IFC Knob Assembly Installation

- 1 Smear the shaded portion (E) of the washer and the IFC cam with grease.
- 2 Install a washer in the IFC knob ass'y.
- 3 Set the marked point (\*B) of the IFC knob ass'y as shown. Install it through the frame and install the IFC cam in the IFC knob ass'y. Be sure that the two marked points (\*A & \*B) coincide. (Place the IFC spring lever in the direction of the arrow when performing this installation.)
- 4 Place the bushing, IFC hook and washer (W3) on the spindle and fasten them with screw B3 x 8.
- 5 Connect the IFC hook and the IFC spring lever with a spring and apply suitable locking compound at point (A) of the lever.
- 6 After the installation has been completed, be sure that the IFC hook moves on its own.

Brake Drum Installation

- 1 Thread the IFC lever with the toner arm lead wires.
- 2 Thread the brake drum ass'y with the toner arm lead wires. Pull the wires out in the direction of the arrow (A).
- 3 Set the marked portion (\*) of the IFC lever between the IFC spring lever and the IFC hook.
- 4 Push the brake lever in the direction of the arrow (B) and match the slitted part with the hook of the IFC lever. (See fig. a)
- 5 Adjust the position of the drum so that the straight side of drum is parallel with the frame (See fig. b). Fix the drum by turning the set screw (SC3 x 6) in the direction of the arrow (C).

**Sub Gear and Clutch Ass'y Installation**

- 1 Set the pawl of the sub gear in hole C and fasten the sub gear with E1.5.
- 2 Set the pawls of the clutch ass'y in holes A and B and fasten the clutch ass'y with E1.5.
- 3 After installation has been completed, make sure that they move on their own.

**TONEARM INSTALLATION**

**1. Pipe Assembly (1)**

1. Thread a wire in D.
2. Thread the leads of A in B and C, and hook the leads by the wire.
3. Insert A in D by pulling the wire in the direction of the arrow, adjust two holes marked \*1 and \*2 to tighten the screws E.

**2. Pipe Assembly (2)**

1. Hook the leads together by the wire and pull the leads into A in the direction of arrow.
2. Adjust the two holes marked \*1 and \*2 to tighten the two screws B.

**3. Arm Boss Ass'y Installation**

1. Thread the wire in arm boss ass'y.
2. Hook the five leads by the wire.
3. Pull the wire in the direction of arrow.
4. Tighten the pivot screw and the lock nut temporarily.

**Note:** Confirm that the portions marked \* of the tonarm pipe are positioned to the center of the screw hole.

**4. Arm Boss Cap Installation**

1. Install the arm boss cap with four screws.
2. Install the tonarm to the frame.

**5. Longitudinal Sensitivity Adjustment**

1. Make the longitudinal balance adjustment of tonearm.
2. Repeating the following procedures, adjust the pivot screw and the lock nut.
  - a. When the 60 mg weight is placed on the top of the shell, the tonearm sinks 5 mm (measured at stylus-tip.)
  - b. When the weight is removed, the tonearm returns horizontally.

**Note:** Rotate the left and right pivot screws by same numbers of turns.

**MOTOR INSTALLATION**

The motor and the servo amp board are assembled together. If found defective, disassemble the motor block as shown in Fig. A and repair it.

Fig. A

1. When the motor shaft is replaced, apply grease to the pivot and apply two drops of the SONY oil (OL-2KA) to the parts marked by \* in Fig. B

2. When the motor bearing and the thrust retainer plate are replaced, apply grease to the pivot.

Fig. B

3. Insert the motor shaft assembly slowly in the motor bearing so that the motor shaft is not attracted by strong magnetic field strength.
4. The motor coils are composed of two pairs.
  - a). Mount the coils on the motor frame so that the boss of the coil is placed in the hole of

- b). Push the coils in the arrowed direction and tighten the screws.
- c). Lay the leads of the coils as shown in Fig. D and fix the leads in the slot between the portions marked by \* in Fig. E.

ADJUSTMENTS

MECHANICAL ADJUSTMENTS

Automatic Razor Position Adjustment

- Unplug the power cord.
- 1. Remove the turntable mat and turntable.
- 2. Put the tonearm on the arm rest.
- 3. Turn the center shaft clockwise by hand and turn the drive gear one turn by engaging the center gear with the Drive gear. Then place the drive gear in the disengaging position.
- 4. Push the clutch left in the direction of the arrow and place the stylus on the groove that is pointed out below.

- 5. Turn the center adjustment screw (Part No. 99118100) to the center point.
- 6. Move the tonearm toward the center shaft by hand so that the center of the stylus is in the groove below and confirm that the stylus is in contact with the groove by the sound of the turntable.

- 7. If necessary, adjust the adjustment screw.
