Make and design a Radio Hat and submit your photograph. The winner(s) will have their photograph published in an upcoming issue of *A.R.C.*

MEET REPORT

New England Antique Radio Club Meet Brookline, New Hampshire, June 16, 2012

BY JIM MONEGHAN

Everything was for sale—audio equipment, radios, test equipment, books, and more.

On June 16, 2012, the New England Antique Radio Club (NEARC) held its spring radio swap meet at the Brookline Event Center on RT 130 in Brookline, New Hampshire. This is a new venue for the NEARC semi-annual swap meet, and while some people reported having a little trouble finding the place, most attendees got there without issue (my Garmin GPS took me right to the front door).

The meet marked the first time the club offered flea market spaces outside for those who wanted to tailgate. The event center's own

staff handled outdoor space assignments and other duties, all very professionally. Food and drink was available indoors.

The weather could not have been better. The sun shone brightly all morning, with hardly a cloud in the sky, and the temperature was perfectly mild. There were several vendors that took advantage of the outdoor spaces (myself included) and by 8 a.m. the spaces were pretty much full. The event center also offers an outside tent in case of rain.

As many of you know, some of the previous locations for the NEARC swap meet

Many items were outdoors in the tailgate section, including this nice Grandfather clock radio.

Assorted catalin radios in the outdoor area.

A very nice collection of battery sets.

Inside there were many tables and a large attendance.

Lots of tubes were available to help hobbyists in the restoration of their collectables.

A beginning collector being shown some items.

Some very happy buyers and sellers.

were poorly lit; I'm happy to report that this was not the case at the Brookline Event Center. When I walked inside the building the first thing I noticed was that the room was bright and clean, making it easy to see everything clearly. Most tables were also full by 8 a.m., and there was plenty of activity from buyers, sellers, and browsers. I noticed that radios from the 1920s through 1960s were well represented and ran the gamut from high-end radios to restoration projects. There was truly something for everyone.

Around 11:30 a.m. the crowd started to thin out and the dealers packed up and headed home. I talked to several dealers and most said

sales were on the weak side. Personally, I sold two radios from the 1920s, several vacuum tubes, an RCA projector, a variac, and several Radio News magazines. Overall it was a very good day for me.

I believe that this may very well be the best location for the NEARC to date, offering indoor and outdoor spaces and run by an extremely professional staff. The next swap meet will be held at the Brookline Event Center in September. I hope to see you all there.

Jim Moneghan is an Atwater Kent specialist who collects AK items from 1895 to 1936.

RADIO RESOURCES

A Visit to Leeds Radio— An Echo of New York City’s Radio Row

BY JON KUMMER

Radio Row in downtown New York City is long gone. Unfortunately, I was too young to have visited that area, which is a legend for so many of us dedicated “radio types.” I am happy to say that in my younger years, I did visit the stores on 45th Street in Manhattan, but those are now only memories. The Canal Street shops have also disappeared, too. But enough wistful nostalgia; on to present day.

Recently I traveled to the borough of Brooklyn, New York (official name Kings County), to visit what I believe is the only survivor of Radio Row: Leeds Radio.

Feels Like Old Times

Leeds Radio was founded in 1923 and occupied a some real estate on Vesey Street in lower Manhattan (official name New York County). In the early 1960s the Radio Row area in Manhattan was torn down and replaced by the World Trade Center complex of buildings, and the old establishments had to find new homes. Leeds moved to the Williamsburg section of Brooklyn in the early 1980s.

Leeds is owned today by Richard Matthews. Matthews purchased the company in 1994 from Bernie Goldstein. According to

A typical aisle at Leeds.

Richard Matthews, owner of Leeds Radio, at the controls of a Triplet 3444A tube tester.

of this place, I would.” On a whim, Matthews said “I’ll buy this place.” A year later, he got what he wished for.

Today Leeds is a 2,400-square-foot facility that is an electronic wonderland. Electronics geeks like me just can’t help wandering up and down the aisles for hours looking at everything. Matthews’ customers include antique radio collectors, electronic hobbyists, hams, engineers, vintage audio listeners, musicians, and more. It was also great to hear that many young people come in to visit and learn about electronics.

Even though the accompanying photographs may give the impression that the shelves hold mysterious messes, believe me, everything is extremely well organized, and Matthews knows the location of every item. While you no longer can purchase the “Leeds listening monitor,” Vibroplex products, receivers, or transmitters listed in the 1930 advertisement reprinted here, this is a great go-to place for all sorts of parts and other items. You can still purchase transformers, lamps, condensers (capacitors), resistors, and wire. Matthews can also point you to any number of CRTs (sorry, though, no 10BP4s), electronic hardware including standoffs, Fahnestock clips, and shaft cou-

plers, inductors, knobs, meters (both new and used), relays, rheostats, pots, semiconductors, switches, tube sockets, and much, *much* more. While more parts than tubes are sold, Matthews does have both receiving and transmitting tubes—probably a total of 100,000! There’s even vintage test equipment available in a small section of the warehouse.

This is not a surplus place filled with old military gear or junk; it’s definitely a step up and offers better quality items.

If you’re ever in the New York City area, you owe it to yourself to stop by Leeds Radio and check it out. It will feel like a visit back in time, to the kind of place that disappeared long ago, replaced by catalogs and the Internet. Visit the website for hours and directions. If New York is too far to travel, however, don’t fret—Matthews says about 90 percent of his business is mail order.

Maybe I’ll see you in the aisles.

RADIO MADNESS

A Rag-Tag Tag Sale

BY JON KUMMER

How many of us have been to a garage sale? O.K. everyone, you can put your hands down.

It really comes as no surprise that most of the collectors *A.R.C.* speaks with have stopped by a garage sale or similar event at least once. Many attend more often...often, much more often!

Now I'm not talking about those wonderful warm weather events—hamfests, computer fairs, and flea markets—we radio fans flock to each spring and summer. I mean your friendly neighborhood soup-to-nuts-and-kitchen-sink sale-a-thons that seem to sprout on nearly every suburban front lawn. They go by different names in different areas of the country. They're dubbed garage sales, yard sales, rummage sales, tag sales, moving sales, even estate sales.

I live in the greater metropolitan New York City area, specifically on western Long Island. This area, as a sprawling suburb of New York City, is very densely populated. Our garden-variety yard sales are usually just someone putting some items in the driveway, without any advertising or promotion. Despite their name, garage sales are also usually held outside, too, but typically have some sort of promotion, such as Internet or local advertising, such as placing posters on phone poles. Tag sales are most often held indoors and have lots of promotion. Items may or may not have a price tag. In western Long Island there are a number of professional companies who will

organize tag sales and take a commission for people who don't want to run the event themselves. Usually, there'll be a website that lists the date and time of the sale and possibly have photographs of the house contents. The professional sale organizers know how to attract people.

In my travels, I've found that pretty much every area of the country has its own version of the "Great American Tag Sale."

The Big Sale

On a recent Sunday, I learned about a large tag sale just a few blocks from my house. Checking the sale's website, I saw photos of the items. It looked like the kind of thing our readers see nightly in their dreams. This was a hoarder's...um, collector's...home, and he had been hoarding/collecting most of his life. Metal shelves lined with equipment climbed the walls and spread across every inch of the floor. Both the first and second floors of this home seemed to be bursting with electronic equipment, including antique radios, parts, manuals, catalogs, communications equipment, and audio equipment.

The website said the sale would start Sunday morning at 9:30.

Here in the New York metro area we have our own way of "doing" tag sales. People arrive early to get on line so they'll be the first to go through the contents. The organizers allow about 10 to 15 people in the house at a time, even keeping a list so nobody "acciden-

Professionally run or thrown together by your Uncle Henry, maybe some tag sale promotion should state, “Enter at your own risk.” (Photo by Jim Chute via Wikimedia Commons)

tally” gets in front of someone else. Because we have such a high population density, and because the professional sale organizers did such a good promotion job, I expected a lot of people to attend.

Since the address was just minutes from my own house, I decided to drive by at 10:30 the night before to see exactly where the sale would be. *Already there were people on line!!!* I couldn’t believe it—this was 13 hours before the start of the sale! I spoke to one person—third in line—who intended to catch some sleep in his car. On this occasion situation, the early arrivals (very wisely, I’d say) started their own list of when people arrived. The organizers of the tag sale were supposed to arrive at 7 a.m. and would start their own list at that point. It was insane.

When the tag sale began at 9:30 there were 60 people waiting to get into the house. Of course, the temperature was 95 degrees and the house had no air-conditioning, not even an open window. At one point there were about 25 people in the basement, where I estimated the temperature to be around 100—I couldn’t begin to estimate the humidity! Nothing had price tags; instead you had to make a pile of items on the main floor and then negotiate with the organizers. Also, you had to be darn careful that nothing disappeared from your pile!

I heard an awful lot of complaining that hot day in the hoarder’s home. But for some reason people (including me) kept on rifling and rummaging for as long as they could. And for some crazy reason, I guess we all thought it was well worth the effort.

AT HOME WITH THE COLLECTOR

In Lou's Lair — Nuggets of Treasure from a Northeast Goldmine

BY LOU T.

I've been a principal engineer (RF and microwave) for about 31 years and an antique electronics collector for 40-plus years. I've also been a member of the AWA (Antique Wireless Association), the IEEE (Institute of Electrical and Electronics Engineers), and an active amateur radio operator (callsign KA1HIH) for a long time. But my interest in antique radios goes back even further. I have been repairing/restoring antique radios and equipment since I was 12 years old. As a young child I would look inside the radio my parents kept in our kitchen.

That set had a molded handle on the top with an opening where you could see the tubes light up while the set was operating. I was fascinated. What was that red glow and how did this all work? It was an Emerson Model #511, and I spent a lot of time searching—successfully!—on eBay for another one so I could relive that time.

As a teenager, my friends and I used to go around the neighborhood looking for “old stuff” to play around with. One of my first acquisitions was a 1958 Zenith B&W television set that a neighbor had in his backyard.

My workbench, front view. Even in this rather blurry shot you can see tons of equipment.

He told us the set didn't work, and we asked if we could have it. We brought it home and after a few adjustments the set was back in operation! (I think the technician who told him it didn't work may have done a little bit of deliberate "mis-tweaking" of the horizontal width control so he could sell him a new set!) That was over 40 years ago, and the set still works today!

I am as much an engineer as I am a technical historian. Once I find an item I'm interested in, I spend a lot of time just researching the company that manufactured it, when it was made, how many were made, what the economic conditions were like when it was made, etc. The history of an item can be as interesting as the item itself.

About My Collection

My collection pretty much covers the following categories:

- TVs from the late 1940s and 1950s—A number of seven-inch electrostatic sets and 10- and 12-inch table models.
- Radios, pre-World War II—Some tall 1930s sets with metal tubes and many pre-stock market crash TRF sets (I have a particular fondness for these). I also have quite a collection of cathedral radios.

An RCA tube radio, plus Motorola, Emerson, and Philco transistors.

Working on a Farnsworth model ET-066 radio.

(Right) A Philco model 80 "Junior" superheterodyne cathedral radio—beautiful and working.

A Zenith model 8S463 standup.

- Radios, post-World War II—Lots of colorful plastic radios (All American Fives)
- Miscellaneous antique test equipment—I believe no one should work on old radios without old tube testers, oscilloscopes, etc.

Some of my favorite "jewels" in my collection include the following:

- A mint condition RCA AR 812 receiver from 1924. It's missing the leather handle, but who would call it portable?! This is the receiver Edwin Howard Armstrong designed—Google it!
- A National Model #TV. This seven-inch TV in wood is fully restored and working
- An Emerson Model # 511 set. I have one white, one black, and one in wood.
- A 1958 RCA B&W 19-inch TV in a metal case. It's in working condition with original parts (it's that TV I collected "way back when")
- A 1949 Admiral Model #22X12 TV in bakelite. I restored this bakelite console TV working order, complete with connected converter box and period rabbit ears.
- An Atwater Kent TRF set with period speaker. I use this one a lot in my basement lab.

A working Admiral model 22X12 TV, complete with converter and period rabbit ears.

This rather science fiction-looking Tektronix model 535A oscilloscope is like new!

My lovely and patient wife at the workbench.

This RCA model 6X8B has been restored.

This Dumont Teleset model RA-103 art deco TV awaits restoration.

This Kolster model K48 standup set is an extremely attractive display piece.

Radios, radios, and more radios.

Some seven-inch TVs from the late 1940s wait on deck for restoration.

Me with my Zenith model 8s463 standup—and what a sound this beauty has!

My workbench is always well stocked with parts, parts, and more parts.

The accompanying, somewhat fuzzy (sorry, high-quality cameras are not in my collection!) photographs show some of my prize possessions. These all reside in my home—I would never store these in a barn or shed (I tried the experiment for several months once with bad results).

For future collectibles, I would love to obtain any radios that are pre-1929 (TRF sets). TVs that are pre-World War II are also desired. I find the history of early television just as fascinating as early radio.

I hope that you enjoy playing your antique radios as much as I enjoy fixing and collecting them. There is something special about getting something to work that has not functioned for over 50 years. Just imagine what these radios “heard” when they were new: the Hindenburg disaster, the start of World War II, President Roosevelt’s Fireside Chats, the Apollo Moon Landing...

What a wonderful hobby this is!

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

Bretting model 14 – Manufactured in 1937. The frequency coverage is from 550 kc to 34 mc. It has 14 tubes and originally sold for \$100. Rudy Gertz, Omaha, NE

Oceanic radio – Model name Surcouf. Made in France in 1956 with a complement of six tubes. Covers the AM and two shortwave bands. Donny Foster, Los Angeles, CA

Attention Subscribers: You can access a color version of this article on the A.R.C. website...

PHOTO REVIEW

RME model 70 – This communications receiver was made in 1938. It covers 550 kc to 32 mc and has 11 tubes. John Halliwell, Spokane, WA

Eico HF-50 Audio Amplifier – The power output from this mono block audio amplifier was 60 watts. Output tubes are 2 x EL34. Made in 1959. The HF-50 used a Chicago output transformer and the HF-60 used a Accrosound output transformer with an output of 60 watts. Karl Breen, Fargo, ND

...find out how by visiting us today at www.antiqueradio.com.

CLASSIFIED ADVERTISEMENTS

**OLD TECH
BOOKS
& THINGS**

A 2,000 sq. ft. museum is not enough space for my 1000+ set collection. And, hundreds of boxes await either space in the museum or sale. Some things must go! Choices must be made. As the late Dr. Muchow said, "As collectors, we truly are temporary caretakers of these historical artifacts."

Items for sale are either duplicates or the result of fine-tuning the scope of my collection.

For details on these items and much more, visit:

www.oldtech.com

From the A.R.C. Bookstore...

Practical Radio Repair – Volume II

by Ray Bintliff

\$22.95 - 126 pages, 315 illustrations, soft cover

Volume I of *Practical Radio Repair* by Ray Bintliff is one of the hottest selling titles in the A.R.C. Bookstore.

Volume II complements the original volume and provides additional information regarding special tools, test adapters, supplies, chemicals, and shop set-up. An excellent book for both the experienced restorer as well as the novice learning repair.

A.R.C., PO Box 1558, Port Washington, NY 11050

Toll Free: (866) 371-0512 • Fax: (516) 883-1077

E-mail: ARC@antiqueradio.com

Web: www.antiqueradio.com

Order today. We gladly accept:

\$3.00 shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Non-U.S. orders, write for shipping costs, or use credit card. Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

Everything stocked & shipped promptly. Radio is our middle name.

CRYSTAL CLEAR

By Maurice L. Sievers

Volume 1

750 Illustrations – 570 Crystal Sets
341 Detectors – 207 Crystals
Perfect for the beginning collector!
Useful for the experienced too!

Crystal Clear is the most comprehensive reference for collectors, historians and anyone interested in early radio. In addition to the many excellent photos and reproductions of ads, *Crystal Clear* includes lists showing all sets by manufacturer, set name, selling price and date of manufacture. 8 1/2" x 11", 282 pages.

\$29.95 – Softcover

Volume 2

Crystal Clear, Vol. 2 supplements the first volume. It identifies an additional 172 crystal radio sets, 91 crystal detectors and 26 crystals by manufacturer, model, year produced, description and original selling price. Further research on many of the crystal sets covered in Volume 1. Detailed history on the Philmore Manufacturing Company and the Western Manufacturing Company. 8 1/2" x 11", 252 pages.

\$29.95 – Softcover

Everything stocked and shipped promptly — Radio is our middle name.

A.R.C., PO Box 1558, Port Washington, NY 11050 – Toll Free: (866) 371-0512
Fax: (516) 883-1077 – E-mail: ARC@antiqueradio.com – Web: www.antiqueradio.com

U.S. orders \$3 for first book, \$1 per additional book (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Most orders shipped by next business day. Send payment with order. New York residents add sales tax. Non-U.S. orders, contact us for shipping costs. For your protection, if using a credit card, use our secure website. Do not send credit card information via e-mail.

CLUBS: Send antique radio club and meet information to A.R.C. for free listing here, as space permits. Sorry, we don't have room for hamfests. Always send a SASE when writing to clubs!

Order today. We gladly accept:

\$3.00 shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Non-U.S. orders, write for shipping costs, or use credit card. Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

A.R.C. RATES & POLICIES

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express or Discover. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or our secure website. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by credit card via our secure website or send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax. For your protection, please no credit cards by e-mail, use our secure website only.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the last day of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see Payment* paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork via e-mail or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)	
	H x W (inches)	H x W (inches)	H x W (inches)	H x W (inches)

Business Card (2nd...)	2 x 3 3/4	1 1/4 x 2 3/8	1 1/4 x 2 3/8	1 1/4 x 2 3/8

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about a 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Cost for	Cost for	Cost for	Cost for	One Time to make up Ad

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 50-WORD AD for subscribers in each issue; additional words are 10¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted. Free ads are OK via e-mail but for your protection, please use our secure website for longer, paid ads.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months) up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L). Also: 0, O, o, Q and D; v, r, and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address are required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 50 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET– 10th of the month!

Subscribers (First Ad):

First 50 words: **FREE!**

10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

**Deadline: 1st of the month
for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are SEARCHABLE! If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

HOW DO I ACCESS THESE BENEFITS?

1

ANTIQUE RADIO CLASSIFIED
A.R.C., P.O. Box 1106, Fort Washington, NJ 11000
