CHANGING THE VALUE OF THE 7800-OHM RESISTOR BETWEEN THE 1st FLANG AND TERMINAL 27 OF THE TUN-L-LITE WILL ADJUST THE HEIGHT OF THE LIGHT COLUMN. REDUCING RESISTANCE INCREASES THE COLUMN OF LIGHT AND INCREASING RESISTANCE REDUCES THE COLUMN.

IF RELAY HUMS OR CHATTERS, INCREASE TENSION ON RELAY SPRING. IF RELAY DOES NOT CLOSE AT 10" LINE-VOLTAGES, DECREASE THE TENSION ON THE SPRING.
