

NOTE 1 - Proper phasing of loudspeakers must be observed when making replacements.

(*) NOTE 2 - R-24 and R-25 used in Model P-1936 only. Model P-1937 utilizes two 4 mfd. non-polarized capacitors (Pt. #925391) in place of these resistors to provide high-frequency cross-over.

EMERSON Models P-1936, P-1937, using Amplifier Chassis 120637
