

WESTINGHOUSE MODEL 267.  
5/6 Dual Wave A.C. Superheterodyne.

DC voltages are measured from the points indicated to earth  
A.C. voltages are measured between the points indicated.  
All voltages indicated are measured with switch in broadcast  
maximum position.  
All measurements taken with a 1000 ohms per volt meter

VALVES:- 6D6 R.F. Amp.; 6A7 Pentagrid Converter; 6B7s I.F. Amp. Detector, A.V.C.; 6C6 Audio Driver; 42 Audio Output Pentode; 80 Rectifier; I.F. 252.5 K.C. For Resistance, voltage and component values see diagram.
