

COSSOR - 364 & 376

COMPONENTS AND VALUES

| Resistances | | Values (ohms) |
|-----------------|--|---------------|
| R ₁ | V ₁ tet. cont. grid resistance | 1,000,000 |
| R ₂ | V ₁ osc. grid resistance | 50,000 |
| R ₃ | V ₁ tet. anode decoupling | 5,000 |
| R ₄ | V ₁ osc. anode resistance | 50,000 |
| R ₅ | V ₁ and V ₂ S.G.'s H.T. feed | 25,000 |
| R ₆ | V ₂ cont. grid decoupling | 1,000,000 |
| R ₇ | V ₂ anode decoupling | 5,000 |
| R ₈ | Manual volume control | 500,000* |
| R ₉ | A.V.C. line decoupling | 1,000,000 |
| R ₁₀ | V ₃ A.V.C. diode load | 1,000,000 |
| R ₁₁ | { V ₄ grid I.F. stoppers | 50,000 |
| R ₁₂ | R ₁₃ | 50,000 |
| R ₁₄ | V ₄ grid resistance | 2,000,000 |
| R ₁₅ | V ₄ G.B. and A.V.C. delay | 130 |
| R ₁₆ | voltage resistances | 250 |
| | | 25 |

Circuit diagram of the Cossor Model 364 A.C. superhet. In the radio-gram model (376), the only difference is that a variable tone control circuit, comprising a fixed condenser and a variable resistance in series, is connected across C19.

| Other Components | | Values (ohms) |
|--------------------------------|-----------------------------------|---------------|
| L ₁ | Aerial coupling coils | 6·0 |
| L ₂ | | 7·0 |
| L ₃ | Band-pass primary coils | 6·8 |
| L ₄ | | 14·0 |
| L ₅ | Band-pass secondary coils | 6·8 |
| L ₆ | | 14·0 |
| L ₇ | Band-pass coupling coils | 0·2 |
| L ₈ | | 0·8 |
| L ₉ | Oscillator tuning coils | 4·0 |
| L ₁₀ | | 9·0 |
| L ₁₁ | Oscillator anode coils | 8·5 |
| L ₁₂ | | |
| L ₁₃ | V ₁ anode S.W. choke | Very low |
| L ₁₄ | { 1st I.F. trans. { Pri. 43·0 | |
| L ₁₅ | Sec. 47·0 | |
| L ₁₆ | { 2nd I.F. trans. { Pri. 43·0 | |
| L ₁₇ | Sec. 47·0 | |
| L ₁₈ | Speaker speech coil | 1·8 |
| L ₁₉ | Hum neutralising coil | 0·1 |
| L ₂₀ | Speaker field winding | 2,000·0 |
| T ₁ | Speaker input trans. { Pri. 800·0 | |
| | Sec. 0·35 | |
| T ₂ | Mains trans. { Pri. total 45·0 | |
| | Heater sec. 0·1 | |
| | Rect. fil. sec. 0·15 | |
| S ₁ -S ₄ | H.T. sec. 1,100·0 | |
| S ₅ | Waveband switches | |
| S ₆ | Radio muting switch (gram.) | |
| S ₇ | Radio-gram. change-over | |
| S ₈ | Mains switch | |
| S ₉ | L.W. scale lamp switch | |
| | M.W. scale lamp switch | |

| Valve | Anode Volts | Anode Current (mA) | Screen Volts | Screen Current (mA) |
|-------------------------|-------------|--------------------|--------------|---------------------|
| V ₁ 4xMPG* | 230 | 0·9 | 100 | 4·2 |
| V ₂ MVS/Pen | 200 | 5·7 | 100 | 1·4 |
| V ₃ DD4 | — | — | — | — |
| V ₄ 42MP/Pen | 210 | 32·0 | 230 | 5·7 |
| V ₅ 442BU | 330† | — | — | — |

* Osc. anode (G₂) 140 V, 2·6 mA.

† Each anode, A.C.

GENERAL NOTES

Switches.—There are nine switches, ganged together in a single unit. S₁-S₄ are for waveband switching, S₅ for radio

| Switch | M.W. | L.W. | Gram. |
|----------------|------|------|-------|
| S ₁ | C | O | O |
| S ₂ | C | O | O |
| S ₃ | O | C | O |
| S ₄ | C | O | O |
| S ₅ | O | O | C |
| S ₆ | O | O | C |
| S ₇ | C | C | C |
| S ₈ | O | C | C |
| S ₉ | C | O | C |

Coils.—The signal frequency and oscillator coils are in three screened units on the chassis deck, and one un-screened unit (L₇, L₈) beneath the chassis. The screens are easily removable.

The band-pass secondary unit, L₅, L₆, also contains C_{4A}, a .002 μ F condenser in parallel with C₄ (.01 μ F), which is beneath the chassis.

The oscillator unit, L₉-L₁₂, also contains C₈, C₉ and C₂₉, the latter being adjustable through a hole in the screen.

The I.F. units are also in similar screens on top of the chassis, and it should be noted that the first of these (L₁₄, L₁₅), also contains the S.W. choke, L₁₃.

| Condensers | | Values (μ F) |
|-------------------|--|-------------------|
| C ₁ | Aerial series condenser | 0·0005 |
| C ₂ | Capacitative aerial coupling to B.P. pri. | 0·000025 |
| C ₃ | V ₁ tet. anode decoupling | 0·1 |
| C ₄ | { V ₁ tet. cont. grid condensers | 0·01 |
| C _{4A} | | 0·002 |
| C ₅ | V ₁ osc. grid condenser | 0·0002 |
| C ₆ | A.V.C. line decoupling | 0·005 |
| C ₇ | V ₁ osc. anode condenser | 0·01 |
| C ₈ | Osc. L.W. tracker | 0·001 |
| C ₉ | Osc. M.W. tracker | 0·0002 |
| C ₁₀ | V ₁ and V ₂ S.G.'s by-pass | 0·1 |
| C ₁₁ | V ₂ cont. grid decoupling | 0·001 |
| C ₁₂ | Gram. pick-up coupling | 0·01 |
| C ₁₃ | V ₂ anode decoupling | 0·01 |
| C ₁₄ | L.F. coupling to R ₈ (gram.) | 0·0002† |
| C ₁₅ | I.F. by-pass | 0·0002† |
| C ₁₆ | Coupling to V ₃ A.V.C. diode | 0·0001 |
| C ₁₇ | L.F. coupling to V ₄ | 0·002 |
| C ₁₈ | V ₄ grid I.F. by-pass | 0·0001 |
| C ₁₉ | Fixed tone compensator | 0·005 |
| C ₂₀ * | V ₄ cathode by-pass | 25·0 |
| C _{21*} | H.T. smoothing | 8·0 |
| C _{22*} | | 8·0 |
| C ₂₃ | Band-pass primary tuning | — |
| C ₂₄ | Band-pass primary trimmer | — |
| C ₂₅ | Band-pass secondary tuning | — |
| C ₂₆ | Band-pass secondary trimmer | — |
| C ₂₇ | Oscillator tuning | — |
| C ₂₈ | Oscillator main trimmer | — |
| C ₂₉ | Oscillator L.W. trimmer | — |
| C ₃₀ | 1st I.F. trans. pri. tuning | — |
| C ₃₁ | 1st I.F. trans. sec. tuning | — |
| C ₃₂ | 2nd I.F. trans. pri. tuning | — |
| C ₃₃ | 2nd I.F. trans. sec. tuning | — |

VALVE ANALYSIS
Readings of valve voltages and currents given in the table overleaf were measured with the receiver operating on A.C. mains of 225 V, with the transformer adjusted to the 220 V tap, in accordance with the manufacturers' instructions. The volume control was at maximum and there was no signal input, while the receiver was tuned to the bottom of the M.W. band. Voltages were measured on the 1,200 V scale of an Avometer, with chassis as negative.

* Electrolytic. † Pre-set. ‡ 0·0001 μ F when R₈ is 1,000,000 ohms. § Two condensers in parallel.
