[D] - 17 VAC BETWEEN PINS D&D.
[E] - 9 VOLTS OSCILLATOR GRID VOLTAGE SHOULD BE MEASURED WITH AN RF CHOKER PLACED IN SERIES WITH THE VOLTMETER LEAD DIRECTLY AT PIN OG.

A.C. LINE VOLTAGE 117 VOLTS POWER CONSUMPTION 30 WATTS.

After the antenna coil has been tracked at 1400 Kc. it is necessary to check the antenna trimmer (C2) adjustment again at 1720 Kc. If no appreciable change in trimmer adjustment is made the coil is in track, if the trimmer requires considerable change it will be necessary to again adjust the position of the antenna coil at 1400 Kc. These two adjustments should be tried several times until no change of trimmer adjustment is required at 1720 Kc.
