

# SONORA

MODEL 86.87

5 Section Condenser  
Internal Wiring

—Top View of Chassis showing Tube Sequence and Speaker Connections

There are certain features to be noted in this receiver. The mixer tube is of the auto-dyne type, wherein it functions as the mixer (1st detector) and at the same time functions as the oscillator. The structure of the oscillator-IF transformer is shown elsewhere. The structure of the 2nd IF transformer is also shown upon the same page. Take note of the changes recorded upon the wiring diagram. See the footnotes concerning the significance of the numbers contained within the circles.
