# EMERSON Chassis 120715, 120716, 120724, Diagram

## CONDITIONS FOR VOLTAGE MEASUREMENTS

Tuner chassis connected to stereo amplifier.  
All controls set at minimum (counter-clockwise).  
Mono-Stereo switch in Mono position.  
SW-2 (function switch) in AM or FM position as indicated on chart.  
VOLTAGE measurements taken with tuning capacitor fully closed (no signal applied, AM or FM).  
All measurements taken between points indicated and chassis (unless otherwise noted), using RCA Voltmyst or equivalent VTVM.
