## SERVICE MANUAL

*US Model  
Canadian Model  
AEP Model  
UK Model  
E Model*

### SPECIFICATIONS

Turntable		General
Platter	7.8 cm (3½ in.), zinc-alloy diecast	Power requirements
Motor	DC motor	US, Canadian model: 120 V ac, 60 Hz AEP model: 220 V ac, 50/60 Hz UK model: 240 V ~ ac, 50/60 Hz E model: 110–120, 220–240 V ~ ac, 50/60 Hz
Drive system	Belt drive	Power consumption
Control system	Electro governor servo control system	Dimensions
Speed	33⅓ rpm, 45 rpm	3 W
Wow and flutter	0.12% (WRMS)	Approx. 215 x 235 x 58 mm (w/h/d) (8½ x 9½ x 2⅔ in.)
Signal-to-noise ratio	58 dB (DIN-B)	including projecting parts and controls
Automatic system	Lead-in, return, reject	Approx. 2.3 kg (5 lbs 2 oz) net Approx. 3.0 kg (6 lbs 10 oz), in shipping carton
Tonearm		Weight
Type	Dynamic balanced low mass type	
Cartridge		
Type	Moving magnet type	
Frequency response	10 to 20,000 Hz	
Channel separation	20 dB at 1 kHz	
Load impedance	50 kilohms	
Tracking force	2 g	
Stylus	Sony ND-143G (0.6 mil diamond)	
Weight	3.4 g	

ATTENTION AU COMPOSANT AYANT RAPPORT  
À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET  
UNE MARQUE SUR LES DIAGRAMMES SCHÉ-  
MATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES  
POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REM-  
PLACER CES COMPOSANTS QUE PAR DES PIÈCES  
SONY DONT LES NUMÉROS SONT DONNÉS DANS CE  
MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR  
SONY.

### SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY SHADING AND MARK ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION.  
REPLACE THESE COMPONENTS WITH SONY PARTS,  
WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS  
MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

## SAFETY CHECK-OUT (US Model)

After correcting the original service problem, perform the following safety check before releasing the set to the customer:  
Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

### LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

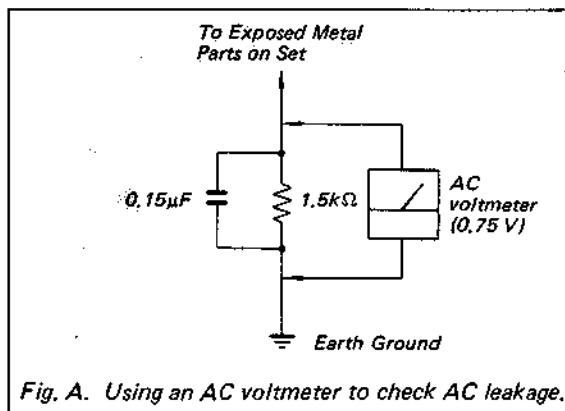

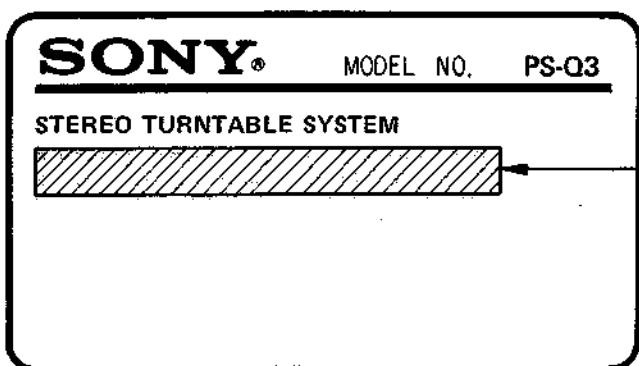

Fig. A. Using an AC voltmeter to check AC leakage.

### MODEL IDENTIFICATION

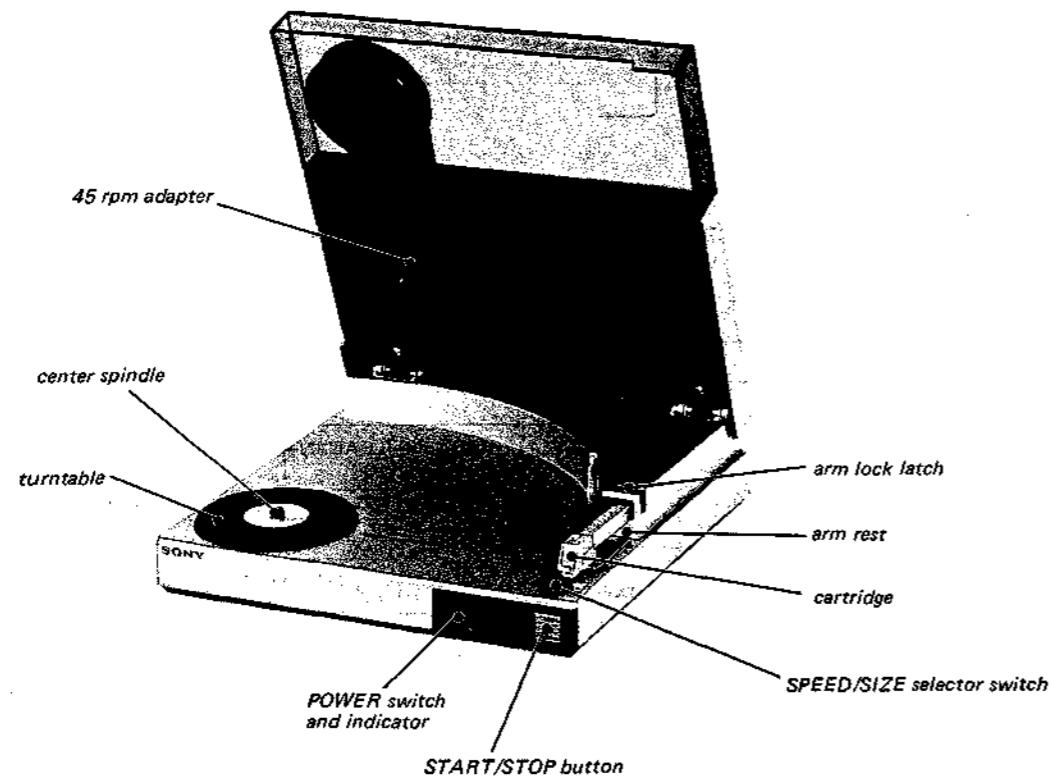

—Specification Label—

US, Canadian model:	AC: 120 V 60 Hz 3 W
AEP model:	AC: 220 V ~ 50/60 Hz 3 W
UK model:	AC: 240 V ~ 50/60 Hz 3 W
E model:	AC: 110 – 120, 220 – 240 V ~ 50/60 Hz 3 W

## SECTION 1 OUTLINE

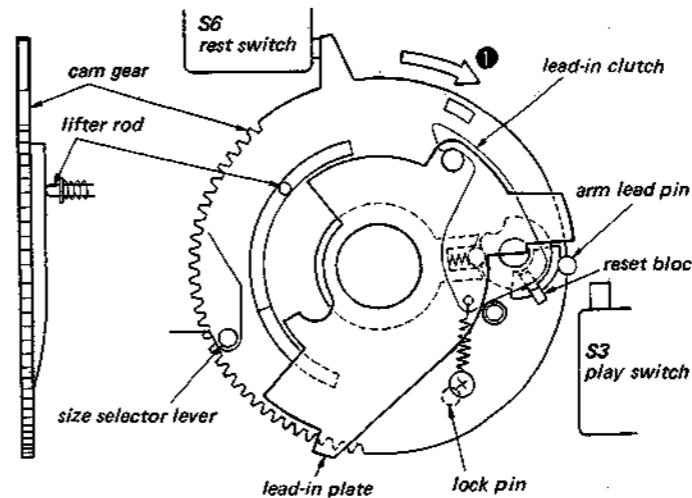

### 1-1. PARTS LOCATION

## PS-Q3 PS-Q3

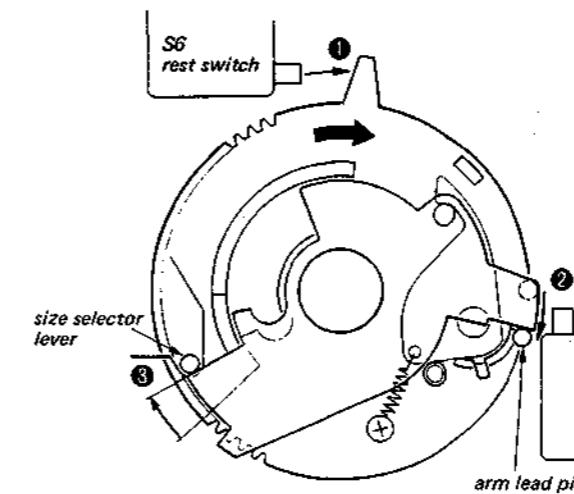

### 1-2. MECHANISM DESCRIPTION AUTOMATIC OPERATION MODE

#### 1. REST

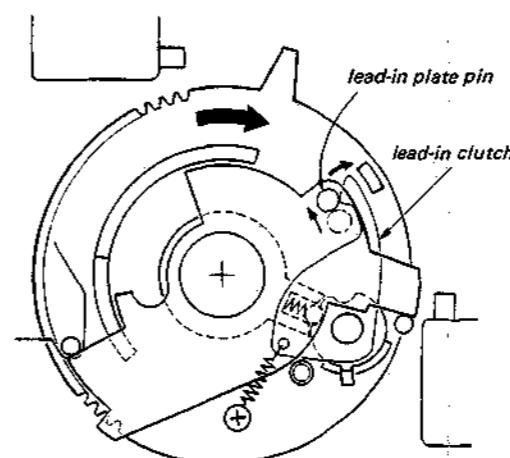

- Cam gear stops, pressing the rest switch.
- The lifter rod is in the "arm lifted" state.
- The arm lead pin is in the rest position.
- ① The arm drive motor (M1) is driven when the START/STOP switch is pressed, and the cam gear turns. Then the turntable motor (M2) goes on.

#### 2. DROP POINT

- ① S6 goes off.
- ② The arm lead pin is pressed and the arm moves inward.
- ③ The lead-in plate hits the size selector lever, and the arm movement stops. (drop point)

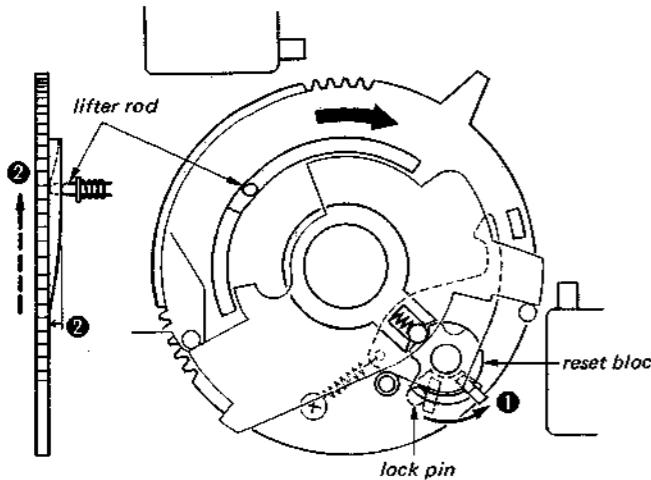

#### 3. LEAD-IN CLUTCH RELEASE

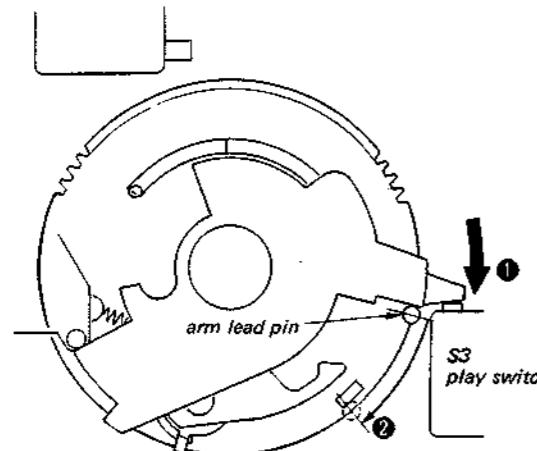

- Since the lead-in plate stops and the cam gear turns, the lead-in clutch comes off of the lead-in plate pin.

## PS-Q3 PS-Q3

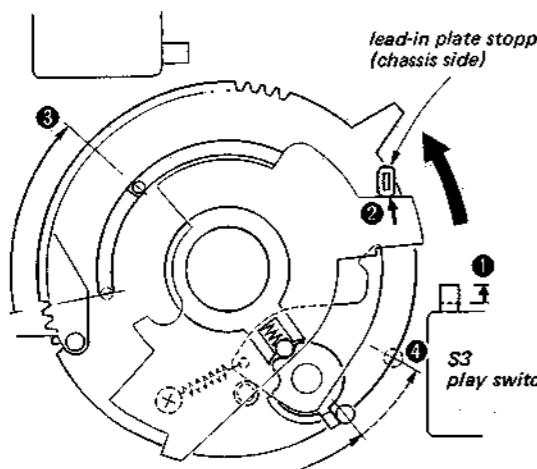

### 4. ARM DOWN

### 5. PLAYING RECORD

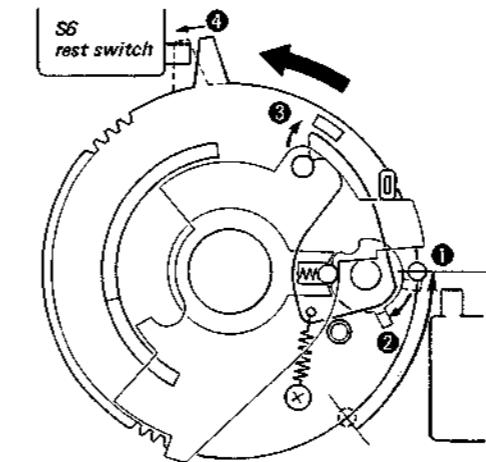

### 6. RETURN

- ① The claw of the reset block hits the lock pin (chassis side), and the reset block is set.
- ② The lifter rod traces the slope of the cam gear, and the arm is lowered.

### 7. REST

- ① The arm is pressed till the arm rest position.
- ② The arm lead pin stops and the reset block is reset.
- ③ The lead-in cam is locked.
- ④ S6 goes on and the cam gear stops.  
The turntable motor (M2) goes off. (Rest mode)

### 1-3. CIRCUIT DESCRIPTION

#### IC102's (SYSTEM CONTROLLER IC TC9305P-009) TERMINAL FUNCTIONS

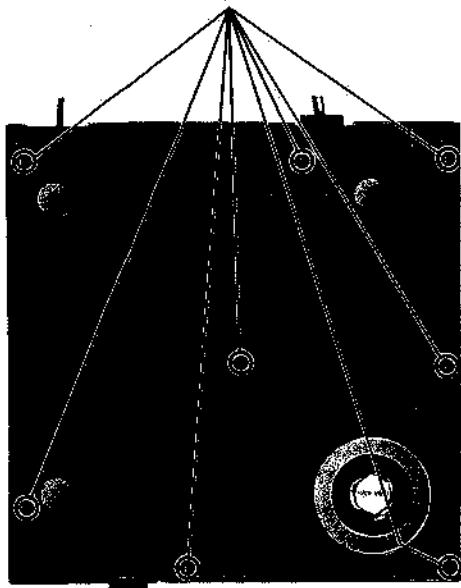

PIN NO.		IN/OUT	TIMING CHART
1	GND		Ground terminal
2	OSC		Terminal for clock OSC
3	CLOCK		
4	START/STOP	INPUT	REST → LEAD-IN → PLAY → LEAD OUT → REST H START/STOP button (S2) is pushed. L Rest switch (S6) is released.
5	REST	INPUT	H Play switch (S3) is pushed. L End detector (Q401/402) is ON.
6	PLAY	INPUT	H 17 cm → 30 cm L LED (D402) is on for 30 cm end detector. H 30 cm L 17 cm LED (D401) is on for 17 cm end detector.
7	END DET	INPUT	H 17 cm → 30 cm L 30 cm H 17 cm L 30 cm Arm is lifted and moves outwards.
8	SIZE SELECT	INPUT	H 17 cm L 30 cm H 30 cm L 17 cm Arm moves inwards and is lowered.
11	SIZE 30	OUTPUT	H ARM OUT L ARM IN
12	SIZE 17	OUTPUT	H TT MOTOR L VDD
13	ARM OUT	OUTPUT	
14	ARM IN	OUTPUT	
15	TT MOTOR	OUTPUT	
16	VDD		Power supply terminal

## SECTION 2 DISASSEMBLY

Note: Follow the disassembly procedure in the numerical order given.

### Frame

- ① Pull off the cartridge.
- ② Remove the eight screws +BVTP 3x12

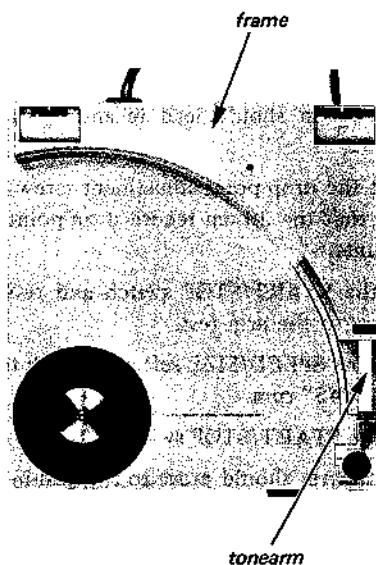

- ③ Remove the bottom cover.

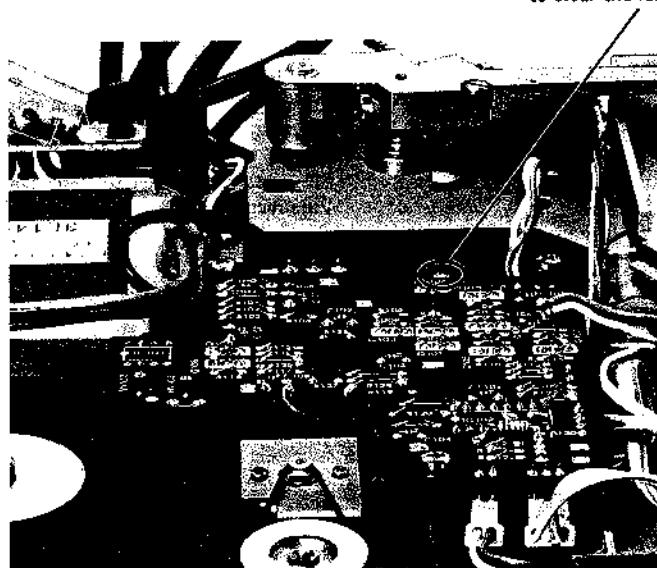

④ Set the player system normal position, turntable side facing top.

⑤ Lift up the frame slowly and remove it by letting the tonearm pass through the opening in the frame.

### NOTE ON REASSEMBLING CAM GEAR

*When reassembling, make sure the protrusion of the cam gear does not land on the lever of the REST switch (S6). When it does, push the lever in to clear the landing.*

## SECTION 3

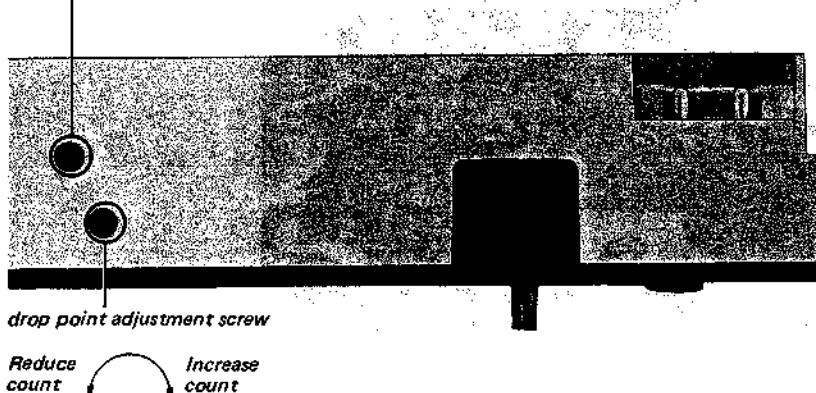

### ADJUSTMENTS

#### 3-1. MECHANICAL ADJUSTMENTS

##### Drop Point Adjustment

1. Set the test record (YFSC-16) on the turntable.
2. Select the SPEED/SIZE selector switch to "30" cm and "33" rpm.
3. Turn on the POWER switch. The LED indicator lights.
4. Push the START/STOP switch.
5. The tonearm should lead in and play the record.
6. Adjust the drop point adjustment screw in such a way that the 30 cm record drop point is 7 to 15 counts.
7. Push the START/STOP switch and return the tonearm to the arm rest.
8. Select the SPEED/SIZE selector switch to "17" cm and "45" rpm.
9. Push the START/STOP switch.
10. The tonearm should move to the lead-in groove of 17 cm record and play the record.  
At this time, the 17 cm record drop point should be 6 to 24 counts. If the drop point is not in the above range, adjust the drop point adjustment screw again.
11. Select the SPEED/SIZE selector switch to "30" cm and "33" rpm again. Make sure that the 30 cm record drop point. Adjust the drop point if necessary.

*return point adjustment screw*

##### Return Point Adjustment

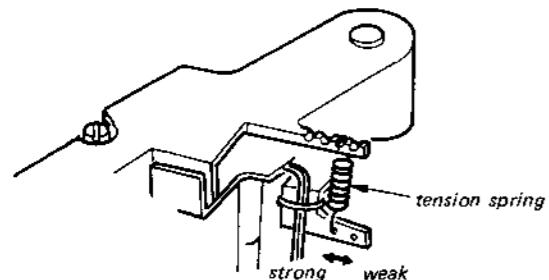

1. Put the return point adjustment record (YFSC-16) on the turntable.
2. Select the SPEED/SIZE selector switch to "30" cm and "33" rpm.
3. Move the tonearm to the start position of the return point groove by hand.
4. Turn on the POWER switch. The LED indicator lights.
5. Push the START/STOP switch to play the record.
6. Adjust the return point adjustment screw in such a way that the tonearm returns at the 30 cm record return point 10 - 13 counts.
7. Select the SPEED/SIZE selector switch to "17" cm and "33" rpm. (The tonearm is on the arm reset.)
8. Move the tonearm to the start position of the 17 cm record return point groove by hand.
9. Push the START/STOP switch. The tonearm should down to the record groove and play the record.
10. The tonearm should stop playing the record and return to the arm rest at the 17 cm record return point 14 - 17 counts.  
Readjust the return point adjustment screw finely if necessary.
11. Select the SPEED/SIZE selector switch to "30" cm and "33" rpm. Make sure that the 30 cm record return point again.

**Caution:** If the record play is started under "30" cm selected by the SPEED/SIZE selector switch, the SPEED/SIZE selector switch can be changed from "30" cm to "17" cm during playing the record. However, if the record play is started under "17" cm, the SPEED/SIZE selector switch can not be changed to "30" cm during playing the record.

## 3-2. ELECTRICAL ADJUSTMENTS

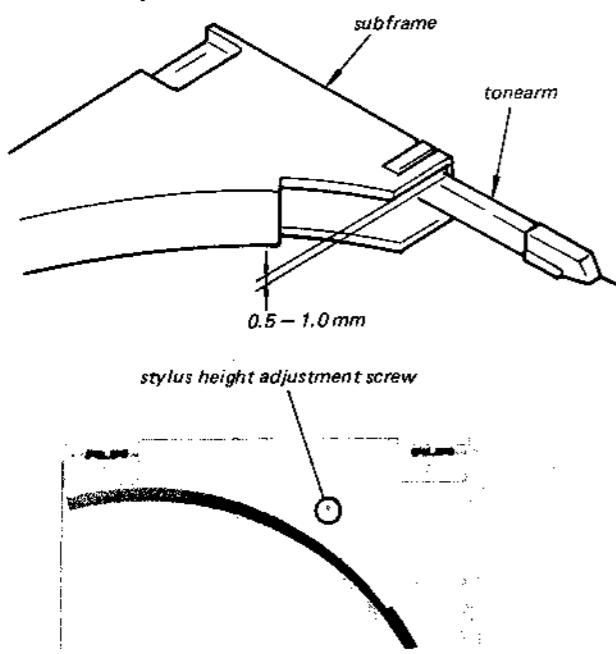

## Stylus Pressure Adjustment

1. Turn on the POWER switch. Push the START/STOP switch to let the tonearm lead in.
2. Turn off the POWER switch.
3. Adjust the stylus pressure at the range of  $1.8 \pm 0.3$  g by changing the compression spring hooking position under the tonearm at horizontal.

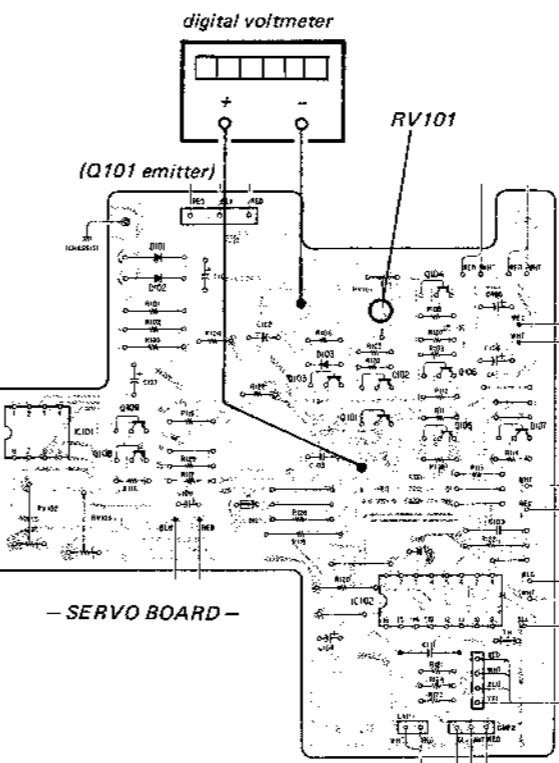

## Stylus Height Adjustment

1. The tonearm is on the arm rest and UP condition.
2. Adjust the clearance between the tonearm top surface and subframe inside surface by the stylus height adjustment screw to 0.5 – 1.0 mm.
3. After the adjustment 2, make sure that the tonearm top surface does not touch with the subframe inside surface by leading in and returning the tonearm.

## Power Voltage Adjustment

Setting:

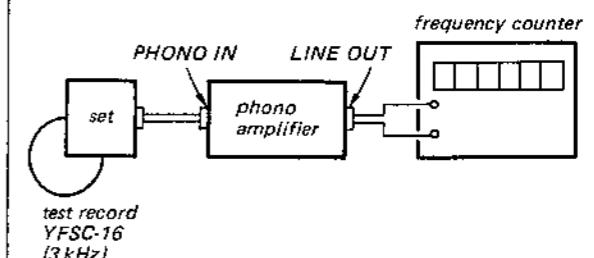

## Procedure:

1. Turn on the POWER switch. (STOP mode)
2. Adjust RV101 for  $3.1 \text{ V} \pm 0.1 \text{ V}$  on the digital voltmeter.

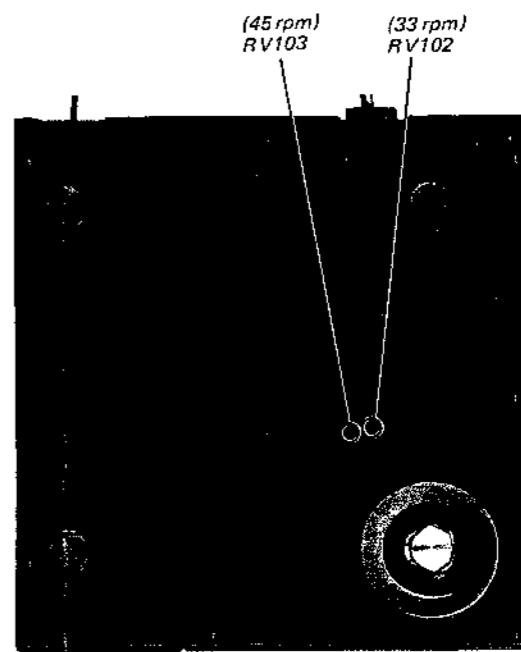

## Speed Adjustment

Setting:

## Procedure:

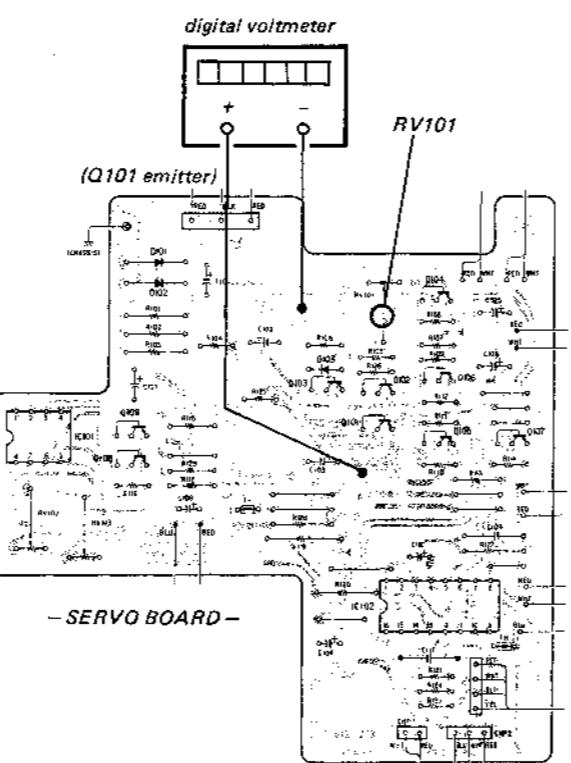

1. Select the SPEED/SIZE selector switch to "30" cm and "33" rpm.
2. Play 3 kHz signal in the test record.
3. Adjust RV102 for  $3,000 \text{ Hz} \pm 9 \text{ Hz}$  on the counter.
4. Select the SPEED/SIZE selector switch to "30" cm and "45" rpm.
5. Play 3 kHz signal in the test record.
6. Adjust RV103 for  $4,050 \text{ Hz} \pm 12 \text{ Hz}$  on the counter.

## 3-2. ELECTRICAL ADJUSTMENTS

## Power Voltage Adjustment

Setting:

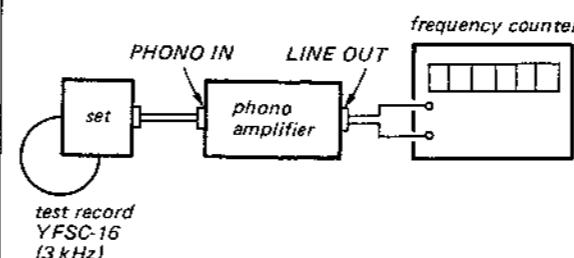

## Procedure:

1. Turn on the POWER switch. (STOP mode)
2. Adjust RV101 for  $3.1 \text{ V} \pm 0.1 \text{ V}$  on the digital voltmeter.

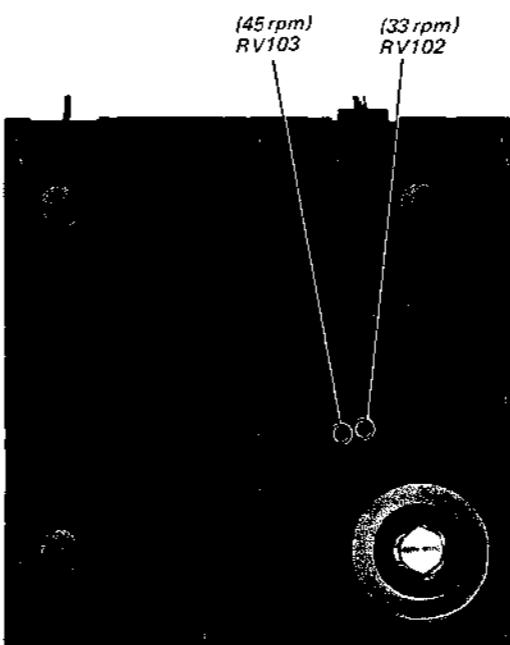

## Speed Adjustment

Setting:

## Procedure:

1. Select the SPEED/SIZE selector switch to "30" cm and "33" rpm.
2. Play 3 kHz signal in the test record.
3. Adjust RV102 for  $3,000 \text{ Hz} \pm 9 \text{ Hz}$  on the counter.
4. Select the SPEED/SIZE selector switch to "30" cm and "45" rpm.
5. Play 3 kHz signal in the test record.
6. Adjust RV103 for  $4,050 \text{ Hz} \pm 12 \text{ Hz}$  on the counter.

## NOTE:

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked "●" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- Due to standardization, parts with part numbers ( $\Delta-\Delta\Delta-\Delta\Delta\Delta-XX$  or  $\Delta-\Delta\Delta\Delta-\Delta\Delta\Delta-X$ ) may be different from those used in the set.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

CAPACITORS:  
All capacitors are in  $\mu F$ . Common capacitors are omitted. Refer to the following lists for their part numbers.  
MF: $\mu F$ , PF: $\mu mF$ .

## COILS:

MMH : mH, UH :  $\mu H$

## SEMICONDUCTORS

In each case, U :  $\mu A$ , for example:  
UA...:  $\mu A$ ..., UPA...:  $\mu PA$ ..., UPC...:  $\mu PC$ ,  
UPD...:  $\mu PD$ ...

**NOTE :**

- The mechanical parts with no reference number in the exploded views are not supplied.
  - Items marked "●" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
  - Due to standardization, parts with part numbers ( $\Delta-\Delta\Delta-\Delta\Delta-XX$  or  $\Delta-\Delta\Delta\Delta-\Delta\Delta-X$ ) may be different from those used in the set.
  - If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

## CAPACITORS:

- All capacitors are in  $\mu$ F. Common capacitors are omitted. Refer to the following lists for their part numbers.  
MF: $\mu$ F, PF: $\mu$ mF.

501 S

- 1994 • 1995 • 1996

SEMICONDUCTORS
