

MARCONI - 436

SPECIAL NOTE.—In certain instruments condenser C9 is a separate unit mounted adjacent to C4 and is *not* contained in the metal case (housing Transformer T1 and condenser C10) as shown below. Where this condition prevails C9 will be found (see circuit diagram) in the lead connecting bottom end of T1 primary to switch contact M instead of in the position shown.

Ref. No.	Description.	Spare Part No.	Ref. No.	Description.	Spare Part No.
