* The abbreviations of 775HF, 776HF, 795HF and 975HF contained in this service manual are indicated when these models are common to all their corresponding models as given below.

Abbreviated model name	775HF	776HF	795HF	975HF
All model names SLV-	775HF (US) 775HF (Canadian) 775HFPX	776HF (US)	795HF (US) 795HF (Canadian)	975HF (US) 975HF (Canadian) 975HFCS 975HFMX 975HFPX

SPECIFICATIONS

System

Format
- VHS NTSC standard

Video recording system
- Rotary head helical scanning FM system

Video heads
- Double azimuth four heads

Video signal
- NTSC color, EIA standards

Tape Speed
- SP: 33.35 mm/s (1 3/8 inches/s)
- EP 11.11 mm/s (7/16 inches/s)
- LP 16.67 mm/s (11/16 inches/s), playback only

Maximum recording/playback time
- 8 hrs. in EP mode (with T-160 tape)

Fast-forword and rewind time
- Approx. 3 min (with T-120 tape)

Tuner section

Channel coverage
- VHF 2 to 13
- UHF 14 to 69
- CATV A-8 to A-1, A to W, W+1 to W+84

Antenna
- 75-ohm antenna terminal for VHF/UHF

Inputs and outputs

LINE-1 IN and -2 IN
- VIDEO IN, phono jack (1 each)
- Input signal: 1 Vp-p, 75 ohms, unbalanced, sync negative
- AUDIO IN, phono jack (2 each)
- Input level: 327 mVrms
- Input Impedance: more than 47 kilohms

LINE OUT
- VIDEO OUT, phono jack (1)
- Output signal. 1 Vp-p, 75 ohms, unbalanced, sync negative
- AUDIO OUT, phonojack (2)
- Standard output: 327 mVrms
- Load impedance 47 kilohms
- Output impedance: less than 10 kilohms

S-LINK (CONTROL S IN)
- Mini jack (1)

CABLE BOX CONTROL (CONTROL S OUT)
- stereo mini jack (plug in power) (1)

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK ⚠ OR DOTTED LINE WITH MARK ⚠ ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE ⚠ SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COM- POSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
4. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
5. Check the line cord for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
6. Check the B+ voltage to see it is at the values specified.
7. Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

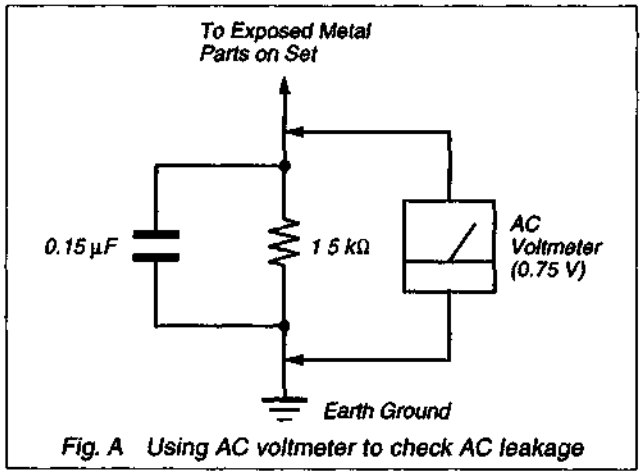

Fig. A Using AC voltmeter to check AC leakage

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

TABLE OF CONTENTS

7. REPAIR PARTS LIST

SERVICE NOTE

1. UPPER DRUM REPLACEMENT

1-1. Removal of Upper Drum

1) Remove the screw ① (BV3 × 8) and take out the ground shaft assembly ②. (See Fig. 1.)
2) Completely remove the rotary upper drum board and desolder the soldering indicated by the arrows.
3) Remove two screw ③ (PSW3 × 8) and take out the rotary upper drum in the arrow direction Ⓐ. (See Fig. 2.)
   If it difficult, remove by shaking the rotary upper drum gradually.

Note: If the drum can not be removed, check whether the solders have been removed or not again.

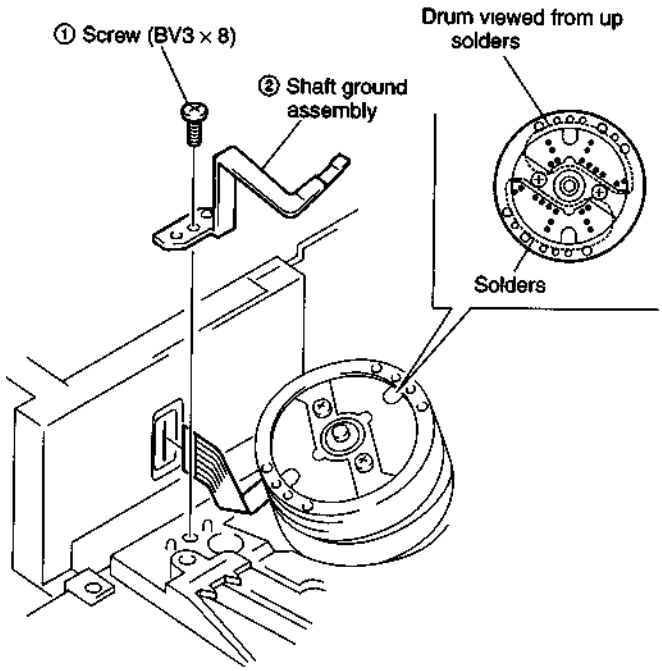

Fig. 1

1-2. Mounting Upper Drum

1) When inserting the rotary drum into the lower drum, be careful not to blur the contacting surface with fingerprint or the like.
2) Mount the rotary upper drum board so that the screw holes of both upper and lower drums match. (See Fig. 2.)
3) If it is difficult, mount the upper drum by shaking it gradually.
   Note: Be careful not to damage the head. Make sure that the upper drum is tightly inserted.
4) Tighten two screws ③ (PSW3 × 8). (See Fig. 2.)
   Note: Temporary tighten two screws. After making sure that upper drum is tightly inserted, tighten the screws.
5) Solder points on the board of the rotary upper drum.
6) Fix the ground shaft assembly ② using the screw ① (BV3 × 8) so that the protrusion of ground shaft assembly end contacts the center of the drum shaft.
   Note: When attaching the ground shaft assembly 2, be careful not to apply force to the spring section of it.

SECTION 1
GENERAL

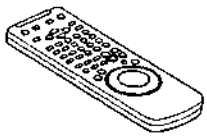
This section is extracted from SLV-975HF/975HFCS/975HFMX instruction manual.

Step 1

Unpacking

Check that you have received the following items with the VCR

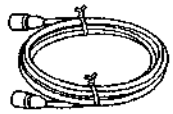
- Remote commander



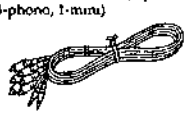
- Cable Mouse (cable box controller)

- Size AA (R6) batteries

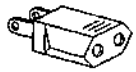
- 75-ohm coaxial cable with F-type connectors



- Audio/video cable (3-phono, 1 mini to 3-phono, 1-mini)



- Plug adaptor (SLV-775HF PX/975HF PX/975HF CS only)

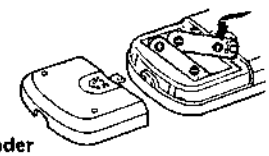


Step 2

Setting up the remote commander

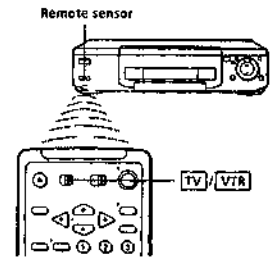
Inserting the batteries

Insert two size AA (R6) batteries by matching the + and – on the batteries to the diagram inside the battery compartment



Using the remote commander

You can use this remote commander to operate this VCR and a Sony TV. The buttons on the remote commander marked with a dot (•) can be used to operate your Sony TV



To operate	Set TV/VTR to
the VCR	VTR and point at the remote sensor on the VCR
a Sony TV	TV and point at the remote sensor on the TV

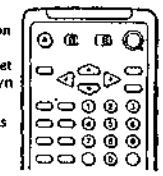
Notes

- With normal use, the batteries should last for approximately three to six months
- If you do not use the remote commander for an extended period of time, remove the batteries to avoid possible damage from battery leakage
- Do not use a new battery with an old one
- Do not use different types of batteries

Setting the COMMAND MODE switch

To remotely control the VCR with the commander, set COMMAND MODE on the remote commander to the same position as that on the VCR. Usually set to VTR 3. Change the position as shown below to control other Sony VCRs.

VTR 1: For Sony Betamax format VCRs
VTR 2: For Sony 8mm format VCRs
VTR 3: For Sony VHS format VCRs



continued

Step 2: Setting up the remote commander (continued)

Controlling other TVs with the remote commander

The remote commander is preprogrammed to control non-Sony TVs. If your TV is listed in the table below, set the appropriate manufacturer's code number.

1. Set TV/VTR at the top of the remote commander to TV.
2. Hold down POWER, and enter your TV's code number(s) using the number buttons. Then release POWER.

Now you can use the POWER, VOL +/–, CH +/–, and TV/VTR buttons to control your TV. You can also use the buttons marked with a dot (•) to control a Sony TV. To control the VCR, reset TV/VTR to VTR.

Tip

- If you set your TV's code number correctly while the TV is turned on, the TV turns off automatically.

Code numbers of controllable TVs

If more than one code number is listed, try entering them one at a time until you find the one that works with your TV.

Manufacturer	Code number
Sony	01
Akai	04
AOC	04
Centurion	12
Coronado	03
Curtis Mathes	12
Daytron	12
Emerson	03, 04, 14
Fisher	11
General Electric	06,10
Gold Star	03, 04, 17
Hitachi	02,03
J C Penny	04,12

Manufacturer	Code number
JVC	09
KMC	03
Magnavox	03,08 12
Marantz	04,13
MGA/Mitsubishi	04,12,13,17
NEC	04,12
Panasonic	06 19
Philco	03,04
Philips	08
Pioneer	16
Portland	03
Quasar	06,18
Radio Shack	05,14

Manufacturer	Code number
RCA	04,10
Sampo	12
Sanyo	11
Scott	12
Sears	07,10,11
Sharp	03,05,18
Sylvania	08,12
Teknika	03,08,14
Toshiba	07
Wards	03,04,12
York	12
Zenith	15

Notes

- If the TV uses a different remote control system from the one programmed to work with the VCR, you cannot control your TV with the remote commander.
- If you enter a new code number, the code number previously entered will be erased.
- When you replace the batteries of the remote commander, the code number automatically resets to 01 (Sony). Reset the appropriate code number.

Step 3

Hookups

Selecting the best hookup option

There are many ways in which your VCR can be hooked up. To hook up your VCR so that it works best for you, first scan through the table below. Then use the accompanying diagrams and procedures on the following pages to set up your VCR.

If you have	Use	Refer to
TV that has audio/video inputs	Audio/video (A/V) hookup, then follow one of the hookups below	Pages 8 to 9
Cable box that is compatible with the VCR's cable box control feature	Hookup 1	Pages 10 to 12
No cable box or incompatible cable box with only a few scrambled channels	Hookup 2	Pages 13 to 15
Antenna only, no cable TV	Hookup 3	Pages 16 to 18
Incompatible cable box with many scrambled channels	Hookup 4	Pages 19 to 22
DSS* receiver	Hookup 5	Pages 23 to 25
Incompatible cable box with only a few scrambled channels, using an A/B switch	Hookup 6	Pages 26 to 30

After you've completed the connections, follow the instructions for setup. During setup, if you need more details on the procedure described, page numbers are provided where you can find complete, step-by-step instructions.

After you've completed the setup, you're ready to use your VCR. Procedures differ depending on the hookup you used. For an overview, refer to "Quick reference to using the VCR" on the back cover.

Before you get started

- Turn off the power to all equipment.
- Do not connect the AC power cords until all of the connections are completed.
- Be sure you make connections firmly. Loose connections may cause picture distortion.
- If your TV doesn't match any of the examples provided, see your nearest Sony dealer or qualified technician.

* DSS® is a registered trademark of DIRECTV, Inc., a unit of Hughes Electronics Corporation.

continued

Audio/video (A/V) hookup

Pages 8 to 9

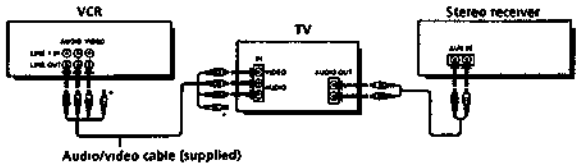
If your TV has audio/video (A/V) input jacks, you will get a better picture and sound if you hook up your VCR using these connections. In addition, for a true "home theater" experience, you should connect the audio outputs of your VCR or TV to your stereo system. If your TV doesn't have A/V inputs, see the following pages for antenna or cable hookups.

If your TV has the S-Link™* (A/V bus control) function, hook up your VCR using the connection shown on page 9. Your TV will automatically switch to the A/V inputs for your VCR when you play back or operate menu on the VCR.

If you're not planning to use your VCR to record programs, you're finished setting up the VCR after you've made the connections shown on pages 8 and 9. If you want to record off-air or off your cable TV system, complete these connections first, and then go to the following pages for antenna or cable hookups.

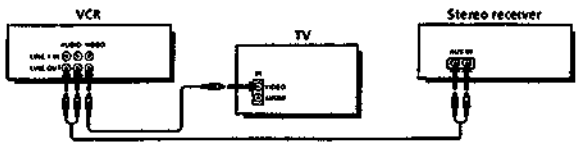
* S-Link™ is a trademark of Sony Corporation.

A Use this hookup if your TV has stereo jacks



* Do not connect the miniplugs for this hookup.

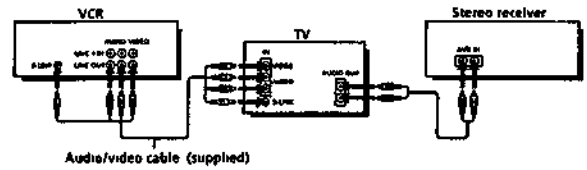
B Use this hookup if your TV doesn't have stereo jacks



Note

- To play a tape in stereo, you must use the A/V connection.

C Use this hookup if your TV has the S-Link™ function

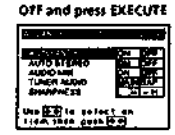


A/V hookup: VCR setup

After you've connected your TV and completed antenna or cable hookup, use the following procedure to set up the VCR.

Press MENU and select ADVANCED OPTIONS

Set AUTO ANT SEL to OFF and press EXECUTE



For details, see page 72.

Caution

Connections between the VCR's VHF/UHF connector and the antenna terminals of the TV receiver should be made only as shown in the following instructions. Failure to do so may result in operation that violates the regulations of the Federal Communications Commission regarding the use and operation of RF devices. Never connect the output of the VCR to an antenna or make simultaneous (parallel) antenna and VCR connections at the antenna terminals of your receiver.

Note to CATV system installer (in USA)

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

continued

Hookup 1

Pages 10 to 12

Using cable box control

Recommended use

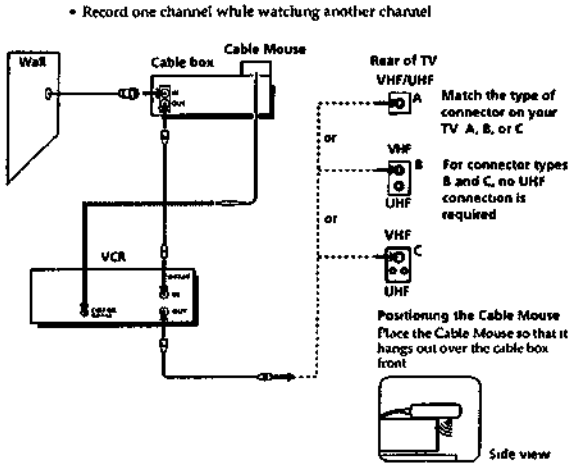
You should use this hookup if you have a cable box, especially if your cable system scrambles all or most channels. This hookup allows the VCR's cable box control feature to control the channel on the cable box, simplifying the recording process. A list of compatible cable boxes is on page 39.

What you can do with this hookup

- Record any channel using the VCR's cable box control feature to select channels on the cable box.

What you can't do

- Record with the cable box turned off.
- Record one channel while watching another channel.

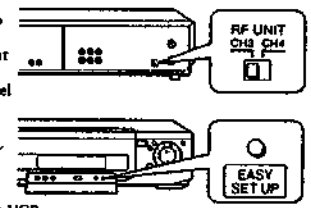


Positioning the Cable Mouse

Place the Cable Mouse so that it hangs out over the cable box front.

Hookup 1: VCR setup

1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel. For details, see page 78.
If you made A/V connections (from page 8), you can skip this step.



2 Turn on your cable box.

3 Press EASY SET UP on the VCR.

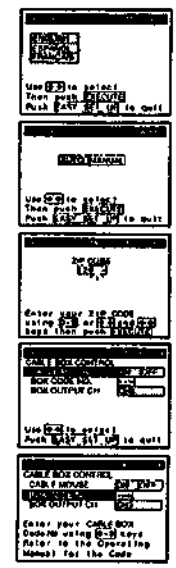
❶ The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press EXECUTE. For details, see page 31.

❷ The CLOCK SET menu appears. Select AUTO and press EXECUTE. For details, see page 32.

❸ The SMART CH MAPPING menu appears. Press CURSOR ↑/↓/←/→ to enter the ZIP CODE in your area and press EXECUTE. (You can also use the number buttons to enter the ZIP CODE.)

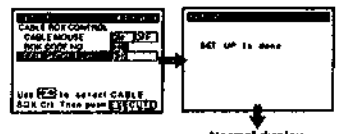
❹ The CABLE BOX menu appears. Select ON. For details, see page 36.

❺ Enter your cable box code number and press CURSOR ↓.



continued

❺ Select your cable box output channel and press EXECUTE



Normal display

Hookup 1: VCR Plus+ channel setup

1 Press MENU and select SET VCR Plus+ CHANNELS

2 Press CURSOR ⇐/⇒ to select AUTO and press EXECUTE

3 Press POWER to turn off the VCR.

The VCR receives the program information signal from 0:00 am to 5:00 am while the VCR is turned off, and set up the channel for VCR Plus+ recording. After channel setup is finished, you can record TV programs using VCR Plus+. For details, see page 48.

Notes

- To use auto VCR Plus+ channel setup feature, leave the cable box on.
- It takes about 1 hour to complete channel setup.
- The VCR can receive the program information signal only while the VCR is turned off and no timer recordings are set.
- If the channels in your area don't carry the program information signals, set the program guide channels manually. For details, see page 50.
- If the Choose your Cable CH MAP menu appears the first time you turn on the VCR after finishing channel setup, select the MAP number. For details, see page 49.

Automatic clock setting

Once you've set up the VCR, it automatically sets the clock the first time you turn off the VCR. After that, whenever you turn off the VCR, it checks the time and adjusts the clock, even for Daylight Saving Time. The VCR sets the clock by picking up a time signal provided by some TV channels.

If you want to use the timer to record right away, or if the channels in your area do not carry time signals, set the clock manually. For details, see pages 36 to 37.

Note

- To use the automatic clock setting feature, leave the cable box on.

Hookup 2 Pages 13 to 15

No cable box, or incompatible cable box with only a few scrambled channels

Recommended use

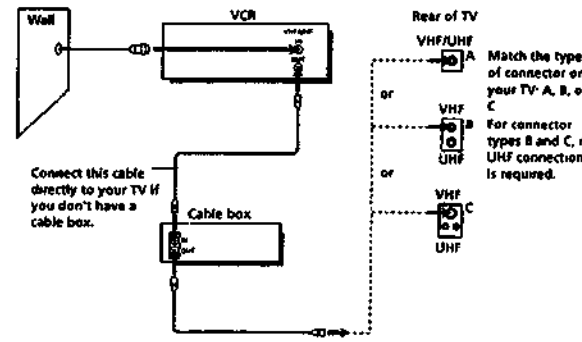
Use this hookup if you do not have a cable box. Also use this hookup if your cable company cannot supply a cable box that is compatible with the VCR's cable box control feature, and your cable system scrambles only a few channels.

What you can do with this hookup

- Record any unscrambled channel by selecting the channel on the VCR.

What you can't do

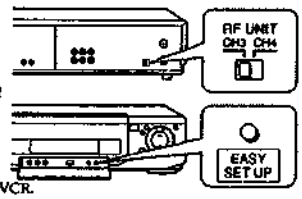
- Record scrambled channels that require a cable box.



continued

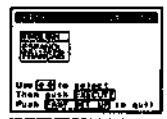
Hookup 2: VCR setup

1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel. For details, see page 78.
If you made A/V connections (from page 8), you can skip this step.

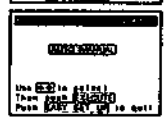


2 Press EASY SET UP on the VCR.

❶ The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press EXECUTE. For details, see page 31.

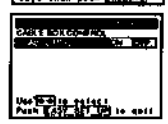


❷ The CLOCK SET menu appears. Select AUTO and press EXECUTE. For details, see page 32.

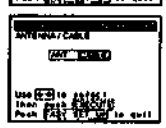


❸ The SMART CH MAPPING menu appears. Press CURSOR ↑/↓/⇐/⇒ to enter the ZIP CODE in your area and press EXECUTE. (You can also use the number buttons to enter the ZIP CODE.)

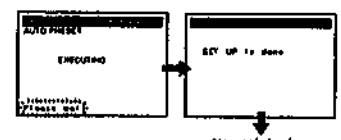
❹ The CABLE BOX menu appears. Select OFF and press EXECUTE. For details, see page 38.



❺ The TUNER PRESET menu appears. Set ANTENNA/CABLE to CABLE and press EXECUTE. For details, see page 43.



❻ The AUTO PRESET starts



Normal display

Hookup 2: VCR Plus+ channel setup

1 Press MENU and select SET VCR Plus+ CHANNELS

2 Press CURSOR ⇐/⇒ to select AUTO and press EXECUTE

3 Press POWER to turn off the VCR

The VCR receives the program information signal from 0:00 am to 5:00 am while the VCR is turned off, and set up the channel for VCR Plus+ recording. After channel setup is finished, you can record TV programs using VCR Plus+. For details, see page 48.

Notes

- It takes about 1 hour to complete channel setup.
- The VCR can receive the program information signal only while the VCR is turned off and no timer recordings are set.
- If the channels in your area don't carry the program information signals, set the program guide channels manually. For details, see page 50.
- If the Choose your Cable CH MAP menu appears the first time you turn on the VCR after finishing channel setup, select the MAP number. For details, see page 49.

Automatic clock setting

Once you've set up the VCR, it automatically sets the clock the first time you turn off the VCR. After that, whenever you turn off the VCR, it checks the time and adjusts the clock, even for Daylight Saving Time. The VCR sets the clock by picking up a time signal provided by some TV channels.

If you want to use the timer to record right away, or if the channels in your area do not carry time signals, set the clock manually. For details, see pages 36 to 37.

continued

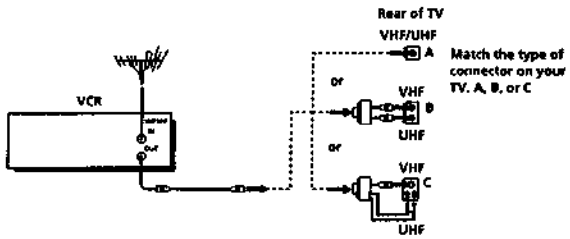
Hookup 3 Pages 16 to 18

Antenna hookup

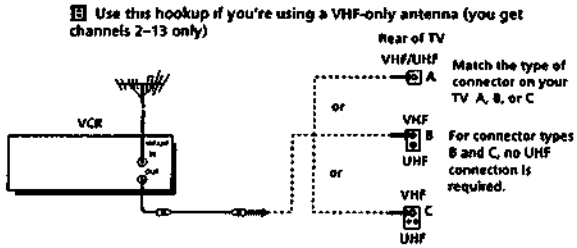
Make the following connections if you're using an antenna (if you don't have cable TV)

A Use this hookup if you're using:

- VHF/UHF antenna (you get channels 2–13 and channels 14 and higher)
- UHF-only antenna (you get channels 14 and higher)
- Separate VHF and UHF antennas



B Use this hookup if you're using a VHF-only antenna (you get channels 2–13 only)

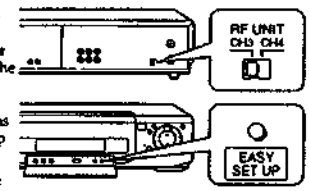


If you cannot connect your antenna cable to the VCR directly

If your antenna cable is a flat cable (300-ohm twin lead cable), attach an external antenna connector (not supplied) so you can connect the cable to the VHF/UHF IN connector. If you have separate cables for VHF and UHF antennas, you should use a U/V band mixer (not supplied). For details, see page 79.

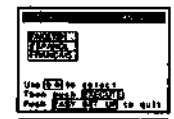
Hookup 3: VCR setup

1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel. For details, see page 78. If you made A/V connections (from page 8), you can skip this step.



2 Press EASY SET UP on the VCR.

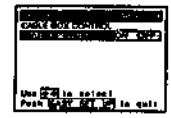
❶ The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press EXECUTE. For details, see page 31.



❷ The CLOCK SET menu appears. Select AUTO and press EXECUTE. For details, see page 32.

❸ The SMART CH MAPPING menu appears. Press CURSOR ↑/↓/←/→ to enter the ZIP CODE in your area and press EXECUTE. (You can also use the number buttons to enter the ZIP CODE.)

❹ The CABLE BOX menu appears. Select OFF and press EXECUTE. For details, see page 38.



❺ The TUNER PRESET menu appears. Set ANTENNA/CABLE to ANT and press EXECUTE. For details, see page 43.

continued

❻ The AUTO PRESET starts.

Normal display

Hookup 3: VCR Plus+ channel setup

1 Press MENU and select SET VCR Plus+ CHANNELS.

2 Press CURSOR ←/→ to select AUTO and press EXECUTE.

3 Press POWER to turn off the VCR.

The VCR receives the program information signal from 0:00 am to 5:00 am while the VCR is turned off, and set up the channel for VCR Plus+ recording. After channel setup is finished, you can record TV programs using VCR Plus+. For details, see page 48.

Notes

- It takes about 1 hour to complete channel setup.
- The VCR can receive the program information signal only while the VCR is turned off and no timer recordings are set.
- If the channels in your area don't carry the program information signals, set the program guide channels manually. For details, see page 50.
- If the Choose your Cable CH MAP menu appears the first time you turn on the VCR after finishing channel setup, select the MAP number. For details, see page 49.

Automatic clock setting

Once you've set up the VCR, it automatically sets the clock the first time you turn off the VCR. After that, whenever you turn off the VCR, it checks the time and adjusts the clock, even for Daylight Saving Time. The VCR sets the clock by picking up a time signal provided by some TV channels.

If you want to use the timer to record right away, or if the channels in your area do not carry time signals, set the clock manually. For details, see pages 36 to 37.

Hookup 4 Pages 19 to 22

Incompatible cable box with many scrambled channels

Recommended use

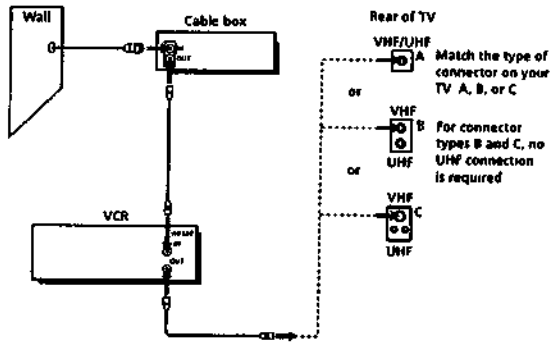
Use this hookup if your cable company cannot supply a cable box that is compatible with the VCR's cable box control feature, and your cable system scrambles all or most channels.

What you can do with this hookup

- Record any channel by selecting the channel on the cable box.

What you can't do

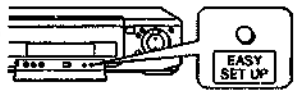
- Record with the cable box turned off
- Record one channel while watching another channel
- Select channels directly on the VCR



continued

Hookup 4: VCR setup

1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area If both are used, set the switch to either channel
For details, see page 78 If you made A/V connections (from page 8), you can skip this step



2 Turn on your cable box

3 Press EASY SET UP on the VCR.

❶ The LANGUAGE menu appears Change the on screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press EXECUTE For details, see page 31

❷ The CLOCK SET menu appears Select MANUAL and press EXECUTE For details, see page 32

❸ The SMART CH MAPPING menu appears Press CURSOR ↑/↓/←/→ to enter the ZIP CODE in your area and press EXECUTE (You can also use the number buttons to enter the ZIP CODE)

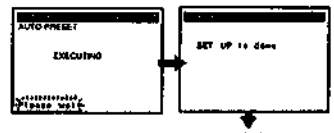
❺ The TUNER PRESET menu appears Set ANTENNA/CABLE to ANT and press EXECUTE For details, see page 43

❻ The AUTO PRESET starts



Normal display

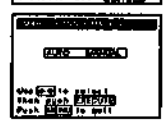
Hookup 4: VCR Plus+ channel setup

1 Find the VCR Plus+ Channel Listing in your program guide For details, see page 47

2 Enter all the channels you want to record and the cable box output channel (usually 2, 3, or 4). For details, see page 50

❶ Press MENU and select SET VCR Plus+ CHANNELS

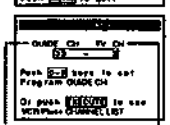
❷ Press CURSOR ←/→ to select MANUAL



❸ Enter the program guide channel, then the cable box output channel

❹ Press EXECUTE

❺ Press MENU



Program guide channel

Cable box output channel

continued

Automatic clock setting

To use the Auto Clock Set feature with this hookup, you need to manually select a channel that carries a time signal

1 Tune the cable box to a channel that carries a time signal

2 Select AUTO in the CLOCK SET menu to turn on the Auto Clock Set feature

3 Turn off the VCR It automatically sets the clock and adjusts for Daylight Saving Time by picking up the time signal

If you want to use the tuner to record right away, or if the channels in your area do not carry time signals, set the clock manually For details, see pages 36 to 37

Note

- To use the automatic clock setting feature, leave the cable box on

Hookup 5 Pages 23 to 25

DSS (Digital Satellite System) receiver

Recommended use

Use this hookup if you have a DSS receiver It allows the VCR's cable box control feature to control the channel on the DSS receiver, simplifying the recording process A list of compatible DSS receivers is on page 40

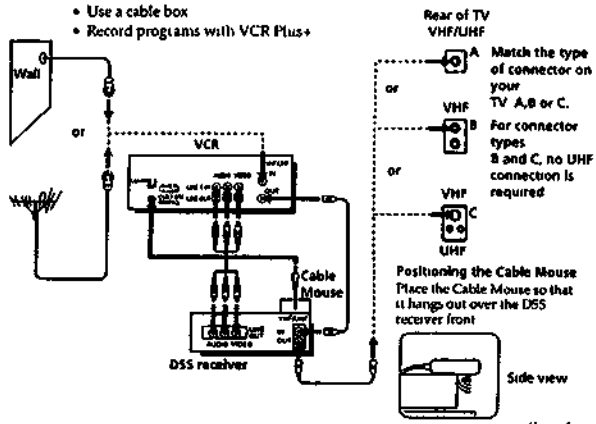
DSS (Digital Satellite System) is a satellite broadcast that provides superior digital-quality video and crisp digital-quality audio A variety of program packages are available through your program providers It also has program guides that are sorted by program categories

What you can do with this hookup

- Record any channels using the VCR's cable box control feature to select channels on the DSS receiver

What you can't do

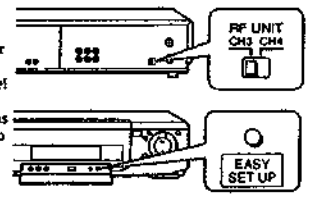
- Record with the DSS receiver turned off
- Record any channels from cable or an antenna
  (To record channels from cable or an antenna, turn off the cable box control feature)
- Use a cable box
- Record programs with VCR Plus+



continued

Hookup 5: VCR setup

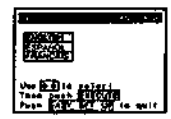
1 Set the RF UNIT switch to CH 3 or CH4, whichever channel is not used in your area If both are used, set the switch to either channel For details, see page 78 If you made A/V connections (from page 8), you can skip this step



2 Turn on your DSS receiver

3 Press EASY SET UP on the VCR

❶ The LANGUAGE menu appears Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press EXECUTE For details, see page 31



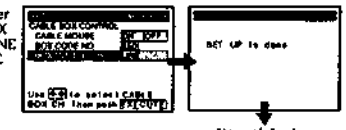
❷ The CLOCK SET menu appears Select AUTO and press EXECUTE For details, see page 32

❸ The SMART CH MAPPING menu appears Press CURSOR ↑/↓/←/→ to enter the ZIP CODE in your area and press EXECUTE (You can also use the number buttons to enter the ZIP CODE)

❹ The CABLE BOX menu appears Select ON For details, see page 38

❺ Enter your DSS receiver code number and press CURSOR↓ For details, see page 38

❻ Set your DSS receiver output channel (BOX OUTPUT CH) to LINE and press EXECUTE



Normal display

Automatic clock setting

Once you've set up the VCR, it automatically sets the clock the first time you turn off the VCR After that, whenever you turn off the VCR, it checks the time and adjusts the clock, even for Daylight Saving Time The VCR sets the clock by picking up a time signal provided by some TV channels

If you want to use the timer to record right away, or if the channels in your area do not carry time signals, set the clock manually For details, see pages 36 to 37

Note

- To successfully record a program from the DSS receiver, proceed as follows
  - Leave the DSS receiver on all the time
  - Turn off the display (menu screen, channel number, etc.) of the DSS receiver
  - To record or receive locked channels, unlock the channel before the VCR starts recording
  - To set pay-per-view programs in the timer setting, order the pay-per-view program before the VCR starts recording
  - Some programs are copy protected You cannot record these programs

continued

Hookup 6 Pages 26 to 30

Incompatible cable box with only a few scrambled channels, using an A/B switch

Recommended use

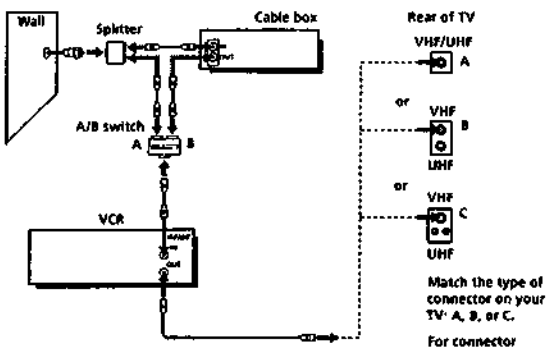
By using an A/B switch (not supplied), this hookup allows you to record both scrambled and unscrambled channels conveniently

What you can do with this hookup

- Record any unscrambled channel by selecting the channel directly on the VCR (the A/B switch is set to A)
- Record any scrambled channel by selecting the channel on the cable box (the A/B switch is set to B)

What you can't do

- Record one scrambled channel while watching another channel (the A/B switch is set to B)

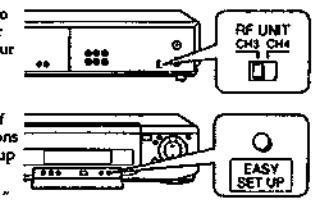


Match the type of connector on your TV: A, B, or C.

For connector types B and C, no UHF connection is required

Hookup 6: VCR setup

1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area If both are used, set the switch to either channel
For details, see page 78 If you made A/V connections (from page 8), you can skip this step

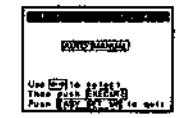


2 Set the A/B switch to "A"

3 Press EASY SET UP on the VCR

❶ The LANGUAGE menu appears Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press EXECUTE For details, see page 31

❷ The CLOCK SET menu appears Select AUTO and press EXECUTE For details, see page 32



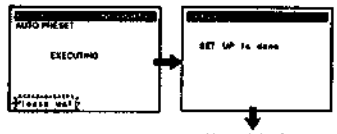
❸ The SMART CH MAPPING menu appears Press CURSOR ↑/↓/←/→ to enter the ZIP CODE in your area and press EXECUTE (You can also use the number buttons to enter the ZIP CODE)

❹ The CABLE BOX menu appears Select OFF and press EXECUTE For details, see page 38

continued

❸ The TUNER PRESET menu appears Set ANTENNA/CABLE to CABLE and press EXECUTE For details, see page 43

❹ The AUTO PRESET starts



Normal display

4 Preset the cable box output channel (usually 2, 3, or 4) For details, see page 38

❶ Press MENU and select TUNER PRESET

❷ Enter the cable box output channel Set MANUAL SET to ADD and press EXECUTE

Hookup 6: VCR Plus+ channel setup

1 Press MENU and select SET VCR Plus+ CHANNELS

2 Press CURSOR ⇐/⇒ to select AUTO and press EXECUTE

3 Press POWER to turn off the VCR

The VCR receives the program information signal from 0:00 am to 5:00 am while the VCR is turned off, and set up the channel for VCR Plus+ recording After channel setup is finished, you can record TV programs using VCR Plus+ For details, see page 48

Notes

- To use the smart channel mapping feature, set the A/B switch to A
- It takes about 1 hour to complete channel setup
- The VCR can receive the program information signal only while the VCR is turned off and no timer recordings are set
- If the channels in your area don't carry the program information signals, set the program guide channels manually For details, see page 50
- If the Choose your Cable CH MAP menu appears the first time you turn on the VCR after finishing channel setup, select the MAP number For details, see page 49

VCR Plus+ channel setup for scrambled channels

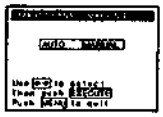
To set the program guide channels for scrambled channels, enter all the scrambled channels you want to record and the cable box output channel (usually 2, 3, or 4) after finishing smart channel mapping For details, see page 50

❶ Find the VCR Plus+ Channel Listing in your program guide For details, see page 47

❷ Press MENU and select SET VCR Plus+ CHANNELS, then press EXECUTE

continued

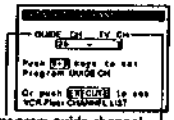
❺ Press CURSOR ⇐/⇒ to select MANUAL



❻ Enter the program guide channel, then the cable box output channel

❼ Press EXECUTE

❽ Press MENU



Program guide channel

Cable box output channel

Automatic clock setting

Once you've set up the VCR, it automatically sets the clock the first time you turn off the VCR. After that, whenever you turn off the VCR, it checks the time and adjusts the clock, even for Daylight Saving Time The VCR sets the clock by picking up a time signal provided by some TV channels

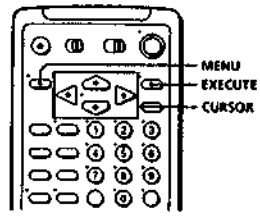
If you want to use the timer to record right away, or if the channels in your area do not carry time signals, set the clock manually For details, see pages 36 to 37

Note

- To use the automatic clock setting feature, set the A/B switch to A

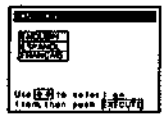
Selecting a language

You can change the on-screen display language



1 Press MENU, then press CURSOR ↑/↓ to move the cursor to LANGUAGE and press EXECUTE

When using the EASY SET UP procedure, skip this step



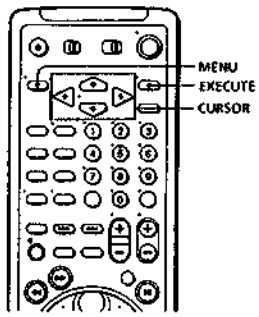
2 Press CURSOR ↑/↓ to select ENGLISH, ESPAÑOL, or FRANÇAIS, then press EXECUTE

Setting the clock

Using the Auto Clock Set feature

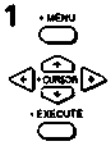
Some TV and cable channels transmit time signals with their broadcasts. Your VCR can pick up this time signal to automatically set the clock.

The Auto Clock Set feature works only if a channel in your area is broadcasting a time signal. If broadcasters in your area are not yet sending time signals, set the time manually (page 36).

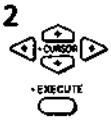


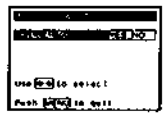
1 Press MENU, then press CURSOR ↑/↓ to move the cursor to CLOCK SET and press EXECUTE.

When using the EASY SET UP procedure, skip this step.

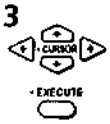


2 Press CURSOR ←/→ to select AUTO, then press EXECUTE.





3 Press CURSOR ←/→ to select YES, then press EXECUTE.



4 To activate the Auto Clock Set function, turn off the VCR.

The VCR automatically sets the clock by searching for a channel that carries a time signal and sets your time zone and Daylight Saving Time (if applicable).

If your clock is set to the wrong time zone or Daylight Saving Time, you can adjust these settings without turning off the Auto Clock Set feature (page 34).

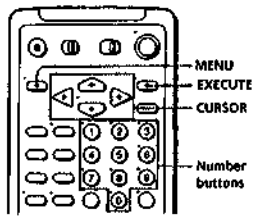
Notes

- The clock cannot be set automatically if you don't receive a channel that carries a time signal in your area. If so, set the clock manually.
- If there are only a few channels in your area that carry time signals, setting the clock automatically may take up to about 30 minutes. If nothing happens even after you wait about 30 minutes, set the clock manually.
- If you use Hookup 1 or Hookup 4, make sure you leave the cable box on.

continued

Setting the clock (continued)

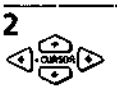
If the clock is not activated

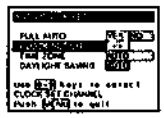


1 Follow steps 1 and 2 in "Using the Auto Clock Set feature."

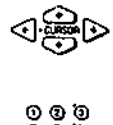
The AUTO CLOCK SET menu is displayed.

2 Press CURSOR ←/→ to select NO for FULL AUTO.





3 Press CURSOR ↑/↓ to highlight the item you want to set, then press CURSOR ←/→ to make the setting.



- For CLOCK SET CH

  Leave the setting to "– –" to have the VCR automatically search for a channel that carries a time signal.

  Press the number buttons to select a channel that carries a time signal.

  Use this option if you know of a channel that carries a time signal. Most PBS member stations broadcast a time signal. For the fastest response, select your local PBS station.

- For TIME ZONE

  Select the time zone of your area, or select AUTO to have the VCR automatically set your time zone.

  The options are AUTO → ATLANTIC → EASTERN → CENTRAL → MOUNTAIN → PACIFIC → ALASKA → HAWAII → AUTO.

- For DAYLIGHT SAVING

  Select ON or OFF (standard time), or AUTO to have the VCR automatically set the daylight saving time.

4 Press EXECUTE.

5 To activate the Auto Clock Set function, turn off the VCR.

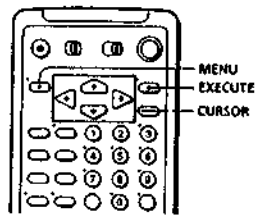
Note

- If you use both the cable box control feature and the Auto Clock Set feature, the VCR automatically changes channels on the cable box until a channel that carries a time signal is found, whenever you turn off the VCR.

  If you want to stop the search, change the channel on the cable box with the channel buttons either on the VCR or on the remote commander.

continued

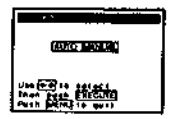
Using Manual Clock Set



1 MENU, CURSOR, EXECUTE

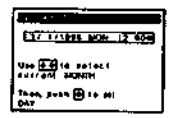
Press MENU, then press CURSOR ↑/↓ to move the cursor to CLOCK SET and press EXECUTE

When using the EASY SET UP procedure, skip this step



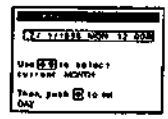
2 CURSOR

Press CURSOR ←/→ to select MANUAL, then press EXECUTE



3 CURSOR

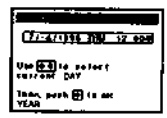
Press CURSOR ↑/↓ to set the month



4 CURSOR

Press CURSOR → to highlight the day and press CURSOR ↑/↓ to set the day

The day of the week is set automatically



5 CURSOR

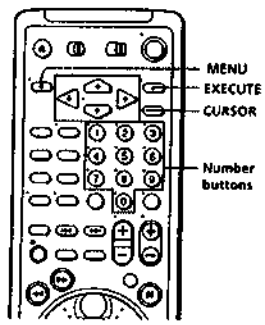
Set the year, hour and minutes in the same way as the day

6 EXECUTE

Press EXECUTE to start the clock

Setting up cable box control

(Skip this section if you are using Hookup 2, 3, 4, or 6.)



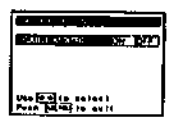
Your VCR includes a cable box control feature that allows the VCR to control most brands of cable boxes/DSS receivers via the Cable Mouse. With cable box control, the VCR controls channels on the cable box/DSS receiver for tuner recording. You can also use the VCR's remote commander to change channels on the cable box/DSS receiver whenever the cable box/DSS receiver is turned on even if the VCR is turned off. To use cable box control, you need to connect the Cable Mouse (pages 10 and 23) and set the code number and output channel.

This VCR is programmed with codes necessary to control channel selection on most brands of cable boxes at the time this VCR was manufactured. It is possible that new cable boxes may be introduced that cannot be controlled with this VCR's Cable Mouse. If you have a cable box that is incompatible with this VCR, contact your cable operator — they may be able to provide you with a compatible cable box.

1 MENU, CURSOR, EXECUTE

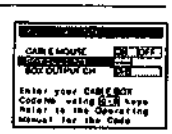
Press MENU, then press CURSOR ↑/↓ to move the cursor to CABLE BOX CONTROL and press EXECUTE

When using the EASY SET UP procedure, skip this step



2 CURSOR

Press CURSOR ←/→ to select ON, then press CURSOR ↓



3 Number buttons, CURSOR

Press the number buttons to enter the cable box/DSS receiver code number, then press CURSOR ↓

Find your cable box/DSS receiver code number from the chart below

4 CURSOR, EXECUTE

If you want to control a cable box, press CURSOR ←/→ to select the output channel for the cable box, then press EXECUTE

If you want to control a DSS receiver, select LINE, then press EXECUTE

Cable box and DSS receiver brand and the corresponding code numbers

If more than one code number is listed, try entering them one by one, until you come to the correct code for your equipment.

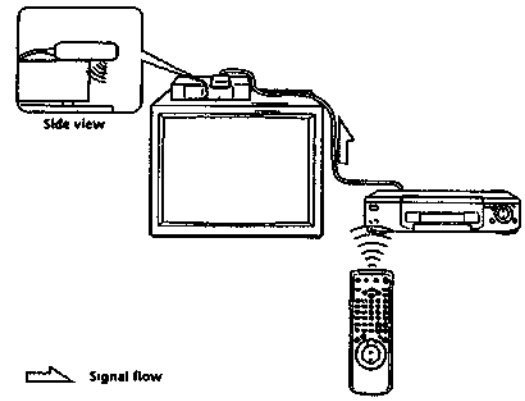
DSS receiver brand	Code numbers
Sony	650
RCA	577

To ensure correct operation

- Place the Cable Mouse so that it hangs out over the cable box/DSS receiver front
- Do not place the cable box/DSS receiver on top of the VCR
- Position the cable box/DSS receiver away from the VCR
- Point the remote commander at the VCR, not at the cable box/DSS receiver



To check the cable box control setting

1 Press CH +/– on the remote commander Does the channel indicator on the cable box/DSS receiver change? (Point the remote commander at the VCR, not at the cable box/DSS receiver)

2 Press all 10 number buttons (0 to 9) on the remote commander Does the channel indicator on the cable box/DSS receiver change?

If the answer to both 1 and 2 is "yes," you have made the correct setting

continued

If you cannot get your VCR to control the cable box/DSS receiver

- Check that the Cable Mouse is connected to the CABLE BOX CONTROL jack on the VCR.
- Check the position of the Cable Mouse
- Place the cable box/DSS receiver and VCR away from each other Do not place the cable box/DSS receiver on top of the VCR
- Try the setup again making sure to use the correct control code If the cable box still does not respond, try the other codes that are listed

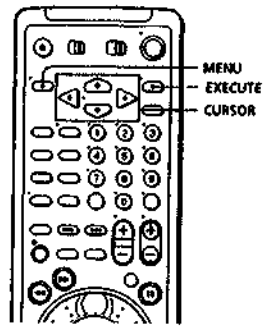
If your cable box still does not operate with the Cable Mouse, contact your cable company to see if they can provide you with a compatible cable box

Note

- Make sure you turn off the VCR when you plug in or unplug the Cable Mouse If you unplug the Cable Mouse and plug it in again, turn on the VCR before you use the cable box/DSS receiver control feature

Presetting channels

(Skip this section if you are using cable box/DSS receiver control.)



This VCR is capable of receiving VHF channels 2 to 13, UHF channels 14 to 69 and unscrambled CATV channels 1 to 125 First, we recommend that you preset the receivable channels in your area using automatic presetting Then, if there are any unwanted channels, disable them manually If you have decided which channels you wish to preset, set them directly using manual presetting

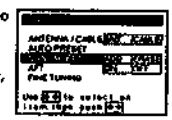
Before you start...

- Turn on the VCR and the TV
- Set the TV to the VCR channel (channel 3 or 4) If your TV is connected to the VCR using A/V connections, set the TV to video input
- Press TV/VTR to display the VTR indicator in the VCR's display window
- Press INPUT SELECT so that a channel number appears in the VCR's display window

Presetting all receivable channels automatically

1 
Press MENU, then press CURSOR ↑/↓ to move the cursor to TUNER PRESET and press EXECUTE

When using the EASY SET UP procedure, skip this step



continued

2

• To preset cable TV channels

Press CURSOR ⇐/⇒ to set ANTENNA/CABLE to CABLE

• To preset VHF and UHF channels

Press CURSOR ⇐/⇒ to set ANTENNA/CABLE to ANT

3

Press CURSOR ⇑/⇓ to select AUTO PRESET then press EXECUTE

All receivable channels are preset in numerical sequence. When no more receivable channels can be found, presetting stops and the picture from the lowest numbered channel is displayed on the TV screen.

Tip

• When receiving a VHF, UHF or CATV channel, the display changes as follows each time you press DISPLAY

Channel number, program name, and station's call letters (if the broadcaster sends those services)

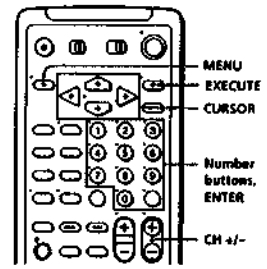
↓

Remaining tape length, and time counter

↓

No display

Presetting/disabling channels manually



1

Press MENU and select TUNER PRESET, then press EXECUTE

2

•To preset a channel

1 Press the number buttons to enter the channel number, then press ENTER

2 Press CURSOR ⇐/⇒ to set MANUAL SET to ADD

•To disable a channel

1 Press CH +/– to select the channel number

2 Press CURSOR ⇐/⇒ to set MANUAL SET to ERASE

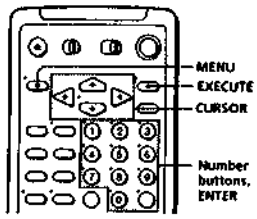
3

Repeat step 2 to preset or disable channels as required, then press EXECUTE

continued

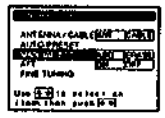
If the picture is not clear

Normally, the Auto Fine Tuning (AFT) function automatically tunes in channels clearly. If, however, the picture of a channel is not clear, you can also use the manual tuning function.



1

Press MENU and select TUNER PRESET, then press EXECUTE



2

Press the number buttons to select the channel you want to fine-tune, then press ENTER

3

Press CURSOR ⇑/⇓ to select FINE TUNING

The fine tuning meter appears.

4

Press CURSOR ⇐/⇒ to adjust to a clearer picture

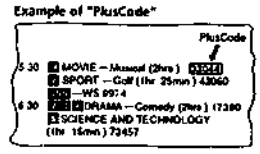
Note that the AFT setting switches to OFF.

Setting up VCR Plus+

How VCR Plus+ works

Whenever you want to record a TV program, all you need to do is look up the program's "PlusCode," a number assigned to each program published in the TV section of most newspapers, cable TV listings, and even *TV GUIDE* magazine. Then, just enter the PlusCode of the program you want and the VCR is automatically programmed to record that show. It's that simple.

Example of "PlusCode"



How to set up your VCR

Setting up your VCR involves coordinating the TV channel number (the number you turn to on your TV or VCR to watch a program) with the guide channel (the number that's assigned to that channel in your program guide).

The VCR can set the guide channels automatically (see page 48), but you may have to set the guide channels manually depending on your area or the way you hooked up your VCR (see page 50).

To find the guide channel numbers, look at the "Channel Line-up Chart" in the program guide for your area that features VCR PlusCodes. It usually looks like the example to the right.

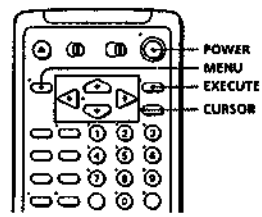
Example of "Channel Line-up Chart"

CABLE CH	CABLE TV	VCR Plus+ GUIDE CH
16	AMC American Movie Classics	35
17	BRAV Bravo (program guid only)	54
20	CNN Cable News Network	42
21	CSPN C SPAN	28
22	DISN The Disney Channel	53
23	DSC The Discovery Channel	37
24	ESPN ESPN	34
25	FAM The Family Channel	47
5	HOME Home Shot Office	33
27	LIFE Lifetime	46
28	CNN Headline News	45
30	MTV Music Television	48
31	NICK Nickelodeon	38
32	SPN Sports Channel	50
33	SPN2 Sports Channel America	70
45	SHO Showtime	41
17	TBS TBS SuperStation	43
44	TMC The Movie Channel	58
49	TNN The Nashville Network	40
50	TNT Turner Network Television	57
51	USA USA Network	44

continued

Setting up VCR Plus+ automatically (Smart Channel Mapping)

The VCR can automatically set the guide channels in your area from ZIP CODE you entered in EASY SET UP The VCR receives the program information signal and renews the data everyday after you complete the following procedure



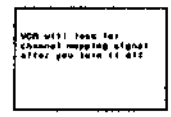
1 Set up the VCR using the EASY SET UP function

2 MENU, CURSOR, EXECUTE

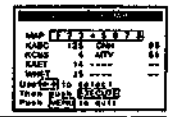
Press MENU, then press CURSOR ↑/↓ to move the cursor to SET VCR Plus+ CHANNELS and press EXECUTE The SMART CHANNEL MAPPING menu appears

3 CURSOR, EXECUTE

Press CURSOR ←/→ to select AUTO and press EXECUTE The instruction shown on the right appears on the TV screen for few seconds, then the screen returns to the normal display



If the program information signal in your area has several channel map patterns, the Choose your Cable CH MAP menu appears, and you must select the channel map See "To select the channel map" on the next page



4 POWER

Press POWER to turn off the VCR

The VCR sets the program guide channels from 0 00 am to 5 00 am while the VCR is turned off (It takes about 1 hour to complete channel mapping)

To select the channel map

If the program information signal in your area has several channel map patterns (up to 8), the Choose your Cable CH MAP menu appears

- the first time you turn on the VCR after completing channel mapping
- after selecting AUTO and pressing EXECUTE on the SMART CHANNEL MAPPING menu

In this case, you have to select the channel map on the Choose your Cable CH MAP menu

1 Find the VCR Plus+ Channel Listing in your program guide For details, see page 47

2 Press CURSOR ←/→ to select the channel map number you want by checking the guide channel number in the program guide

3 Press EXECUTE

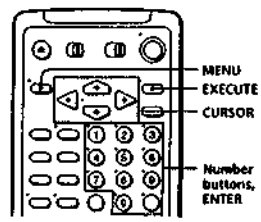
Notes

- It takes about 1 hour to complete channel mapping
- The VCR can receive the program information signal only while the VCR is turned off and no timer recordings are set
- The VCR cannot set the guide channels correctly unless you enter the ZIP CODE in your area
- When you move to a different area, you must set up the VCR again and enter your new ZIP CODE in the EASY SET UP procedure

continued

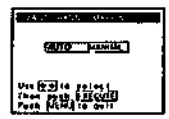
Setting up VCR Plus+ manually

To set the guide channels manually, use the Channel Line-up Chart to check that the guide channel numbers match the TV channel your VCR receives For example, if HBO is listed in the Channel Line-up Chart on channel 33, and your VCR receives HBO on channel 5, you need to coordinate these numbers using the following procedure If the guide and TV channel numbers are the same, you can skip this procedure



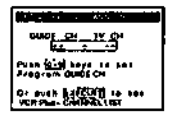
1 MENU, CURSOR, EXECUTE

Press MENU, then press CURSOR ↑/↓ to move the cursor to SET VCR Plus+ CHANNELS and press EXECUTE



2 CURSOR, EXECUTE

Press CURSOR ←/→ to select MANUAL and press EXECUTE

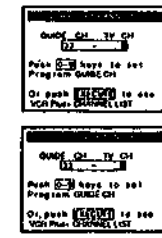


3 0–9, ENTER

Enter the guide channel number assigned in the program guide and press ENTER

4 ENTER

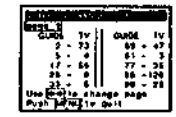
- If you made Hookup 1, 2, or 3 Enter the actual number on your TV (and VCR) and press ENTER
- If you made Hookup 4 Enter the cable output channel (usually 2, 3, or 4) and press ENTER
- If you made Hookup 6 Enter the actual number on your TV (and VCR) for an unscrambled channel and press ENTER For a scrambled channel, enter the cable box output channel (usually 2, 3, or 4) and press ENTER



5 Repeat steps 3 and 4 for each guide channel number that doesn't match

6 EXECUTE

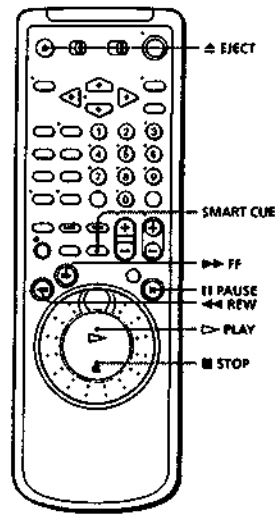
When you have set all channels, press EXECUTE to confirm your channel settings



7 MENU

After all settings are complete, press MENU to exit

Playing a tape



1 Turn on your TV and set it to the video channel

2 Open the drop down panel and insert a tape

The VCR turns on and starts playing automatically if you insert a tape with its safety tab removed

3 PLAY ▷ Press ▷ PLAY

When the tape reaches the end, it will rewind automatically

Additional tasks

To	Press
Stop play	■ STOP
Pause play	II PAUSE
Resume play after pause	II PAUSE or ▷ PLAY
Search forward	▶▶ FF during playback
Search backward	◀◀ RLW during playback
Fast forward the tape	▶▶ FF during stop
Rewind the tape	◀◀ REW during stop
Eject the tape	⏏ EJECT

To skip playback

You can skip a portion of playback you don't want to watch such as a commercial and restart playback by pressing a single button

1 Press SMART CUE during playback of the scene you want to skip The VCR starts searching

2 Press SMART CUE again when you find the scene you want to watch The VCR stops searching, rewinds a few seconds, then resumes normal playback

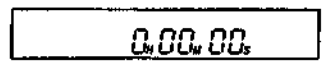
If you press and hold SMART CUE while the VCR is skip searching, the VCR will stop searching, and continue rewinding until you release SMART CUE

Tip

- You can change the length of rewinding time on the ADVANCED OPTION menu See page 72

To use the time counter

At the point on the tape that you want to find later, press COUNTER RESET The counter in the display window resets to "0H00M00S " Search for the point afterwards by referring to the counter

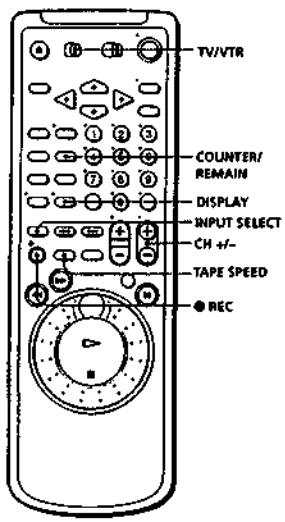


To display the counter on the TV screen, press DISPLAY

Notes

- Tapes recorded in the LP mode on other VCRs can be played back on this VCR but the picture quality cannot be guaranteed
- The counter resets to "0H00M00S" whenever a tape is reinserted
- The counter stops counting when it comes to a portion with no recording

Recording TV programs

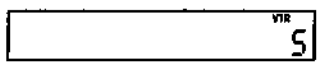


1 Turn on your TV and set it to the video channel

To record from a cable box, turn it on

2 Insert a tape with its safety tab in place

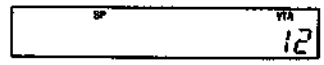
3 INPUT SELECT Press INPUT SELECT until a channel number appears in the display window



4 +CH Press CH +/– to select the channel you want to record

5 TAPE SPEED Press TAPE SPEED to select the tape speed, SP or EP

EP provides recording time three times as long as SP, however, SP produces better picture quality



6 ●REC Press ● REC to start recording

To stop recording

Press ■ STOP

To check the remaining tape length

Press DISPLAY The white bar indicates the approximate length of tape remaining With the display on, press COUNTER/REMAIN to check the remaining time Each time you press COUNTER/REMAIN, the time counter and the remaining time appear alternately The remaining time also appears in the display window

To check the remaining time of a tape more than two hours long, set TAPE SELECT in the ADVANCED OPTIONS menu to "~160 " (For details, see page 72)

To watch another TV program while recording

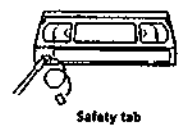
1 Press TV/VTR to turn off the VTR indicator in the display window

2 If the TV is connected to the VCR's LINE OUT jacks, set the TV to TV input, if not, skip this step

3 Select another channel on the TV

To save a recording

To prevent accidental erasure, break off the safety tab as illustrated To record on a tape again, cover the tab hole with adhesive tape



Safety tab

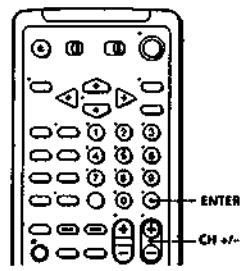
continued

Tips
- To select a channel, you can use the number buttons on the remote commander Enter the channel number, then press ENTER
- You can select a video source form the LINE-1 IN or LINE-2 IN jacks using INPUT SELECT
- The display appears on the TV screen indicating information about the tape, but the information won't be recorded on the tape
- If you don't want to watch TV while recording, you can turn off the TV When using a cable box, make sure to leave it on

Notes
- The remaining time may not be indicated accurately for short tapes such as T-20 or T-30 or tapes recorded in the LP mode
- The display does not appear during still (pause) mode or slow-motion playback
- It may take up to one minute for the VCR to calculate and display the remaining time after you press DISPLAY

Locating a channel by station ID

You can select the TV program from station ID



1 Turn on your TV and set it to the video channel
To record from a cable box, turn it on

2 ENTER Press ENTER
The station ID appears on the TV screen

The selected station ID

3 +CH Press CH +/– to select the station ID you want

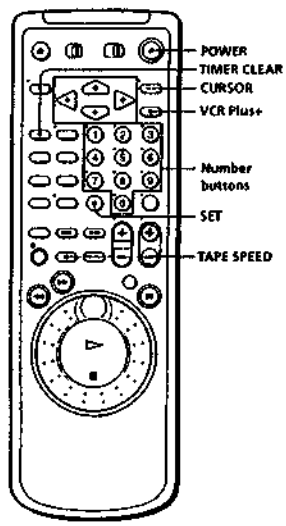
4 ENTER Press ENTER

Note
- If the TV channel has no station ID, the channel number appears on the TV screen

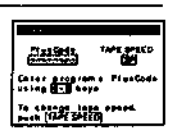
Recording TV programs using VCR Plus+

Just enter the program's PlusCode listed in the TV program guide The date, times and channel number of that program are set automatically You can preset up to eight programs at a time

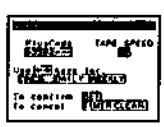
Before you start...
- Check that the VCR clock is set to the correct time
- Turn on your TV and set it to the video channel When using a cable box, turn it on
- Insert a tape with its safety tab in place Make sure the tape is longer than the total recording time



1 +VCR Plus+ Press VCR Plus+



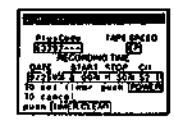
2 ⓪ ① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ Press the number buttons to enter the program's PlusCode
If you make a mistake, press TIMER CLEAR and re-enter the correct number



3 TAPE SPEED Press TAPE SPEED to select SP or EP

4 CURSOR ←/→, SET Select ONCE, DAILY, or WEEKLY by using CURSOR ←/→, then press SET

To record	Select
Only once	ONCE
Everyday Monday to Friday	DAILY
Once a week	WEEKLY



TIMER CLEAR The date, start and stop times, channel number and tape speed appear on the TV screen If the information is not correct, press TIMER CLEAR to cancel the setting

5 To enter another setting, repeat steps 1 to 4

6 POWER Press POWER to turn off the VCR
The TIMER indicator on the VCR lights up and the VCR stands by for recording When using a cable box, leave it on

To stop recording
To stop the VCR while recording, press ■ STOP

To use the VCR after setting the timer
To use the VCR before a timer recording begins, just press POWER The "TIMER" indicator turns off and the VCR switches on Remember to press POWER to reset the VCR to timer recording standby after using the VCR

You can also do the following tasks while the VCR is recording
- Reset the counter
- Display tape information on the TV screen
- Check the timer settings
- Watch another TV program

continued

To lock the VCR after setting the timer (Child Lock)

Hold down POWER on the VCR until the VCR beeps. The VCR turns off and the "LOC" appears in the display window. The VCR will not work except for timer recording.

To unlock the VCR, hold down POWER on the VCR until the VCR beeps.

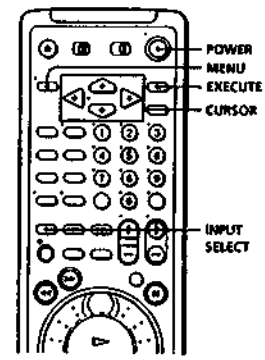
Tips

- To cancel the procedure, press VCR Plus+ before pressing SET.
- When you are recording a program in the SP mode and the remaining tape becomes shorter than the recording time, the tape speed is automatically changed to the EP mode. Note that some noises will appear on the picture when the tape speed is changed. If you want to keep the tape speed, set AUTO TAPE SPEED to OFF in the ADVANCED OPTIONS menu (page 72).

Notes

- If the VCR beeps, this means that
  - the PlusCode is incorrect.
  - ONCE, DAILY, or WEEKLY was selected incorrectly. You cannot select DAILY or WEEKLY for a program that airs more than seven days ahead.
- The VCR will be unlocked when
  - you stop timer recording by pressing ■ STOP.
  - you insert a tape.
  - the AC power cord is disconnected or power supply stops.

Setting the timer manually



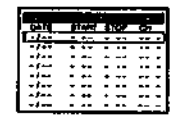
If VCR Plus+ is not available in your area, follow the instructions below to set the timer to record programs.

Before you start ..

- Check that the VCR clock is set to the correct time.
- Turn on your TV and set it to the video channel. When using a cable box, turn it on.
- Insert a tape with its safety tab in place. Make sure the tape is longer than the total recording time.

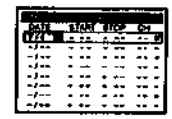
1 • MENU

Press MENU and select TIMER SET/CHECK.



2

Set the date, start and stop times, channel number and tape speed.



1 Press CURSOR ➡ to highlight each item in turn.
2 Press CURSOR ↓/↑ to set each item.

To correct a setting, press CURSOR ⬅ to return to that setting and reset.

To record the same program every day or the same day every week, press CURSOR ↓ while the date is highlighting. For details, see "Daily/weekly recording" on the next page.

• INPUT SELECT

To record from a source connected to the LINE-1 IN or LINE-2 IN jacks, press INPUT SELECT to display "L1" or "L2" in the "CH" position.

continued

3 • CURSOR

Press CURSOR ➡ to confirm the setting.

The cursor appears at the beginning of the line. To enter another setting, move the cursor to the next line and repeat step 2.

4 • EXECUTE

Press EXECUTE.

5 • POWER

Press POWER to turn off the VCR.

The TIMER indicator on the VCR lights up and the VCR stands by for recording.

When using a cable box, leave it on.

Daily/weekly recording

In step 2 above, press CURSOR ↓ to select the recording pattern. Each time you press CURSOR ↓, the indication changes as shown below. Press CURSOR ↑ to change the indication in reverse order.

the current date → SUN-SAT → MON-SAT → MON-FRI → EVERY SAT → EVERY MON → EVERY SUN → 1 month later → (cycles backward) → the current date

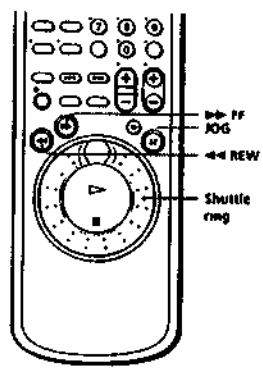
Tips

- To set the channel, you can also use the CH +/– or number buttons.
- To set the tape speed, you can also use TAPE SPEED.
- When you are recording a program in the SP mode and the remaining tape becomes shorter than the recording time, the tape speed is automatically changed to the LP mode. Note that some noises will appear on the picture when the tape speed is changed. If you want to keep the tape speed, set AUTO TAPE SPEED to OFF in the ADVANCED OPTIONS menu (page 72).
- To lock the VCR after setting the timer, see page 60.

Note

- If you are using cable box control, you cannot select "L1" or "L2."

Playing/searching at various speeds



Using the remote commander

Playback options	Operation
Fast-forward/rewind	During stop, press ▶▶ FF or ◀◀ REW.
View the picture during fast-forward or rewind	During fast forward, hold ▶▶ FF down. During rewind, hold ◀◀ REW down.
Rewind and start play	During stop, hold ◀◀ REW on the VCR, and press ▷ PLAY on the VCR.

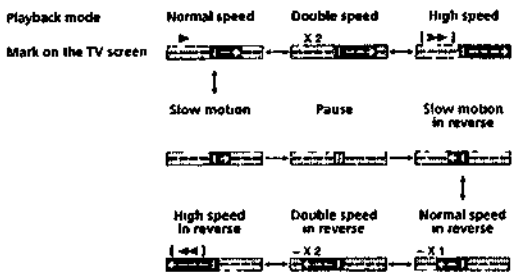
continued

Using the Shuttle ring

With the Shuttle ring, you can operate a variety of playback options. There are two ways for using the Shuttle ring, normal mode and jog mode.

To use the Shuttle ring in normal mode

During playback or pause, turn the Shuttle ring clockwise or counterclockwise. Each change in the Shuttle ring position changes the playback mode, and the corresponding mark appears on the TV screen for a few seconds in the following way if the on-screen display function is on.



To use the Shuttle ring in jog mode

Use this mode for fram-by-fram playback.

Press JOG to enter the jog mode. The JOG button lights up. If you change to the jog mode during any playback mode, the playback pauses so you can see a still picture. Each change in the Shuttle ring position shifts the picture one frame. To shift frames in reverse, turn the Shuttle ring counterclockwise. The frame shift speed depends on the speed you turn the Shuttle ring. To resume normal playback, press JOG again. The JOG indicator goes off.

To resume normal playback

Press ▷ PLAY.

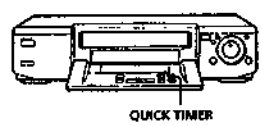
Tip

- Adjust the picture using the TRACKING +/– buttons if
  - Streaks appear while playing in slow motion.
  - Bands appear at the top or bottom while pausing.
  - The picture shakes while pausing.

Notes

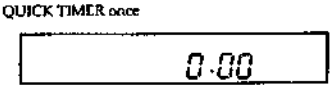
- The sound is muted during these operations.
- Tapes recorded in the LP mode on other VCRs can be played back on this VCR but the picture quality cannot be guaranteed.
- If the playback mode mark doesn't appear on the TV screen, press DISPLAY.

Recording TV programs using the quick timer



After starting recording in the normal way, you can have the VCR stop recording automatically after a specified duration.

1 While recording, press QUICK TIMER once.



2 Press QUICK TIMER repeatedly to set the duration.

Each press advances the time in increments of 30 minutes.

The duration decreases minute by minute to 0:00, then the VCR stops recording and turns off automatically.

To check or extend the duration

Press QUICK TIMER once. The duration is displayed for 10 seconds. If you want to extend the time, press QUICK TIMER within 10 seconds to set to the new duration.

To stop while recording

Press ■ STOP.

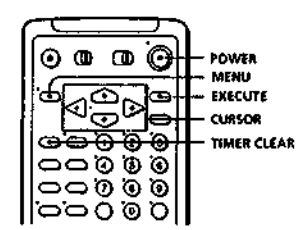
Using the quick timer during stop mode

1 Press QUICK TIMER.

2 Press CH +/– or INPUT SELECT to select the channel you want to record.

3 Press QUICK TIMER repeatedly to set the recording duration. The recording starts.

Checking/ changing/ cancelling timer settings

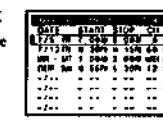


Before you start ..

- Turn on your TV and set it to the video channel.

1 Press POWER to turn on the VCR.

2 Press MENU and select TIMER SET/CHECK.



- If you want to change a setting, go on to the next step.
- If you do not need to change the settings, press EXECUTE, then turn off the VCR to return to recording standby.

3 Press CURSOR ↓/↑ to select the setting you want to change.

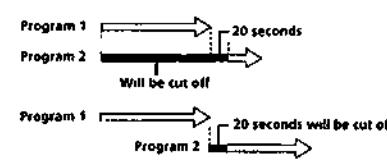
- To change the setting, press CURSOR ←/→ to highlight the item you want to change, and press CURSOR ↓/↑ to reset it. Then, press CURSOR → repeatedly until the cursor appears at the beginning of the line.
- To cancel the setting, press TIMER CLEAR.

4 Press EXECUTE.

If any timer settings remain, turn off the VCR to return to recording standby.

When the timer settings overlap

The program that starts first has priority and the second program starts recording only after the first program has finished. If the programs start at the same time, the program listed first in the menu has priority.



Recording stereo and bilingual programs

Recording stereo programs

This VCR automatically receives and records stereo programs. When a stereo program is received, the STEREO indicator lights up. If there is noise in the stereo program, set AUTO STEREO in the ADVANCED OPTIONS menu to OFF. The sound will be recorded in monaural (on both hi-fi and normal audio tracks) but with less noise. For details, see page 72.

Recording bilingual programs

Normally, this VCR records only the main sound. When a SAP (Second Audio Program) is received, the SAP indicator lights up. To record only SAP sound, set TUNER AUDIO in the ADVANCED OPTIONS menu to SAP. For details, see page 72.

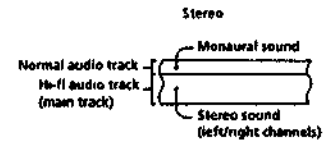
Selecting the sound during playback

Press AUDIO MONITOR to select the sound you want.

To listen to	On-screen display	Display window
Stereo/main (left and right channels)	STEREO	STEREO
Left channel only	LEFT CH	STEREO
Right channel only	RIGHT CH	STEREO
Monaural	No indicator	No indicator

How sound is recorded on a video tape

The VCR records sound onto two separate tracks. Hi-fi audio is recorded onto the main track along with the picture. Monaural sound is recorded onto the normal audio track along the edge of the tape.

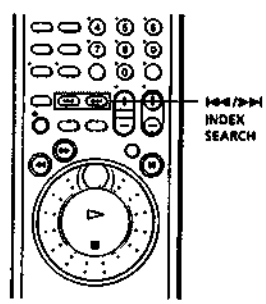


Notes

- To play a tape in stereo, you must use the A/V connections.
- When you play a tape recorded in monaural, the sound is heard in monaural regardless of the AUDIO MONITOR setting.
- If the AUDIO MONITOR button does not function, check that AUDIO MIX in the ADVANCED OPTIONS menu is set to OFF.

Searching using the index function

The VCR marks the tape with an index signal at the point where each recording begins. Use these signals as references to find a specific recording. The VCR can search up to 99 index signals ahead of or behind the current position.



1 Insert an indexed tape into the VCR.

2 Press ⏮/⏭ INDEX SEARCH repeatedly to specify how many index signals ahead or behind you want to search.

- To search ahead, press ⏭ INDEX SEARCH.
- To search backwards, press ⏮ INDEX SEARCH.

The VCR starts searching and the index number on the TV screen counts down to zero. Playback starts automatically from that point.

To stop searching

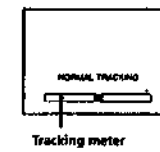
Press ■ STOP.

Adjusting the picture

Adjusting the tracking

Although the VCR automatically adjusts the tracking when playing a tape (the tracking indicator flashes in the display window, then goes off), distortion may occur if the tape was recorded in poor condition. In this case, manually adjust the tracking.

Press the TRACKING +/– buttons to display the tracking meter. The distortion should disappear as you press one of the two buttons (the indicator lights up). To resume automatic tracking adjustment, eject the tape and reinsert it.



Tracking meter

About Adaptive Picture Control (APC)

Adaptive Picture Control (APC) automatically improves recording and playback quality by adjusting the VCR to the condition of the video heads and tape. To maintain better picture quality, we recommend that you set APC to ON in the ADVANCED OPTIONS menu (with the APC indicator in the display window lit). For details, see page 72.

APC playback

The APC function automatically works on all types of tapes, including rental tapes and tapes that were not recorded with APC.

APC recording

Whenever you insert a tape and first start recording, the VCR adjusts to the tape using the APC function (the APC indicator flashes rapidly). This adjustment is retained until the tape is ejected.

Notes

- Auto tracking adjustment cannot be used on tapes recorded in the LP mode on other VCRs.
- The APC function does not work if the tape speed is automatically changed from the SP to EP mode during a timer recording, unless the tape has been recorded in the EP mode with the APC function.
- There is a delay of a few seconds before the VCR actually starts recording while the VCR analyzes the tape. To avoid the delay, first set the VCR to recording pause (the APC indicator flashes slowly) and press ● REC to have the VCR analyze the tape (the APC indicator flashes rapidly). After the APC indicator stops flashing, press II PAUSE to start recording immediately.

  If you want to start recording quickly without using the APC function, first set the VCR to recording pause (the APC indicator flashes slowly) and press II PAUSE to start recording.

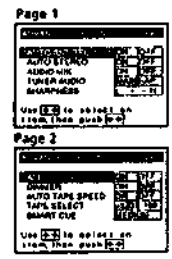
Changing menu options

1 Press MENU and select ADVANCED OPTIONS

2 Press CURSOR ↑/↓ to select the option to change, then press CURSOR ←/→ to change the setting

The ADVANCED OPTION menu has 2 pages. To select page 2, press CURSOR ↓ repeatedly until page 2 appears. To select page 1, press CURSOR ↑ repeatedly until page 1 appears.

3 Press EXECUTE to return to the original screen.



Menu choices

Initial settings are indicated in bold print.

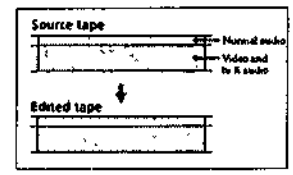
Menu option	Set this option to
AUTO ANT S&L	**ON** if your TV is connected only to VHF/UHF OUT on the VCR. To play a tape, set the TV to the VCR channel (channel 3 or 4). **OFF** if your TV is connected to both VHF/UHF OUT and LINE OUT on the VCR. To play a tape, set the TV to the VCR input.
AUTO STEREO	**ON** to receive stereo programs, OFF to reduce noise. The sound changes to monaural.
AUDIO MIX	**ON** to listen to the sound recorded on hi-fi and normal audio tracks at the same time. The AUDIO MONITOR button will not function. **OFF** to listen to hi-fi and normal audio tracks separately. Select the sound using the AUDIO MONITOR button.
TUNER AUDIO	**MAIN** to record the main sound on both hi-fi and normal audio tracks. SAP to record the SAP (Second Audio Program) sound on both hi-fi and normal audio tracks.
SHARPNESS	L (Low) through H (High) to adjust the sharpness of the picture. L to turn off the sharpness control.
APC	**ON** to switch on the APC (Adaptive Picture Control) function and improve picture quality, OFF to switch off APC.
DIMMER	**ON** to make the display window dim, OFF to make it brighter.
AUTO TAPE SPEED	**ON** to change the timer recording tape speed automatically to the EP mode when the remaining tape becomes shorter than the recording time, OFF to keep the tape speed.
TAPE SELECT	"~120" or "~160" to select the tape length and display the remaining time correctly.
SMART CUE	**MEDIUM** to set the automatic rewinding time on skip playback to a medium length, SHORT to set to short, LONG to set to long.

Editing methods

This section introduces you to various ways to edit tape recordings.

Basic editing

You can make a copy of a tape.



Insert editing

You can replace an existing scene with material from another recording. There are three kinds of insert editing.

Video insert

Replaces the original video and hi-fi audio. The monaural sound on the normal audio track is retained.

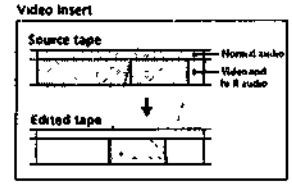
Audio insert

Replaces the original monaural sound on the normal audio track. The video and hi-fi sound are left intact. For example, you can use this feature to add commentary to a tape recorded on a camcorder.

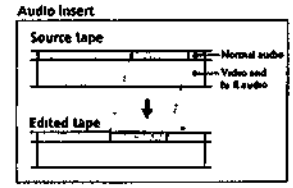
A/V insert

Replaces the original video and both hi-fi and monaural sound.

Video Insert

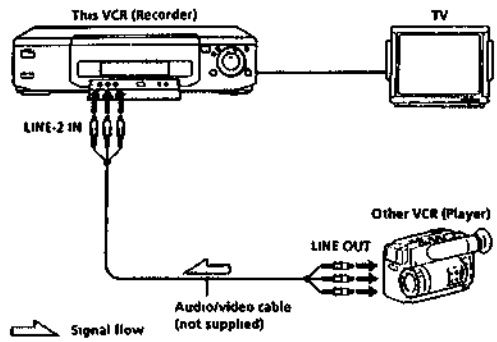


Audio Insert



Hooking up to a VCR or stereo system

How to hook up to record on this VCR



How to hook up to a stereo system

Connect LINE-2 IN AUDIO on this VCR to the audio output jacks on the stereo system, using the RK-C510KS audio cable (not supplied).

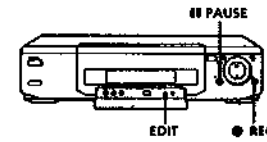
If the other VCR has a CONTROL S OUT jack for synchronized editing

Hook up to record on the other VCR, then connect the VCRs via the CONTROL S jacks. The CONTROL S connection lets you control (pause and release pause) both VCRs from the recording VCR.

Notes

- Make sure you connect the plugs to jacks of the same color.
- If the other VCR is a monaural type, leave the red plugs unconnected.
- If you connected this VCR to both the LINE IN and LINE OUT jacks of the other VCR, select the input correctly to prevent a humming noise.
- If the CONTROL S IN jack is used for S-Link™ (A/V bus control) with a TV, the CONTROL S connection cannot be used for editing.

Basic editing
(when recording on this VCR)



Before you start editing

- Turn on your TV and set it to the video channel.
- Press INPUT SELECT to display "L2" in the display window.
- Press TAPE SPEED on the remote commander to select the tape speed, SP or EP.
- On this VCR, press EDIT to display "EDIT" in the display window. If the other VCR has a similar button, press it to activate edit function.

1 Insert a source tape with its safety tab removed into the other (playback) VCR. Search for the point to start playback and set it to playback pause.

2 Insert a tape into this (recording) VCR. Search for the point to start recording and press II PAUSE.

3 Press ● REC on this VCR and set it to recording pause.

4 To start editing, press the II PAUSE buttons on both VCRs at the same time.

To stop editing

Press the ■ STOP buttons on both VCRs.

Tips

- To edit more precisely, press the II PAUSE buttons on the VCRs to release pause.
- To cut out unwanted scenes while editing, press II PAUSE on this VCR when an unwanted scene begins. When it ends, press II PAUSE again to resume recording (Assemble Editing).

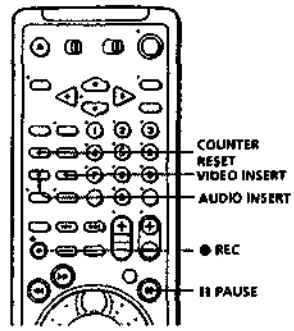
Note

- If you start recording following the procedure above, the VCR won't start recording with the APC function. To record a tape with the APC function, press ● REC again during recording pause in step 3 so that the VCR analyzes the tape. Then when you start recording in step 4, press II PAUSE immediately after the APC indicator stops flashing. If you press II PAUSE before the APC indicator stops flashing, the APC function is canceled.

Insert editing

Before you start editing

- Turn on your TV and set it to the video channel
- Press INPUT SELECT to display "L1" in the display window
- Press TAPE SPEED on the remote commander to select the tape speed, SP or EP
- On this VCR, press EDIT to display "EDIT" in the display window If the other VCR has a similar switch, set it to ON as well



1 Insert a source tape into the playback VCR or the stereo system Search for the point to start playback and set it to playback pause

2 Insert a prerecorded tape into this (recording) VCR Search for the end of the scene to be replaced and press II PAUSE

3 Press COUNTER RESET on this VCR to reset the counter to "0H00M00S"

4 Rewind the prerecorded tape to the beginning of the scene to be replaced

The VCR pauses.

5 Press the INSERT buttons

To replace	Press
Picture and hi-fi sound	VIDEO INSERT "VID INS II" appears on the TV screen and "V INSERT" appears in the display window
Monaural sound only	AUDIO INSERT "A INSERT" appears in the display window
Picture, hi-fi and monaural sound	AUDIO INSERT, then VIDEO INSERT "A/V INS II" appears on the TV screen and "AV INSERT" appears in the display window

6 To start editing, press the II PAUSE buttons on this VCR and the other VCR (or stereo system) at the same time

To stop editing

Press the ■ STOP buttons on this VCR and the other VCR (or stereo system)

To listen to both the hi-fi and normal audio

Set AUDIO MIX to ON in the ADVANCED OPTIONS menu (page 72) Use this feature to listen to inserted audio together with the original hi-fi audio When AUDIO MIX is set to ON, the AUDIO MONITOR button does not function Remember to reset AUDIO MIX to OFF after playing the tape

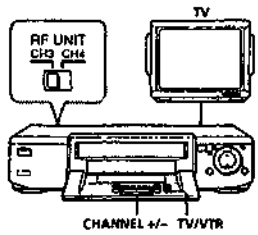
Note

- To use the INSERT function, this VCR must be set to playback pause, not recording pause

General setup information

Setting the RF unit

When connecting the VCR to the TV using only the antenna cable, you must set the RF UNIT switch on the rear of the VCR so that the TV can receive the correct signal from the VCR



1 Set the RF UNIT switch on the rear of the VCR to CH3 or CH4, whichever channel is not used in your area If both are used, set the switch to either channel

2 Press POWER to turn on the VCR

3 Press TV/VTR to turn on the VTR indicator in the VCR's display window

4 Press CHANNEL +/− to display a channel number in the display window Select an active channel number in your area

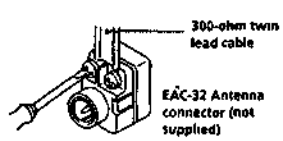
5 Turn on your TV and set it to the channel you selected in step 1 (channel 3 or 4)

The selected TV channel broadcast appears on the TV screen If the channels change when you press CHANNEL +/− on the VCR, you have made the correct setting

Whenever you use the VCR, set the TV to the channel selected in step 1

Attaching the external antenna connector

When using a 300-ohm twin lead cable for VHF/UHF antenna, use the EAC-32 antenna connector (not supplied) to connect the antenna to the VCR



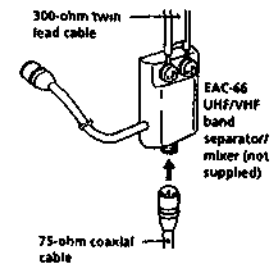
1 Loosen the screws on the antenna connector

2 Wind the twin leads around the screws on the antenna connector

3 Retighten the screws

Attaching a UHF/VHF band mixer

When using both 75-ohm coaxial cable and 300-ohm twin lead cable for VHF / UHF antenna, use the EAC-66 UHF/VHF band separator/mixer (not supplied) to connect the antenna to the VCR



1 Loosen the screws on the mixer

2 Wind the twin leads around the screws on the mixer

3 Retighten the screws

4 Connect the 75-ohm coaxial cable to the mixer

5-6. SERVO/SYSTEM CONTROL MICROPROCESSOR PIN FUNCTION (MA-290 BOARD IC161 CXP-87852-014Q)

Pin No.	Pin name	I/O	Function
1	RF SWP	O	RF switching pulse output
2	AF REC P	O	Hi-Fi record pulse output
3	N C	–	Not used
4	Q VD	O	Quasi VD pulse output
5	N C	–	Not used
6	FE ON	O	Flying erase ON/OFF
7	REC CTL	O	REC CTL signal output
8	N C	–	Not used
9	CAM1	O	CAM motor control 1
10	CAM2	O	CAM motor control 2
11	TA MUTE	O	Tuner audio mute output
12	N C	–	Not used (Low)
13	NT JUDGE	I	NTSC judgement input
14	MESECAM	I	MESECAM judgement input
15	REC PRF	I	Erasing protection tab, cassette IN detection input
16	RENTAL	I/O	YNR control
17	N C	O	Not used
18	N C	–	Not used
19	MODE 4	I	Mechanism section CAM encoder input
20	MODE 3	I	Mechanism section CAM encoder input
21	MODE 2	I	Mechanism section CAM encoder input
22	MODE 1	I	Mechanism section CAM encoder input
23	TV/VTR	O	"L" when VTR mode "H" when TV mode
24	N C	–	Not used
25	N C	–	Not used
26	CBC ON	O	Cable box control on
27	N C	I	Not used
28	SDA	I	IIC data line (VIDEO, Hi-Fi)
29	N C	I	Not used
30	SCL	I	IIC clock line (VIDEO, Hi-Fi)
31	A MUTE	O	AUDIO mute output
32	T/E LED	O	T/E LED output
33	N C	–	Not used
34	N C	–	Not used
35	CAP STOP	O	Capstan STOP signal output
36	FULL ERS	O	Full erase control
37	N C	O	Not used
38	N C	O	Not used
39	MP	I	Fixed to L
40	ASURA RESET	I	System reset input
41	VSS	–	GND
42	XTAL	–	System clock 16 MHz
43	EXTAL	–	System clock 16 MHz
44	ASURA CS	I	S/S microcomputer chip select signal
45	S IN 0	I	Serial communication signal
46	S OUT 0	O	Serial communication signal
47	SCLK	O	Serial communication signal
48	NICOL ON	O	S-LINK on
49	F MONO	O	Tuner Audio Select
50	N C	–	Not used

Pin No.	Pin name	I/O	Function
51	N C	–	Not used
52	AVSS	–	UNSW GND
53	AVREF	–	AD port reference input UNSW 5V
54	AVDD	–	UNSW 5V
55	NTPB SW	I	NTSC PB switch input
56	VA ADJ	I	Hi-Fi/RF switching adjustment mode
57	N C	I	Not used
58	N C	I	Not used
59	AF ENV	I	Hi-Fi audio playback signal envelope
60	RF ENV	I	Video playback signal envelope
61	T SENS	I	Take up end sensor input
62	S SENS	I	Supply end sensor input
63	S REEL FG	I	S side reel FG input
64	T REEL FG	I	T side reel FG input
65	N C	–	Not used
66	V SYNC	I	Composite sync input
67	PB CTL	I	Playback CTL input
68	DRM PG	I	Drum PG input
69	DRM FG	I	Drum FG input
70	CAP FG	I	Capstan FG input
71	N C	–	Not used
72	CAP RVS	O	Capstan reverse control H when Reverse
73	CAP DA	O	Capstan error D/A output
74	DRUM DA	O	Drum PG input
75	CTL REC	O	"H" CTL write
76	CTL STEP	O	CTL amp, STEP operation control
77	REC COUNT	I	5V Record count input (Hi)
78	CLK	I	Clock (HI)
79	CTL INDEX	O	CTL INDEX signal input
80	SO1	I/O	Signal for serial communication
81	SCLK1	I/O	Signal for serial communication
82	N C	–	Not used
83	N C	–	Not used
84	CAP TRQ PWM	O	Capstan TRQ PWM output
85	N C	–	Not used
86	N C	–	Not used
87	N C	–	Not used
88	VSS	–	GND
89	VDD	–	5V
90	N C		Not used
91	N C	–	Not used
92	N C	–	Not used
93	SP	O	Tape speed Select
94	DSF	O	Picture improvement control
95	N C	–	Not used
96	AF REC	O	"H" output when hi-fi audio REC
97	N C	–	Not used
98	N C	–	Not used
99	STEP PLS	O	Step pulse H when Capstan step driving
100	AF SWP	O	AF switching pulse output

5-7. TUNER/TIMER MODE CONTROL PIN FUNCTION (MA-290 BOARD IC181 CXP82960-016Q)

Pin. No.	Pin Name	I/O	Function
1	N C	–	Not used
2	POWER FAIL	I	Power failure detect signal input
3	H DET	I	Video signal detect signal input
4	SIRCS IN	I	SIRCS signal input
5	STEREO DET	I	STEREO detection
6	SIRCS OUT	O	SIRCS signal output
7	BUZZER	O	Buzzer output
8	N C	–	Not used
9	N C	–	Not used
10	SCK0	O	Clock for serial communication
11	SI0	I	Serial data input
12	SO0	O	Serial data output
13	N C	–	Not used
14	LANC IN	I	LANC input
15	LANCE OUT	O	LANC output
16	A/D0	I	Key reading A/D input
17	A/D1	I	Key reading A/D input
18	A/D2	I	Key reading A/D input
19	A/D3	I	Key reading A/D input
20	A/D4	I	Key reading A/D input
21	A/D5	I	Key reading A/D input
22	N C	–	Not used
23	AFT	I	AFT input
24	AVDD	–	UNSW 5V
25	AV REF	–	AD port reference input UNSW 5V
26	SCL0	O	I²C BUS (clock)
27	CG $\overline{CS}$	O	Character generator chip select signal
28	SDA0	O	I²C BUS (data)
29	LED $\overline{CS}$	O	LED driver chip select signal
30	AVSS	–	UNSW GND
31	EXTAL	–	System clock Not used
32	XTAL	–	
33	VSS	–	GND
34	$\overline{RST}$	I	Reset signal in
35	PLL CLK	O	Tuner clock signal
36	PLL DATA	O	Tuner data signal
37	PLL ENABLE	O	Tuner enable signal
38	MAIN/$\overline{SAP}$	O	Normal audio MAIN/SAP select control
39	SAP	I	MAIN/SAP judge input
40	V $\overline{SET}$ $\overline{CS}$	O	XDS data decoder chip select

Pin. No.	Pin Name	I/O	Function
41	DMS 1	I	DMS 1 input
42	DMS 2	I	DMS 2 input
43	VFDP	–	–30V
44-62	SEG 1-19	O	LCD segment output
63	N C	–	Not used
64	N C	–	Not used
65	N C	–	Not used
66-71	GRID 6-1	O	LCD grid output
72	VDD	–	UNSW 5V
73	TX	–	Connected to oscillator for clock
74	TEX	–	
75	NC/VPP	–	Connect to +5V
76	ASURA $\overline{CS}$	O	S/S microcomputer chip select
77	$\overline{SYS\ RESET}$	O	System reset signal output
78	POWER CONT 1	O	Power supply control signal output
79	POWER CONT 2	O	Power supply control signal output for EDS
80	CG V	I	Vertical sync signal input

71	N C	–	Not used
72	BUZZER	O	Buzzer output
73	SIRCS OUT	O	SIRCS signal output
74	MAIN/SAP	O	Normal audio MAIN/SAP select input
75	P FAIL	I	Power failure detection input
76	NICOLE ON	O	S-LINK on
77	CAP ERR	O	Capstan error output
78	DURM ERR	O	Drum error output
79	S REEL	I	Supply reel sensor input
80	T REEL	I	Take-up reel sensor input
81	N C	–	Not used
82	CHECK	I	Check signal input
83	N C	–	Not used
84	C SYNC	I	Composite sync input
85	CAP FG	I	Capstan FG input
86	DURM PG	I	Drum PG input
87	DURM FG	I	Drum FG input
88	AMP VSS	–	CTL amplifier GND
89	AMP VREF OUT	O	CTL amplifier
90	AMP VPEF IN	I	CTL amplifier
91	CTL IN–	I/O	CTL singal (–) input/output
92	CTL IN+	I/O	CTL singal (+) input/output
93	CTL SW OUT	O	CTL switch output
94	CTL AMP IN	I	CTL amplifier input
95	AMPC	I	CTL amplifier
96	CTL VSS	–	CTL amplifier GND
97	CTL AMP OUT	O	CTL amplifier output
98	AMP VCC	–	CTL amplifier 5V
99	A VCC	–	Analog 5V
100	N C	–	Not used

SECTION 6
ADJUSTMENTS

During the adjustment, see the Parts Arrangement Diagram for Adjustment on page 6-8.

6-1. MECHANICAL ADJUSTMENTS

Refer to the SERVICE MANUAL of VHS MECHANICAL ADJUSTMENT IV.

6-2. ELECTRICAL ADJUSTMENTS

2-1. PRE-ADJUSTMENT PREPARATIONS

Necessary items and indications for total adjustment of electric circuit of this machine will be described in this chapter

2-1-1. Instruments to be Used.

1) Color TV
2) Oscilloscope 1or 2 phenomena, band more than 30 MHz, deley mode, as provided.
3) Frequency counter (min 8 digits)
4) NTSC pattern generator
5) Digital voltmeter
6) Audio level meter
7) Audio generator
8) Modulation Analyzer
9) Distortion factor meter
10) Attenuator
11) Alignmeter tape
    Part Code. 8-192-605-32 (KRV-51N2)
13) Extension cable (13P)
    Part code J-6090-054-A
    RP-218/220 (CN260) ↔ DRUM

2-1-2. Connection

Unless otherwise specified, connect and adjust the measuring instruments as shown in the following diagram.

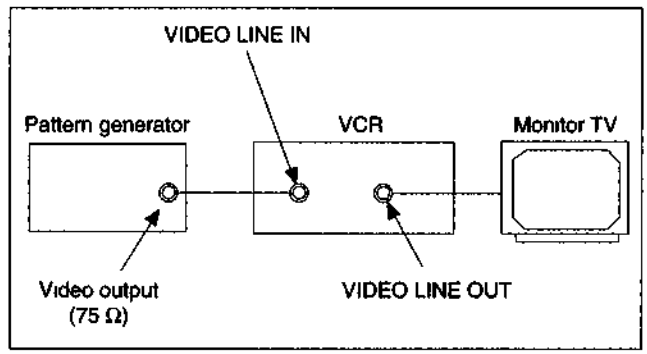

Fig. 6-2-1

2-1-3. Set-up of Adjutment

In this adjustment, NTSC pattern generator is connected with LINE input signal terminal. When check to tuner, connected AERIAL terminal. Check that the amplitudes of video signal NTSC signal, of picture portions, and of burst signals are flat at approximately 0.3, 0.7 and 0.3 V, respectively, and that the level ratio of the burst signal and "red" signal are 0.30: 0 66. Fig. 6-2-2. shows video signals (color bars) used in adjusting the video section.

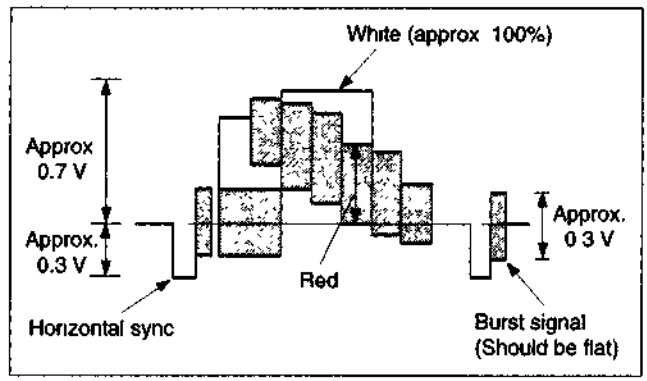

Fig. 6-2-2.

2-1-4. Alignment Tape
[Alignment Tape (KRV-51N2)]

	Mode	Time	Video signal	Audio signal (HiFi/Normal)
1	SP	Seven minutes	Color bar	400 Hz
2		Three minutes	Monoscope	400 Hz
3	EP	Seven minutes	Color bar	400 Hz
4		Three minutes	Monoscope	—

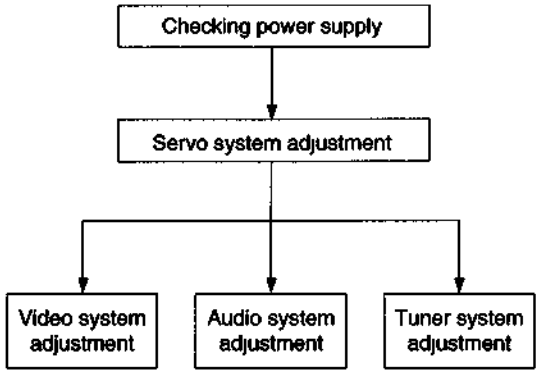
2-1-5. Specified I/O Level and Impedance

Input/output terminal

Video inputs	LINE IN : phono jack
	1 Vp-p, 75 Ω, unbalanced, sync negative
Audio inputs	LINE IN : phono jacks
	47 kΩ, –7.5 dBs (0 dBs = 0.775 Vrms)
	More than 10 kΩ, ± 4 dBs
Video outputs	LINE OUT : phono jack
	1 Vp-p, 75 Ω, unbalanced, sync negative
Audio outputs	LINE OUT : phono jacks
	–7.5 dBs at load impedance 47 kΩ
	Output impedance : less than 10 Ω

2-1-6. Adjusting Sequence

Make the electrical adjustment in the following sequence.



2-2. POWER SUPPLY ADJUSTMENT

2-2-1. Power Supply Check (SR-800/802 BOARD)

Mode	E-E
Measuring Instrument	Digital voltmeter
+F, –F check	
Measurement Point	Pin ④ (+), ①(–) of CN201
Specified Value	4 6 ± 1 Vdc
–30 V check	
Measurement Point	Pin ② of , CN201
Specified Value	–29 ± 3 Vdc
D6 V check	
Measurement Point	Pin ⑤ of CN201
Specified Value	5 9 ± 0 5 V
SW12 V	
Measurement Point	Pin ⑧ of CN201
Specified Value	12 ± 1 Vdc
MTR12 V check	
Measurement Point	Pin ⑫ of CN201
Specified Value	13.2 ± 1 Vdc
+38 V check	
Measurement Point	Pin ⑯ of CN201
Specified Value	38.0 ± 3 Vdc
SW5 V check	
Measurement Point	Pin ⑰ of CN201
Specified Value	5 ± 0.5 Vdc

Checking Method:

1) Confirm that each voltage meets its specified value.

2-2-2. D6V Adjustment (SR-800/802 BOARD)

Mode	REC or PB
Measuring Instrument	Digital voltmeter
Measurement Point	Pin ⑤ of CN201
Adjusting Element	RV201
Specified Value	5.9 ± 0.5 V

2-3. SERVO SYSTEM Adjustment

2-3-1. Switching Position Adjustment (MA-290/292, RP-218/220 Board)

Purpose:

Adjust the interval between A ch and B ch of tape playback output. Improve the interchangeability with other tapes and sets.
When it is out of order, the interval appears on the screen, the screen is disturbed.

Mode	PB
Signal	Alignment tape SP mode color bar
Measurement Point	CH1: VIDEO LINE OUT CH2: Pin ③ of CN261 (RP-218/220 board) (RF SWP)
Measuring Instrument	Oscilloscope
Specified Value	6.5 ± 0.5 H (410 ± 32μsec)

Adjusting Method:

1) Connect MA-290 board SWP ADJ TP to the GND for about 1 second to activate the RF switching position adjustment mode.: MA-290 Board
   Connect HI-50 board JS430 to the GND for about 1 secont to activate the RF switching position adjustment mode.. MA-292 Board
2) Check appear "Adj-rf" on FL display.: MA-290 Board
   Check appear "A" on FL display.. MA-292 Board
3) Using the channel + and – buttons, adjust to 410 ± 32 μsec (6.5 ± 0.5 H).

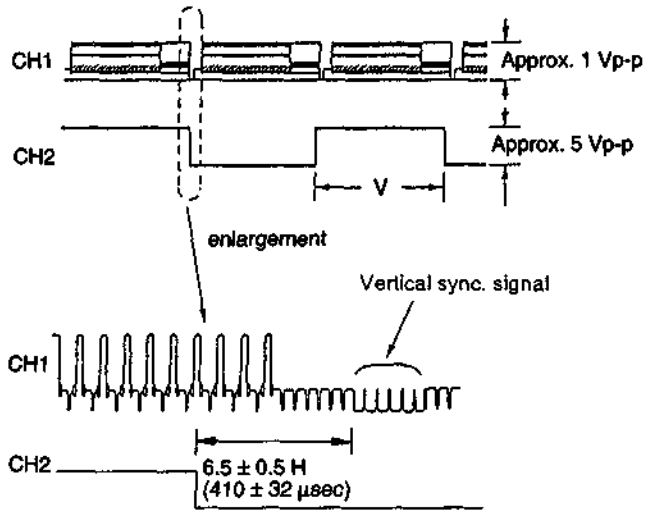


Fig. 6-2-3.

2-4. VIDEO SYSTEM ADJUSTMENT

Adjust the video system in the following sequence as a rule. The color video signal supplied from the pattern generator is used as a video input signal for video system adjustment in the recording mode.
Make sure that sync. and color burst signals meet requirements specified at set up of adjustment shown in Fig. 6-2-1.

[Adjustment Sequence]

2-4-1. Recording Y Signal Level Check
2-4-2. White Clip, Dark Clip Check
2-4-3. Playback Y Signal Level Check
2-4-4. Recording Chroma Level Check
2-4-5. Sync. AGC Check
2-4-6. X'tal Oscillation Frequency Check

2-4-1. Recording Y Signal Level Check (MA-290/292 Board)

Purpose:

Check the brightness signal level after passing through the V/C separating circuit.

Mode	E-E
Signal	Color bar
Measurement point	Pin ㊷ IC201
Measurement equipment	Oscilloscope
Specified value	320 ± 50 mVp-p

Confirmation Method:

1) Confirm that the record Y level is 320 ± 50 mVp-p.

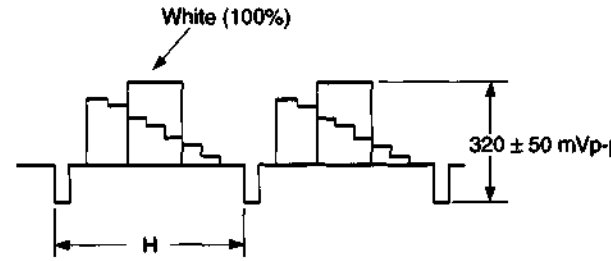

Fig. 6-2-4.

2-4-2. White Clip, Dark Clip Check (MA-290/292 Board)

Purpose:

Confirm that no overshoot is generated by the pre-emphasis circuit. If shifted, the signals are overmodulated, thus causing a noise in the images.

Mode	E-E
Signal	Color bar
Measurement point	Pin ㊲ of IC201
Measurement equipment	Oscilloscope
Specified value	White clip: 190 ± 15% Dark clip: 50 ± 10%

Confirmation Method:

1) Confirm that the white clip is 190 ± 15%, on condition that the level between white and sync. is 100%.
2) Confirm that the dark clip is 50 ± 10%, on condition that the level between white and sync. is 100%

Fig. 6-2-5.

2-4-3. Playback Y Signal Level Check (MA-290/292 Board)

Purpose:

Confirm that the playback Y signal level is correct.

Mode	PB
Signal	Alignment tape SP color bar
Measurement point	Pin ㊳ IC201
Measurement equipment	Oscilloscope
Specified value	2.10 ± 0.18 Vp-p

Note: Make this adjustment with the EDIT switch turned off. (MA-290 Board)

Confirmation Method:

1) Confirm that the play Y level is 2.10 ± 0.18 Vp-p.

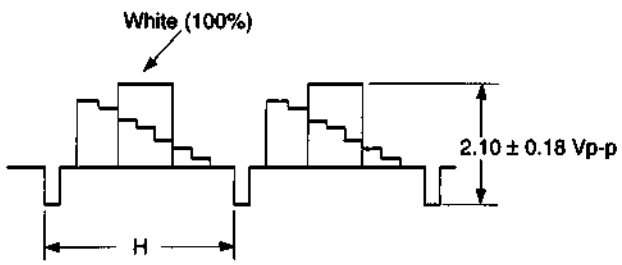

Fig. 6-2-6.

2-4-4. Recording Chroma Level Check (MA-290/292 Board)

Purpose:

Check the chroma signal level after passing through the Y/C separating circuit.
If shifted, the image is roughened and another color may appear on the edges.

Mode	E-E
Signal	Color bar
Measurement point	Pin ⑭ of IC201
Measurement equipment	Oscilloscope
Specified value	380 ± 40 mVp-p

Confirmation Method:

1) Confirm that the record chroma level is 380 ± 40 mVp-p.

Fig. 6-2-7.

2-4-5. Sync. AGC Check (MA-290/292 Board)

Purpose:

Confirm that the video level is correct.

Mode	E-E
Signal	Color bar
Measurement point	Pin ㊳ IC201
Measurement equipment	Oscilloscope
Specified value	2.10 ± 0.14 Vp-p

Note: Video output terminal must be terminated at 75 Ω.

Confirmation Method:

1) Confirm that the sync. AGC level is 2.10 ± 0 14 Vp-p.

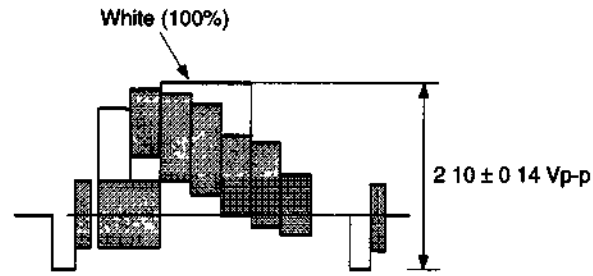

Fig. 6-2-8.

2-4-6. X'tal Oscillation Frequency Check (MA-290/292)

Purpose:

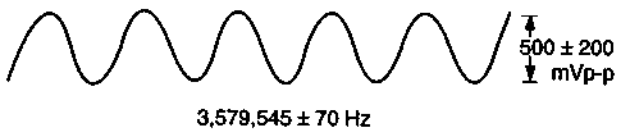
Confirm that the fsc is correct.

Mode	PB
Signal	Alignment tape SP color bar
Measurement point	Pin ⑯ of IC201
Measurement equipment	Frequency counter, Oscilloscope
Specified value	3,579,545 ± 70 Hz

Note: connect the frequency counter through a probe of high input impedance (about 10 MΩ) and low capacity (10 pF or less).

Confirmation Method:

1) Confirm that the frequency is 3,579,545 ± 70 Hz
2) Confirm that the amplitude is 500 ± 200 mVp-p.



3,579,545 ± 70 Hz

Fig. 6-2-9.

2-5. AUDIO SYSTEM ADJUSTMENTS

- Adjust both Lch and Rch.

[Connection]

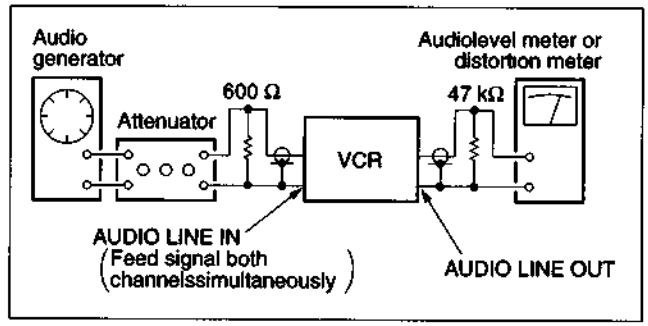


Fig. 6-2-10.

2-5-1. Hi-Fi Audio System Adjustment

- Set switches and knobs to the following positions to make adjustment unless otherwise specified
  INPUT SELECT switch ..... LINE
  AUDIO MONITOR ..... STEREO

1. AF Switching Position Adjustment (MA-290/292 Board)

Purpose:

Adjust the interval between A CH and B CH of tape playback output. Improve the interchangeability with other tapes and sets. When it is out of order, noisy sound is increased and big noise is heard.

Mode	PB
Signal	Alignment tape SP mode color bar
Measurement point	CH1. Pin ③ of CN261 (RP-218/220 Board) CH2: Pin ① of CN341 (RP-218/220 Board)
Measuring Instrument	Oscilloscope
Specified Value	Fig 6-2-11

Adjusting Method:

1) Connect MA-290 board SWP ADJ TP to the GND for about 1 second to activate the RF switching position adjustment mode..
   MA-290 Board
   Connect HI-50 board JS430 to the GND for about 1 secont to activate the RF switching position adjustment mode.: MA-292 Board
2) Press the record button to activate the AF switching position adjustment mode.
3) Check appear "Adj-HF" on FL display.: MA-290 Board
   Check appear "A" on FL display.: MA-292 Board
4) Using the channels + and – buttons, minimize a chipped portion. At this time, confirm that a noisy sound is not heard.

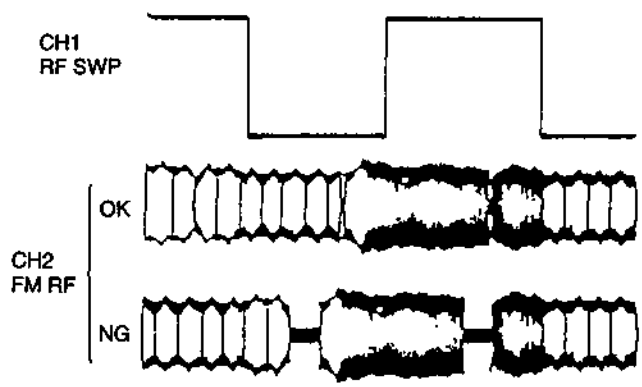

Fig. 6-2-11.

2-5-2. Normal Audio System Adjustment

- Make adjustment in the SP mode, unless otherwise specified. Use a normal VHS cassette for an adjustment tape.
- Set AUDIO MONITOR to normal.

[Adjustment Sequence]

1. **ACE Head Adjustment**
2. **E-E Output Level Check**
3. **Recording Bias Adjustment**
4. **Overall Level Characteristic and Distortion Factor Check**
5. **Overall S/N Check**

1. ACE Head Adjustment
Refer to the service manual of VHS MECHANICAL ADJUSTMENT IV.

2. E-E Output Level Check (MA-290/292 Board)
Purpose:
Confirm that the output level against the reference input is within the specification.

Mode	E-E
Signal	L, R: 400 Hz, –7.5 dBs
Measurement point	Audio output terminal
Measurement equipment	Audio level meter
Specified value	–7.5 ± 2 dBs

Confirmation Method:
1) Simultaneously input a signal of 400 Hz, –7.5 dBs to both L and R channels of Audio Line Input.
2) Confirm that the audio output level is –7.5 ± 2 dBs.

3. Recording Bias Check (MA-290/292 Board)
Purpose:
Confirm that the frequency characteristic is within the specification.

Mode	REC and PB (SP mode)
Signal	400 Hz, –27.5 dBs 7 kHz, –27.5 dBs
Measurement point	Audio output terminal
Measurement equipment	Audio level meter
Specified value	0 ± 3 dB

Note: Tape path adjustment must have been completed.

Confirmation Method:
1) Supply a signal of 400 Hz, –27.5 dBs to both L and R channels of Audio Line Input.
2) Connect the audio level meter to the Audio Line Output.
3) Adjust the attenuator so that the audio level meter will indicate –27.5 dBs.
4) Make recording in the SP mode.
5) Set an audio line input signal to 7 kHz and make recording.
6) Playback a recorded portion, and measure output levels at 400 Hz and 7 kHz.
7) Confirm that the 7 kHz playback output level within a range of the 400 Hz playback output level 0 ± 1 dB.

4. Overall Level Characteristic and Distortion Factor Check
Purpose:
Check the record level, play level, and distortion factor against the reference input.

Mode	REC and PB (SP mode)
Signal	400 Hz, –7.5 dBs
Measurement point	Audio output terminal
Measurement equipment	Audio level meter and distortion factor meter
Specified value	Playback level. –7.5 ± 3 dBs Distortion factor: 4% or less

Confirmation Method:
1) Supply an audio signal of 400 Hz, –7.5 dBs simultaneously to both L and R channels of Audio Line Input.
2) Make recording
3) Play back a recorded portion.
4) Confirm that a playback level is –7.5 ± 3 dBs.
5) Confirm that a distortion factor is within 4%.

5. Overall S/N Check
Purpose:
Confirm that the S/N is within the specification.

Mode	REC and PB (SP mode)
Signal	No signal
Measurement point	Audio output terminal
Measurement equipment	Audio level meter
Specified value	–46 dB or more

Confirmation Method:
1) Connect both L and R channels of audio line input to the GND.
2) Start recording.
3) Play the recorded part to confirm that the noise is below –46 dB.

2-6. TUNER SYSTEM ADJUSTMENTS

[Connection]

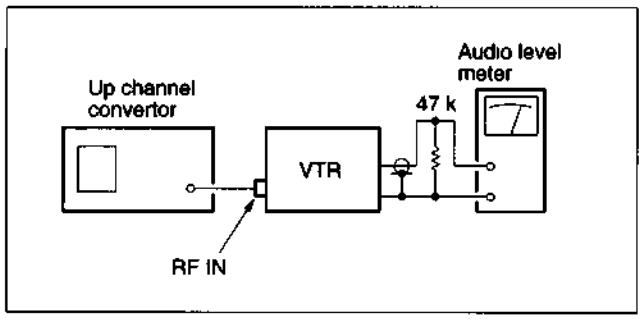

Fig. 6-2-12.

2-6-1. Separation Adjustment

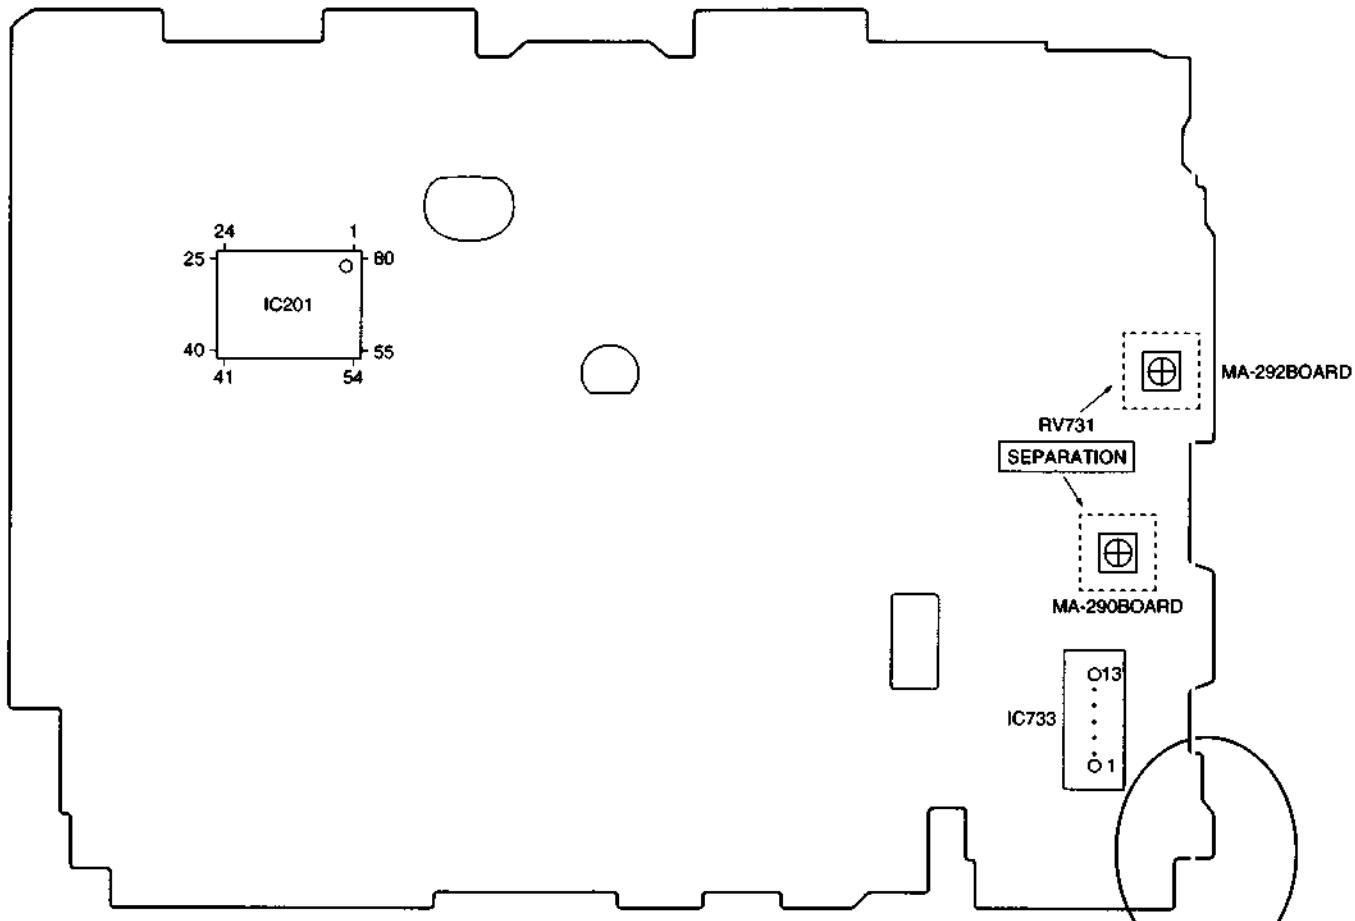
Purpose:

Mixed audio signal separate Lch and Rch

Mode	E-E
Signal	VIDEO color bar (87 5% modulation) AUDIO. L 1 kHz 100% modulation R no signal ELECTRIC FIELD 60–80 dBs/75 Ω Tem
Measurement point	Pin ⑫ of IC733
Measurement equipment	Audio level meter
Adjusting Element	RV731
Specified value	-9 9 ± 0 2 dBm (700 ± 14 mVp-p)

2-7. PARTS ARRANGEMENT DIAGRAM FOR ADJUSTMENTS

MA-290/292 BOARD (Side B)



MA-290 BOARD (Side A)

7-2. ELECTRICAL PARTS LIST

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS
  All resistors are in ohms
  METAL: Metal-film resistor
  METAL OXIDE: Metal oxide-film resistor
  F: nonflammable
- Items marked "*" are not stocked since they are seldom required for routine service
  Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS
  In each case, u: μ, for example:
  uA ... μA uPA... μPA
  uPB... μPB uPC ... μPC
  uPD ... μPD
- CAPACITORS
  uF: μF
- COILS
  uH: μH

The components identified by mark ⚠ or dotted line with mark ⚠ are critical for safety
Replace only with part number specified

Les composants identifiés par une marque ⚠ sont critiquens pour la sécurité
Ne les remplacer que par une pièce portant le neméro spécifié

When indicating parts by reference number, please include the board
